Section 11125(a) of the Interstate Commerce Act authorizes the Commission to act in situations where it finds that *a rail carrier cannot transport traffic offered to it because—(1) its cash position makes its continuing operation impossible; (2) transportation has been discontinued under court order; or (3) it has discontinued transportation without obtaining a required certificate under 49 U.S.C. 10903* (emphasis added). The initial period for the directed service order may not exceed 60 days.[3] However, the order may be extended for an additional period not to exceed 180 days.

Under a directed service order from the Commission, a directed carrier may voluntarily choose to provide directed service without any subsidy or compensation to which it may be entitled from the Commission, as ATSF has done here. *See St. Louis S.W. Ry. Co—Directed Service—Chciago*, 363 I.C.C. 1 (1980), and Directed Service Order No. 1504, *The New York, Susquehanna and Western Railway Corporation—Directed Service—The Delaware and Hudson Railway Company*, (not printed) served June 22, 1988.[4]

Considering CMW's announced imminent cessation of service due to cashlessness, and CMW's request that the Commission direct service on the East/West Line, we find that CMW's current situation meets the statutory standards of 49 U.S.C. 11125(a)(1) and (3).

In view of the urgent need for continued rail service over CMW's East/West Line, and ATSF's willingness to provide directed service without compensation from the Federal government, the Commission is exercising its authority under 49 U.S.C. 11125(a) and authorizing ATSF to commence operations upon CMW's cessation of service. Service authorized by this order includes operations utilizing trackage rights agreements, leases, and other existing arrangements of CMW with connecting railroads.

The emergency nature of the situation compels us to conclude that advance public notice and hearings would be impractical and contrary to the immediate public interest concern to secure continued rail transportation services. Accordingly, we exercise our authority under 49 U.S.C. 11125(a) to waive advance public notice and hearings in the present circumstances.

Section 11125 permits us to direct service for an initial period of not more than 60 days, with an option to extend the direct service period for an additional 180 days, if cause exists. We believe directed service authority to be necessary here at least for an initial 60 day period. Any interested person may file comments on this action during this period.

Terms and Conditions

Effective Date. Directed Service Order No. 1506 shall be effective on November 3, 1989. On the date CMW ceases operations and notifies the Commission and ATSF that it has done so, ATSF shall be authorized to commence operations and shall notify the Commission and all parties to this proceeding of the date it commences operation under this authority.

Compensation. ATSF's authority under Directed Service Order No. 1506 is expressly conditioned upon its waiver of all compensation under 49 U.S.C. 11125(b)(5).

Track Safety. In accordance with 49 U.S.C. 11125(b)(2)(A), ATSF need not operate over any CMW line segment certified by the Federal Railroad Administration as being below Class I track safety standards.

Cars and Operating Equipment. In operating CMW's line, ATSF shall use its own cars and operating equipment wherever possible. However, ATSF may use CMW's cars and operating equipment on terms mutually agreeable to the parties.

Employees. In providing service under this directed service order, ATSF shall comply with the requirements of 49 U.S.C. 11125(b)(4) with respect to CMW employees.

Preservation of the CMW estate. During the period of its operation of the CMW lines, ATSF shall be responsible for preserving the value of those lines to the CMW estate. ATSF shall thus have an affirmative duty to perform that degree of maintenance necessary to avoid deterioration of the lines and related facilities.

Rates. ATSF is authorized to act on behalf of CMW in all matters of transportation. Rates and charges shall be those applicable to the line and in effect at the time ATSF commences operations. ATSF may seek changes in CMW rates and charges. All revenues from such charges shall accrue to the account of ATSF during the effective period of this order, and shall not constitute assets of the Trustee or the estate.

Liability for Expenses. Any rehabilitation, operational, or other costs related to the authorized operations shall be the sole responsibility and liability of ATSF. Any such costs or expenditures shall not be deemed an obligation or liability of the United States Government. ATSF shall hold the United States Government harmless from any claim arising out of the authorized operations.

Operational Difficulties. Any operational difficulties associated with the authorized operations shall be resolved by ATSF and any other affected party through negotiated agreement, or failing agreement, by the Commission.

Reporting Requirements. To assist us in evaluating ATSF's operation of the line, we shall require ATSF to file a report at the end of the directed service period identifying: (a) The average number of carloads transported daily over the line during the directed service period; (b) the total gross revenue for the carloads transported; and (c) CMW's normal portion of the total gross revenue.

We find:

1. CMW intends to discontinue service over certain of its lines. ATSF has requested the Commission to permit it to provide continued rail service over those lines of CMW between Cockrell, IL, and Kansas City, MO, and between Roodhouse and Tolson, IL.

2. To prevent severe transportation and economic disruptions when CMW ceases operations, it is necessary for the Commission to authorize ATSF to operate CMW's lines between Cockrell, IL, and Kansas City, MO, and between Roodhouse and Tolson, IL under 49 U.S.C. 11125, conditioned upn a waiver of any compensation or subsidy from the Federal government.

3. Our action in this decision will not substantially impair the ability of ATSF to serve its own patrons adequately, or meet its outstanding common carrier obligations, *see* 49 U.S.C. 11125(b)(2)(B), and will assure continued rail service to affected shippers.

This action will not significantly affect either the quality of the human environment or energy conservation.

It is ordered:

1. Based upon its undertaking to do so without any form of compensation from the Federal government, ATSF is authorized to enter upon and operate CMW's lines between Cockrell, IL, and Kansas City, MO, and between Roodhouse and Tolson, IL pursuant to this voluntary directed service order under 49 U.S.C. 11125.

(a) Entry by ATSF may occur on the date CMW discontinues service and notifies ATSF and the Commission that it has done so, and operations by ATSF may continue no later than the sixtieth day after the service date of this decision.

(b) ATSF shall immediately notify the Commission and the parties to this proceeding, in writing, of the date on which it commences operations under this order.

2. Operations under this order shall conform to the directions and conditions prescribed above.

3. All submissioins filed in this proceeding should refer to DSO No. 1508 and be sent to the Commission's headquarters at 12th Street and Constitution Avenue, NW., Washington, DC 20423. An original and 10 copies should be submitted.

4. The provisions of this decision shall apply to intrastate, interstate, and foreign commerce.

5. The Commission retains jurisdiction to modify, supplement, or reconsider this decision at any time.

6. Notice of this decision shall be given to the general public by publication in the **Federal Register**. The decision will also be served on the Federal Railroad Administration, the Association of American Railroads, American Short Line Railroad Association, Amtrak, The Railway Labor Executives' Association, the CMW, ATSF, Consolidated Rail Corporation, and SSW.

7. This decision and order shall become effective on November 3, 1989.

8. Unless otherwise modified by the Commission, this order will expire at 11:59 p.m., on January 2, 1990.

Decided: November 3, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

[1] In Finance Docket No. 31522, *Rio Grande Industries, Inc., Et al.—Purchase and Trackage Rights—Chicago, Missouri and Western Railway Company Between St. Louis, MO and Chicago, IL*, served September 29, 1988, the Commission granted authority for Rio Grande Industries, Inc. (RGI), Southern Pacific Transportation Company (SPT), The Rio Grande Western Railroad Company (DRGW), St. Louis Southwestern Railway Company (SSW), and SPCSL Corp. (SPCSL), a recently incorporated subsidiary of RGI, to acquire CMW's lines between East St. Louis and Chicago, IL, East St. Louis and Godfrey, IL, and certain attendant trackage rights. The Trustee has notified the Commission that consummation of the above purchase is scheduled for November 8, 1989.

[2] On October 16, 1989, the Commission issued Directed Service Order No. 1507, authorizing SSW to operate as a Directed Rail Carrier, uncompensated and without Federal subsidy under 49 U.S.C. 11125(b)(5) over the Chicago to St. Louis lines of CMW for 60 days.

[3] It should be noted that the Trustee and ATSF anticipate negotiation of a directed service agreement that is expected to provide for termination of directed service upon the earliest of 45 days after the date on which ATSF enters the line to provide the directed service or upon the occurrence of various described contingencies. Petition for Directed Service Order at 7.

[4] Likewise, the Commission may authorize directed service without provision for compensation to the carrier over which service is directed. *Kansas City Terminal Ry. Co.—Operate—Chicago R.I.&P.*, 360 I.C.C. 239 (1979).

DEPARTMENT OF JUSTICE

Lodging of Consent Decree

Consistent with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that a Complaint was filed on August 28, 1987, in *United States* v. *General Motors Corporation*, Civil Action No. CV87–189OS, in the United States District Court for the Northern District of Texas, Fort Worth Division, and a proposed Settlement Agreement between the United States and General Motors Corporation ("GM") was signed by the parties on October 23, 1989. This Settlement Agreement settles the claims alleged in the Complaint and in a Notice of Violation issued by the Environmental Protection Agency on May 12, 1987, pursuant to the Clean Air Act, 33 U.S.C. 7401 *et seq.*, for civil penalties for violations of the Clean Air Act, and section 115.191(a)(8) of Regulation V of the federally enforceable Texas State Implementation Plan ("SIP").

Under the terms of the proposed Settlement Agreement, GM has agreed to interim and final compliance requirements for the primer surfacer, topcoat and final repair lines. GM also has agreed to convert its laquer topcoat line to a base coat/clear coat line by September 1, 1990. After the base coat/clear coat line has been installed, GM will determine the daily emission rate of the topcoat line by implementing EPA's protocol for measuring daily topcoat emissions. GM will use a similar measurement method for the primer surfacer line.

GM will use an occurrence weighted average to demonstrate compliance for its automobile final repair coating line. GM will provide compliance demonstrations, monitoring and retesting. Unless the parties agree otherwise, the final compliance requirements, the payment of stipulated penalties, and the payment of a civil penalty in the amount of $65,000.00 will not be applicable if a state proposed SIP revision to amend Regulation V, section 115.191(8) of the Texas SIP is not

submitted to EPA, or is not approved by EPA, or if a federally approved SIP revision is reversed on appeal.

State Implementation Plan in certain respects was entered on October 24, 1989; and a proposed Consent Decree

United States Attorney's Office

BILLING CODE 4410–01–M

Lodging of Consent Decree

In accordance with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that a Complaint was filed on August 27, 1987, in *United States* v. *General Motors Corporation,* Civil Action No. CV87–1890S, in the United States District Court for the Western District of Louisiana, Shreveport Division; an Order providing a procedure for revision of the Louisiana State Implementation Plan in certain respects was entered on October 24, 1989; and a proposed Consent Decree between the United States and General Motors Corporation ("GM") was lodged with the court on October 24, 1989. This Consent Decree would settle the claims alleged in the Complaint pursuant to the Clean Air Act, 33 U.S.C. 7401 *et seq.,* for injunctive relief and civil penalties for violations of the Clean Air Act, and section 22.9.2 of the federally enforceable Louisiana State Implementation Plan ("SIP").

Under the terms of the proposed Consent Decree, GM has agreed to comply with the existing SIP limit of 3.5 lbs. of VOC per gallon of coating (minus water) limit for the Chassis Black and Anti-corrosion lines. GM has agreed to comply with a 15.1 lbs. of VOC per gallon of solids applied limit which is to be proposed to be incorporated into the Louisiana SIP for the topcoat line. GM will determine the daily emission rate on the topcoat line by implementing EPA's protocol for measuring daily topcoat emissions. These requirements will take effect on January 1, 1990, or upon entry of the Consent Decree after the 15.1 limit has been incorporated into the SIP. GM also has agreed to submit a compliance demonstration, to monitor the topcoat line and retest, if necessary, and to provide records of compliance to EPA. Unless the parties agree otherwise, the compliance requirements and the payment of a civil penalty in the sum of $85,000.00 will not be applicable if a State proposed SIP revision to amend LAC 33:III.2133 is not submitted to EPA, or is not approved by EPA, or if a federally approved SIP revision is reversed on appeal.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, 10th and Pennsylvania Avenue, NW., Washington, DC 20530. All comments should refer to *United States* v. *General Motors Corporation,* D.O.J. Ref. No. 90–5–2–1–1030.

The proposed Consent Decree and the Order providing a procedure for SIP revision review may be examined at the following offices of the United States Attorney and the Environmental Protection Agency ("EPA"):

EPA Region IV

Contact: Mike Barra, Office of Regional Counsel, U.S. Environmental Protection Agency, 1445 Ross Avenue, Dallas, Texas 75202 (214) 655–2125.

BILLING CODE 4410–01–M

Lodging of Consent Decree

In accordance with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that a complaint was filed on October 2, 1989 in *United States* versus *City of Nacogdoches,* Civil Action No. L–89–137–CA, in the United States District Court for the Eastern District of Texas, and simultaneously, a proposed consent decree between the United States and the City of Nacogdoches ("City") was lodged with the court. This consent decree settles the claims alleged in the complaint pursuant to Clean Water Act, 33 U.S.C. 1251 *et seq.,* for injunctive relief and civil penalties for violations of the Clean Water Act, the Environmental Protection Agency's ("EPA") pretreatment regulations at 40 CFR part 403, and the City's National Pollutant Discharge Elimination System ("NPDES") permit for its publicly-owned treatment works.

Under the terms of the proposed consent decree, the City has agreed to employ a full-time pretreatment coordinator; conduct a priority pollutant scan of all industrial users ("IU"); issue permits to all IUs; inspect all IUs; and, implement an effective IU enforcement program. In addition, the City has agreed to pay a civil penalty of $60,000.

The Department of Justice will receive comments relating to the proposed consent decree for a period of 30 days from the date of this publication. Comments should be addressed to the

Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, 10th and Pennsylvania Avenue, NW., Washington, DC 20530. All comments should refer to *United States* versus *City of Nacogdoches,* D.J. Ref. 90–5–1–1–3281.

The proposed consent decree may be examined at the following offices of the United States Attorney and the Environmental Protection Agency ("EPA"):

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–20,909]

APV Chemical Machinery Saginaw, MI: Notice of Negative Determination on Reconsideration

Pursuant to a remand by the U.S. Court of International Trade, in *Former Employees of Baker Perkins* v. *Secretary of Labor* (USCIT 89–02–00089) the Department makes the following negative determination on reconsideration for workers of APV Chemical Machinery, Saginaw, Michigan.

Investigation findings show that the Baker Perkins/APV merger resulted in the cessation of all production assembly operations at APV Chemical Machinery in Saginaw in December, 1987. All production of chemical machinery including pod and pusher centrifuges and vertical mixers was transferred to a corporate plant in Lake Mills, Wisconsin. The only functions remaining at Saginaw were marketing, the Tech Center, rebuild operations, administration and product engineering. The findings on remand reveal increasing production and sales of chemical machinery at Lake Mills and a corresponding decrease in sales and production of chemical machinery at Saginaw.

The Department's initial denial was based on the fact that the "contributed importantly" test of the Group Eligibility Requirements of the Trade Act of 1974 was not met. The Department's survey of major customers of APV Chemical Machinery for 1986, 1987 and in the first nine months of 1988 showed that the respondents did not import in the periods surveyed. Also, the sales and production of rebuilds and parts and service sales increased in 1987 compared to 1986.

The Court remanded the subject case since the customer survey was incapable of detecting the increased imports claimed by the plaintiffs because of the unique facts involved—the relabelling of imported articles which were sold to the customers of the subject firm. Further, the Court indicated that the record did not show the type of production transferred and the type of production remaining at Saginaw.

In addition to the above matter raised by the Court on remand, the Department addressed the petitioners claim that batch mixers and the extruded equipment like the ones produced at Saginaw were imported from Europe.

Findings on remand show that batch mixers and extruded equipment were imported as claimed by the petitioners. The batch mixers, multiple purpose mixers and extruded equipment have not been produced at Saginaw since 1983. Production at Saginaw in 1988 was at the Rebuild Center and consisted of G-Force Pelletizers and SE Mixers which were never imported and the attachment of purchased domestic motors and controls to the imported equipment. Accordingly, there is no basis for certification since the workers did not produce the articles or that portion of the article imported from Europe during the period investigated by Labor.

With respect to the issue of workers at Saginaw working on company imports, there is no basis for certification when the workers' firm did not manufacture the imported equipment during the time period applicable to the petition and when the workers employment is dependent on the continued importation of the equipment. The Department's survey of major customers accounted for over 100 percent of the subject firm's 1987 sales decline. The survey revealed that APV's customers did not import competitive products and had declining purchases of the imported equipment finished at Saginaw. Also, the motors and controls were produced domestically and their mounting operations were not transferred overseas. Accordingly, the investigation findings show that the Department's survey supports its negative determination.

Conclusion

After reconsideration, I affirm the original notice of negative determination of eligibility to apply for adjustment assistance to workers of APV Chemical Machinery, Saginaw, Michigan.

Signed at Washington, DC, this 30th day of October 1989.

Stephen A. Wander,

Deputy Director, Office of Legislation and Acturial Services, UIS.

BILLING CODE 4410–30–M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; ARCO Oil & Gas Co. et al.

Petitions have been filed with the Secretary of Labor under section 221 (a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than November 20, 1989.

Interested persons are invited to submit written comments regarding the

BEST COPY AVAILABLE

VOL 54 ISS 216 NO 9 1989 UMI

subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than November 20, 1989.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 30th day of October 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; Fresh Pak Candy Co.

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period of October 1989.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-23,358; Fresh Pak Candy Co., Davenport, IA

TA-W-23,307; Continental Pet Technologies, Inc., Kentwood, MI

TA-W-23,326; Racal Data Communications, Inc, Racal-Milgo Div, Sunrise and Miami, FL

TA-W-23,317; Mercury Marine, Fond Du Lac, WI

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA-W-23,308; Arrow Pump & Supply, Inc., Ada, OK

U.S. imports of oilfield machinery are negligible.

TA-W-23,343; Ford Electronics & Refrigeration Corp., Connersville, IN

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-23,310; Diversified Drilling Services, Inc., Abilene, TX

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-23,261; Ka'u Agribusiness Co., Inc., Pahala, HI

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,335; Amoco Production Co., Edgewood Gas Plant, Edgewood, TX

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,258; H.T. Geophysical Corp., Denver, CO

The workers' firm does not produce an article as required for certification

under Section 222 of the Trade Act of 1974.

TA-W-23,215; Celsius Energy Co., Denver, CO

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,295; Celsius Energy Co., Salt Lake City, UT

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,258; H.T. Geophysical Corp., Denver, CO

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,259; Horizon Well Service, Woodward, OK

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,316; Litton Panelvision, Pittsburgh, PA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,321; Munsingwear Men's Div., Design Dept., Minneapolis, MN

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,332; Union Carbide Chemical & Plastic Co., Inc., Coatings Resins Unit, Bound Brook, NJ

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,323; Petroplex Savings Associations, Midland, TX

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,342; E.T. Wright & Co., Inc., Rockland, MA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,333; Westpoint Pepperell, Inc., Keysville, VA

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-23,324; Pharmacia ENI Diagnostics, Inc., Cranbury, NJ

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,350; Rio Algon Mining Corp., Moab, UT

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,306; Customized Transportation, Inc., Yardville, NJ

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,318; Monon Corp., Monon, IN

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,344; General Motor Corp., CPC Tarrytown, North Tarrytown, NY

Increased imports did not contribute importantly to workers separations at the firm.

Affirmative Determinations

TA-W-23,379; Collette Toy Novelty Co., Inc., Long Island, NY

A certification was issued covering all workers separated on or after September 5, 1988.

BILLING CODE 4510-30-M

[TA-W-23,206]

Newman Crosby Steel, Inc., Pawtucket, RI; Negative Determination Regarding Application for Reconsideration

By an application dated October 11, 1989, Local # 3333 of the United Steelworkers of America (USW) requested administrative reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on September 19, 1989 and published in the Federal Register on October 3, 1989 (54 FR 40755).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The USW claims that articles produced by Newman Crosby Steel's customers e.g., saw blades, knife blades, bushings, automobile timing chains etc. are being imported to such a degree that it has adversely affected employment at Newman Crosby Steel.

Investigation findings show that Newman Crosby Steel purchased imported and domestic cold rolled strip and processed it into different hardnesses, lengths and widths for its customers.

The Department's denial was based on the fact that U.S. aggregate imports of cold rolled carbon steel strip declined absolutely and relative to domestic shipments in 1988 compared to 1987 and in the first four months of 1989 compared to the same period in 1988.

Under the Trade Act of 1974, only increased imports of articles like or directly competitive with the articles produced by the workers' firm or appropriate subdivision can be considered. Saw blades, knife blades, bushings, automobile timing chains and

other finished articles incorporating cold rolled carbon steel strip are not like or directly competitive with cold rolled carbon steel strip. This is

the Amarillo workers were much different in 1986 when TA-W-17,731 was issued than they are today. Each

of eligibility to apply for adjustment assistance to former workers of Santa Fe Energy Company, Amarillo, Texas.

demand for their services by the workers' firm (GM BOC Chicago) whose workers meet all the statutory criteria

notice are set forth in the Supplementary Information section.

increase in the potential for unauthorized access to the system.

Also, in response to comments from

other finished articles incorporating cold rolled carbon steel strip are not like or directly competitive with cold rolled carbon steel strip. This issue was addressed in *United Shoe Workers of America, AFL–CIO* v. *Bedell*, 506 F2d 174, (D.C. Cir. 1974). The court held that imported finished women's shoes were not like or directly competitive with shoe components—shoe counters. Similarly, cold rolled carbon steel strip cannot be considered like or directly competitive with finished articles made from cold rolled carbon steel strip.

Conclusion

After review of the application and investigations, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 25th day of October 1989.

Robert O. Deslongchamps,

Director, Office of Legislation and Actuarial Services, UIS.

[FR Doc. 89–26417 Filed 11–6–89; 8:45 am]

BILLING CODE 4510–30–M

[TA–W–23,122]

Santa Fe Energy Co., Amarillo, TX; Negative Determination on Reconsideration

On October 25, 1989, the Department issued an Affirmative Determination Regarding Application for Reconsideration for former workers of Santa Fe Energy, Amarillo, Texas.

The former workers stated that the Department should have compared revenues for the years 1987 and 1988 instead of the first five months of 1989 compared to the same period in 1988. The former workers also stated that they were certified earlier under TA–W–17,731 and should be reconsidered for benefits under the Trade Act as amended by the Omnibus Trade and Competitiveness Act (OTCA) of 1988.

The investigation findings show that the Amarillo facility serviced the other facilities of Santa Fe which produced crude oil and natural gas. The Amarillo facility encompassed an accounting function, corporate records, a data processing center and land administration. Although the Amarillo service workers were certified eligible to apply for adjustment assistance under TA–W–17,731 which expired on November 7, 1988 that certification would not act as a precedent for the certification of workers in 1989. The conditions necessary for certification of the Amarillo workers were much different in 1988 when TA–W–17,731 was issued than they are today. Each worker petition must be judged on its own merits and in the time period in which it was filed. The Amarillo workers were included by an amendment to a certification for workers of Santa Fe's Midland facility (TA–W–17,731) because a substantial portion of Amarillo's decreased activities in 1985 and 1986 resulted from decreased production and sales and employment at Midland which produced crude oil and natural gas. These conditions no longer exist.

The Department's denial on the instant petition was based on the fact that customers of Santa Fe Energy did not import crude oil or natural gas. The findings also showed that corporate revenues increased during the first five months of 1989 compared to the first five months of 1988.

The investigation findings showed that no articles within the meaning of Section 222(3) of the Trade Act, were produced at the Amarillo facility. The Department has consistently determined that the performance of services does not constitute an article, as required by Section 222 of the Act and this determination has been upheld in the U.S. Court of Appeals.

In order for service workers like those at Amarillo to become certified eligible for adjustment assistance their separations must be caused importantly by a reduced demand for their services from a parent firm, a firm otherwise related to the subject firm by ownership, or a firm related by control. In any case, the reduction in demand for services must originate at a production facility whose workers independently meet the statutory criteria for certification and the reduction must directly relate to the product impacted by imports. These conditions have not been met for workers at Amarillo. Workers at Santa Fe's production facilities serviced by Amarillo are not currently certified eligible to apply for adjustment assistance.

The service provisions of OTCA apply only to workers of service firms who are engaged in the exploration or drilling for crude oil or natural gas for unaffiliated clients in the oil and gas industry. These provisions do not apply to workers of Santa Fe Energy because Santa Fe is a producer of oil and not a service firm and the services performed at Amarillo are not those which would form a basis for certification under OTCA.

Conclusion

After reconsideration, I affirm the original notice of negative determination of eligibility to apply for adjustment assistance to former workers of Santa Fe Energy Company, Amarillo, Texas.

Signed at Washington, DC, this 30th day of October 1989.

Stephen A. Wandner,

Deputy Director, Office of Legislation and Actuarial Services, UIS.

[FR Doc. 89–26420 Filed 11–6–89; 8:45 am]

BILLING CODE 4510–30–M

[TA–W–23, 194]

United Auto Workers Local Number 558, Willow Springs, IL; Negative Determination Regarding Application for Reconsideration

By an application dated October 16, 1989 Local #558 of the United Auto Workers (UAW) requested administrative reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on September 19, 1989 and published in the Federal Register on October 3, 1989 (54 FR 40755).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The union claims that the Department is inconsistent in its determinations by certifying all workers at the BOC Chicago plant including support and service workers at UAW. The union also directs the Department's attention to its own General Administration Letter (GAL) No. 6–88.

The investigation findings reveal that the subject firm (the union) performs administrative functions and does not produce an article within the meaning of Section 222(3) of the Act. The Department has consistently determined that the performance of service does not constitute an article, as required by Section 222 of the Act and this determination has been upheld in the U.S. Court of Appeals. This issue was addressed in the Department's initial negative determination issued on September 19, 1989.

Service workers at GM BOC Chicago are eligible to apply for adjustment assistance since there was a reduced demand for their services by the workers' firm (GM BOC Chicago) whose workers meet all the statutory criteria for certification. However, the workers' firm in the instant case is the UAW not GM. The union has control over its own hiring and firing. All payroll transactions and personnel actions are controlled by the union. Accordingly, the Department sees no inconsistency in its determinations.

The purpose of GAL 6–88 was to inform the State Employment Security Agencies of a new group of workers who may qualify for TAA benefits. The service provisions of the Omnibus Trade and Competitiveness Act of 1988 (OTCA) apply only to workers of service firms who are engaged in the exploration or drilling for crude oil or natural gas for unaffiliated clients in the oil and gas industry. These provisions do not apply to service workers in other industries. Accordingly, the services performed by the UAW are not those which would form a basis for certification under OTCA.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 31st day of October 1989.

Stephen A. Wandner,

Deputy Director, Office of Legislation and Actuarial Services, UIS.

ACTION: Notice of Revised System of Records.

SUMMARY: The National Archives and Records Administration (NARA) is proposing to alter the system of records NARA–1, Researcher Application Files. This notice is a clarification of the Notice of Revised System of Records for NARA–1 which was published in the Federal Register of September 20, 1989 (54 FR 38756). It has been revised pursuant to comments NARA received from the Office of Management and Budget. The specific changes to this notice are set forth in the Supplementary Information section.

DATES: Written comments on the proposed altered system NARA–1 should be received by December 11, 1989. All other changes to the systems will be effective on December 11, 1989. NARA filed a revised Altered System Report with the Congress and the Office of Management and Budget on November 1, 1989. The proposed altered system shall be effective without further notice on January 2, 1990, unless comments are received which would result in a contrary determination.

ADDRESS: Comments on the proposed altered system should be addressed to John A. Constance, Director, Policy and Program Analysis Division (NAA), National Archives and Records Administration, Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: John A. Constance or Laurence Patlen, Policy and Program Analysis Divison (NAA), National Archives and Records Administration, Washington, DC 20408. Telephone (202) 523–3214 or (FTS) 523–3214.

SUPPLEMENTARY INFORMATION: As required by the Privacy Act of 1974, and Office of Management and Budget (OMB) Circular A–130, an Altered System Report for NARA–1, Researcher Application Files, was submitted on September 13, 1989 to the Congress and OMB. Based OMB's comments on this report, the Altered System Report for NARA–1 was revised and resubmitted to the Congress and OMB on November 1, 1989. NARA has extended the public comment period and effective date of the revision to the system.

The system is to be amended by adding an electronic database which will serve as an index to the files, provided NARA with statistical data relating to researcher use at the National Archives, and facilitate the preparation of mailing lists. This information will be used by NARA to compile statistical reports and to study research use of NARA facilities. This modification constitutes a change in the computer environment. Accordingly, NARA is modifying the categories of records, routine uses (including the purposes of such uses), storage, retrievability, safeguards, and retention and disposal sections of the NARA–1 notice. The routine use statement is expanded to describe the purposes of the electronic database, and (in response to OMB comments) to clarify the purposes of the existing routine uses. No new routine use disclosures outside of NARA are proposed. Safeguards are being established to counteract any increase in the potential for unauthorized access to the system.

Also, in response to comments from OMB, the categories of individuals covered by the system and categories of records sections are being revised for clarification. Minor administrative changes are being made to NARA–1, as detailed in the September 20, 1989 notice (54 FR 38756).

The amended system notice is set forth in its entirety below. NARA previously published the NARA–1 system and appendixes containing the general routine uses and addresses of locations applicable to all NARA systems in the Federal Register of May 9, 1989 (54 FR 19970).

NARA 1

SYSTEM NAME:

Researcher Application Files.

SYSTEM LOCATION:

This system of records is located in the National Archives Building, the Regional Archives, and except for the electronic database, the Presidential Libraries. The addresses are listed in the appendix following the NARA Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any member of the general public who applies to use original records in the National Archives, the Regional Archives, and the Presidential Libraries.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications to use records including the individual's name, address, telephone number, occupation, research topic, educational level, and field of interest. At the National Archives Building and the Regional Archives, the system includes an electronic database containing the information from applications.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 2108, 2203(*f*)(1), and 2907.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by NARA employees in the Office of the National Archives (including the Regional Archives) and the Presidential Libraries to register individuals who apply to use original records for research at a NARA facility; to record initial research interests of researchers; to determine which records the individual should use; to provide a means of contacting the individual if additional information of research interest to him or her is found, or if problems with the records are

VOL 54 ISS 216 NO 9 1989 UMI

discovered; and to mail notices of events and programs of interest to users of the records. Information in the electronic database will be used by staff of the Office of National Archives (and the Regional Archives) as a finding aid, to compile statistical reports regarding researcher use of records, and to facilitate the preparation of mailing lists. The routine use statements A, F, and G, described in the appendix following the NARA Notices, also apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper and floppy disks.

RETRIEVABILITY:

Filed alphabetically at each location by name of individual, except that at the National Archives Building and the Regional Archives records may be filed numerically by researcher card number and accessed through the electronic database.

SAFEGUARDS:

During normal hours of operation, paper records are maintained in areas accessible only to authorized personnel of NARA. The electronic database maintained by the Office of the National Archives operates on a non-networked computer accessible only to NARA employees via passwords on terminals located in attended offices. After hours, buildings have security guards and/or doors are secured and all entrances are monitored by electronic surveillance equipment.

RETENTION AND DISPOSAL:

Paper records, including (if necessary) a printout indexed by researcher name, are cut off annually, held one year, and retired. They are destroyed when 25 years old. Electronically stored records are cut off when two years old, then maintained on a backup disk and deleted one year later. These procedures are in accordance with the NARA Records Maintenance and Disposition Manual.

SYSTEM MANAGER(S) AND ADDRESS:

NARA officials with responsiblity for this geographically dispersed system of records are the Assistant Archivist for the National Archives at the National Archives Building, the directors of the Presidential libraries, and the directors of the Regional Archives. The system manager for the electronic database is the Assistant Archivist for the National Archives. The addresses for these locations are listed in the appendix following the NARA Notices.

NOTIFICATION PROCEDURE:

Information may be obtained from the officials cited above at the appropriate repository where individuals have used records.

RECORD ACCESS PROCEDURE:

Requests for these records should be addressed to the Assistant Archivist for the National Archives, the directors of the Presidential Libraries, or the directors of the Regional Archives, depending on where individuals have used records. In-person requests may be made during business hours listed for each location in the appendix following the NARA Notices. For written requests, the individual should provide full name, address, and telephone number, the approximate dates records were used. For personal visits, individuals should be able to provide some acceptable identification, such as a driver's license or student or employee identification. Only general inquiries may be made by telephone.

CONTESTING RECORD PROCEDURES:

NARA rules for contesting the contents and appealing initial determinations are found in 36 CFR Part 1202.

RECORD SOURCE CATEGORIES:

Researchers.

Dated: November 1, 1989.

Don W. Wilson,

Archivist of the United States.

BILLING CODE 7515-01-M

NATIONAL ENDOWMENT FOR THE ARTS AND HUMANITIES

Advisory Panel Meeting; Arts in Education

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Arts in Education Advisory Board Panel (State Arts in Education Grants Section) to the National Council on the Arts will be held on

December 4, 1989, 8:15 a.m.-7:30 p.m.
December 5, 8:15 a.m.-5:00 p.m.
December 6, 8:15 a.m.-4:30 p.m.

in room M09 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

A portion of this meeting will be open to the public on December 6, 1989, from 1:00 p.m.-4:00 p.m. The topic for discussion will be FY 1991 guidelines.

The remaining portions of this meeting on

December 4, 8:15 a.m.-7:30 p.m.
December 5, 8:15 a.m.-5:00 p.m.
December 6, 8:15 a.m.-1:00 p.m.

are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsection (c) (4), (6), and (9)(B) of section 552b of title 5, United States Code.

If you need special accommodations due to a disability, please contact the Office of Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682-5532, 202/682-5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

Dated: October 31, 1989.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

[FR Doc. 89-26474 Filed 11-8-89; 8:45 am]

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget Review (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. Type of submission, new, revision, or extension: Extension.

2. The title of the information collection: Data Report on Spouse.

3. The form number if applicable: NRC Form 354.

4. How often the collection is required: As needed.

5. Who will be required or asked to report: NRC employees, NRC contractor, and NRC licensee access authorization applicants who are married to non-U.S. citizens; marry after completing NRC's Personnel Security Forms; or marry after having been granted an NRC access authorization or employment clearance.

6. An estimate of the number of responses: 88.

7. An estimate of the total number of hours needed to complete the requirement or request: 22 (.25 hours per response).

8. An indication of whether section 3504(h), Public Law 96-511 applies: Not applicable.

9. Abstract: The NRC Form 354 is completed by NRC contractors, licensee applicants, and employee applicants who are married to non-U.S. citizens; marry after submission of the Personnel Security Forms, or after receiving an access authorization or employment clearance.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street NW., Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer: Nicolas B. Garcia, Paperwork Reduction Project (3150-0028), Office of Management and Budget, Washington, DC 2503.

Comments may also be communicated by telephone at (202) 395-3084.

The NRC Clearance Officer is Brenda Jo. Shelton, (301) 492-8132.

Dated at Bethesda, Maryland, this first day of November 1989.

For the Nuclear Regulatory Commission.

Joyce A. Amenta,

Designated Senior Official for Information Resources Management.

[FR Doc. 89-25440 Filed 11-8-89; 8:45 am]

BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget (OMB) review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the OMB for review the following for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. Type of submission, new, revision or extension: Extension

2. The title of the information collection: 10 CFR Part 100, Appendix A, "Seismic and Geologic Siting Criteria for Nuclear Power Plants"

3. The form number is applicable: Not applicable

4. How often the collection is required: As necessary in order for NRC to assess the adequacy of proposed seismic design bases and the design bases for other geological hazards for nuclear power plants constructed and licensed in accordance with 10 CFR Part 50, and the Atomic Energy Act of 1954, as amended (the Act).

5. Who will be required or asked to report: Licensees for nuclear power plants.

6. An estimate of the number of respondents: 3 annually

7. An estimate of the annual average burden hours per response: 16,666

8. An estimate of the total number of hours needed annually to complete the requirement: 50,000

9. An indication of whether section 3504(h), Public Law 9696-511 applies: Not applicable.

10. Abstract: The regulations require utilities that propose to build and operate nuclear power plants to design, construct, and maintain those plants to withstand geologic hazards, such as faulting, seismic hazards, and the maximum credible earthquake, to protect the health and safety of the public and the environment.

ADDRESS: Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW., Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Comments and questions should be directed to the OMB reviewer, Nicolas B. Garcia, Paperwork Reduction Project (3150-0093), Office of Management and Budget, Washington, DC 20503. Comments can also be submitted by telephone (202) 395-3084.

NRC Clearance Officer is Brenda J. Shelton, (301) 492-8132.

Dated at Bethesda, Maryland, this 1st day of November 1989.

For the Nuclear Regulatory Commission.

Joyce A. Amenta,

Designated Senior Official for Information Resources Management.

[FR Doc. 89-25441 Filed 11-8-89; 8:45 am]

BILLING CODE 7590-01-M

$1,875 and a $5,625 civil penalty should be imposed.

Appendix—Evaluations and Conclusions

Subitem B.2

Section 9.B of this manual requires, in part, that a quarterly management audit be

possessed is the requirement and, therefore, has instructed licensee staff when conducting inventories to record the quantity of material (i.e., number of sources) possessed rather

within six months prior to the date of use or transfer.

Contrary to the above, an iridium-192 sealed radiographic source, last leak tested

Items D, E, and F are violations of a "paperwork nature" only.

NRC Evaluation

[Docket No. 030-19680 License No. 21-21010-01 EA 89-096]

Photon Field Inspection, Inc.; Order Imposing Civil Monetary Penalty

I

Photon Field Inspection, Inc. (the licensee) 1705 Boxwood Saginaw, MI 48601, is the holder of Byproduct Material License No. 21-21010-01 issued by the Nuclear Regulatory Commission (NRC/Commission). The license authorizes the use of byproduct material to perform industrial radiography. The license was originally issued on September 15, 1982 and expired on September 30, 1987. A timely renewal application was filed, as of August 31, 1987, and the renewal is pending.

II

An inspection of the licensee's activities was conducted on April 6, 1989, at the licensee's facility in Saginaw, Michigan. The results of this inspection indicated that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty was served upon the licensee by letter dated June 7, 1989. The Notice stated the nature of the violations, the provisions of the NRC's requirements that the licensee had violated, and the amount of the civil penalty proposed. The licensee responded to the Notice of Violation and Proposed Imposition of Civil Penalty (Notice) by letters received by the NRC Region III office on July 27 and August 11, 1989. In its response, the licensee denied Violations B.2 and C and did not deny the remaining six violations. In addition, the licensee requested a reduction in the Severity Level and a reduction in the proposed civil penalty.

III

After consideration of the licensee's response and the statements of fact, explanation, and argument for mitigation contained therein, the NRC staff has determined, as set forth in the Appendix to this Order, that Violations B.2 and C require further evaluation by the NRC staff and therefore are being withheld from this escalated enforcement action at this time. The staff has also determined that the remaining six violations occurred as stated. After considering that: (1) The civil penalty was assessed equally among the eight violations, and (2) Violations B.2 and C constitute 25 percent of the violations, the amount of the civil penalty has been reduced by

VOL 54 ISS 216 NO 9 1989 UMI

$1,875 and a $5,625 civil penalty should be imposed.

IV

In view of the foregoing and pursuant to section 234 of the Atomic Energy Act of 1954, as amended (Act), 42 U.S.C. 2282, and 10 CFR 2.205, *it is hereby ordered that:*

The licensee pay a civil penalty in the amount of $5,625 within 30 days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555.

V

The licensee may request a hearing within 30 days of the date of this Order. A request for a hearing shall be clearly marked as a "Request for an Enforcement Hearing" and shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies shall also be sent to the Assistant General Counsel for Hearings and Enforcement, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555 and to the Regional Administrator, Region III, 799 Roosevelt Road, Glen Ellyn, IL 60137.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within 30 days of the date of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issues to be considered at such hearing shall be:

(a) Whether the licensee was in violation of the Commission's requirements as set forth in the Notice of Violation and Proposed Imposition of Civil Penalty referenced in Section II above, with the exception of Violations B.2 and C.; and

(b) Whether, on the basis of the violations, this Order should be sustained.

Dated at Rockville, Maryland, this 30th day of October 1989.

For the Nuclear Regulatory Commission.

Hugh L. Thompson, Jr.,

Deputy Executive Director for Nuclear Materials Safety, Safeguards, and Operations Support.

Appendix—Evaluations and Conclusions

On June 7, 1989, a Notice of Violation and Proposed Imposition of Civil Penalty (Notice) was issued to Photon Field Inspection, Inc, (licensee) for violations identified during a routine NRC inspection. The licensee responded to the Notice in two documents received by the Region III office on July 27 and August 11, 1989. In its response, the licensee denies Violations B.2 and C, and offers reasons why the Severity Level of all the violations should be reduced and why the civil penalty should not be imposed. The NRC's evaluation and conclusion regarding the licensee's arguments are as follows:

I. Restatements of Violations, Summary of Licensee's Response and NRC Evaluation of Licensee's Response

Restatement of Violation A

License Condition No. 10 limits storage of licensed material to a facility located at 300 Ames Street, Saginaw, Michigan

Contrary to the above, as of April 6, 1989, the licensee has stored licensed material at location other than that authorized by the license. Specifically, the licensee relocated its radiographic facility from 300 Ames Street, Saginaw, Michigan to 1705 Boxwood, Saginaw, Michigan in January 1989, has stored licensed material at that site since January 1989, and failed to inform the NRC and obtain approval prior to the move.

Summary of Licensee's Response

The licensee does not deny the violation.

NRC Evaluation of Licensee's Response

Since the licensee does not deny the violation, the violation remains as stated.

Restatement of Violation B

License Condition No. 16 requires, in part, that the licensee conduct its program in accordance with the statements, representations, and procedures contained in the reference application and certain listed documents, and any enclosures thereto.

The licensee's referenced application, which was amended July 1, 1982, transmitted to NRC as an enclosure a revised Administrative Manual.

Subitem B.1

Section 8.D of this manual requires, in part, that periodic training be given by the Radiation Safety Officer to update radiographic personnel at least every 12 months and that the training be followed by a written and oral quiz.

Contrary to the above, as of April 6, 1989, the sole radiographer employed by the licensee had not been provided any periodic training and had not been given a written and oral quiz during the last twelve months.

Summary of Licensee's Response

The licensee does not deny the violation.

NRC Evaluation of Licensee's Response

Since the licensee does not deny the violation, the violation remains as stated.

Subitem B.2

Section 9.B of this manual requires, in part, that a quarterly management audit be conducted in accordance with Form 6 of Appendix 1, which includes audits of various records such as inventory, instrument calibration, and receipt and disposal records.

Contrary to the above, since October 5, 1988, the licensee has not conducted any management audits of records such as inventory, instrument calibration, and receipt and disposal records.

This is a repeat violation.

Summary of Licensee's Response

The licensee denied this part of the violation and stated that management audits have been conducted since October 5, 1988. The licensee stated that after review of all files related to radiography, a record of a quarterly management audit accomplished on January 3, 1989 was located. The licensee stated further that this record was not available during the inspection due to the unavoidable absence of the Radiation Safety Officer and the lack of knowledge as to the whereabouts of all records on the part of the technician who represented the licensee during the inspection.

NRC Evaluation of Licensee's Response

The NRC is continuing to evaluate the licensee's response to this violation. The licensee will be notified by separate correspondence of the NRC's conclusion regarding this violation and the licensee's response.

Restatement of Violation C

10 CFR 34.26 requires, in part, that the licensee conduct a quarterly physical inventory to account for all sealed sources received and possessed under the license. The records of the inventories shall also include the quantities of byproduct material.

Contrary to the above, between October 5, 1988 and April 6, 1989, the licensee failed to conduct a quarterly inventory of all sealed sources as required. In addition, the quantities of iridium-192 and cobalt-60 listed in 1988 quarterly inventory records are incorrect in that they did not correspond to source manufacturer decay information or NRC calculated values.

This is a repeat violation.

Summary of Licensee's Response

The licensee denied the part of the violation that stated no quarterly inventories were conducted between October 5, 1988 and April 6, 1989. The licensee stated that after reviewing all files related to radiography, a record of a quarterly physical inventory accomplished on January 3, 1989 was located. The licensee stated further that this record was not available during the inspection due to the unavoidable absence of the Radiation Safety Officer and the lack of knowledge as to the whereabouts of all records on the part of the technician who represented the licensee during the inspection.

The licensee further stated that the source activity is not a requirement for quarterly inventory as per 10 CFR 34.26. The licensee claims that the quantity of material possessed is the requirement and, therefore, has instructed licensee staff when conducting inventories to record the quantity of material (i.e., number of sources) possessed rather than activity.

NRC Evaluation of Licensee's Response

The NRC is continuing to evaluate that part of the licensee's response to this violation which asserts that inventories were conducted. The licensee will be notified by separate correspondence of the NRC's conclusion regarding this part of the violation.

NRC disagrees with the licensee's interpretation that the word "quantities" in the phrase in 10 CFR 34.26 "quantities and kinds of byproduct material" refers only to the number of sources. An inventory record must be complete and accurate as to the description of the sealed sources being accounted for in the inventory. This is especially true to inventory records required by 10 CFR 34.26 because the radionuclide of choice in the majority of these sealed sources is iridium-192. Iridium-192 has a physical half-life of approximately 74 days, which necessitates exchanging a decayed source for a source of higher activity at a frequency of 2-5 times per year. Without a record of the activity of each source the "quantity" of iridium-192 cannot be determined. Therefore, the word "quantities" in the phrase "quantities and kinds of byproduct material" as stated in 10 CFR 34.26 should be interpreted to include the number of sources, the activity of each source at the time of inventory or on a specified assay date, and the serial number of each source. In addition, the licensee's example quarterly inventory form, submitted as attachment No. 4 in its response dated July 26, 1989, clearly indicates that the activity of the source in curies, is part of the information required to be recorded.

Restatement of Violation D

10 CFR 34.24 requires, in part, that each survey instrument used to conduct physical radiation surveys be calibrated at intervals not to exceed three months.

Contrary to the above, on July 5, 1988, more than three months after calibration, the licensee conducted physical radiation surveys with two survey instruments which were last calibrated on March 10, 1988.

Summary of Licensee's Response

The licensee does not deny the violation.

NRC Evaluation of Licensee's Response

Since the licensee does not deny the violation, the violation remains as stated.

Restatement of Violation E

10 CFR 34.25(b) requires, in part, that sealed sources be tested for leakage at intervals not to exceed six months.

License Condition No. 12.B exempts the licensee from the requirements of 10 CFR 34.25(b) as to radiography sources which are in storage and not being used. Since sources must be tested for leakage prior to any use or transfer unless they have been leak tested within six months prior to the date of use or transfer.

Contrary to the above, an iridium-192 sealed radiographic source, last leak tested on October 9, 1987, was removed from storage and used for radiography on ten occasions between April 14 and June 23, 1988, and transferred to the source manufacturer in July 1988. Prior to such use and transfer, the sources had not been leak tested within the previous six months.

Summary of Licensee's Response

The licensee does not deny the violation.

NRS Evaluation of Licensee's Response

Since the licensee does not deny the violation, the violation remains as stated.

Restatement of Violation F

10 CFR 71.5(a) prohibits transport of licensed material outside the confines of a plant or other place of use, or delivery of licensed material to a carrier for transport unless the licensee complies with applicable requirements of the regulations appropriate to the mode of transport of the Department of Transportation (DOT) in 49 CFR parts 170 through 189. 49 CFR 172.200–202 requires each person who transports hazardous material to describe the material on a shipping paper. 49 CFR 172.203(d) describes the required additional shipping paper entries for radioactive materials.

Contrary to the above, in January 1989, the licensee transported curie quantities of radioactive material from its Ames Street facility to its Boxwood Street facility and failed to complete any shipping papers.

Summary of Licensee's Response

The licensee does not deny the violation.

NRC Evaluation of Licensee's Response

Since the licensee does not deny the violation, the violation remains as stated.

Restatement of Violation G

10 CFR 30.51 (a) and (c)(1) require, in part, that persons who receive byproduct material pursuant to a license issued pursuant to Part 34 keep records showing the receipt of such byproduct material as long as the material is in their possession.

Contrary to the above, a record of receipt of byproduct material (cobalt-60 sealed source) received in approximately 1983 and currently in the possession of the licensee was not maintained.

Summary of Licensee's Response

The licensee does not deny the violation.

NRC Evaluation of Licensee's Response

Since the licensee does not deny the violation, the violation remains as stated.

II. Licensee's Request for Reduction in Severity Level and Reduction of Proposed Civil Penalty

Licensee's Request

The licensee protests the classification of Items D, E, and F as Severity Level III violations. It states that Severity Level III is unwarranted since no personnel were injured or overexposed due to radiation and that Items D, E, and F are violations of a "paperwork nature" only.

NRC Evaluation

The licensee is correct insofar as no personnel were injured or overexposed due to radiation, but is incorrect in assuming Items D, E, and F are each a Severity Level III violation. The Notice of Violation and Proposed Imposition of Civil Penalty clearly states that "these violations have been categorized *in the aggregate* as a Severity Level III problem (Supplement VI)." Separate severity levels have not been assigned to the individual violations in this case. The NRC enforcement policy, as delineated in 10 CFR part 2, Appendix C, section II.B.III, provides that violations may be evaluated in the aggregate and a single severity level assigned for a group of violations. 10 CFR part 2, Appendix C, Supplement VI(c)(6), states that Severity Level III can apply if there is:

Breakdown in the control of licensed activities involving a number of violations that are related or, if isolated, that are recurring violations that collectively represent a potentially significant lack of attention or carelessness toward licensed responsibilities.

The licensee is also incorrect in asserting that Items D, E, and F are violations of a "paperwork nature" only. Item D is a violation concerning the use of a survey instrument which had not been tested for calibration at the proper frequency and Item E is a violation concerning the use of a sealed source overdue for leak testing. These items address the licensee's failure to perform certain required tasks within a specified time interval and are not "paperwork" violations. Item F is a violation concerning the lack of proper shipping papers during the transport of sealed sources of radioactive material. This violation could be viewed as a "paperwork" violation; nevertheless, the requirement to have shipping papers during the transportation of radioactive materials is one of significance. Shipping papers are essential for regulatory agencies and for emergency response personnel who may be responding to an accident involving a vehicle carrying radioactive material to ensure that hazards are correctly identified and controlled.

III. NRC Conclusion

After reviewing the licensee's response to the Notice, the NRC has concluded that the violations were properly categorized in the aggregate at Severity Level III. The licensee has not provided a basis for mitigation of the proposed civil penalty. The NRC is continuing its evaluation of Violations B.2 and C, which the licensee has denied, and both of these violations have been withheld from this enforcement action pending completion of this review. The licensee will be notified by separate correspondence of the NRC's conclusion regarding Violations B.2 and C.

Since Violations B.2 and C constitute 25 percent of the 8 cited violations, we have determined that the $7,500 civil penalty should be reduced by $1,875 to $5,626.

BILLING CODE 7590-01-M

VOL 54 ISS 216 NO 9 1989 UMI

OFFICE OF MANAGEMENT AND BUDGET

List of Designated Federal Entities and Federal Entities

Public Law 100-504, "The Inspector General Act Amendments of 1988", requires the Office of Management and Budget to publish a list of "Designated Federal Entities" and "Federal Entities" and the heads of such entities. Designated Federal Entities were required to establish an Office of Inspector General before April 17, 1989. Federal Entities are required to report annually to each House of the Congress and the Office of Management and Budget on audit and investigative activities in their organizations.

The attached list was prepared in consultation with the U.S. General Accounting Office.

Frank Hodsoll,

Executive Associate Director.

Designated Federal Entities

1. Action—Director
2. Amtrak—Chairman
3. Appalachian Regional Commission—Federal Co-Chairman
4. The Board of Governors, Federal Reserve System—Chairman
5. Board for International Broadcasting—Chairman
6. Commodity Futures Trading Commission—Chairman
7. Consumer Product Safety Commission—Chairman
8. Corporation for Public Broadcasting—Board of Directors
9. Equal Employment Opportunity Commission—Chairman
10. Farm Credit Administration—Chairman
11. Federal Communications Commission—Chairman
12. Federal Deposit Insurance Corporation—Chairman
13. Federal Election Commission—Chairman
14. Federal Home Loan Bank Board—Chairman
15. Federal Labor Relations Authority—Chairman
16. Federal Maritime Commission—Chairman
17. Federal Trade Commission—Chairman
18. Interstate Commerce Commission—Chairman
19. Legal Services Corporation—President
20. National Archives and Records Administration—Archivist of the United States
21. National Credit Union Administration—Board of Directors
22. National Endowment for the Arts—Chairman
23. National Endowment for the Humanities—Chairman
24. National Labor Relations Board—Chairman
25. National Science Foundation—National Science Board
26. Panama Canal Commission—Chairman
27. Peace Corps—Director
28. Pension Benefit Guaranty Corporation—Executive Director
29. Securities and Exchange Commission—Chairman
30. Smithsonian Institution—Secretary
31. Tennessee Valley Authority—Board of Directors
32. United States International Trade Commission—Chairman
33. United States Postal Service—Postmaster General

Federal Entities

1. Administrative Conference of the United States—Chairman
2. Advisory Committee on Federal Pay—Chairman
3. Advisory Commission on Intergovernmental Relations—Chairman
4. Advisory Council on Historic Preservation—Chairman
5. African Development Foundation—Chairman
6. Alaskan Natural Gas Transportation System, Office of the Federal Inspector—Federal Inspector
7. American Battle Monuments Commission—Chairman
8. Architectural and Transportation Barriers Compliance Board—Chairman
9. Arms Control and Disarmament Agency—Director
10. Barry Goldwater Scholarship and Excellence in Education Foundation—Chairman
11. Christopher Columbus Quincentenary Jubilee Commission—Chairman
12. Commission for Purchase from the Blind and other Severely Handicapped—Chairman
13. Commission for the Study of International Migration and Cooperative Economic Development—Chairman
14. Commission of Fine Arts—Chairman
15. Commission on the Bicentennial of the United States Constitution—Chairman
16. Commission on Civil Rights—Chairman
17. Delaware River Basin—Commission—U.S. Commissioner
18. Export-Import Bank—President and Chairman
19. Federal Mediation and Conciliation Service—Director
20. Federal Mine Safety and Health Review Commission—Chairman
21. Federal Retirement Thrift Investment Board—Chairman
22. Franklin D. Roosevelt Memorial Commission—Chairman
23. Harry S. Truman Scholarship Foundation—Chairman
24. Illinois and Michigan Canal National Heritage Corridor Commission—Chairman
25. Institute of American Indian and Alaska Native Culture and Arts Development—Chairman
26. Institute of Museum Services—Director
27. Intelligence Community Staff—Director CIA
28. Inter-American Foundation—Chairman
29. Interstate Commission on the Potomac River Basin—Chairman
30. James Madison Memorial Fellowship Foundation—Chairman
31. Japan-U.S. Friendship Commission—Chairman
32. Marine Mammal Commission—Chairman
33. Merit Systems Protection Board—Chairman
34. Office of the Special Council—Special Council
35. National Afro-American History Commission—Chairman
36. National Capital Planning Commission—Chairman
37. National Commission for Employment Policy—Chairman
38. National Commission on Libraries and Information Science—Chairman
39. National Commission on Migrant Education—Chairman
40. National Commission on Responsibility for Financing Postsecondary Education—Chairman
41. National Council on the Handicapped—Chairman
42. National Endowment for Democracy—President
43. National Gallery of Art—Board of Trustees
44. National Institute of Building Sciences—Chairman
45. National Mediation Board—Chairman
46. National Transportation Safety Board—Chairman
47. Navajo-Hopi Relocation Commission—Chairman
48. Neighborhood Reinvestment Corporation—Chairman
49. Occupational Safety and Health Review Commission—Chairman
50. Offices of Independent Counsels—Independent Counsels
51. Overseas Private Investment Corporation—President
52. Pennsylvania Avenue Development Corporation—Chairman
53. Postal Rate Commission—Chairman
54. Selective Service System—Director
55. State Justice Institute—Director
56. Susquehanna River Basin Commission—U.S. Commissioner
57. U.S. Holocaust Memorial Commission—Chairman
58. U.S. Institute for Peace—Chairman
59. U.S. International Cultural and Trade Center Commission—President
60. U.S. Soldier's and Airman's Home—Governor
61. Washington Metropolitan Transit Authority—General Manager
62. Woodrow Wilson International Center for Scholars—Board of Trustees

DEPARTMENT OF STATE

[Pub. Notice CM-8/1321]

National Committee of the U.S. Organization for International Radio Consultative Committee; Meeting

The Department of State announces that the National Committee of the U.S. Organization for the International Radio Consultative Committee (CCIR) will meet on November 27, 1989 at the Department of State, 2201 C Street, NW., Washington, DC. The meeting will be held in Room 1105, from 1:30 to 4:30 p.m.

The single agenda item is to consider broad aspects of the present CCIR and its future role, working methods and procedures, particularly with respect to the ITU's Review of Structure and Functioning. Mr. Richard Kirby, Director of the CCIR in Geneva, plans to participate in the meeting.

Members of the general public may attend and participate subject to instructions of the Chairman and available seating. Persons wishing to attend must contact the office of Richard Shrum, Department of State, Washington, DC; (202) 647-2592, telefax (202) 647-5957. Entrance to State Department is controlled, and attendees must use the C Street entrance. An escort will be at the main entrance to the building (22nd and C Streets) during the period 1:15-1:35 p.m. to facilitate entry.

Dated: October 31, 1989.

Richard E. Shrum,

Chairman, U.S. CCIR National Committee.

BILLING CODE 4710-07-M

Bureau of Diplomatic Security

Anti-Terrorism Assistance Training

In accordance with Office of Management and Budget Circular No. A-102, dated March 3, 1988, the Department of State hereby gives notice of intention to establish a cooperative

VOL 54 ISS 216 NO 9 1989 UMI

agreement for purposes of facilitating the accomplishment of the objectives of 22 U.S.C. 2349aa, et seq. Under this authority, assistance may be furnished to foreign law enforcement personnel to enhance their ability to deter terrorists and terrorist groups from engaging in international terrorist acts. The proposed agreement will encompass facilities and administrative support in conducting training under the referenced authority, and will facilitate the development of long-range plans by providing a measure of stability in the planning process.

The Department of State has identified the Louisiana State Police Academy as having the necessary capabilities to conduct the training contemplated by this agreement. This agreement contemplates annual funding of approximately $750,000, which includes amounts which normally are granted directly to the participating individuals for their room and board. Training materials provided by the Louisiana State Police and consumed in the training will be reimbursed by the Department of State. Training materials for the participants provided by the Louisiana State Police and not consumed during the training, will be reimbursed by the Department of State, and will be granted to the participants.

If additional needs are identified in the future, the Department will entertain consideration of additional or alternative sources. Public comment on this intended action may be submitted within 20 days after the date of the Federal Register in which this notice appears, addressed to David Epstein, U.S. Department of State, Office of Counterterrorism Programs (DS/CTP/ATA). Fifth Floor SA-10, Washington, DC 20520-1003. Tel. (202) 663-0272.

Dated: October 20, 1989.

Christopher M.B. Dissay,

Acting Deputy Assistant Secretary for Policy and Counterterrorism.

Bureau of Intelligence and Research

[Public Notice 1140]

Soviet-Eastern European Studies Advisory Committee; Meeting

The Department of State announces that the Soviet and Eastern European Studies Advisory Committee will meet on December 14, 1989, starting at 9:30 a.m. in Room 1105, Department of State, 2201 C Street, NW., Washington, DC.

The advisory Committee will recommend grant recipients for the advancement of the objectives of the Soviet and Eastern European Research and Training Act of 1983. The agenda will include: opening statements by the Chairman of the Committee and its members; oral statements by interested members of the public about the Title VIII program in general; and within the Committee, discussion, approval, and recommendation that the Department of State negotiate grant agreements with certain "national organziations with an interest and expertise in conducting research and training concerning the USSR and Eastern Europe" based on the guidelines contained in the Call for Applications published in the Federal Register on June 20, 1989.

Public attendance is permitted but will be limited to the seating available. Entry into the Department of State building is controlled and must be arranged in advance of the meeting. It is required that persons planning to attend notify Susan H. Nelson, Soviet and Eastern European Studies Advisory Committee, INR/RES, Department of State, 1730 K Street, NW., Suite 233, Washington, DC 20006, (202) 632-6203. All attendees must use the 2201 C Street entrance to the State Department building.

Kenneth E. Roberts,

Executive Director, Soviet and Eastern European Studies Advisory Committee

BILLING CODE 4710-32-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Application of North American Airlines, Inc., for Certificate Authority Under Subpart Q

AGENCY: Department of Transportation.

ACTION: Notice of Order to Show Cause, (Order 89-11-6) Docket 46314.

SUMMARY: The Department of Transportation is directing all interested persons to show cause why it should not issue an order finding North American Airlines, Inc., fit and awarding it a certificate of public convenience and necessity to engage in domestic scheduled air transportation of persons, property and mail.

DATE: Persons wishing to file objections should do so no later than November 13, 1989.

ADDRESSES: Objections and answers to objections should be filed in Docket 46314 and addressed to the Documentary Services Division (C-55, Room 4107), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, and should be served upon the parties listed in Attachment A to the order.

FOR FURTHER INFORMATION CONTACT: Ms. Carol A. Woods, Air Carrier Fitness Division (P-56, Room 6401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-2340.

Dated: November 6, 1989.

Jeffrey N. Shane,

Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910-62-M

Federal Highway Administration

Environmental Impact Statement; Franklin and Vance Counties, NC

AGENCY: Federal Highway Administration (FHWA).

ACTION: Rescind notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will not be prepared for a proposed highway project in Franklin and Vance Counties, North Carolina.

FOR FURTHER INFORMATION CONTACT: Mr. Robert L. Lee, District Engineer, Federal Highway Administration, P.O. Box 26806, Raleigh, North Carolina 27611, Telephone (919) 790-2850.

SUPPLEMENTARY INFORMATION: A Notice of Intent to prepare an Environmental Impact Statement (EIS) for a proposed highway project to improve US-1 in Franklin and Vance Counties, North Carolina, was issued on August 9, 1989 and published in the August 13, 1989 Federal Register. The FHWA, in cooperation with the North Carolina Department of Transportation, has since determined that the proposed highway project will not be Federally funded and hereby rescinds the previous Notice of Intent.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning, and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Thomas H. Mull,

Acting District Engineer, Raleigh, North Carolina.

[FR Doc. 89-26337 Filed 11-8-89; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement; Moore and Lee Counties, NC

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project from north of Lakeview, Moore County, to south of Sanford in Lee County, North Carolina.

FOR FURTHER INFORMATION CONTACT: Roy C. Shelton, District Engineer, Federal Highway Administration, Suite 470, 4505 Falls of Neuse Road, Raleigh, North Carolina 27611, Telephone (919) 790-2852.

SUPPLEMENTARY INFORMATION: The FHWA in cooperation with the North Carolina Department of Transportation (NCDOT) will prepare an environmental impact statement (EIS) for the improvement of the US 1 Corridor from north of Lakeview to south of Sanford. The proposed action would be the constructon of a multilane divided highway, potentially on a new location with controlled access from existing four-lane section north of Lakeview to the existing four-lane section south of SR 1180 (south of Sanford), a distance of about 12 miles. Improvements to the corridor are considered necessary to increase safety and traffic service.

This improvement is part of intrastate system, to provide multilane facilities on US 1 from Henderson in Vance County, near the Virginia line, to Richmond County on the South Carolina line.

Alternatives under consideration include: (1) the "no-build", (2) improving existing facilities, (3) partial relocation, and (4) a controlled access highway on new location.

Solicitation of comments on the proposed action are being sent to appropriate Federal, State and local agencies. A complete public involvement program has been developed for the project to include: the distribution of newsletters to interested parties, along with public meetings and a public hearing to be held in the study area. Information on the time and place of the public hearing will be provided in the local media. The draft EIS will be available for public and agency review and comment prior to the public hearing. No formal scoping meeting is planned at this time.

To assure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: November 3, 1989.

Roy C. Shelton,

District Engineer, FHWA, Raleigh, North Carolina.

[FR Doc. 89-26479 Filed 11-8-89; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement; Madison County, AL

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for a proposed highway project in Madison County, Alabama.

FOR FURTHER INFORMATION CONTACT: Mr. W.R. Van Luchene, District Engineer, Federal Highway Administration, 441 High Street, Montgomery, Alabama 36104-4684, Telephone: (205) 223-7379. Mr. Royce G. King, State of Alabama Highway Department, 1409 Coliseum Boulevard, Montgomery Alabama 36130, Telephone: (205) 242-6311.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the State of Alabama Highway Department, will prepare an Environmental Impact Statement (EIS) for Projects M-8508(1) and ST-807-7. These projects are located in the City of Huntsville, Madison County, Alabama. The proposals are to construct a Southern Bypass of Huntsvile from Memorial Parkway near Hobbs Island Road to Interstate Highway I-565, a distance of approximately 12 miles; and to construct an extension of Weatherly Road to the proposed bypass, a distance of approximately 2 miles

The Southern Bypass will be a controlled access divided facility with frontage roads. The highways will expedite traffic flow and relieve congestion to the Huntsville street system.

Alternatives under consideration include: (1) alternate route locations, (2) a no action alternative, and (3) postponing the action.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State and local agencies, and to private organizations and citizens who have previously expressed or are known to have an interest in this proposal. A public involvement meeting will be held in Huntsville to acquire local input. Time and place for the meeting will be advertised in the local newspaper. A scoping meeting will also be held to solicit agency and public response to the action. The date and location of the scoping meeting will be appropriately advertised.

To ensure that the full range of issues related to this proposed action is addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Joe D. Wilkerson,

Division Administrator, Montgomery, Alabama.

BILLING CODE 4910-22-M

[FHWA Docket No. 89-23]

Additional Interchanges to the Interstate System

AGENCIES: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed policy statement; request for comments.

SUMMARY: This notice requests public comment on a proposed statement of FHWA policy on guidance to the States for the justification and documentation needed for requests for additions of interchanges and ramps to the existing Interstate System. Since requests by States for additional access to the Interstate System have dramatically increased, the FHWA intends to clarify its policy and emphasize the need for justification in areas such as safety, traffic operations and land use.

DATE: Comments must be received on or before December 26, 1989.

ADDRESS: Submit written, signed comments to FHWA Docket No. 89-23, Federal Highway Administration, Room 4232, HCC-10, 400 Seventh Street SW., Washington, DC 20590. All comments

VOL 54 ISS 216 NO 9 1989 UMI

received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m. ET, Monday through Friday. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Seppo I. Sillan, Office of Engineering, (202) 366-0312, or Michael J. Laska, Office of the Chief Counsel, (202) 366-1383. Office hours are from 7:30 a.m. to 4:00 p.m. ET, Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION:

Background

Section 111 of title 23, U.S.C., provides that all agreements between the Secretary and the State highway department for the construction of projects on the Interstate System shall contain a clause providing that the State will not add any points of access to, or exit from, the project in addition to those approved by the Secretary in the plans for such project, without the prior approval of the Secretary. The Secretary has delegated the authority to administer 23 U.S.C. 111 to the Federal Highway Administrator pursuant to 23 CFR 1.48(b)(10). This agreement provision is contained in 23 CFR 630, subpart C, appendix A.

It has always been the policy of FHWA to maintain adequate control of access to the Interstate System to ensure safety, efficient traffic operation and efficient land use. The guidance for justifying and documenting the need for additional access to existing sections of the Interstate System has traditionally been included in the Interstate Cost Estimate (ICE) manuals that are periodically issued by FHWA pursuant to 23 U.S.C. 104(b)(5) and available to the public. The guidance generally required the documentation of public benefits or needs before an additional interchange or ramp could be added to the Interstate System. In July of 1987, the FHWA, by memorandum to Regional Federal Highway Administrators, restated and emphasized the justification criteria contained in ICE manuals. This was necessitated by an expanding effort by both public and private investors to enhance the utility and value of adjacent property to the Interstate System by requesting additional access points.

Discussion

The FHWA received 28 requests for additional accession 1975, 49 in 1980, about 70 in 1986, and 25 so far in 1989. Many requests are initiated to accommodate normal growth in residential and business areas while maintaining the safe and efficient operation of the Interstate facility. However, others are initiated by special interests merely to enhance adjacent property values or provide direct access to private facilities. The inadequacy of State and Federal funds to finance all transportation and infrastructure improvements has led local governments to seek alternative tax revenues. Commercial development can generate needed reveue for the local government, some of which may be dedicated to address transportation problems. However, in the pursuit of commercial growth, sound transportation planning can be compromised.

Traffic congestion is the major transportation issue today in most metropolitan areas. Some projections indicate that delay caused by traffic congest'on on urban freeways will quadruple by the year 2005 unless aggressive actions are undertaken. The FHWA has placed emphasis on implementing existing congestion relief technologies. Major initiatives are under way in areas such as incident management and integrated freeway-arterial traffic control systems. The proliferation of added interchanges would further compound the freeway congestion problem and possibly negate other steps taken to relieve this congestion. It is imperative that plans for additional Interstate access be conceived in a manner that takes in account not only legitimate local needs for access, but also gives due consideraion for system integrity and purpose, i.e., a high level of safety and mobility.

The addition of interchanges to the Interstate System must be based on overall system needs and limitations. To assist the States in this critical process in the future, the FHWA is proposing to summarize its policy to ensure critical factors are duly considered in the request and approval process. Due to the national importance attached to maintaining a high level of service for traffic on the Interstate System, the FHWA is giving all interested parties an opportunity to comment on this policy.

Policy

It is in the national interest to maintain the Interstate highway systems to provide the higest level-of-service in terms of safety and mobility. Adequate control of access is critical to this end. Therefore, additional access points to the existing Interstate System will be considered for approval only if:

1. It is clearly demonstrated that the existing interchanges and/or local roads and streets cannot handle the expected traffic, provide access, or be improved to do so.

2. All feasible alternatives for design, location and transportation system management type improvements have been assessed.

3. The proposed new interchange does not adversely impact the safety and operation of the interstate facility based on an analysis of current and future traffic. The operational analysis for existing and proposed conditions should, particularly in urbanized areas, include an analysis of adjacent sections of the interstate facility as well as nearby existing and proposed interchanges. Crossroads and other roads and streets should be included in the analysis to the extent necessary to assure their ability to collect and distribute traffic to and from the new access or their ability to handle traffic in lieu of an added interchange.

4. The proposed interchange connects to a public road and will provide for all traffic movements. The proposed interchange is designed to meet current standards for Federal-aid projects on the Interstate System.

5. The proposal considers and is consistent with local and regional land use and transportation plans. In areas where the potential exists for future multiple interchange additions, all requests for new access are supported by a comprehensive interstate desired interchange additions within the context of a long term plan.

6. The request for a new interchange generated by new or expanded development demonstrates appropriate coordination between the commercial development and transportation system improvements. This includes possible phasing or staging of both transportation and private development work to optimize the highway system operations and to minimize the adverse effects of increased traffic demand.

Implementation

The FHWA Division Office will ensure that all added interchange requests submitted by the State highway agency for FHWA consideration contain sufficient information to allow the FHWA consideration contain sufficient information to allow the FHWA to independently evaluate the request and to ensure that all pertinent factors and alternatives as discussed above have been appropriately considered. The extent and format of the required justification and documentation should be developed jointly by the State highway agency and FHWA to accommodate the operations of both the State and FHWA. The extent and format of justification should also be consistent with the complexity and expected impact of the proposals, i.e., information in support of an isolated rural interchange may not need to be as extensive as for a complex or potentially controversial interchange in an urbanized area. No specific justification documentation format or content is prescribed by this policy.

Policy State Impact

The FHWA has determined that this document does not contain a major rule under Executive Order 12291 or a significant action under the Department of Transportation's regulatory policies and procedures. Because of the interest in maintaining the highest level-of-service in terms of safety and mobility in the Interstate highway system, the FHWA has decided to give all interested parties an opportunity to comment on this policy.

The proposed policy statement summarizes and clarifies FHWA policy and guidance for the justification and documentation needed for requests for additions of interchanges and ramps to the existing Interstate System. Specifically, the proposed policy statement emphasizes the need for clear justification based on adequate information in areas such as safety, traffic operations and land use. The proposed policy statement will not impose any additional reporting or recordkeeping requirements on the States. To assure that adequate information and analysis is provided with each request for additional access, the extent and contents of the currently required justification documentation may need to be modified. These modifications can simply be incorporated into the States' existing additional interchange request policy. Therefore, a full regulatory evaluation is not required. For the above reasons, and under the criteria of the Regulatory Flexibility Act, the FHWA hereby certifies that that this action, if promulgated, will not have a significant economic impact on a substantial number of small entities.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this proposed policy statement does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

(Catalog of Federal Domestic Assistance Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental review of Federal programs and activities apply to this program.)

Issued on: November 2, 1989.

Sunshine Act Meetings

Federal Register
Vol. 54, No. 216
Thursday, November 9, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, November 14, 1989, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC.

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. § 437g.
Audits conducted pursuant to 2 U.S.C. § 437g, § 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration.
Internal personnel rules and procedures or matters affecting a particular employee.

DATE AND TIME: Thursday, November 16, 1989, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC (Ninth Floor).

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Setting of Dates for Future Meetings.
Correction and Approval of Minutes.
Draft Advisory Opinions:
Draft AO 1989-21:
Ms. Elaine Sandra Abramson on behalf of Create-A-Craft
Draft AO 1989-23:
Mr. David T. Wright on behalf of Coopers & Lybrand
Draft AO 1989-24:
Ms. Kay Yarbrough on behalf of First Florida Partners for Good Government
Explanation & Justification of the Foreign National Regulations: 11 CFR 110.4
Affiliation & Earmarking Regulations: Announcement of Effective Date
Administrative Matters

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, Telephone: (202) 376-3155.

Marjorie W. Emmons,

Secretary of the Commission.

Part II

Small Business Administration

13 CFR Part 115
Surety Bond Guarantee; Interim Final Rule

VOL 54 ISS 216 NO 9 1989 UMI

SMALL BUSINESS ADMINISTRATION

13 CFR Part 115

[Revision 4]

RIN 3245-AB77

Surety Bond Guarantee

AGENCY: Small Business Administration (SBA).

ACTION: Interim final rule.

SUMMARY: SBA publishes a new complete revision of its surety bond guarantee (SBG) regulations in further implementation of Title II of Pub. L. 100-590, the Preferred Surety Bond Guarantee Program Act of 1988 (Act).—An earlier implementing regulation (Rev. 3) was published May 8, 1989 (54 FR 19544) and is superseded by this Rev. 4. The Act created within SBA's Surety Bond Guarantee (SBG) program a pilot program, which allows SBA to authorize selected surety companies to issue, monitor and service surety bonds subject to SBA's guarantee without specific prior SBA approval. This program, unless extended by Congress, is due to end September 30, 1992. Because of the need to move this three-year pilot program forward, the rules are again published as "interim final" without opportunity for prior public comments. SBA requests comments on or before January 8, 1990. These comments will be carefully considered, and necessary amendments made as soon thereafter as practicable.

DATES: These rules are effective November 9, 1989. Comments are due on or before January 8, 1990.

ADDRESSES: Comments should be sent to James W. Parker, Jr., Director, Office of Surety Guarantees, Small Business Administration, 4040 N. Fairfax Drive, Suite 500, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: James W. Parker, Jr., Tel: (703) 235-2900.

SUPPLEMENTARY INFORMATION: The Act has the stated purpose of encouraging the major surety companies to contribute their expertise by substantial participation in SBA's Surety Bond Guarantee (SBG) program. The 3-year pilot program instituted under the Act is expected to improve the access to bonding for small and disadvantaged small business concerns. The inducement to participate is the freedom of designated sureties from the need to seek prior SBA approval for each decision relating to the issuance and administration of bid and final bonds guaranteed by SBA. The trade-off is a substantially lower indemnification against losses (70%).

In implementation of the Act, SBA published Revision 3 of its SBG regulations on May 8, 1989 (54 FR 19544) as "interim final", with a request for comments. Revision 3 attempted to merge the rules for the pilot Preferred Surety Bond (PSB) program with the rules of the pre-existing program (Revision 2), published August 24, 1988 (53 FR 32195). Our purpose was to maintain a unified program with uniform rules, to the extent that this is possible, since the purpose of the two programs, and the means to their achievement, are one and the same.

The purpose of both programs is stated in the policy section: to assist qualified small business concerns to obtain the required bid, payment and performance bonds and bonds ancillary thereto, which are unobtainable without an SBA guarantee. The older program does so by SBA approval of each bond guarantee on a case-by-case basis, or under a "bonding line", which allows for a limited number of bond guarantees for a pre-approved contractor within strict limitations. The older program was utilized almost exclusively by "specialty" sureties. The new program will allow sureties selected pursuant to strict principles to issue bonds guaranteed by SBA within stated limits, without prior SBA approval.

The two major objectives of the new program are, first, expansion of the participation of the standard surety companies, and second, improved access to surety bonds for small business concerns (Conference Report H.R. 100-1029, 100th Cong., 2d Session, October 3, 1988 p. 31).

SBA's attempt to formulate a single set of rules was not well received. The trade association representing the major sureties (Surety Association of America—SAA) expressed the opinion that separate regulations for the PSB program should be developed. Another comment from within SBA, also recommended separation of the regulations for the two programs, because the format used was considered confusing and it was difficult to ascertain what is applicable to each program. Accordingly, the present revision separates the rules for the two programs, by dividing the entire regulatory system into three subparts. The first subpart contains the rules common to both programs, and the other two subparts contain the rules for each of the two programs.

Another comment pointed out that the ability of PSB companies to write bonds also under the prior-approved program was susceptible to adverse risk selection; a surety might write the riskiest bonds under the prior-approval program, because of its greater loss guarantee (90% or 80% *vs* 70%). Accordingly, the present revision prohibits a surety admitted to the PSB program from also utilizing the prior-approval program.

The following comments explain the substantive changes made in Revision 4 from the prior Revision 3. For sections which have not been substantively changed from Revision 3, reference is made to the explanations given for Revision 2 (53 FR 32195; August 24, 1988) and Revision 3 (54 FR 19544; May 8, 1989)

A new § 115.1 explains the division of the SBG regulations (part 115) into three subparts. Subpart A contains regulations generally applicable to the SBG program. Subpart B deals with the (pre-existing) prior-approval program. Subpart C regulates the PSB program.

The paragraph dealing with the selection principles for the PSB program, now § 115.10(d), states a lower Treasury underwriting limitation than before ($1,250,000 vs. $2,500,000). Many comments pointed out that the $2.5 million limit excluded too many long-time participants in the SBG program from opting for PSB status. Others stressed the program itself was limited to contracts up to $1,250,000, so that the higher underwriting limit of the regulation bore no immediate relation to the SBG program limit. SBA now adopts the program limit, although it is hoped that contractors who "graduate" from the SBG program will be able to stay with the surety companies which brought them to "graduation", beyond the $1,250,000 ceiling.

The requirement that a PSB charge no more than the SAA advisory rates (§ 115.10(d)(2)) came under criticism. It was pointed out that three states (CA, KY, IL) prohibited the promulgation of advisory rates, and that the number of such states may grow. SBA is not concerned with the legality of these rates in the various states, but adopts them without regard thereto, because our experience has been that these rates protect the interests of small concerns without putting the surety at a disadvantage. In fact, certain present participants in the SBG program now use rates lower than SAA rates for some bond categories.

A new requirement has been added (§ 115.10(d)(3)). Guaranteed contact bonds may not exceed one-quarter of the PSB surety's total "book" of contract bond business. This requirement replaces former § 115.3(e)(3). The requirement that the PSB surety's

underwriters, as a group, write at least 25% of their bonds outside the SBG progam, came under criticism because it tended to stifle the formation of small-business specialists. The purpose of the former and of the new requirement is the same: to obtain experienced underwriting, not influenced by the awareness of the government guarantee.

The requirements of in-house underwriting (formerly § 115.3(e)(3)) and claims handling (formerly § 115.3(e)(4)) were criticized, because sureties commonly delegate some of these functions to branch offices. Accordingly, § 115.10(d) (4) and (5) now require that underwriting and claims settlement must be handled by employees of the surety, not necessarily in the home office. This requirement does not preclude business production by independent agents, and claims handling by independent counsel and consultants, selected by employees of the surety company, so long as the ultimate decision is reserved to the employees of the surety.

As pointed out above, § 115.10(f) now limits PSB participants to PSB bonds, to preclude adverse risk selection, *i.e.*, in the words of one comment, "to 'dump bad business' into the [prior-approval] program and thus to 'raid the Treasury'."

Section 115.10(g), formerly § 115.3(f), limits SBA's guarantee to bonds issued before contract work has begun. The definition of work start (any action which exposes the surety to liability) was criticized as overbroad because, it was said, such liability can begin without the surety's or the obligee's knowledge, for example, when the contractor orders materials before the bond is issued, to lock in a good price. Accordingly, the definition now limits work start to actions on the job site.

The definition of "Account of Contract" in the definition section, § 115.11, (formerly § 115.4) was criticized as omitting multi-year service and supply contracts. Accordingly, the definition now provides that such contracts are eligible so long as the surety's exposure in any one year does not exceed the statutory limit of $1,250,000.

The definition of "bid bond" limited the duration of the bid bond guarantee to 120 days unless SBA and surety agree otherwise. Our purpose was to safeguard our control over the use of our program level authority, since we must reserve an appropriate amount against bid bonds. A comment pointed out that sometimes a bid invitation is extended at the last moment, leaving no time to seek SBA approval. Accordingly, the definition now provides that the surety notify SBA in timely fashion of such extension, but need not seek approval.

The definition of "bid bond" now omits the prohibition of forfeiture bonds. That prohibition has been moved to § 115.33, where it continues to apply to prior-approval sureties. It is inappropriate to the PSB program, since it is an underwriting matter not subject to SBA's review.

A new definition, "Loss under ancillary bond" limits SBA's guarantee to a covered loss occuring under the guaranteed contract. This definition was judged necessary because ancillary bonds are sometimes term bonds, useable on unbonded contracts subsequent to the bonded contract for which they were issued.

The definition of "loss from litigation cost" was criticized. The definition required prior SBA approval for suits brought by a surety against a United States department or agency. The reason is obvious: in these cases the U.S. Government would pay for the litigation cost of both sides. It is recognized, however, that some such suits may be necessary for several reasons, such as the effect on the interests of indemnitors or guarantors. Accordingly, SBA reserves to itself the judgment on the necessity of such suits, and pledges that its approval will not be unreasonably withheld.

In the definition of "Loss from attorney's fees and damages" the words, "or any other person", present in Rev. 2 and inadvertently omitted in Rev. 3 have been restored, because tort suits against a surety can be brought not only by a principal, but also by any other claimant. The reason for this exclusion is the fact that, under the statute, SBA may only indemnify a surety for losses "resulting from a breach of the terms of a * * * bond * * * by a principal" (15 U.S.C. 694b(a)).

The definition of "obligee" has been expanded to include the so-called "dual obligee savings clause." That clause binds a co-obligee to the surety as completion contractor, as well as to the principal. Otherwise the bond would become a completion bond, since the co-obligee would not be bound to pay for completion by the surety. This savings clause has long been recognized by SBA in its Standard Operating Procedures (SOP) 50-45, par. 10.

A new definition for "Person" as a natural person or legal entity has been added.

The definition of "Regulatory Violation" in § 115.13 (formerly § 115.16), Defenses of SBA, has been clarified in response to a comment which found the prior definition in terms of exposure of SBA too vague. The definition now speaks in terms of an increase in SBA's bond liability by more than 25% or $50,000, whichever is less.

A comment criticized the general part of former § 115.7(a), now § 115.30(a). It was stated that the "deemed" certification of reasonableness of risk imposed an undue burden on the surety, and provided little guidance. We note that these words, and the others in the same paragraph, are taken from the statute, where they form the basis for the guarantee (See § 202 of Pub. L. 100-590, 15 U.S.C. 694b(a)(4)). Similar words have been in earlier Revisions, see for example, 13 CFR § 115.8(a)(1), Edition as of Jan. 1, 1988. To our knowledge, these words have not caused problems.

A clarification has been added to the indemnification paragraph, § 115.30(c), formerly § 115.3(d). It now states expressly that a final bond initially for a contract amount of less than $100,000 may increase beyond that amount without reduction in the guarantee percentge (80%), if the bond guarantee is issued on behalf of a disadvantaged small concern. It also makes clear that if a bond for a contract amount of less than $100,000 issued on behalf of a principal which is not disadvantaged subsequently increases beyond $100,000, the percentage will decrease from 90% by one percent for each $5,000 or for any part of a $5,000 increment, but will not decrease below 80%. Conversely, it also makes clear that bonds for contracts over $100,000 issued on behalf of small concerns which are not disadvantaged will be guaranteed up to the administrative ceiling of 80%.

In § 115.31 (formerly § 115.8), paragraph (c) has been amended to make clear that SBA requires the principal's or the surety's own check for the principal's guarantee fee with the notice from the surety of the issuance of final bonds. This change from the earlier wording is intended to make clear that the surety is not responsible for the clearance of the principal's check, and may submit its own check if it so desires. The reason for this provision is the difficulty SBA sometimes experiences in collecting a principal's guarantee fee, since SBA is not in privity with the principal, whereas the surety is in privity.

A new paragraph has been added to § 115.32 (formerly § 115.9). That paragraph requires sureties to obtain status reports from bond obligees, which are not to be forwarded to SBA. This new requirement was suggested by the General Accounting Office, an arm of the U.S. Congress, in the course of its review of the SBG program, to enable sureties better to monitor progress under the bonded contract. Most sureties

BEST COPY AVAILABLE

obtain such reports now, but the practice is not as general as it should be.

A change in § 115.34 (formerly § 115.11) relaxes the condition of reinstatement of a principal after Determination must remain committed to SBA judgment, since circumstances vary from case to case. Generally speaking, we expect that SBA will follow the surety's and the principal's shares will be passed back and forth between SBA and PSB sureties in the normal course of business. Increases and decreases in bond liability of 25% or

however, that the statute lists SBA's defenses (See § 115.13 and § 411(e) of the Small Business Investment Act, as amended by Section 203(c) of the Act). monitor, and service such bonds subject to the Administration's guarantee."

It is therefore necessary to set forth how such sureties will be selected to Business Act, 15 U.S.C. 634(b)(6), section 308(c) of the Small Business Investment Act, 15 U.S.C. 687(c), and section 411(d) of that Act, 15 U.S.C. 694(b)(d).

VOL 54 ISS 216 NO 9 1989 UMI

obtain such reports now, but the practice is not as general as it should be.

A change in § 115.34 (formerly § 115.11) relaxes the condition of reinstatement of a principal after default. Paragraph (a)(1) previously required that a principal indemnify its surety for at least half its loss in cash, with a note for the balance. It now leaves the percentage of indemnification to the surety's discretion.

Section 115.35(c) (formerly § 115.12(c)), SBA charge to surety, now prescribes a uniform 20% share of the bond premium as SBA's guarantee fee from the surety. Several comments had sharply criticized the former dual computation of either 20% or a flat dollar fee per thousand dollars of bond or contract amount. The comments called it "an accounting nightmare" and an "opportunity for error." Accordingly, SBA has omitted the flat dollar rate altogether, and adopted a 20% premium share across the board.

Section 115.35(c) has been further amended by the insertion of a *de minimis* provision. Adjustments up or down in SBA's premium share or the principal's guarantee fee may be disregarded if such fee adjustment amounts to less than forty dollars. The reason for this change is cost effectiveness. It must be noted, however, that no such cost effectiveness considerations apply to § 115.13 where the statute requires a material breach and a substantial violation to justify a denial of liability. For an explanation of the requirement concerning the principal's guarantee fee, see comment on § 115.31.

A series of questions were raised regarding § 115.37(b)(1) (formerly § 115.14(b)(1)). The questions and their answers are provided as follows: (Q) Does the "imminent breach" regulation concern itself only with financing of the principal? (A) Any measure to forestall a breach (*e.g.* surety pays for accountant or engineer) qualifies under this provision. (Q) Does the surety apply for approval of preventive expenditures before or after they are made? (A) Before. (Q) Why do the regulations differ in this regard for non-PSB and PSB sureties? (A) Because the principle underlying the PSB program is to let a PSB surety act without case-by-case SBA approval. A PSB surety takes responsibility for all its servicing decisions, including this one. (Q) Can SBA react quickly enough to approve a surety's request for indemnification? (A) We expect that we can give telephone approval (See § 115.32(a)) from one business day to the next. (Q) On what criteria does SBA determine that a breach is imminent? (A) The Determination must remain committed to SBA judgment, since circumstances vary from case to case. Generally speaking, we expect that SBA will follow the surety's and the principal's lead since the prevention of a breach should cost much less than a default.

The provision concerning business integrity of the surety, § 115.39(b) (formerly § 115.17(b)) has been amended to emphasize that the events destroying the presumption of good character are themselves only presumptively destructive, and can be rebutted by appropriate evidence. For example, a license revocation can be explained by an inadvertent late fee payment which has since been paid and the license restored.

In § 115.60(a), Procedures for PSB (formerly § 115.6(a)), the criterion of geographic diversification has been omitted. SBA had assumed that PSB sureties would do business throughout the country. A well taken comment, however, pointed out that reinsurers do not have such a requirement. Single state and regional sureties are often more successful than national firms, because of their greater familiarity with their clients and with local conditions.

Another comment asked whether a bid bond would count against the PSB allotment by its penal sum or by the estimated contract price (See § 115.60(b), formerly § 115.6(b)). The regulation now provides that the penal sum counts until such time as the SBA bid bond guarantee expires, for example, because the contract has been awarded or the bid withdrawn.

Section 115.60(c)(2) (formerly § 115.6(c)) has been amended by the addition of a sentence requiring PSB sureties to obtain status reports from obligees. While SBA believes that this practice is the custom of the surety industry, the requirement matches a similar requirement in § 115.32(b).

A former paragraph, § 115.6(c)(5) requiring prior SBA approval for compromise settlements with indemnitors or guarantors, and of liquidation plans for debtor small concerns, came under criticism as both cumbersome and contrary to the principle of the PSB program entrusting all servicing decisions to the PSB surety. In response, SBA has omitted such requirements form this revision.

The remaining paragraphs (3) through (6) of § 115.60(c) (formerly § 115.6(c)(3) through (4)) have been rewritten in response to comments thereon. These paragraphs now require SBA notification of all bid and final bonds with SBA guarantees and all changes thereto, by means of a monthly bordereau. Premiums, loss and recovery shares will be passed back and forth between SBA and PSB sureties in the normal course of business. Increases and decreases in bond liability of 25% or $50,000, whichever is less, require adjustment both in the principal's guarantee fee and in SBA's premium share, but changes of less than $40 are to be disregarded. Increases in bond liability must fit within the PSB surety's allotment for the period during which the PSB surety consents to such increase. When a principal defaults or is reinstated after default, SBA is to be notified within 30 calendar days irrespective of bordereau periods. SBA's purpose here is to prevent a defaulted contractor from seeking SBA-guaranteed bonds from other sureties, and to enable it to restore bonding capability when warranted.

Section 115.61(a), formerly § 115.15, now requires submission of claims for losses within one year from disbursement, but no longer requires the submission of the bonded contract, consistent with the principle that PSB sureties participating in the PSB program are not subject to case-by-case approval from SBA.

For the same reason, the requirement for semi-annual status reports has been omitted.

Section 115.61(b) Imminent breach formerly was § 115.14(b)(2), and remains substantively unchanged (See comments on § 115.37(b).

Section 115.62(a) (formerly § 115.17(a)) has been amended to compare PSB surety bond practice with those of other PSB sureties, as more stringent criteria are applicable to PSB sureties.

Section 115.61(b), formerly § 115.17(b), has been amended in conformity with § 115.39(b), to make clear that the stated events destroying the presumption of good character are themselves only presumptively destructive, and therefore rebuttable.

A new section, § 115.64, not contained in earlier revisions, has been added in response to comments on former § 115.10(b). That paragraph stated that SBA would determine the eligibility of PSB bonds for an SBA guarantee at the time a claim for loss under such bond is received. This point in time seemed to us to be the first when SBA had knowledge of the PSB bond, and became able to review such PSB bond's conformity with SBA's authorizing statute. The provision, however, was termed as "totally unacceptable" by SAA. Accordingly, SBA has attempted to formulate the 13 grounds for denials of liability which have become manifest in the past and which are applicable to the PSB program. It should be noted,

however, that the statute lists SBA's defenses (See § 115.13 and § 411(e) of the Small Business Investment Act, as amended by Section 203(c) of the Act). These statutory defenses are available, whether or not repeated in the regulation. Accordingly, the grounds for denial of liability recited in this section cannot be taken as definitive or comprehensive. In this connection, we point out that in the last sixteen years, less than fifty denials of liability have occurred, and that each denial requires approval from the highest level of SBA. The first four grounds are statutory. The fifth ground would exist if the bonded contract represents a financial guarantee, such as if the principal's payments to the obligee are bonded. The sixth ground exists if an agent mistakenly issues a guaranteed bond in the name of a surety other than the one which has agreed to issue it. The seventh to eleventh grounds are explicitly stated in these regulations. The twelfth ground exists, for example, if the surety suffers a loss as a result of a "bad faith" practice.

The last ground would exist if an ancillary bond, *e.g.*, for taxes or union benefits, issued as a term bond rather than a job bond results in a loss on a job for which SBA had not issued a bond guarantee.

Compliance with Executive Orders 12291 and 12612, the Regulatory Flexibility Act and the Paperwork Reduction Act

For purposes of Executive Order 12291, SBA has determined that these rules are major since they restructure a program with a program level of $1.25 billion.

SBA certifies that these rules do not warrant the preparation of a Federal Assessment in accordance with Executive Order 12812.

For purposes of the Regulatory Flexibility Act, 5 U.S.C. 604, SBA has determined that these rules will have a significant economic impact on a substantial number of small entities.

The following analysis is provided within the context of the review required under Executive Order 12291 and the Regulatory Flexibility Act (5 U.S.C. 603):

These rules are necessary to implement the Preferred Surety Bond Guarantee Program Act of 1988, Pub. L. 100–590, Title II approved November 3, 1988 (102 Stat. 3007). This Act created within SBA's existing Surety Bond Guarantee program a new program under which SBA may authorize selected sureties "without further administration approval, to issue, monitor, and service such bonds subject to the Administration's guarantee."

It is therefore necessary to set forth how such sureties will be selected to issue SBA guarantees on SBA's behalf without prior SBA approval, how they would operate to meet SBA's requirement under the statute and the regulations, how SBA would regulate, audit and, if necessary, terminate the PSB status of such sureties. At the same time, it is necessary to restructure the existing regulatory system to accommodate a two-track surety bond guarantee program.

The change in § 115.35(c), SBA charge to surety, was made because one of the prior computations of a guarantee fee, a flat dollar amount, had been criticized as a potential fairness problem, given the increasing diversity of premium rates. We believe that the present system will avoid such results.

We believe that the new statute and these regulations will result in lower bonding costs and better availability of bonds for small concerns, because the expected entry into the SBG program of major industry members with their wide organizational network, at premiums which do not exceed the Surety Association of America's advisory rates, will make more bonds at lower cost available to the small business market. It should be noted that the PSB represents a trade-off. PSB sureties accept a lower indemnification rate against their losses, and sometimes lower premiums, in return for the privilege of protecting their bonds with the SBA guarantee without "second-guessing" by SBA. However, given the finite guarantee authority for SBA, it is conceivable that over time a market shift away from SBA's traditional participants towards the new SBG entrants could occur, although we do not think so. SBA's increased bonding authority, together with the trade-off discussed above, should combine to prevent a detriment to our traditional partners.

SBA is not aware of any suitable alternatives to the rules here set forth. Because of the short life of this pilot program, as explained in the Summary, these rules are published as interim final, with a request for comments.

There are no reporting, recordkeeping and other compliance requirements not approved by the Office of Management and Budget which would come under the Paperwork Reduction Act, 44 U.S.C. ch. 35.

There are no federal rules which duplicate, overlap or conflict with these rules.

The legal authority for these rule changes is section 5(b)(6) of the Small Business Act, 15 U.S.C. 634(b)(6), section 308(c) of the Small Business Investment Act, 15 U.S.C. 687(c), and section 411(d) of that Act, 15 U.S.C. 694(b)(d).

List of Subjects in 13 CFR Part 115

Small business, Surety bonds.

Pursuant to the authority contained in section 411(d) of title IV, part B, Small Business Investment Act of 1958, as amended, (15 U.S.C. 694(b)(d)) and in section 203 of the Preferred Surety Bond Guarantee Program Act of 1988, Pub. L. 100–590 (102 Stat. 3007). Title 13, Code of Federal Regulations, chapter I, part 115, is hereby revised as follows.

PART 115—SURETY BOND GUARANTEE

Sec.

115.1 Explanation of regulations.
115.2 Statutory provisions.
115.3 Headings.
115.4 Savings clause.

Subpart A—Regulations Applicable to All Surety Bond Guarantees Under This Part

115.10 Policy.
115.11 Definitions.
115.12 Eligibility of principal.
115.13 Defenses of SBA.

Subpart B—Guarantees Subject to Prior Approval

115.30 Procedure for surety bond guarantee assistance.
115.31 Approval or decline of surety's guarantee application.
115.32 Underwriting and servicing standards.
115.33 SBA's review of surety's underwriting.
115.34 Reinstatement after default or failure to pay guarantee fee.
115.35 Fees and premiums.
115.36 Surety bonding line.
115.37 Minimization of loss.
115.38 Claims of losses.
115.39 Refusal to issue further guarantees.
115.40 Audits and investigations.

Subpart C—Preferred Surety Bond (PSB) Guarantees

115.60 Procedures for PSB.
115.61 Claims for losses.
115.62 Qualifications of surety.
115.63 Audits and investigations.
115.64 Liability of SBA.

Authority: Title IV, Part B of the Small Business Investment Act of 1958, as amended (15 U.S.C. 687b, 694a, 694b), the Inspector General Act of 1978 (5 U.S.C. App. 1) and Pub. L. 100–590, Title II.

§ 115.1 Explanation of regulations.

These regulations cover the Small Business Administration's (SBA's) Surety Bond Guarantee programs under part B of title IV of the Small Business Investment Act of 1958, as amended. Subpart A of this part 115 contains regulations common to both the program

VOL 54 ISS 216 NO 9 1989 UMI

requiring prior SBA approval of each bond guarantee, and the program not requiring such prior approval. Subpart B contains the regulations applicable only to the prior-approval program. Subpart C contains the regulations applicable only to the program not requiring prior SBA approval. These latter regulations implement the Preferred Surety Bond Guarantee Program Act of 1988, Pub. L. 100-590 (102 Stat. 3007), from which the name Preferred Surety Bond Program (PSB) is derived.

§ 115.2 Statutory provisions.

The relevant statutory provisions will be found at 15 U.S.C. 694a, *et seq.*

§ 115.3 Headings.

Headings are explanatory (for reference ease) and are not regulatory.

§ 115.4 Savings clause.

The legality of transactions, including the issuance by SBA of bond guarantees, pursuant to provisions of SBA regulations in effect before amendment, shall be governed thereby, notwithstanding subsequent changes. Nothing herein shall bar SBA enforcement with respect to any transaction consummated or bond guarantees issued in violation of provisions applicable at the time, but no longer in effect. If any section or part of a section of these regulations should be adjudged invalid, only that section or part shall be invalid, and no other part or section shall be affected thereby.

Subpart A—Regulations Applicable to All Surety Bond Guarantees Under This Part

§ 115.10 Policy.

(a) *Congressional intent.* It is the intent of Congress to strengthen the competitive free enterprise system by assisting qualified small business concerns to obtain bid, payment, or performance bonds and bonds ancillary thereto, which are otherwise unobtainable without a Small Business Administration (SBA) guarantee. Consequently, Congress has authorized SBA to guarantee on a prudent and economically justifiable basis (upon such terms and conditions as SBA may prescribe) sureties participating in the Surety Bond Guarantee (SBG) program, against a part of their losses incurred as a result of a principal's breach of the terms of a bid bond, payment bond, performance bond, or bonds which are ancillary to such bonds, on any contract not exceeding $1,250,000 in face value. Congress has further authorized SBA to empower selected sureties, without further SBA approval, to issue, monitor, and service such bonds, subject to SBA's guarantee. This latter program is hereafter referred to as the Preferred Surety Bond Program (PSB).

(b) *Types of bonds.* The Administration has determined that only bid, performance, and payment bonds (other than bonds in the nature of a financial guarantee) issued in connection with a contract and of a type listed in the "Contract Bonds" section of the current Rating Manual of the Surety Association of America [1] will be eligible for an SBA guarantee. In addition, the SBA guarantee may be extended to such ancillary bonds as are incidental to the contract and essential for its performance.

(c) *Guarantee agreement.* A surety company participating in this program shall be listed by the U.S. Treasury as eligible to issue bonds in connection with Federal procurement contracts, and be a corporation determined by SBA to be a surety eligible to participate in this program. The terms and conditions of SBA's bond guarantee agreements may vary from surety to surety, depending on SBA's experience with a particular surety. Where the statute does not mandate the division of losses, the Office of Surety Guarantees will consider, by way of example and not of limitation, surety's loss rate in this program in comparison with other sureties participating with SBA to a comparable degree, the rating or ranking designation assigned to the surety by recognized authority, the average contract amount or bond penalty per bond written in this program and the ratio of bid bonds to final bonds written in this program.

(d) *Selection of sureties for the PSB program.* SBA's selection of sureties empowered to issue, monitor and service bonds subject to SBA's guarantee without prior SBA approval will be guided by, but not limited to, these factors:

(1) An underwriting limitation of at least one and one-quarter million dollars ($1,250,000) on the U.S. Treasury Department list of acceptable sureties;

(2) An agreement to charge small concerns bonded under PSB no more than the advisory premium rates of the Surety Association of America, whether or not such rates are approved in or accepted by the relevant jurisdiction;

(3) Premium income from contract bonds guaranteed by any government agency (Federal, State or local) does not exceed one-quarter of the total contract bond premium income of the surety;

(4) Underwriting authority for SBA-guaranteed bonds is vested only in employees of the surety company;

(5) Final settlement authority for claims under the PSB program is vested in employees of a PSB surety's permanent claims department satisfactory to SBA;

(6) Number of bid and final contract bonds issued by the surety from year to year for the last five fiscal years;

(7) The rating or ranking designations assigned to the surety by recognized authority.

(e) *Duration of PSB program.* The PSB program shall terminate on September 30, 1992, unless extended by Act of Congress. SBA guarantees effective under this program on or before September 30, 1992, shall remain in effect after such date.

(f) *Participation in PSB program.* A surety authorized to issue, monitor, and service surety bonds subject to SBA's guarantee without obtaining prior SBA approval, shall not be eligible to submit applications under subpart B.

(g) *Timeliness.* (1) SBA's guarantee of a bond will be honored only if issued before the work under the contract has begun. To establish the exact bond issuance date, a surety shall maintain a contemporaneous record of the issuance of each bond (OMB Approval No. 3245-0007).

(2) For purposes of this paragraph (g), work on a job shall be considered as having begun when a contractor takes any action at the job site which exposes its surety to liability under applicable law.

(3) SBA may guarantee a bond issued after work on the contract has begun, but only by the signature on Form 991 (OMB No. 3245-0007) of an SBA official having delegated authority to approve contract amounts such as underlie the bond in question (see § 101.3-2, Part III(c) of this chapter), upon receipt of all of the following from the surety:

(i) Evidence (certified copy of contract or sworn affidavit) from the principal that the surety bond requirement was contained in the original job contract, or documentation satisfactory to SBA, as to why a surety bond was not previously secured and is now being required.

(ii) A certification by the principal listing all suppliers and indicating that they are paid to date, attaching a waiver of lien from each; that all taxes and labor costs are current; that all subcontractors are paid to their current status of work and a waiver of lien from each, or an explanation satisfactory to SBA why such documentation cannot be produced.

[1] 100 Wood Avenue South, Iselin, New Jersey 08830.

(iii) A certification by obligee that all payments due under the contract to present status have been made and that the job has been satisfactorily completed to present status.

§ 115.11 Definitions.

This section includes terms defined at 15 U.S.C. 694a and provides definitions of other terms.

Affiliate is defined in § 121.3(a) of this chapter.

Amount of contract. The amount of the contract to be bonded shall be established as of the time of issuance of the executed and guaranteed bond or bonds. The contract amount shall not exceed $1,250,000 in face value. The amounts of two or more contracts for a single project, to be performed in phases, shall not be aggregated if the prior bond is released (other than for maintenance or warranty—see definition of "contract" in this section) before the beginning of each succeeding phase. A "single project" means one represented by two or more contracts of one principal or its affiliates with one obligee or its affiliates for performance at the same locality, irrespective of job title or nature of the work to be performed. A service or supply contract covering more than a one-year period shall be eligible if the annual contract amount and the penal sum of the bond do not exceed $1,250,000 at any time.

Ancillary bond means a bond incidental and essential to the performance of the contract to which SBA's guarantee pertains.

Bid bond means a bond conditioned upon the bidder on a contract (not to exceed a contract amount of $1,250,000) entering into the contract, if bidder receives the award thereof, and furnishing the prescribed payment bond and performance bond. A bid bond guarantee shall expire 120 days after issuance of the bond, unless surety notifies SBA in writing before such 120th day that a later expiration date is required, stating such date.

Contract means an obligation of the principal requiring the furnishing of services, supplies, labor, materials, machinery, equipment or construction (including a warranty up to two years if such warranty is limited to defective materials or workmanship). The contract shall not be a permit, subdivision contract, lease, land contract, evidence of debt, financial guarantee (*e.g.*, a contract requiring payment(s) by principal to obligee), warranty of performance or efficiency, warranty of fidelity, or release of lien (other than for claims under a guaranteed bond) nor shall a contract prohibit a surety from performing the contract upon default of the principal. A warranty in excess of two years or against other than defective materials or workmanship shall not be covered by SBA's guarantee unless SBA, by a separate writing signed by surety and SBA, agrees to a warranty in excess of two years from completion or for other than materials and workmanship, ancillary to an otherwise eligible contract, if such warranty is the immediate contractual responsibility of the principal, upon a showing that such warranty is customarily required in the relevant trade or industry.

Contractor means the person with whom the obligee contracts to perform the contract.

Imminent Breach means a threat to the successful completion of a bonded contract which, unless remedied by surety, makes a default under the bond appear to be inevitable.

Issuance or *issued* means the release of the SBA-guaranteed executed bond by the surety, which binds surety to the contract if such contract is awarded to the principal.

Loss shall have the following meanings: (a) Loss Under Bid Bond. In the case of a bid bond, the lesser of the penal sum or the sum which is the difference between the bonded bid and the next higher responsive bid, less any amounts recovered by reason of the principal's defenses against the obligee's demand for performance by the principal and less any sums recovered from indemnitors and other salvage.

(b) Loss Under Payment Bond. In the case of a payment bond, at the surety's option, the sums necessary to pay all just and timely claims against the principal which are for the value of labor, materials, equipment and supplies furnished for use in the performance of the contract, and to pay other debts of the principal for which the surety is liable under the bond, or the penal sum of the payment bond, with interest and related court costs and attorney's fees, if any, less any amounts recovered (through offset or otherwise) by reason of the principal's claims against laborers, materialmen, subcontractors, suppliers or other rightful claimants, and less any sums recovered from indemnitors and other salvage.

(c) Loss Under Performance Bond. In the case of a performance bond, at the Surety's option, the sums necessary to meet the cost of fulfilling the terms of a contract, or the penal sum of the bond, with interest and related court costs and attorneys fees, if any, less amounts recovered (through offset or otherwise) by reason of the principal's defenses or causes of action against the obligee and less any sums recovered from indemnitors and other salvage.

(d) Loss under Ancillary Bond means a loss covered by that bond and attributable to the particular contract for which SBA-guaranteed payment or performance bonds were issued.

(e) Loss adjustment expense. Amounts actually paid, specifically allocable to the investigation, adjustment, negotiation, compromise, settlement of or resistance to a given claim (including court costs and reasonable attorney's fees) for loss resulting from the asserted breach of the terms of any guaranteed bond, but excluding all unallocated or overhead expenses of surety. Any allocation method must be reasonable and in accord with generally accepted accounting principles.

(f) Loss from litigation cost. Expenses shall also include court costs and reasonable attorney's fees incurred in suits to enforce mitigation of loss as defined in paragraphs (a) through (d) of this definition, including suits to obtain sums due from obligees, indemnitors, principals and others, but no such expense shall be paid for any such suits filed against the United States of America or any of its agencies, officers or employees unless the surety has, prior to filing such suit, received written concurrence from SBA that such suit may be filed, or unless such claim is asserted as a cross-claim or counterclaim.

(g) Loss from attorneys' fees and damages. "Loss" shall not include attorney's fees and court costs incurred by a surety in a suit by or against SBA or its Administrator, and shall not include such costs or payments (*e.g.*, tort damages) arising out of a successful suit sounding in tort initiated under the bond by a principal or any other person against such surety.

(h) Loss after excess contract amount. Where the contract amount, through change orders or otherwise is increased after issuance of the executed guaranteed bond beyond the statutory limit of $1,250,000, SBA's share of the loss shall be limited to that percentage of the increased contract amount, which the statutory limit represents, multiplied by the guarantee percentage approved by SBA. Thus, if a contract amount has been increased to $1,375,000, SBA's share of the loss under an 80% guarantee would be limited to 72.73% [1,250,000 ÷ 1,375,000=90.91% × 80%=72.73%].

Obligee means in the case of a bid bond, the person requesting bids for the performance of a contract, or in the case of a payment bond or performance bond, the person who has contracted with a Principal for the completion of

the contract and to whom the primary obligation of the surety runs in the event of a breach by the principal of the conditions of a payment bond or

Guarantee Agreement or a Preferred Surety Bond Agreement with SBA and:

(a) Under the terms of a bid bond, undertakes to pay a sum of money to the

be subcontracted. SBA will not guarantee bonds for contractors who are primarily brokers or packagers, see § 124.109(a) of this chapter.

Chapter I, and amended from time to time by publication in the Federal Register. For purposes of this paragraph, a substantial violation shall be one

Assistance," SBA Forms 994 and 994B or C (Underwriting Review), respectively (OMB Approval No. 3245-0007). Except

found to be disadvantaged by SBA pursuant to section 8(a) of the Small Business Act (15 U.S.C. 637(a)). See

VOL 54 ISS 216 NO 9 1989 UMI

the contract and to whom the primary obligation of the surety runs in the event of a breach by the principal of the conditions of a payment bond or performance bond. No person shall be named co-obligee on the bond or on a rider to the bond unless such person (including a lender to the original obligee) is bound by the contract to the principal or to the surety, if surety has arranged completion of the contract, to the same extent as the original obligee or unless such co-obligee is a Federal department or agency. In no event may the aggregate liability of the surety exceed the penal sum of the bond.

Payment bond means a bond conditioned upon the payment by the Principal of money to persons who furnish labor, materials, equipment and supplies for use in the performance of the contract, and to other persons who have a right of action against such bond.

Performance bond means a bond conditioned upon the completion by the principal of a contract in accordance with its terms. Such bond shall not prohibit a surety from performing the contract upon default of the principal.

Person means a natural person or a legal entity.

PSB Surety means a surety admitted by SBA to the Preferred Surety Bond Program (PSB) and authorized by SBA to issue, monitor and service without further SBA approval, bid, payment and performance bonds, and bonds ancillary thereto, which shall be guaranteed by SBA, subject to these regulations, if issued within the periodic allocations set by SBA for each such preferred surety (see § 115.60(b)).

Premium means an amount determined by applying an approved rate to the bond or contract amount, and does not include surcharges for extra services whether or not considered part of the "premium" under local law.

Principal means in the case of a bid bond, a person bidding for the award of a contract, or in the case of final and ancillary bonds, the person primarily liable to complete a contract for the obligee, or to make payments to other persons in respect of such contract, and for whose performance or payment the surety is bound under the terms of a payment or performance bond. A principal may be a prime contractor or a subcontractor.

PSB means the Preferred Surety Bond Program (See "PSB Surety" above).

Surety means the person which is listed by the U.S. Treasury, see § 115.10(c), and is a corporation determined by SBA to be a surety eligible to participate in this program, which has entered into a Surety Bond Guarantee Agreement or a Preferred Surety Bond Agreement with SBA and:

(a) Under the terms of a bid bond, undertakes to pay a sum of money to the obligee in the event the principal breaches the conditions of the bond;

(b) Under the terms of a performance bond, undertakes to pay a sum of money or to incur the cost of fulfilling the terms of a contract in the event the principal breaches the conditions of the contract; or

(c) Under the terms of a payment or an ancillary bond, undertakes to make payment to all persons supplying labor and material in the prosecution of the work under the contract and who have a right of action against the bond under local law, or

(d) Is an agent, independent agent, underwriter, or any other company or individual empowered to act on behalf of such person.

§ 115.12 Eligibility of principal.

In order to be eligible for a bond guaranteed by SBA, the principal must:

(a) *Size.* Qualify as a small business under part 121 of this chapter;

(b) *Character.* Possess good character and reputation. A Principal will be deemed to meet this standard if each owner of twenty percent or more of its equity, and each of its officers, directors, or partners possesses good character and reputation. Good character and reputation shall be presumed absent when any such person:

(1) Is under indictment (pending disposition of such indictment) for or convicted of a felony, or has suffered an adverse final civil judgment that he or she has committed a breach of trust or the violation of a law or regulation protecting the integrity of business transactions or business relationships; or

(2) A regulatory authority has revoked, cancelled or suspended the license of such person necessary to perform the contract; or

(3) Has obtained a bond guarantee by fraud or material misrepresentation (as these terms are defined in § 115.13), or has failed to keep Surety informed of unbonded contracts or a contract bonded by another surety as required by a bonding line commitment pursuant to § 115.36.

(c) *Need for bond.* Certify that a bond is required in order to bid on a contract or to serve as a prime contractor or subcontractor thereon;

(d) *Availability of bond.* Certify that a bond is not obtainable on reasonable terms and conditions without SBA's bond guarantee assistance; and

(e) *Partial subcontract.* Certify the percentage of work under the contract to be subcontracted. SBA will not guarantee bonds for contractors who are primarily brokers or packagers, see § 124.109(a) of this chapter.

(f) *Debarment.* Certify that applicant is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from transactions with any Federal department or agency, pursuant to governmentwide debarment and suspension rules. See, e.g., part 145 of this chapter, and 48 CFR subpart 9.4. Compliance with 13 CFR 145.510 shall satisfy this requirement, i.e., if surety has on file applicant's SBA Form 1624.

§ 115.13 Defenses of SBA.

In addition to equitable and legal defenses and remedies afforded by the general law of contracts, the statute and these regulations, SBA shall be relieved of all liability under any Surety Bond Guarantee, if:

(a) *Excess contract amount.* The total contract amount at the time of issuance of the bond or bonds exceeds $1,250,000 in face value; or

(b) *Misrepresentation.* The surety obtained the guarantee agreement or applied for reimbursement for losses by fraud or material misrepresentation. Material misrepresentation includes (but is not limited to) both the making of an untrue statement of material fact and the omission of a statement of material fact necessary to make a statement not misleading in light of the circumstances in which it was made, and includes the adoption by the surety of a material misstatement made by others which the surety knew or under generally accepted underwriting standards should have known to be false or misleading. Failure by the surety (as defined in § 115.11) to disclose its ownership (or the ownership by any owner of twenty percent or more of its equity) of an interest in a principal or an obligee shall be deemed the omission of a statement of material fact; or

(c) *Material breach.* The surety has committed a material breach of one or more terms or conditions of its guarantee agreement, whether under PSB or otherwise. For purposes of this paragraph, a material breach or breaches of such terms or conditions shall be deemed to have occurred if such breach (or such breaches in the aggregate) causes an increase in SBA's bond liability of at least 25 percent or $50,000 whichever is less, or if one of the statutory conditions (see § 115.30(a)) is not met; or

(d) *Regulatory violation.* The surety has substantially violated the SBA regulations as published in 13 CFR

Chapter I, and amended from time to time by publication in the Federal Register. For purposes of this paragraph, a substantial violation shall be one which increases the Agency's bond liability by more than 25 percent or $50,000 in the aggregate, whichever is less, or is contrary to the purposes of the program (see § 115.10(a)) or to the mission of SBA (see section 2 of the Small Business Act, 15 U.S.C. 631) or to national policy as stated in SBA regulations (see, for example and not as limitation, parts 112, 113, 116, 117 and 145 of this chapter); or

(e) *Alteration.* Surety agrees to or acquiesces in any material alteration in the terms, conditions or provisions of the bond(s), including but not limited to the following acts, without obtaining prior written approval from SBA which may be conditioned upon payment of additional fees:

(1) Name as an obligee on the bond(s) or on a rider to the bond any party (other than a Federal department or agency) which is not bound by the contract to the principal, or to the surety if surety has arranged completion of the contract, to the same extent as the original obligee; or

(2) Make any alterations in bond(s) issued with SBA's prior approval which would increase the bond(s) liability by more than either 25 percent, or $50,000 in the aggregate, whichever is less.

See also §§ 115.10(g), 115.30(a), 115.31(c), and 115.60(c)(4).

Subpart B—Guarantees Subject to Prior Approval

§ 115.30 Procedure for surety bond guarantee assistance.

(a) *General.* By submitting an application to SBA for a bond guarantee, surety shall be deemed to certify that the contractor is a small business concern, that the bond is expressly required by the terms of the bid solicitation or the contract (as the case may be), that the contractor is not able to obtain such bond on reasonable terms and conditions without an SBA guarantee, that the terms and conditions of the proposed bond are reasonable in the light of the risks involved and the extent of the surety's participation, and that there is a reasonable expectation that the principal, if awarded the contract, will perform the conditions of the contract with respect to which the bond is required.

(b) *Application for guarantee.* Application for an SBA guarantee (including a bonding line application—see also § 115.36(c)) is made by the contractor and the surety on a form "Application for Surety Bond Guarantee Assistance," SBA Forms 994 and 994B or C (Underwriting Review), respectively (OMB Approval No. 3245–0007). Except for premiums, contractor shall itemize on SBA Form 994 (Application for Surety Bond Assistance) all payments made, or to be made, by contractor to surety (as defined in § 115.11) for whatever purpose as a condition of, or in connection with, the issuance of the bond(s) to be guaranteed by SBA. Contractor and surety, respectively, shall disclose, by separate attachment to SBA Forms 994 and 994B or C, to the best of their knowledge any business and close family relationship between them (for definition of "close relative," see § 120.2–2(d) of this chapter). No negative statement is required. The contractor shall be required to execute and file SBA Form 1261 (Statements Required by Law or Executive Order) and SBA Form 1624 (Lower Tier Certification Form) (no OMB Approval No. required) with the initial application. In addition, the contractor shall complete and provide SBA Form 912, Statement of Personal History (OMB Approval No. 3245–0176), for each owner of 20 percentum (20%) or more of its equity and each officer, director and partner, for submission with contractor's initial application and on subsequent applications shall either certify that the information provided in the initial SBA Forms 912 remains complete and accurate, or submit updated SBA Forms 912. The completed application, together with the surety's report of underwriting review on SBA Form 994B or 994C (OMB Approval No. 3245–0007), shall be submitted to SBA only by a person empowered and authorized by the surety in writing to issue the bond applied for. A surety shall furnish SBA a true copy of its agent's power-of-attorney (including any dollar or other limitation thereon) before or with such agent's initial request for a guarantee, notice of any subsequent modification thereof, and a renewal notice on or before the expiration date of such power.

(c) *Indemnification.* (1) SBA shall pay to the surety ninety percent (90%) of the loss incurred and paid if:

(i) The total amount of the contract at the time of issuance of the bond is one hundred thousand dollars ($100,000) or less.

(ii) The bond was issued on behalf of a small concern owned and controlled by socially and economically disadvantaged individuals. "Socially and economically disadvantaged individuals" shall include Black Americans, Hispanic Americans, Native Americans, Asian Pacific Americans, Subcontinent Asian Americans, and other minorities or any other individual found to be disadvantaged by SBA pursuant to section 8(a) of the Small Business Act (15 U.S.C. 637(a)). See § 124.105 of this chapter. A concern so owned and controlled shall qualify if it qualifies as small under the size standard for its primary industry as set forth in part 121 of this chapter and if it is at least fifty-one percent (51%) or more owned by such disadvantaged individuals, and it is managed and its daily business operations are controlled by one or more such individuals.

(iii) In cases where the contract amount, subsequent to the issuance of the bond under paragraph (c)(1)(i) of this section, increases to more than $100,000, through change orders or otherwise, the percentage of SBA's indemnification of the surety shall decrease by one percentage point for each $5,000 of increase or part thereof, but shall not decrease below 80 percent. This provision shall not apply to guarantees which qualify under paragraph (c)(1)(ii) of this section.

(2) SBA shall indemnify a surety in an amount not to exceed an administrative ceiling of eighty percent (80%) of the loss on bonds issued to other than disadvantaged concerns in excess of $100,000 (one hundred thousand dollars).

§ 115.31 Approval or decline of surety's guarantee application.

(a) *Approval.* SBA's approval or decline of a guarantee application shall be made in writing only by the SBA officer having delegated authority to approve contract amounts such as underlie the bond in question (see § 101.3–2, Part III (c) of this chapter). This paragraph does not prohibit telephone notice by such officer to a surety that SBA's guarantee approval form has already been signed by such officer, in advance of surety's receipt of such approval (pending receipt by surety of such written approval): *Provided, however,* That the written approval shall be controlling, as against such telephone notice.

(b) *Reconsideration—appeal.* A request by a surety for reconsideration of a decline shall be directed to the appropriate SBA officer who made the decision to be reconsidered. If the decision on reconsideration is negative, the surety may make a further appeal to the Regional Administrator. If the decision is again adverse, surety may direct an appeal to the Associate Administrator for Finance and Investment, who shall make the final Agency decision.

(c) *Notice to SBA.* When surety has issued the final bonds, surety shall complete Items 19 to 26 on SBA Form

VOL 54 ISS 216 NO 9 1989 UMI

990, or in the case of a bonding line, SBA Form 994C, and submit the form, together with the principal's or the surety's check for the principal's guarantee fee (see § 115.35(b)) to SBA within 45 days after the later date of:

(i) The award of the bonded contract or

(ii) The issuance of the bond(s).

(2) If surety fails to submit such information and check in a timely fashion, SBA's guarantee of the bond shall be void from its inception, but may be reinstated, at SBA's discretion, upon a showing that:

(i) The contract is not in default and

(ii) A valid reason exists why a timely submission was not made.

§ 115.32 Underwriting and servicing standards.

(a) *Underwriting.* Sureties shall adhere to SBA's general principles and practices used in evaluating the credit, capacity, and character of a contractor as set forth in SBA's Surety Bond Guarantee Program Standard Operating Procedure (SOP 50–45), as amended from time to time,[2] and as supplemented by generally accepted standards of the surety business, to assure a reasonable expectation that the principal will perform the covenants and conditions of the contract, and that the terms and conditions of the bond are reasonable in the light of the risks involved and the extent of the surety's participation.

(b) *Servicing.* Sureties shall obtain from obligees of final bonds guaranteed by SBA job status reports on forms approved by SBA. Frequency, form and content of such reports shall be set forth in SOP 50–45 referred to in paragraph (a) of this section.

§ 115.33 SBA's review of surety's underwriting.

The authorized officer (see § 115.31(a)) shall review the surety's underwriting of a bond, taking into consideration the standards specified in § 115.32 for the purpose of making SBA's determination that the principal and the proposed bond(s) are eligible for SBA's guarantee, that there is a reasonable expectation that the principal will perform the covenants and conditions of the contract under consideration, that the terms of the bond are reasonable in the light of the risk involved and the extent of the surety's participation. A bid bond shall not be a forfeiture bond unless issued for a jurisdiction where statute or settled decisional law requires forfeiture bonds for public works.

[2] The SOP may be obtained from SBA' Office of Surety Guarantees.

§ 115.34 Reinstatement after default or failure to pay guarantee fee.

(a) *Conditions for reinstatement.* When legal action against a bond has been instituted, or when surety establishes a claim reserve for such bond, or when surety requests reimbursement of loss under such bond from SBA, or a principal on such bond has failed to pay SBA the fee required by § 115.35(b), the principal's file shall be transferred to SBA's Office of Surety Guarantees, unless that office, in its discretion and with the surety's recommendation, determines that further bond guarantees will assist in the prevention or elimination of loss to SBA. The application file will be retained in that office and the principal, including any affiliates, will not be considered for guarantees of bonds until principal pays the fee or surety has repaid SBA in full for all payments due to an imminent breach or due to the principal's default, as the case may be, or one of the following circumstances exists:

(1) Surety has settled its claim with principal for an amount less than the amount of loss; principal has made an agreed cash payment to surety for a portion of the settlement and has given a note for the balance to surety.

(2) Principal is presented with a claim which it contests and principal provides collateral acceptable to surety which has a liquidation value of not less than the amount of the claim including related expenses.

(3) The principal's indebtedness to the surety is discharged by operation of law as in bankruptcy or any judicial or quasi-judicial process.

(b) *Underwriting after reinstatement.* A guarantee application after default is subject to the most stringent underwriting review, taking into account the previous default, past work experience, present and future financial and work capability, and SBA's budgetary guidelines. While a settlement, as described above, permits reinstatement, prudent underwriting must take into consideration all past experience. Where, however, a surety with full knowledge of past experience is willing to bond the principal again, and states its belief that the principal can complete the proposed contract successfully and without another loss, SBA will give careful consideration to the surety's guarantee application.

§ 115.35 Fees and premiums.

(a) *Surety's premium.* A surety shall charge a principal no amount greater than that authorized by the appropriate insurance department. A surety shall make no requirement of a principal that it purchase casualty or other insurance or any other services from the surety or any affiliate or agent of the surety. A surety shall not make non-premium charges to a principal except where other services are performed and the additional charge or fee is permitted by the appropriate State law or regulation and agreed to by the principal.

(b) *SBA charge to principal.* No application or bid bond guarantee fee shall be charged to the small business by SBA. No bid bond guarantee fee shall be charged by SBA to the surety. If SBA guarantees a payment and/or performance bond, the principal shall pay to SBA to guarantee fee of $6 (six dollars) per thousand dollars (rounded off to the nearest one thousand dollars) of the contract amount (unless SBA agrees otherwise in writing) to be remitted to SBA by surety together with the notice required under § 115.31(c) of this part. See paragraph (c)(2) of this section for additional requirements in the event of certain changes in the bond obligation.

(c) *SBA charge to surety.* (1) Subject to § 115.39(a), a surety shall pay SBA a guarantee fee on each guaranteed bond computed at twenty percent (20%) of the bond premium. SBA shall not receive any portion of a surety's non-premium charges. Surety shall notify SBA of any increases or decreases in such contract or bond amount aggregating $10,000 or more, but no adjustment in fees shall be made therefor: *Provided,* That whenever the bond liability is increased by change order or otherwise, in excess of an aggregate amount of 25% or $50,000, whichever is less (see § 115.13(e)), SBA's approval of such increase(s) by SBA's authorized officer (see § 115.31(a)) on a supplemental SBA Form 990 (OMB Approval No. 3245–0007) shall be conditioned upon payment by the surety, in the normal course of business, of an additional twenty percent (20%) premium share for such increase(s). In these circumstances, the surety's application for approval thereof shall be accompanied by the principal's or the surety's check for the principal's additional guarantee fee for such increase computed as prescribed in paragraph (b) of this section: *Provided, however,* That an adjustment of SBA's premium share or the principal's guarantee fee amounting to less than forty dollars ($40) shall be disregarded. The surety's application pursuant to this paragraph shall be ineffective without such check for the principal's guarantee fee.

(2) Whenever such contract amount or bond liability is decreased by an aggregate amount in excess of 25% or $50,000, whichever is less, SBA shall promptly refund to the surety a proportionate amount of the principal's guarantee fee paid to SBA and rebate such proportionate amount of SBA's premium share in the normal course of business: *Provided, however,* That an adjustment of SBA's premium share or the principal's guarantee fee amounting to less than forty dollars ($40) shall be disregarded. The surety shall promptly pay such SBA refund and a proportionate amount of its premium to the principal.

§ 115.36 Surety bonding line.

(a) *General.* A surety bonding line is a written commitment by SBA to a surety which provides for the issuance of multiple bonds to a specified small business within pre-approved terms, conditions and limitations. A bonding line shall not exceed one year's duration. In addition to the other limitations and provisions set forth in this part 115, the following conditions apply to each surety bonding line (OMB Approval No. 3245–0007):

(b) *Underwriting.* A bonding line may be issued by SBA for a small business if the respective underwriting evaluation is satisfactory. The surety shall require the principal to keep it informed of all its contracts, bonded by the same or another surety or unbonded, during the time limit of the bonding line.

(c) *Application for bonding line.* The surety shall provide SBA with:

(1) In addition to the forms required pursuant to § 115.30(b), information about the small business deemed necessary by SBA;

(2) A determination regarding the limit on the number of contracts covered by SBA guaranteed bonds under the bonding line which the small business may undertake at any one time;

(3) A determination regarding the maximum dollar amount of any single bonded contract the small business can reasonably be expected to perform;

(4) A determination concerning the number and a limit of the total value of all outstanding bids plus uncompleted contracts ("work on hand," bonded by the same or another surety and unbonded) which the small business can reasonably be expected to perform simultaneously;

(5) A determination whether the small business' bonds should be restricted to a specific type or specialty of work or should be restricted to a geographical area.

(d) *Bonding line commitment conditions.* In the event a bonding line is approved, the written commitment shall be conditioned by limitations as follows:

(1) The time period of the bonding line not to exceed one year, subject to renewal in writing;

(2) The total dollar volume of the small concern's bonded and unbonded work on hand at any one time during the period of the bonding line;

(3) The number of such contracts during the period of the bonding line;

(4) The maximum dollar amount of any single guaranteed bonded contract;

(5) The bond covering a given contract shall be dated and issued before the work on the contract has begun (see § 115.10(g)(2)), or surety submits to SBA the documentation required under § 115.10(g)(3); and

(6) Any other limitation related to type, specialty of work, geographical area or credit.

(e) *Excess bonding.* If, after a bonding line is committed, the principal desires a bond and the Surety desires a guarantee exceeding a limitation of the bonding line, an application to SBA may be made under regular procedures.

(f) *Submission of forms to SBA.* Within 15 business days after the issuance of any final bonds under a bonding line, the surety shall submit notice to SBA on forms prescribed by SBA (OMB Approval No. 3245–0007) showing that the bond or bonds have been issued. Surety may use SBA Form 994C (OMB Approval No. 3245–0007) when a completed Form 994B is on file with SBA, except when new financial statements are received from the principal. If the surety fails to submit such form and the related check for the guarantee fee of the principal to SBA in a timely fashion, SBA's guarantee of the bond shall be void from its inception, but may be reinstated, at SBA's discretion, upon a showing that the contract is not in default—see § 115.10(g)(3)—and a valid reason exists why the timely submission was not made.

(g) *Additional information.* In addition to the information required under paragraph (f) of this section, surety shall submit any additional data deemed necessary by SBA.

(h) *Cancellation.* Upon the occurrence of a default, in the opinion of the surety, whether under a contract bonded by the same or another surety or an unbonded contract, the surety shall cancel the bonding line commitment. SBA, if it has approved the bonding line, or the surety may cancel a bonding line commitment at any other time upon written notice to the other party. In either event surety shall promptly notify the principal in writing. Cancellation by SBA will be effective upon receipt of such notice by the surety: *Provided, however,* That bonds issued before the effective date of cancellation shall remain guaranteed by SBA.

§ 115.37 Minimization of loss.

(a) *Indemnification agreements and collateral.* Surety shall take all reasonable action to minimize risk of loss, including, but not limited to, securing from each bonded principal a written indemnification agreement which shall cover actual losses under the contract, and payments pursuant to paragraph (b) of this section, secured by such collateral as the surety and/or SBA may deem appropriate. Other indemnity agreements from other persons or entities, secured by collateral or unsecured, may also be required by the surety and SBA. All SBA requirements concerning collateral and indemnity from parties other than the principal shall be communicated to the surety in the written commitments issued pursuant to §§ 115.31(a) or 115.36(d).

(b) *Imminent breach.* (1) A surety may apply to SBA for an agreement to indemnify such surety against loss sustained when making payments for the purpose of avoiding, or attempting to avoid, an imminent breach of the terms of a specific bond guaranteed by SBA, if the surety can demonstrate to SBA's satisfaction that such breach is imminent and that the principal has no other recourse to prevent such breech. No payment by SBA to avoid imminent breach shall exceed 10 per centum of the contract price, unless the Administrator finds that a greater payment is necessary and reasonable. In no event shall SBA pay an amount exceeding its guaranteed share of the bond penalty, see § 115.30(c), nor shall SBA make any duplicate payment pursuant to this provision or any other provision.

(2) A surety making payments to avoid imminent breach shall keep records concerning such payments that will enable SBA to ensure that its payments do not exceed its guaranteed share of the bond penalty, and that SBA's total payments under its guarantee of a given bond do not include a share of duplicate payments under such bond. See also § 115.32(b).

(c) *Salvage and recovery.* A surety shall pursue all possible sources of salvage and recovery, until SBA consents to discontinuance of such efforts or to a compromise. Such surety shall remit SBA's share of all such collections to SBA within 90 days of receipt by surety. In any dispute between two or more sureties concerning bonds which are guaranteed by SBA, such dispute shall first be brought to the attention of SBA's Office

VOL 54 ISS 216 NO 9 1989 UMI

recovery and for an additional three years thereafter, and, shall include the following records:

(1) The bond agreement;

(2) All documentation submitted by the principal in applying for the bond;

(3) All information gathered by the surety in reviewing the principal's application;

(4) All documentation of any breach by the principal;

(5) All records of any transactions for which the surety makes payment pursuant to the bond, including, but not limited to, copies of all claims, bills, judgments, settlement agreements and court or arbitration decisions, contracts and receipts;

(6) All documentation relating to efforts to mitigate losses, including documentation required by § 115.37(b) concerning imminent breach; and

(7) Records of any accounts into which fees and funds obtained in mitigation of losses have been paid, and from which payments have been made pursuant to the bond.

(c) *Purpose of audit.* Such audit shall determine but not be limited to

(1) The adequacy of the surety's underwriting and credit analysis;

(2) The adequacy and accuracy of the documentation of claims and the surety's claims settlement procedures and activities;

(3) The minimization of loss, including the exercise of bond options upon contract default; and

(4) The surety's loss ratio in comparison with other sureties participating with SBA to a comparable degree.

(d) *Investigations.* SBA may conduct such investigations as it deems necessary to inquire into the possible violation by any person of the Small Business Act and the Small Business Investment Act of 1958, as amended, or of any rule or regulation under these Acts, or of any order issued under these Acts, or any Federal law relating to programs and operations of the SBA.

(e) *Authority.* Authority for paragraphs (a), (b) and (d) of this section is contained in sections 310(a) and 411(g) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 687b(a) and 694b(g), and in the Inspector General Act of 1978 (5 U.S.C., App. I).

Subpart C—Preferred Surety Bond (PSB) Guarantees

§ 115.60 Procedures for PSB.

(a) *Applications.* A surety shall make application for admission to PSB in writing to the Director, Office of Surety Guarantees (OSG), Small Business Administration, 4040 N. Fairfax Drive, Suite 500, Arlington, Virginia 22203. That office shall determine the eligibility of the applicant for admission to PSB status (see § 115.10(d)) and review the applicant's standards and procedures for underwriting, administration and claims. A surety admitted to PSB shall execute a "Preferred Surety Bond Guarantee Agreement," before issuing SBA guaranteed bonds, and no SBA guarantee shall attach to bonds issued before SBA's Associate Administrator for Finance and Investment or his designee has countersigned such Agreement.

(b) *Allocation of guarantee authority.* OSG shall allot to each surety admitted to PSB a periodic maximum guarantee authority. No SBA guarantee shall attach to bonds issued by a PSB surety if such bonds are issued within a given period in excess of the allotted authority for such period and no reliance on past or future authority shall be permitted. A PSB surety's allocation shall be increased only by prior written permission of OSG. The penal sum of bid bond guarantees shall count against the allocation until the contract has been awarded, the bid withdrawn or the bid bond has expired (see definition in § 115.11). The release of final bonds shall not restore such periodic allocation.

(c) *Operations.* (1) A PSB surety shall observe all applicable SBA regulations (including but not limited to parts 112, 113, 115, 116 and 117) and obtain from its applicants all the information and certifications required by SBA. The PSB surety shall document such observance of regulations and retain such certifications (including a contemporaneous record of the date of issuance of each bond) in its files, for inspection by SBA or its agents and for submission to SBA in connection with claims made under SBA's guarantee. See also § 115.10(g).

(2) A PSB surety shall issue and administer SBA-guaranteed bonds in the same manner and with the same staff as the surety's activity outside the PSB program. Such surety shall send requests for job status reports to the obligees in accordance with its own procedures.

(3) The PSB surety shall pay SBA 20 percent of the premium of final bonds, and remit to SBA the principal's check or its own check for the principal's guarantee fee of $6 (six dollars) per thousand dollars of the contract or bond amount, according to the PSB surety's own premium base (rounded off to the nearest one thousand dollars). SBA's premium share shall be remitted as agreed between SBA and the PSB surety. The check for the principal's guarantee fee shall be remitted with the bordereau listing the related final bond. See § 115.35(b).

(4) A PSB surety shall advise SBA by monthly bordereau of all bid bonds issued and of the issuance of final bonds or the surety's approval of increases and decreases in the bond liability. SBA's guarantee shall not cover a final bond for which SBA has not received notice on the monthly bordereau for the month in which the bond was issued or the liability increase was approved by the PSB surety, as the case may be. The notice shall contain the name, trade address and employer ID number of the principal, the PSB surety's and SBA's identifying number(s), the obligee's name and address, a brief description of the nature, extent and location of the job, the bid or estimated contract amount and the bond amount.

(5) The PSB surety shall advise SBA within thirty (30) calendar days of the name and address of a principal when legal action against such principal's bond has been instituted or when the obligee has declared a default or when the surety has established a claim reserve. Such surety shall similarly notify SBA within thirty (30) days if SBA's payments under its guarantees have been reimbursed and if surety determines to bond such principal again.

(6)(i) The PSB surety shall process bond liability increases within its allocation (see § 115.60(b)) in the same manner as initial guaranteed bond issuances (see paragraph (c)(4) of this section), present checks for additional fees due from the principal computed on the aggregate increase(s), only if they exceed 25 percent or $50,000, whichever is less, computed pursuant to paragraph (c)(3) of this section and attach such payment(s) to the respective monthly bordereau: *Provided, however,* That an adjustment of SBA's premium share or the principal's guarantee fee amounting to less than forty dollars ($40) shall be disregarded.

(ii) Where such bond liability is decreased to a like extent, the PSB surety shall promptly remit to the principal SBA's refund of such principal's guarantee fee (see § 115.35(c)(5)(B), and adjust SBA's premium share accordingly in the normal course of business: *Provided, however,* That an adjustment of SBA's premium share or the principal's guarantee fee amounting to less than forty dollars ($40) shall be disregarded.

§ 115.61 Claims for losses.

(a) *How claims are submitted.* A PSB surety shall submit to SBA claims for reimbursement of losses paid on its own

of Surety Guarantees for an attempt at mediation and settlement.

§ 115.58 Claims for losses.

Claims for reimbursement on account of losses which surety has paid shall be submitted (together with a copy of the bond and the bonded contract with the initial claim) to SBA's Office of Surety Guarantees within one year from the time of each disbursement on SBA Form 994H (OMB Approval No. 3245–0007). Claims submitted after one such year shall be accompanied by complete substantiation to SBA's satisfaction. Loss will be determined as of the date of receipt by SBA of such claim for reimbursement, or as of such later date as additional information requested by SBA is received. Surety shall further submit semiannual status reports on each claim, six months after the initial default notice and in six-month intervals thereafter. SBA may request additional information. Subject to part 140 of this chapter, SBA shall pay its share of loss within ninety (90) days of receipt of the requisite information. Surety shall reimburse or credit SBA (in the same proportion as SBA's share of loss) within ninety (90) days of any recovery or salvage by surety. Claims for reimbursement and any additional information provided are subject to review and audit by SBA, including but not limited to the surety's compliance with SBA's regulations and the requirements of SBA forms.

§ 115.59 Refusal to issue further guarantees.

(a) *Improper surety bond guarantee practices.* SBA at its sole discretion may refuse to issue further guarantees to a surety where SBA finds that the surety, in its underwriting of surety bonds guaranteed by SBA, or in its efforts to minimize loss, or in its claims practices, or its documentation related to such bonds, has failed to adhere to prudent underwriting standards or other prudent surety practices, as compared to those of other sureties participating in the SBA Surety Bond Guarantee Program, including any standards or practices required and communicated by SBA. Acts of wrongdoing such as fraud, material misrepresentation, breach of the guarantee agreement or regulatory violation (as defined in § 115.13 above) shall constitute adequate grounds for refusal to issue further guarantees. SBA may also require the renegotiation of the percentage of its loss guarantee under § 115.10(c) and/or its charge to surety under § 115.35(c), with a surety which experiences excessive losses on SBA-guaranteed bonds, relative to those of other sureties participating in the program to a comparable degree. Such refusals or sanctions will be issued by SBA's Associate Administrator for Finance and Investment. Any surety that has been so sanctioned may file a petition for review of the sanction in accordance with § 134.11(a) of this chapter. Proceedings concerning such petition shall be conducted in accordance with the provisions of part 134 of this chapter. The Assistant Administrator of the Office of Hearings and Appeals or an Administrative Law Judge of such office shall be the reviewing official for purposes of § 134.34 of this chapter.

(b) *Business integrity.* Any person qualifying as a surety, including any officer, director, individual partner, other individual holding twenty or more percent of the surety's voting securities, and any agent, independent agent, underwriter or individual empowered to act on behalf of such person shall be deemed to have good character and (subject to § 115.30(b) of this part) be entitled to present applications for guarantees of bonds: *Provided, however,* That good character shall be presumed absent in the following circumstances:

(1) When a State or other authority regulating insurance (including the surety industry) has revoked or cancelled the license required of such person or engage in the surety business, the right of such person to participate in the program may be denied or terminated as applicable. When such authority has suspended such license, the right to participate may be suspended for the duration of such suspension.

(2) When such person has been indicted or otherwise formally charged with a misdemeanor or felony bearing on such person's fitness to participate in the program, the participation of such person may be suspended until the charge is disposed of. Upon conviction, participation may be denied or terminated.

(3) When such person has suffered an adverse final civil judgment holding that such person has committed a breach of trust or violation of a law or regulation protecting the integrity of business transactions or relationships, participation may be denied or terminated.

(4) When such person has made a material misrepresentation or willfully false statement in the presentation of oral or written information to SBA in connection with an application for a surety bond guarantee or the presentation of a claim thereon, or committed a material breach of the guarantee agreement or a material violation of the regulations (all within the meaning of § 115.13(b)), the participation may be denied or terminated.

(5) When such person is debarred, suspended, voluntarily excluded from or declared ineligible for participation in Federal programs, participation may be denied or terminated.

(c) *SBA proceedings.* Surety shall notify SBA if and when any of the above mentioned persons does not, or ceases to, qualify as a surety under this section. SBA may require submission of SBA Form 912, Statement of Personal History (OMB Approval No. 3245–0178) from any of these individuals. All proceedings for suspensions, terminations from and reinstatements to participation in the Surety Bond Guarantee program shall be conducted in the manner described in subsection (a) of this section. The Administrator may, pending a hearing and decision pursuant to part 134 of this Chapter, suspend the participation of any surety for any of the causes listed in paragraphs (b)(1) through (5) of this section. A guarantee issued by SBA before a suspension or termination under this section shall remain in effect.

§ 115.60 Audits and investigations.

(a) *Audits.* At all reasonable times, SBA may audit in the office of either a participating surety, its attorneys, or the contractor or subcontractor completing the contract all documents, files, books, records, tapes, disks and other material relevant to the Administration's surety bond guarantee, commitments to guarantee a surety bond, or agreements to indemnity the surety. Failure of a surety to consent to such audit or maintain such records shall be grounds for SBA to refuse to issue further surety bond guarantees or to honor claims until such time as the surety consents to such audit: *Provided, however,* That when SBA has so refused to issue further guarantees or to honor such claims, the surety may file a petition for review of such adverse action in accordance with § 134.11(a) of this chapter. Proceedings concerning such appeal shall be conducted in accordance with the provisions of part 134. The Assistant Administrator of the Office of Hearing and Appeals or an Administrative Law Judge of such office shall be the reviewing official for purposes of § 134.34.

(b) *Records.* The relevant records within the meaning of paragraph (a) of this section shall be maintained for the term of each bond, plus such additional time as may be required to settle claims for which the surety may seek recovery from SBA or attempt salvage or other

VOL 54 ISS 216 NO 9 1989 UMI

form if such form is approved by SBA no later than one year from disbursement. Loss will be determined as of the date of receipt by SBA of such claim for reimbursement, or as of such later date as additional information or documents requested by SBA are received. SBA may request additional information or documents. Subject to part 140 of this chapter, SBA shall pay its share of loss within ninety (90) days of receipt of the requisite information. The PSB surety shall reimburse or credit SBA (in the same proportion as SBA's share of loss) within ninety (90) days of any recovery or salvage by surety. Claims for reimbursement and any additional information provided are subject to review and audit by SBA.

(b) *Imminent breach.* A PSB surety may make payments to avoid imminent breach without prior SBA approval whether or not such payment exceeds 10 per centum (10%) of the contract price, but SBA's guaranteed share of the aggregate of such payments and of indemnification against loss shall be limited to SBA's guaranteed share of the bond penalty. In no event shall SBA make any duplicate payment pursuant to this paragraph (b) or any other provision of these regulations. A PSB surety making payments to avoid imminent breach shall keep records concerning such payments that will enable SBA to ensure that its payments do not exceed its guaranteed share of the bond penalty, and that SBA's total payments under its guarantee of a given bond do not include a share of duplicate payments under such bond.

§ 115.62 Qualifications of surety.

(a) *Improper surety bond guarantee practices.* SBA at its sole discretion may suspend the preferred status of a PSB surety pursuant to paragraph (d) of this section, where SBA finds that the surety, in its underwriting of surety bonds guaranteed by SBA, or in its efforts to minimize loss, or in its claims practices, or its documentation related to such bonds, has failed to adhere to prudent underwriting standards or other prudent surety practices, as compared to those of other PSB sureties participating in the SBA Surety Bond Guarantee Program. Acts of wrongdoing such as fraud, material misrepresentation, breach of the guarantee agreement or regulatory violation (as defined in § 115.13 above) shall constitute adequate grounds for refusal to continue preferred status. SBA may also require the renegotiation of the percentage of its loss guarantee under § 115.64(a) and/or its charge to surety under § 115.60(c)(3), with a surety which experiences excessive losses on SBA-guaranteed bonds, relative to those of other PSB sureties participating in the program to a comparable degree. Such sanctions will be issued by SBA's Associate Administrator for Finance and Investment. Any surety that has been so sanctioned may file a petition for review of the sanction in accordance with § 134.11(a) of this chapter. Proceedings concerning such petition shall be conducted in accordance with the provisions of part 134 of this chapter. The Assistant Administrator of the Office of Hearings and Appeals or an Administrative Law Judge of such office shall be the reviewing official for purposes of § 134.34 of this chapter.

(b) *Business integrity.* Any person qualifying as a PSB surety, including any officer, director, individual partner, other individual holding twenty or more percent of the surety's voting securities, and any agent, independent agent, underwriter or individual empowered to act on behalf of such person shall be deemed to have good character: *Provided, however,* That good character shall be presumed absent in the following circumstances:

(1) When a State or other authority regulating insurance (including the surety industry) has revoked or cancelled the license required of such person to engage in the surety business, the right of such person to participate in the program may be dined or terminated as applicable. When such authority has suspended such license, the right to participate in the PSB program in any capacity may be suspended for the duration of such suspension.

(2) When such person has been indicted or otherwise formally charged with a misdemeanor or felony bearing on such person's fitness to participate in the program, the participation of such person may be suspended until the charge is disposed of. Upon conviction, participation may be denied or terminated.

(3) When such person has suffered an adverse final civil judgment holding that such person has committed a breach of trust or violation of a law or regulation protecting the integrity of business transactions or relationships, participation may be denied or terminated.

(4) When such person has made a material misrepresentation or willfully false statement in the presentation of oral or written information to SBA in connection with an application for a surety bond guarantee or the presentation of a claim thereon, or committed a material breach of the guarantee agreement or a material violation of the regulations (all within the meaning of § 115.13), the participation may be denied or terminated.

(5) When such person is debarred, suspended, voluntarily excluded from or declared ineligible for participation in Federal programs, participation may be denied or terminated.

(c) *SBA proceedings.* The PSB surety shall notify SBA if and when any of the above mentioned persons does not, or ceases to, qualify as a surety under this section. SBA may require submission of SBA Form 912, Statement of Personal History (OMB Approval No. 3245-0178) from any of these individuals. The Administrator may, pending a hearing and decision pursuant to part 134 of this chapter, suspend the participation of any surety for any of the causes listed in paragraphs (b)(1) through (5) of this section. A guarantee issued by SBA before a suspension or termination under this section shall remain in effect.

(d) *Suspension and termination of preferred status.* SBA reserves the right to suspend the preferred status of a surety by written notice stating SBA's reason(s) for such suspension, at least 30 calendar days prior to the effective date of the suspension. Any bonds issued under SBA's guarantee prior to the effective date of such suspension shall remain covered by SBA's guarantee. Reasons for such suspension, in addition to the defenses listed in § 115.13, shall include, but not be limited to, an excessive loss experience as compared to other PSB surety companies participating with SBA to a comparable degree, a finding of violation of the PSB surety's approved underwriting or claims procedures, or of SBA's regulations, or that the surety no longer meets the qualification for preferred status (§ 115.10(d)). Any surety that has been so suspended may file a petition for review of such suspension in accordance with § 134.11(a) of this chapter. Proceedings concerning such petition shall be conducted in accordance with the provisions of part 134 of this chapter and may result in the surety's termination from surety bond program participation (§ 134.3(i)). The Assistant Administrator of the Office of Hearings and Appeals or an Administrative Law Judge of such office shall be the reviewing official for purposes of § 134.34.

§ 115.63 Audits and investigations.

(a) *Records and reports.* Each PSB surety shall be audited at least once each year by examiners selected and approved by the Administration. At all reasonable times, SBA may audit in the office of either a PSB surety, its attorneys, or the contractor or subcontractor completing the bonded contract all documents, files, books, records, tapes, disks and other material relevant to the Administration's surety bond guarantee, or agreements to indemnify the PSB surety. Failure of a PSB surety to consent to such audit or maintain such records shall be grounds for SBA to suspend such PSB surety from participation or to honor claims until such time as the surety consents to such audit: *Provided, however,* That when SBA has so refused to issue further guarantees, the surety may file a petition for review of such refusal in accordance with § 134.11(a) of this chapter. Proceedings concerning such appeal shall be conducted in accordance with the provisions of part 134. The Assistant Administrator of the Office of Hearings and Appeals or an Administrative Law Judge of such office shall be the reviewing official for purposes of § 134.34.

(b) *Time period.* The relevant time period and the records subject to such audit are those listed in § 115.40(b).

(c) *Investigation.* SBA may conduct such investigations as it deems necessary to inquire into the possible violation by any person of the Small Business Act and the Small Business Investment Act of 1958, as amended, or of any rule or regulation issued under these Acts, or of any order issued under these Acts, or of any Federal law applicable to programs or operations of the SBA.

(d) *Authority.* Authority for this section is contained in sections 310(a) and 411(g) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 687b(a) and 694b(g)), and in the Inspector General Act of 1978 (5 U.S.C., App. I).

§ 115.64 Liability of SBA.

(a) *Percentage of Indemnification.* SBA shall indemnify a surety operating under PSB in an amount not to exceed seventy percent (70%) of its loss as that term is defined in § 115.11.

(b) *Grounds for denial of indemnification.* SBA shall deny liability to a PSB surety if:

(1) The total contract amount at the time of issuance of the bond or bonds exceeds $1,250,000, whether or not the liability under the bond(s) exceeds that amount;

(2) The principal is not a small business, as defined in part 121 of this chapter;

(3) The bond is not required under the bid solicitation or the contract;

(4) The SBA guarantee of the bond has been obtained, or the surety has applied for indemnification against losses, by fraud or material misrepresentation, as these terms are defined in § 115.13;

(5) The bond was not eligible for guarantee by SBA because the bonded contract did not comply with the definition of contract in § 115.11;

(6) The loss occurred under a bond that was not guaranteed by SBA;

(7) The loss does not fall within the definition of eligible "loss" in § 115.11;

(8) The loss occurred under a final bond for which the check(s) for the contractor's guarantee fee had not been received with the related bordereau(x) by SBA;

(9) The PSB surety's guaranteed bond was issued without SBA's consent after work under the contract had begun, as defined in § 115.10(g);

(10) The PSB surety's guaranteed bond was issued in an amount which, together with all other such bonds, exceeded the allotment for the period during which such bond was issued and no prior SBA approval had been obtained;

(11) The bond was not listed on the bordereau for the period during which it was issued;

(12) The loss did not result from the principal's breach of the contract for which the guaranteed payment or performance bond were issued;

(13) The loss under an ancillary bond is not attributable to the particular contract for which SBA-guaranteed payment or performance bonds were issued.

Department of Defense
General Services Administration
National Aeronautics and Space Administration

48 CFR Parts 15, 31, and 52
Federal Acquisition Regulation (FAR); Cost of Postretirement Benefits Other Than Pensions; Proposed Rule

VOL 54 ISS 216 NO 9 1989 UMI

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 15, 31, and 52

Federal Acquisition Regulation (FAR); Cost of Postretirement Benefits Other Than Pensions

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering amending FAR 15.804–6, 31.205–6, 52.216–7, and 52.232–16, and adding 52.215–38 to set forth a new rule on the allowability of postretirement benefits other than pensions on U.S. Government contracts.

DATE: Comments should be submitted to the FAR Secretariat at the address shown below on or before January 8, 1990 to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 89–70 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Margaret A. Willis, FAR Secretariat, Room 4041, GS Building, Washington, DC 20405 (202) 523–4755.

SUPPLEMENTARY INFORMATION:

A. Background

The Financial Accounting Standards Board has proposed a rule which would require that, for purposes of financial accounting, certain liabilities and costs be recognized in connection with postretirement benefits other than pensions. The Councils are proposing a rule, for purposes of cost recognition under Government contracts, which would require either payment of the liability or dedicated funding as a condition of allowability. Such a rule would be consistent with the Government's time-honored policy precedent, notably in the qualified pension area, with regard to material distant liabilities. The Councils believe that the cash flow advantages that would inure to contractors, should unfunded accruals be reimbursed under contracts, could not be justified as public policy.

B. Regulatory Flexibility Act

The proposed changes to 15.804–6, 31.205–6(m), 52.216–7, and 52.232–16, and the adding of 52.215–38 clarify a condition of allowability, namely funding or payment, upon those who wish to be reimbursed under Government contracts. As such, there is no administrative burden on businesses of any size. The proposed changes are not expected to have a significant impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because most contracts awarded to small entities are awarded on a competitive, fixed-price basis and the cost principles do not apply. An Initial Regulatory Flexibility Act analysis has therefore not been performed. Comments are invited from small businesses and other interested parties. Comments from small entities concerning the affected FAR subparts will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and must cite section 89–610 (FAR Case 89–70).

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose recordkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, et seq.

List of Subjects in 48 CFR Parts 15, 31, and 52

Government procurement.

Dated: November 1, 1989.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, it is proposed that 48 CFR parts 15, 31, and 52 be amended as set forth below:

1. The authority citation for 48 CFR parts 15, 31, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2473(c).

PART 15—CONTRACTING BY NEGOTIATION

2. Section 15.804–6 is amended by adding paragraph (f) to read as follows:

15.804–6 Contract clauses.

* * * * *

(f) *Postretirement benefit funds.* The contracting officer shall insert the clause at 52.215–38, Reversion or Adjustment of Postretirement Benefits other than Pensions (PRB) Plans, in solicitations and contracts for which it is anticipated that certified cost or pricing data will be required or for which any preaward or postaward cost determinations will be subject to Subpart 31.2

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

3. Section 31.205–6 is amended by revising paragraph (m)(1); by redesignating paragraph (m)(2) as (m)(3); and adding a new paragraph (m)(2) to read as follows:

31.205–6 Compensation for personal services.

* * * * *

(m) *Fringe benefits.* (1) Fringe benefits are allowances and services provided by the contractor to its employees as compensation in addition to regular wages and salaries. Fringe benefits included, but are not limited to, the cost of vacations, sick leave, holidays, military leave, employee insurance, postemployment benefits such as pensions and retiree health care, and supplemental unemployment benefit plans. Except as provided otherwise in Subpart 31.2, the costs of fringe benefits are allowable to the extent that they are reasonable and are required by law, employer-employee agreement, or an established policy of the contractor.

(2) To be allowable in the current year, the costs of postretirement benefits other than pensions (PRB) must be paid either to (i) an insurer, provider, or other recipient as current year costs or premiums, or (ii) an insurer or trustee to establish and maintain a fund or reserve for the sole purpose of providing PRB to retirees. Further, to be allowable, costs of the type referenced in 31.205–6(m)(2)(ii) must be calculated and certified according to the provisions of 42 CFR 403.258 (a) and (b) and be funded or otherwise liquidated by the time set for filing the Federal income tax return or any extension thereof. The Government shall receive an equitable share of any amount of previously funded PRB costs which revert or inure to the contractor. Such equitable share shall reflect the Government's previous participation in PRB costs through those contracts for which certified cost or pricing data were required or which were subject to Subpart 31.2.

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

4. Section 52.215–38 is added to read as follows:

52.215–38 Reversion of adjustment of funds for postretirement benefits other than pensions (PRB) plans.

As prescribed in 15.804–6(e), insert the following clause:

Reversion or Adjustment of Postretirement Benefits Other Than Pensions (PRB) Plans (Oct 1989)

The Contractor shall promptly notify the Contracting Officer in writing when it determines that it will terminate or reduce a PRB plan. If PRB fund assets revert, on inure, to the Contractor or are constructively received by it under a plan termination or otherwise, the Contractor shall make a refund or give a credit to the Government for its equitable share as required by FAR 31.205–6(m). The Contractor shall include the substance of this clause in all subcontracts under this contract which meet the applicability requirements of FAR 15.804–6(f). The resulting adjustment to prior years' PRB costs will be determined and applied in accordance with FAR 31.205–6(m)(2).

(End of clause)

5. Section 52.216–7 is amended by removing in the title of the clause the date "(APR 1984)" and inserting in its place "(OCT 1989)"; by revising the first sentence of paragraph (b)(2) of the clause; and by removing the derivation lines following "(End of clause)" to read as follows:

52.216–7 Allowable cost and payment.

* * * * *

(b) * * *

(2) Contractor contributions to any pension or other postretirement benefit, profit-sharing, or employee stock ownership plan funds that are paid quarterly or more often may be included in indirect costs for payment purposes; *provided*, that the Contractor pays the contribution to the fund within 30 days after the close of the period covered. * * *

* * * * *

6. Section 52.232–16 is amended by removing in the title of the clause the date "(AUG 1987)" and inserting in its place "(OCT 1989)" and by revising paragraph (a)(2)(iii) of the clause to read as follows:

52.232–16 Progress payments.

* * * * * *

(a) * * *

(2) * * *

(iii) Accrued costs of Contractor contributions under employee pension or other postretirement benefit, profit sharing, and stock ownership plans shall be excluded until actually paid unless—

Title 3—

The President

Proclamation 6061 of November 7, 1989

National Hospice Month, 1989 and 1990

By the President of the United States of America

A Proclamation

Employing the skills of a full cadre of health care professionals and volunteers—including physicians, nurses, counselors, therapists, and members of the clergy—hospice care enables terminally ill individuals to live peacefully and comfortably in their final days. The dedicated men and women who provide hospice care help terminally ill patients to face natural death without feeling alone or unprepared. They also help patients' families cope with emotional suffering and loss. A vital portion of our Nation's health care system, hospice programs reaffirm the inherent dignity and worth of each individual while underscoring our reverence for human life.

In recent years, the public and private sectors have forged a unique partnership in the development of hospice programs and services for terminally ill individuals and their families. Today, a permanent Medicare hospice benefit and the implementation of a hospice benefit by several State Medicaid programs enable more terminally ill Americans to obtain needed care. Many private insurance companies and employers also provide hospice benefits in health care coverage packages. These programs are helping to ensure that hospice care remains a positive, viable alternative for terminally ill individuals and their loved ones.

In acknowledgment of the value of hospice programs and in grateful recognition of the thousands of health care professionals and volunteers who care for the terminally ill, the Congress, by Senate Joint Resolution 78, has designated the months of November 1989 and 1990 as "National Hospice Month" and has authorized and requested the President to issue a proclamation in observance of these months.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the months of November 1989 and 1990 as National Hospice Month. I urge all government agencies, hospice organizations, health care providers, and the people of the United States to observe these months with appropriate programs and activities designed to encourage recognition of and support for hospice care as a humane response to the needs of the terminally ill and as a viable component of our Nation's health care system.

IN WITNESS WHEREOF, I have hereunto set my hand this seventh day of November, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

George Bush

Proclamation 6062 of November 7, 1989

National Glaucoma Awareness Week, 1989

By the President of the United States of America

A Proclamation

Our eyesight is a great and precious gift. Most of us have been blessed with the ability to see the faces of loved ones, to view the natural wonders that surround us, and to read a good book or informative journal. Tragically, however, too many Americans are at risk of losing their eyesight to glaucoma.

Glaucoma is a serious disease that, if left undetected or untreated, can lead to blindness. In fact, glaucoma is a leading cause of vision loss among older men and women. Black Americans of all ages are also highly vulnerable to this disease, as are persons with diabetes or a family history of glaucoma.

Of the two million Americans known to suffer from glaucoma, some 80,000 are legally blind. It is estimated that several million Americans suffer from ocular hypertension, which is frequently a silent symptom of the disease.

Fortunately, glaucoma is treatable, and blindness from the disease is almost always preventable. However, because glaucoma is often asymptomatic in its early stages, millions of healthy people are unaware that they have the disease. That is why periodic, comprehensive eye exams are so important—especially for those at higher risk of developing glaucoma and other eye ailments.

In recognition of the importance of promoting public awareness about glaucoma and of encouraging all Americans to obtain periodic eye examinations, the Congress, by Senate Joint Resolution 194, has designated the week beginning November 12, 1989, as "National Glaucoma Awareness Week" and has authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week beginning November 12, 1989, as National Glaucoma Awareness Week. I call upon health care providers, private voluntary organizations, and the people of the United States to observe this week with appropriate programs, ceremonies, and activities designed to encourage all Americans to have their eyes examined regularly.

IN WITNESS WHEREOF, I have hereunto set my hand this seventh day of November, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

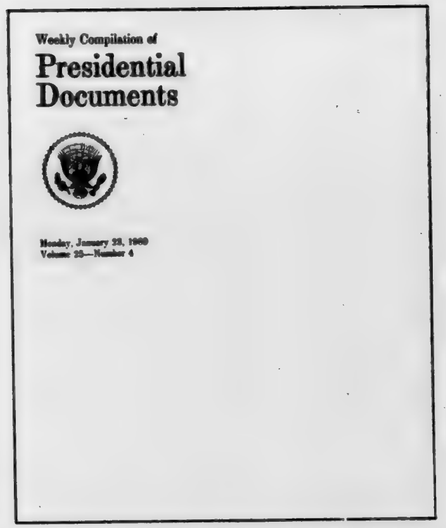
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SAN FRANCISCO, CA

WHEN: November 29; at 9:00 a.m.
WHERE: Room 15138,
450 Golden Gate Avenue,
San Francisco, CA.
RESERVATIONS: Call Mary Walters at the San Francisco Federal Information Center,
415-556-6000.

SEATTLE, WA

Title 3—

The President

Proclamation 6063 of November 8, 1989

Montana Centennial Day, 1989

By the President of the United States of America

A Proclamation

On November 8, 1889, Montana was admitted to the Union as the 41st State. In the century that has followed, the people of Montana have built upon their frontier heritage and made substantial contributions to our Nation's economic and social well-being.

During their famous expedition early in the 19th century, Captains Meriwether Lewis and William Clark introduced this "Big Sky Country" to the world. By wagon train and later by railroad, a rush of homesteaders seized the opportunity to cultivate this new land and enjoy its abundant natural resources. Our Nation's fourth largest State is now home to a number of important industries—such as farming, ranching, mining, and tourism—that utilize its spectacular wealth of forests, prairies, wildlife, minerals, and natural beauty. Montanans are a proud, hardworking, and community-minded people who have added strength and color to the character of America.

In recognition of these contributions, the Congress, by Senate Joint Resolution 19, has designated November 8, 1989, as "Montana Centennial Day" and has authorized and requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim November 8, 1989, as Montana Centennial Day.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of November, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

George Bush

Rules and Regulations

Federal Register
Vol. 54, No. 217
Monday, November 13, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 683]

Navel Oranges Grown in Arizona and Designated Part of California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona navel oranges that may be shipped to domestic markets during the period from November 10 through November 16, 1989. Consistent with program objectives, such action is needed to balance the supplies of fresh navel oranges with the demand for such oranges during the period specified. This action was recommended by the Navel Orange Administrative Committee (Committee), which is responsible for local administration of the navel orange marketing order.

DATES: Regulation 683 (7 CFR part 907) is effective for the period from November 10 through November 16, 1989.

FOR FURTHER INFORMATION CONTACT: Jacquelyn R. Schlatter, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–8139.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order 907 (7 CFR part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Department Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 123 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order and approximately 4,065 navel orange producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

The California-Arizona navel orange industry is characterized by a large number of growers located over a wide area. The production area is divided into four districts which span Arizona and part of California. The largest proportion of navel orange production is located in District 1, Central California, which represented 65 percent of the total production in 1988–89. District 2 is located in the southern coastal area of California and represented 13 percent of 1988–89 production; District 3 is the desert area of California and Arizona, and it represented approximately 1 percent; and District 4, which represented approximately 1 percent, is northern California. The Committee's estimate of 1989–90 production is 73,350 cars (one car equals 1,000 cartons at 37.5 pounds net weight each), as compared with 70,833 cars during the 1988–89 season.

The three basic outlets for California-Arizona navel oranges are the domestic fresh, export, and processing markets. The domestic (regulated) fresh market is a preferred market for California-Arizona navel oranges. The Committee estimates that about 68 percent of the 1989–90 crop of 73,350 cars will be utilized in fresh domestic channels (49,500 cars), with the remainder being exported fresh (10 percent) or processed (22 percent). This compares with the 1988–90 total of 45,581 cars shipped to fresh domestic markets, about 64 percent of the crop.

Volume regulations issued under the authority of the Act and Marketing Order No. 907 are intended to provide benefits to growers. Growers benefit from increased returns and improved market conditions. Reduced fluctuations in supplies and prices result from regulating shipping levels and contribute to a more stable market. The intent of regulation is to achieve a more even distribution of oranges in the market throughout the marketing season.

Based on the Committee's marketing policy, the crop and market information provided by the Committee at its November 7, 1989, meeting, and other information available to the Department, the costs of implementing the regulations are expected to be more than offset by the potential benefits of regulation.

Reporting and recordkeeping requirements under the navel orange marketing order are incurred by handlers of navel oranges. However, handlers in turn may require individual growers to utilize certain reporting and recordkeeping practices to enable handlers to carry out their functions. Costs incurred by handlers in connection with recordkeeping and reporting requirements may be passed on to growers.

Major reasons for the use of volume regulations under this marketing order are to foster market stability and enhance grower revenue. Prices for navel oranges tend to be relatively inelastic at the grower level. Thus, even a small variation in shipments can have a great impact on prices and grower revenue. Under these circumstances, strong arguments can be advanced as to the benefits to growers, particularly smaller growers.

VOL 54 ISS 217 NO 13 1989 UMI

At the beginning of each marketing year, the Committee submits a marketing policy to the U.S. Department of Agriculture (Department) which discusses, among other things, the potential use of volume and size regulations for the ensuing season. The Committee, in its 1989–90 season marketing policy, considered the use of volume regulation for the season. This marketing policy is available from the Committee or Ms. Schlatter. The Department reviewed that policy with respect to administrative requirements and regulatory alternatives in order to determine if the use of volume regulations would be appropriate. A "Notice of Marketing Policy" (notice), which summarized the Committee's marketing policy, was prepared by the Department and published in the October 19, 1989, issue of the **Federal Register** (54 FR 42966). The purpose of the notice was to allow public comment on the Committee's marketing policy and the impact of any regulations on small business activities.

The notice provides a 30-day period for the receipt of comments from interested persons. That comment period will end on November 20, 1989. The Department will analyze all comments received, and the analysis will be made available to interested persons. That analysis will assist the Department in evaluating the marketing policy and considering the issuance of weekly volume regulations.

This action is consistent with the 1989–90 marketing policy adopted by the Committee. The Committee met publicly on November 7, 1989, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended, by a vote of nine to one with one abstention, that 1,600,000 cartons is the quantity of navel oranges deemed advisable to be shipped to fresh domestic markets during the specified week. This amount is 100,000 cartons more than estimated in the tentative shipping schedule adopted by the Committee on October 3, 1989. Of the 1,600,000 cartons, 1,536,000 are allotted for District 1, and 64,000 are allotted for District 3. Districts 2 and 4 are not regulated as they do not have a sufficient quantity of fruit available for current shipment.

During the week ending on November 2, 1989, shipments of navel oranges to fresh domestic markets, including Canada, totaled 782,000 cartons compared with 230,000 cartons shipped during the week ending on November 3, 1988. Export shipments totaled 92,000 cartons compared with 0 cartons shipped during the week ending on November 3, 1988, and processing and other uses accounted for 164,000 cartons compared with 89,000 cartons shipped during the week ending on November 3, 1988.

Fresh domestic shipments to date this season total 1,236,000 cartons compared with 379,000 cartons shipped by this time last season. Export shipments total 122,000 cartons compared with 0 cartons shipped by this time last season. Processing and other use shipments total 286,000 cartons compared with 139,000 cartons shipped by this time last season.

The average f.o.b. shipping point price for the week ending on November 2 was $9.53 per carton based on a reported sales volume of 548,000 cartons compared with last week's average of $9.88 per carton on 205,000 cartons. The season average f.o.b. shipping point price to date is $9.88 per carton. The average f.o.b. shipping point price for the week ending November 3, 1988, was $10.96 per carton; the season average f.o.b. shipping point price this time last season was $9.83 per carton.

The Committee reports that the market for navel oranges is stronger for most sizes although some price discounting is occurring on Choice quality fruit.

According to the National Agricultural Statistics Service, the 1988–89 season average fresh equivalent on-tree price for California-Arizona navel oranges was $3.86 per carton, 65 percent of the season average parity equivalent price of $5.98 per carton.

Based upon fresh utilization levels indicated by the Committee and an econometric model developed by the Department, the point estimate of the 1989–90 season average fresh on-tree price would be $4.30 per carton. This is equivalent to 66 percent of the projected season average fresh on-tree parity equivalent price of $6.54 per carton. It is currently estimated that there is less than a one percent probability that the 1989–90 season average fresh on-tree price will exceed the projected season average fresh on-tree parity equivalent price.

Limiting the quantity of navel oranges that may be shipped during the period from November 10 through November 16, 1989, would be consistent with the provisions of the marketing order by tending to establish and maintain, in the interest of producers and consumers, an orderly flow of navel oranges to market. By using provisions contained in the navel orange marketing order, handler shipments could exceed 1,920,000 cartons during the week.

Based on considerations of supply and market conditions, and the evaluation of alternatives to the implementation of this volume regulation, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities and that this action will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is further found and determined that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register**. This is because there is insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act.

In addition, market information needed for the formulation of the basis for this action was not available until November 7, 1989, and this action needs to be effective for the regulatory week which begins on November 10, 1989. Further, interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and handlers have been apprised of the provisions of this rule and the effective time. It is necessary, therefore, in order to effectuate the declared purposes of the Act, to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

List of Subjects in 7 CFR Part 907

Arizona, California, Marketing agreements and orders, Oranges (navel).

For the reasons set forth in the preamble, 7 CFR part 907 is amended as follows:

PART 907—[AMENDED]

1. The authority citation for 7 CFR part 907 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 907.993 is added to read as follows:

Note: This section will not appear in the annual Code of Federal Regulations.

§ 907.993 Navel Orange Regulation 693.

The quantity of navel oranges grown in California and Arizona which may be handled during the period from November 10 through November 16, 1989, is established as follows:

(a) District 1: 1,536,000 cartons;
(b) District 2: unlimited cartons;
(c) District 3: 64,000 cartons;
(d) District 4: unlimited cartons.

Dated: November 8, 1989.

Charles R. Brader,

Director, Fruit and Vegetable Division.

[FR Doc. 89-26698 Filed 11-9-89; 8:45 am]

BILLING CODE 3410-02-M

7 CFR Part 910

[Lemon Reg. 691]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 691 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 291,534 cartons during the period from November 12 through November 18, 1989. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 691 (7 CFR part 910) is effective for the period from November 12 through November 18, 1989.

FOR FURTHER INFORMATION CONTACT: Beatriz Rodriguez, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 475-3861.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 65 handlers of lemons grown in California and Arizona subject to regulation under the lemon marketing order and approximately 2800 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona lemons may be classified as small entities.

The regulation is issued under Marketing Order No. 910, as amended (7 CFR part 910), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601–674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee (Committee) and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the California-Arizona lemon marketing policy for 1989–90. The Committee met publicly on November 7, 1989, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and, by an 11–2 vote, recommended a quantity of lemons deemed advisable to be handled during the specified week. The Committee reports that overall demand for lemons is moderate.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Arizona, California, Lemons, Marketing agreements and orders.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR part 910 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 910.991 is added to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 910.991 Lemon Regulation 691.

The quantity of lemons grown in California and Arizona which may be handled during the period from November 12, 1989, through November 18, 1989, is established at 291,534 cartons.

Dated: November 8, 1989.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Parts 1823, 1902, 1942, and 1948

Association Loans and Grants—Community Facilities, Shift-in-Land-Use, Irrigation and Drainage, Area Assistance Development Planning Grants

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) is removing from the Code of Federal Regulations (CFR) its regulations regarding Association Loans for Shift-In-Land-Use Projects, Irrigation and Drainage and Other Soil and Water Conservation Measures, and Area Assistance Development Planning Grants. This action is necessary because these programs have not been funded for several years and the regulations are no longer used by the Agency. The intended effect of this action is to remove unnecessary regulations from the CFR. Along with obsoleting the forms that are exclusive to these regulations, the renumbering of certain forms is also being accomplished at this time.

EFFECTIVE DATE: November 13, 1989.

FOR FURTHER INFORMATION CONTACT: Marlene Snell, Loan Specialist, Community Facilities Division, FmHA,

VOL 54 ISS 217 NO 13 1989 UMI

USDA, Room 6314, South Agriculture Building, Washington, DC 20250, Telephone: (202) 382–6487.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Departmental Regulation 1512–1, which implements Executive Order 12291 and has been determined to be exempt from those requirements because it involves only internal Agency management. It is the policy of this Department to publish for comment rules relating to public property, loans, grants, benefits, or contracts notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This section, however, is not published for proposed rulemaking since it involves only internal Agency management, making publication for comment unnecessary.

Environmental Impact Statement

This document has been reviewed in accordance with FmHA Instruction 1940–G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Public Law 91–190, an Environmental Impact Statement is not needed.

Programs Affected

This action affects the following FmHA programs as listed in the current Catalog of Federal Domestic Assistance:

Section 10.409 Irrigation and Drainage Loans
Section 10.414 Resource Conservation and Development Loans
Section 10.419 Watershed Loans and Advances
Section 10.423 Community Facility Loans

These programs are subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials (7 CFR 3015, subpart V, 48 FR 29112, June 24, 1983).

Background

Since no new funds have been appropriated for new loans or grants under these programs for several years, the Agency has removed the regulations from the CFR. All loans made under these programs, however, remain valid and will continue to be serviced under subpart E of part 1951 of this chapter. In addition although the Agency has removed subpart 1823–H, Irrigation and Drainage and Other Soil and Water Conservation Measures, several programs within FmHA remain available for Soil and Water Conservation purposes. Finally, while certain forms are being renumbered to achieve consistency within the regulations, the content of the forms themselves have not changed.

List of Subjects

7 CFR Part 1823

Credit, Grazing lands, Loan programs—Agriculture, Rural areas, Soil conservation, Water resources.

7 CFR Part 1902

Accounting, Banks, Banking, Grant programs—Housing and community development, Loan programs—Agriculture, Loan programs—Housing and community development.

7 CFR Part 1942

Community development, Community facilities, Loan programs—Housing and community development, Loan security, Rural areas, Waste treatment and disposal—Domestic, Water supply—Domestic.

7 CFR Part 1948

Business and industry, Community development, Community facilities, Energy, Grant programs—Housing and community development, Housing, Planning, Rural Areas, Transportation.

Accordingly, chapter XVIII, title 7, Code of Federal Regulations is amended as follows:

PART 1823—ASSOCIATION LOANS AND GRANTS—COMMUNITY FACILITIES, DEVELOPMENT, CONSERVATION, UTILIZATION

1. The authority citation for part 1823 continues to read as follows, and the authority citation for subpart N is removed.

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 25 U.S.C. 490; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Association Loans for Shift-in-Land-Use Projects

Subpart B—[Removed and reserved]

2. Subpart B, §§ 1823.51–1823.67, is removed and reserved.

Subpart H—Association Loans for Irrigation and Drainage and Other Soil and Water Conservation Measures

Subpart H—[Removed and reserved]

3. Subpart H, §§ 1823.221–1823.238, is removed and reserved.

Subpart I—Processing Loans to Associations (Except for Domestic Water and Waste Disposal)

Subpart I—[Removed and reserved]

4. Subpart I, §§ 1823.251–1823.289, is removed and reserved.

Subpart N—Loans to Indian Tribes and Tribal Corporations

§ 1823.415 [Amended]

5. Section 1823.415 is amended in the first sentence by changing the reference, "subpart I of part 1823" to "subpart A of part 1942."

§ 1823.416 [Amended]

6. Section 1823.416 is amended in the last sentence by changing the reference, "§§ 1823.271 and 1823.272" to "subpart A of part 1942 of this chapter."

Exhibit A to subpart N—[Amended]

7. Exhibit A to subpart N, Section 1 is amended by removing the reference, "Form FmHA 442–12 Financial Statement," by changing in section 1.(b) the reference, "Form FmHA 442–46" to read "Form FmHA 1942–46" and by changing in section 2 the reference, "Form FmHA 442–14" to read "Form FmHA 1942–14".

PART 1902—SUPERVISED BANK ACCOUNTS

8. The authority citation for part 1902 is revised to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Loan and Grant Disbursement

§ 1902.15 [Amended]

9. Section 1902.15(c) is amended in the first sentence by removing the reference, "Grazing Association, Irrigation and Drainage," and by removing the reference, "and part 1823, subpart I (FmHA Instruction 442.9)."

PART 1942—ASSOCIATIONS

10. The authority citation for part 1942 is revised to read as follows:

Authority: 7 U.S.C. 1989; 16 U.S.C. 1005; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Community Facility Loans

§§ 1942.1 and 1942.5 [Amended]

11. The reference, "Form FmHA 442–46" is changed to read "Form FmHA 1942–46" in the following sections:

§ 1942.1(d)(4)
§ 1942.5(a)(1)(ii), in the last sentence

§ 1942.5(c), introductory text, last sentence
§ 1942.5(c)(2) and (c)(3)

§ 1942.2 [Amended]

12. In § 1942.2(c)(3), the reference, "Form FmHA 442–39" is changed to read "Form FmHA 1942–39."

§ 1942.2 [Amended]

13. In § 1942.2(c)(3), the reference, "Form FmHA 442–40" is changed to read "Form FmHA 1942–40."

§ 1942.5 [Amended]

14. The reference, "Form FmHA 442–14" is changed to read "Form FmHA 1942–14" in the following paragraphs:
§ 1942.5(b)(1)(ii)(C)
§ 1942.5(c), introductory text
§ 1942.5(c)(3)

Subpart C—Fire and Rescue Loans

§ 1942.104 [Amended]

15. In § 1942.104(c)(3), the reference, "Form FmHA 442–46" is changed to read "Form FmHA 1942–46."

§ 1942.108 [Amended]

16. In § 1942.108(b), the reference, "Form FmHA 442–14" is changed to read "Form FmHA 1942–14."

Subpart I—Resource Conservation and Development

[RCD] Loans and Watershed (WS) Loans and Watershed Advances

§ 1942.412 [Amended]

17. In § 1942.412(a)(2)(ii), the reference, "Form FmHA 442–40" is changed to read "Form FmHA 1942–40" and the reference, "Form FmHA 442–39" is changed to read "Form FmHA 1942–39."

Part 1948—Rural Development

18. The authority citation for part 1948 is revised to read as follows:

Authority: 7 U.S.C. 1989; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Area Development Assistance Planning Grants

Subpart A—[Removed and reserved]

19. Subpart A, §§ 1948.1–1948.47, is removed and reserved.

Dated: August 29, 1989.

Neal Sox Johnson,

Acting Administrator, Farmers Home Administration.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-NM-101-AD; Amdt. 39-6393]

Airworthiness Directives; Aerospatiale Model ATR42 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises an existing airworthiness directive (AD), applicable to Aerospatiale Model ATR42 series airplanes, which currently prohibits use of the autopilot when operating in icing conditions. That action was prompted by an incident in which a Model ATR42 airplane operating in icing conditions (believed to have been freezing rain) experienced roll excursions and autopilot disconnect. This condition, if not corrected, could result in loss of control of the airplane. This amendment requires installation of vortex generators on the upper wing surface as a terminating action to the prohibition of use of the autopilot when operating in icing conditions.

EFFECTIVE DATE: December 15, 1989.

ADDRESSES: The applicable service information may be obtained from Aerospatiale, 216 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert C. McCracken, Standardization Branch, ANM–113; telephone (206) 431–1979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by revising AD 89–09–05, Amendment 39–6197 (54 FR 15730; April 19, 1989), applicable to Aerospatiale Model ATR42 series airplanes, to require installation of vortex generators on the upper wing surface as a terminating action to the prohibition of use of the autopilot when operating in icing conditions, was published in the **Federal Register** on July 18, 1989 (54 FR 30059).

Interested pesons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the two comments received.

The Air Line Pilots Association (ALPA) expressed qualified support for the proposed rule, agreeing with the intent of the action, but questioning the effectiveness of the vortex generator installation in addressing the unsafe condition. The FAA does not agree with the commenter's inference that the vortex generator is ineffective. The vortex generator installation has been evaluated by the manufacturer and the FAA, and the FAA has determined that this installation does improve aileron effectiveness when operating in icing conditions including freezing rain.

The commenter also noted that the FAA has initiated other rulemaking action to prevent icing related incidents from occurring on Model ATR42 airplanes, and questioned the need for vortex generators if the Anti-icing Advisory System (AAS) installation already proposed (in a separate rulemaking action) would solve the problem. The FAA does not concur with the commenter's inference that the vortex generators are not needed. The vortex generator installation is intended to improve the aileron effectiveness when operating in icing conditions, including freezing rain. The AAS has been proposed to improve flight crew awareness of the presence of icing conditions in general, and enhance recognition of impending stall conditions. The two actions, while both intending to improve safety during flight in icing conditions, address different aspects of the unsafe condition, as discussed in the respective preambles.

ALPA asked FAA to examine the effects of ice on the horizontal stabilizer, with the belief that analysis of previous incidents would indicate that control difficulties were not limited to the roll axis, but also existed around the pitch axis. The FAA acknowledges that its review of operations in icing conditions only supports findings of an unsafe condition relative to the roll axis; no data has been provided to demonstrate that the unsafe condition addressed by this action is related to control problems in the pitch axis.

The commenter questioned whether the word "prolonged," as used in AD 89–09–05 prohibiting use of the autopilot when operating in icing conditions, could be defined; if not, the commenter suggested a prohibition of flight into freezing rain. The FAA does not concur with the commenter's suggestion. The existing AD requires the addition of a page in the Limitations Section of the Airplane Flight Manual which prohibits use of the autopilot when operating in

VOL 54 ISS 217 NO 13 1989 UMI

icing conditions and contained the statement, "Prolonged operation in freezing rain should be avoided." That AD is being revised by this AD, and the wording is removed from the Airplane Flight Manual when the vortex generators are installed. Since the wording is no longer used, further definition of the word "prolonged" is not considered necessary.

In addition, the commenter questioned the certification of the ATR42 airplane, and other airplanes, for flight in freezing rain. The commenter also expressed opinions regarding the adequacy of the anti-ice/de-ice systems and operational procedures to provide protection when operating in freezing rain on the ATR42 airplane, and questioned FAA's practices regarding operation of any airplane in freezing rain. The FAA does not consider this AD to be the proper forum for discussion of icing certification practices. These comments are of a general nature, and do not directly address the proposed rule, which requires installation of vortex generators to improve aileron effectiveness during operation in icing conditions including freezing rain. As these comments are considered to be outside the scope of the proposed rule, they will not be addressed for the purposes of this rulemaking action.

Another commenter requested revising the proposed rule to allow dispatch with up to one vortex generator missing on each wing, to an airport where repairs can be accomplished. The commenter noted that during flight tests conducted to evaluate the vortex generators, testing was conducted to show that the absence of one vortex generator (out of eight) from each wing did not substantially reduce the effectiveness of the modification. He noted that the methods used for cleaning ice from the top of the wing prior to takeoff can dislodge vortex generators. The FAA concurs with this comment, and the final rule has been revised to allow dispatch with up to one vortex generator missing on each wing. The airplane will be allowed to operate in this condition for no more than 16 hours time-in-service.

Since the issuance of the Notice, Aerospatiale has issued Revision 1 of Service Bulletin ATR42-57-0016, dated June 26, 1989. This revision differs from the Service Bulletin dated May 3, 1988, which was cited in the Notice, in that it provides clarifying information and changes the estimated number manhours required to install the vortex generators from 4 manhours to 16 manhours. The economic analysis paragraph, below, has been revised to reflect the total manhours as 16, and the total cost impact of the AD on U.S. operators as $27,520. The final rule has been revised to cite the latest revision of the Aerospatiale Service Bulletin as the appropriate service information for procedures relating to the installation of the vortex generators.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

It is estimated that 43 airplanes of U.S. registry will be affected by this AD, that it will take approximately 16 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of AD on U.S. operators is estimated to be $27,520.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

Air transportation, Aircraft, Aviation safety, Safety

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amendewd by amending Amendment 39-6197 (54 FR 15730; April 19, 1989), AD 89-09-05, as follows:

Aerospatiale: Applies to Model ATR42 series airplanes, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To minimize the potential hazards associated with operating in icing conditions including freezing rain, accomplish the following:

A. Within 10 hours time-in-service after May 3, 1989 (the effective date of Amendment 39-6197), incorporate the following into the Limitations Section of the FAA-approved Airplane Flight Manual (AFM). This may be accomplished by including a copy of this AD in the AFM. "When operating in icing conditions, as defined in the AFM, or when freezing rain is forecast or reported, use of the autopilot is prohibited.

Warning

Prolonged operation in freezing rain should be avoided. Ice accretion due to freezing rain may result in asymmetric wing lift and associated increased aileron forces necessary to maintain coordinated flight. Whenever the aircraft exhibits buffet onset, uncommanded roll, or unusual control wheel forces, immediately reduce angle-of-attack and avoid excessive maneuvering."

B. Within 60 days after the effective date of this amendment, install vortex generators, in accordance with Aerospatiale Service Bulletin ATR42-57-0016, Revision 1, dated June 26, 1989. This action constitutes terminating action for the AFM prohibition required by paragraph A., above, regarding use of the autopilot when operating in icing conditions, and the limitation may be removed from the AFM.

C. Dispatch with up to one vortex generator missing on each wing is allowable. Operation in this condition is limited to no more than 16 hours time-in-service.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by7 the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Aerospatiale, 216 Route de Bayonne, 31060 Toulouse, Cedex 03, France. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

This amendment amends Amendment 39-6197, AD 89-09-05.

This amendment becomes effective December 15, 1989.

Issued in Seattle, Washington, on October 31, 1989.

Steven B. Wallace,
Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-NM-126-AD; Amdt. 39-6394]

Airworthiness Directives; Aerospatiale Model ATR42 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to all Aerospatiale Model ATR42 series airplanes, which requires installation of an anti-icing advisory system. This amendment is prompted by reports that flight crews have been unaware of the significance of the accretion of ice on the airplane while operating in certain icing conditions. This condition, if not corrected, could lead to loss of control of the airplane.

EFFECTIVE DATE: December 15, 1989.

ADDRESSES: The applicable service information may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert C. McCracken, Standardization Branch, ANM-113; telephone 431-1979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to Aerospatiale Model ATR42 series airplanes, which requires installation of an anti-icing advisory system, was published in the **Federal Register** on July 31, 1989 (54 FR 31535).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the three comments received.

The Air Line Pilots Association (ALPA) expressed qualified support for the proposed rule. This commenter expressed concerns with respect to the original icing certification of the Model ATR42 airplane, the adequacy of the anti/de-icing system, and the operation of the airplane in freezing rain. These comments are of a general nature, and do not directly address the proposed rule, which would require modifications intended to enhance the awareness and response of the flight crew to the presence of ice on the airplane. As these comments are considered to raise issues outside the scope of the proposed rule, they will not be addressed.

ALPA also expressed concerns regarding the effectiveness of the ice detector system. The FAA acknowledges that the ice detection system utilized by the Model ATR42 Anti-icing Advisory System (AAS) has been demonstrated to provide a reliable crew alert in the presence of ice accretion, and is proposed to improve recognition of ice accretion by the flight crew.

After review of ALPA's comments overall, the FAA infers that ALPA is requesting additional AD action to further improve the airplane while operating in icing conditions. The FAA has determined that the action required by this rule is adequate to address flight crew awareness of the significance office accretion and enhance recognition of impending stall conditions. However, the FAA has also proposed additional (separate) rulemaking to require the installation of vortex generators on Model ATR42 series airplanes, the installation of which is intended to improve the aileron effectiveness when operating in icing conditions, including freezing rain. These two rulemaking actions, while both intending to improve safety during flight in icing conditions, address the different aspects of the unsafe condition, as discussed in the respective preambles.

Aerospatiale, commenting for Avions de Transport Regional (ATR), which is the consortium that manufacturers the Model ATR42 airplane, made several comments regarding statements in the preamble of the proposed rule. It noted that one statement, regarding incidents involving partial loss of control due to ice accretion, could be taken out of context and be prejudicial to the ATR program. The FAA shares the concerns expressed by the commenter and acknowledges that the statement in the preamble would have been clearer if stated as follows:

> There have been several incidents involving partial loss of control due to ice accretion on Aerospatiale Model ATR42 series airplanes operating in icing conditions, including freezing rain, which have been attributed to the crew being unaware of the severity or significance of ice accretion, not following Airplane Flight Manual procedures for operation when in icing conditions, and/or not recognizing the onset of a stall resulting from ice accretion.

This commenter also stated that the statement in the preamble regarding increases in minimum speeds given in the Airplane Flight Manual (AFM) for use while operating in icing conditions was incorrect. Aerospatiale noted that rather than increasing minimum speeds, ATR had actually eliminated one category of flight, namely "icing conditions without ice accretion", thereby reducing the number of flight conditions addressed in the AFM from three to two. The commenter stated that the minimum speeds with ice accretion did not change with the AFM revision addressing the anti-icing advisory system. The FAA has reviewed this material and notes that Revision 5 of the U.S. AFM stipulates minimum speeds with ice accretion are to be 1.39 times the stall speed (1.39 Vs). On the other hand, Revision 6 of the U.S. AFM provides three different minimum speeds depending on flight condition: while takeoff/2nd segment climb minimum speed is 1.32 Vs, the enroute minimum speed is 1.45 Vs and approach minimum speed is 1.5 Vs, the latter two of which are both higher than that shown in Revision 5.

The commenter also noted that, in addition to the features comprising the AAS identified in the proposed rule, ATR has added an "A.O.A." light, which notifies the crew that the stall warning angle of attack threshold has been lowered and the minimum speeds observed should be increased to the "icing speeds". The FAA concurs with this comment; however, the above comments are informational in nature. The FAA does not infer that commenter has requested any changes to the proposed rule.

Aerospatiale also suggested making Revision 6 of the U.S. AFM mandatory. The FAA concurs with this comment. Revision 6 of the AFM contains an explanation of the anti-icing advisory system and sets forth the necessary

procedures relating to it. Since this information is necessary for the flight crew to properly operate the system, the FAA intended that the AFM be revised when the system is incorporated.

Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617)

regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket.

(c) Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

(d) Upon submission of substantiating data by an owner or operator through an FAA

VOL 54 ISS 217 NO 13 1989 UMI

procedures relating to it. Since this information is necessary for the flight crew to properly operate the system, the FAA intended that the AFM be revised when the system is incorporated. Accordingly, the AD has been revised to clarify this intent.

ATR Support, Inc., which provides service and maintenance support for Model ATR42 operators in the United States, commented that the current schedule for incorporating the AAS on Model ATR42 airplanes will result in some airplanes not being modified within the compliance time cited in the proposed rule, and requested a longer compliance time. The FAA does not concur that this constitutes justification for a longer compliance time. The FAA is concerned that failure to incorporate the modifications prior to the onset of the icing season for most operators does not adequately address the unsafe condition which has pompted this action. If parts are not available within the compliance time, the individual operators may petition the FAA for an extension of compliance time, or an alternate means of compliance, under the provisions of paragraph C. of the final rule.

Since the issuance of the Notice, Aerospatiale has issued Service Bulletin ATR42-30-0021, Revision 3, dated July 20, 1989, which deletes two airplanes from the applicability statement. Paragraph A. of the final rule has been revised to reflect this latest revision.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes described above. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

It is estimated that 50 airplanes of U.S. registry will be affected by this AD, that it will take approximately 300 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. The cost for parts is estimated to be $45,000 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $2,850,000.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Aerospatiale: Applies to all Model ATR42 series airplanes, certificated in any category. Compliance required within 60 days after the effective date of this AD, unless previously accomplished.

To improve protection against loss of control when operating in icing conditions, including freezing rain, accomplish the following:

A. Install an anti-icing advisory system in accordance with Aerospatiale Service Bulletins ATR42-27-0021, Revision 8, dated May 2, 1989; ATR42-30-0017, Revision 3, dated January 20, 1989; ATR42-30-0018, Revision 4, dated June 14, 1989; ATR42-30-0021, Revision 3, dated July 20, 1989; ATR42-30-0024, Revision 1, dated February 13, 1989; and ATR42-30-0027, Revision 1, dated February 21, 1989.

B. Incorporate Revision 6 of the Airplane Flight Manual (AFM), dated August 1988, into the FAA-approved AFM.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective December 15, 1989.

Issued in Seattle, Washington, on October 31, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89-26536 Filed 11-9-89; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 88-ANE-44; Amdt. 39-6334]

Airworthiness Directives; Goodyear 32x8.8R16, 10PR, P/N 328Q08G2 Radial Tires

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) which requires early removal of certain Goodyear 32x8.8R16, 10PR, P/N 328Q08G2 radial tires installed on but not limited to ATR-42 aircraft. The amendment is needed to require early removal of additional ties in order to prevent tire failure which could cause an unsafe takeoff or landing condition.

DATES: *Effective Date:* November 13, 1989.

Compliance: As indicated in the body of the AD.

ADDRESSES: The applicable service bulletin (SB) may be obtained from Goodyear S.A., Colmar-Berg, Luxembourg, or may be examined in the Regional Rules Docket, Room 311, Office of the Assistant Chief Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Terry Fahr, Boston Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273-7103.

SUPPLEMENTARY INFORMATION: This amendment amends Amendment 39-6103 (54 FR 1342; January 13, 1989), AD 89-03-01, which currently requires early removal of Goodyear 32x8.8R16, 10PR, P/N 328Q08G2 radial tires, installed on but not limited to ATR-42 aircraft. After issuing Amendment 39-6103, the FAA has determined that the tires produced subsequent to serial date 8340Gxxx, under a different process than those tires affected by the original AD, have experienced four premature failures. The tires produced under the new process have been determined to be satisfactory for 400 landings. Therefore, the FAA is amending Amendment 39-6103, by requiring all Goodyear 32x8.8R16, 10PR, P/N 328Q08G2 radial tires with serial dates greater than 8340Gxxx, that have exceeded 400 landings, be removed from service, in order to prevent tire failure which could cause an unsafe takeoff or landing condition.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein do not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this emergency regulation involves approximately 900 tires and will cost approximately $360,000.00; and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration (FAA) amends 14 CFR part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by amending Amendment 39-6103 (54 FR 1342; January 13, 1989), AD 89-03-01, by adding and revising as follows:

The AD is restated in its entirety for clarity.

Goodyear: Applies to 32x8.8R16, 10PR, P/N 328Q08G2 radial tires, with serial dates 8060Gxxx and above, installed on but not limited to ATR-42 aircraft.

Compliance required as indicated, unless already accomplished.

To prevent tire failure, accomplish the following:

(a) Remove from service, all tires with serial dates between 8000Gxxx and 8320Gxxx, as follows:

(1) Tires which have accumulated 230 or more landings since new on the effective date of this AD, within the next 50 landings.

(2) Tires which have accumulated less than 230 landings since new on the effective date of this AD, at or prior to accumulating 300 landings.

(3) Tires for which no landing record has been maintained, within the next 50 landings.

(b) Remove from service, all tires with serial dates 8340Gxxx and above, as follows:

(1) Tires which have accumulated 250 or more landings since new on the effective date of this AD, within the next 150 landings.

(2) Tires which have accumulated less than 250 landings since new on the effective date of this AD, at or prior to accumulating 400 landings.

(3) Tires for which no landing record has been maintained, within the next 150 landings.

Notes: (1) Tires with serial dates 8060Gxxx and above may be used as replacements subject to the restrictions of paragraphs (a) and (b) above. Tires with serial dates prior to 8060Gxxx are approved without restrictions.

(2) Goodyear Alert Service Bulletins 32-001, dated December 5, 1988, and 32-002, Revision 1, dated July 14, 1989, apply to this AD.

(c) Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

(d) Upon submission of substantiating data by an owner or operator through an FAA Airworthiness Inspector, an alternate method of compliance with the requirements of this AD or adjustments to the compliance times specified in this AD may be approved by the Manager, Boston Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

This amendment becomes effective on November 13, 1989.

This amendment amends Amendment 39-6103 (54 FR 1342; January 13, 1989), AD 89-03-01.

Issued in Burlington, Massachusetts, on August 31, 1989.

Jay J. Pardee,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 97

[Docket No. 26061; Amdt. No. 1412]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

EFFECTIVE DATES: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

VOL 54 ISS 217 NO 13 1989 UMI

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS-420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

SUPPLEMENTARY INFORMATION:

This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule under Executive Order 1229; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria for the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Approaches, Standard Instrument, Incorporation by reference. Issued in Washington, DC on October 27, 1989.

Robert L. Goodrich,
Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 Gmt on the dates specified, as follows:

PART 97—[AMENDED]

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1421, and 1510; 49 U.S.C. 106(g) (revised, Pub. L. 97-449, January 12, 1983; and 14 CFR 11.49(b)(2)).

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33 and 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 111

Annual User Fee for Customs Broker's Permit

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of due date of broker's user fee.

SUMMARY: This document advises Customs brokers that for 1990 the annual user fee of $125 that is assessed for each permit held by an individual, partnership, association, or corporate broker is due by January 12, 1990. This announcement is being published to comply with the Tax Reform Act of 1986.

DATE: Due for fee: January 12, 1990.

FOR FURTHER INFORMATION CONTACT: Raymond R. Janiszewski, Chief, Broker Compliance and Evaluation Branch (202) 566-5307.

SUPPLEMENTARY INFORMATION:

Background

Section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272) established that an annual user fee of $125 is to be assessed for each Customs broker's permit held by an individual, partnership, association or corporate broker. This fee is set forth in the Customs Regulations in § 111.96 (19 CFR 111.96).

Section 111.96 Customs Regulations provides that the fee is payable for each calendar year in each district where a broker has a permit to do business by the due date which will be published in the **Federal Register** annually.

Section 1893 of the Tax Reform Act of 1985 (Pub. L. 99-514), provides that notice of the date on which payment is due of the user fee for each broker permit shall be published by the Secretary of the Treasury in the **Federal Register** by no later than 60 days before such due date.

This document notifies brokers that for 1990 the due date for payment of the user fee is January 12, 1990. It is expected that annual user fees for brokers for subsequent years will be due on or about the first of January each year.

Dated: November 8, 1989.
Carol B. Hallett,
Commissioner of Customs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 430, 436, 440, 442, 448, and 455

[Docket No. 89N-0328]

Antibiotic Drugs; Updatings and Technical Changes

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the antibiotic drug regulations by updating and making noncontroversial technical changes in accepted standards of antibiotic and antibiotic-containing drugs for human use. These changes will result in more accurate and usable regulations.

DATES: Effective December 13, 1989; comments, notices of participation, and requests for hearing by December 13, 1989; data, information, and analyses to justify a hearing by January 12, 1990.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Peter A. Dionne, Center for Drug Evaluation and Research (HFD-520), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4290.

SUPPLEMENTARY INFORMATION: FDA is amending the antibiotic drug regulations by updating and making noncontroversial technical changes in certain antibiotic drug regulations that provide for accepted standards of antibiotic and antibiotic-containing drugs intended for human use.

1. In 21 CFR 430.6(b)(34), the amount of cephalothin master standard that is equivalent to 1 microgram of cephalothin activity (potency) is revised from "1.066" to "1.056" micrograms to reflect the potency of a new lot of cephalothin master standard.

2. In 21 CFR 436.215, the second "of" in the footnote to the table in paragraph (b) is corrected to read "or", and the word "absorbence" in paragraph (c)

VOL 54 ISS 217 NO 13 1989 UMI

(10)(iii) is corrected to read "absorbance".

3. In 21 CFR 440.9a, paragraphs (a)(1)(vii) and (viii) are corrected by making the testing requirements for ampicillin content and concordance inapplicable when the high-performance liquid chromatographic (HPLC) assay procedure is used to determine the potency of sterile ampicillin sodium.

4. In 21 CFR 440.209b, the number of theoretical plates for sulbactam in paragraph (b)(1)(iii)(B) is revised from "5,000" to "3,500" and the resolution factor between the peaks for ampicillin and sulbactam alkaline degradation in paragraph (b)(1)(iii)(C) is revised from "4.0" to "1.2". These requirements were incorrectly stated in the **Federal Register** of November 4, 1987 (52 FR 42290).

5. In 21 CFR 442.15, the phrase "3-etheryl" in paragraph (a)(1) is corrected to read "3-ethenyl"; paragraphs (b)(1)(ii)(A) and (C) are corrected by revising the diluent used in the preparation of the working and sample solutions in the HPLC potency assay for cefixime trihydrate from "mobile phase" to "0.1 *M* phosphate buffer, pH 7.0"; and paragraph (b)(1)(iii)(E) is corrected by adding equal signs (=) to the first two formulas for calculating the capacity factor for cefixime.

6. In 21 CFR 446.60, the formula for calculating the capacity factor for minocycline in paragraph (b)(1)(iii)(*e*) is corrected, and the explanation of the term "C_s" in the formula for the calculation of the potency of the minocycline sample solution in paragraph (b)(1)(iv) is corrected.

7. In 21 CFR 446.260, paragraph (b)(1)(ii)(*a*) is corrected by adding the word "content" after "minocycline" in the first sentence.

8. In 21 CFR 455.62a, the number of theoretical plates for sulbactam in paragraph (b)(1)(iii)(B) is revised from "4,000" to "3,500". This requirement was incorrectly stated in the **Federal Register** of November 4, 1987 (52 FR 42290).

Environmental Impact

The agency has determined under 21 CFR 25.24(c)(6) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Submitting Comments and Filing Objections

These amendments institute changes that are corrective, editorial, or of a minor technical nature. Because the amendments are not controversial, and because, when effective, they provide notice of accepted standards, FDA finds that notice, public procedure, and delayed effective date are unnecessary and not in the public interest. This final rule, therefore, becomes effective December 13, 1989. However, interested persons may, on or before December 13, 1989, submit comments on this regulation to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this final rule may file objections to it and request a hearing. Reasonable grounds for the hearing must be shown. Any person who decides to seek a hearing must file (1) on or before December 13, 1989, a written notice of participation and request for hearing, and (2) on or before January 12, 1990, the data, information, and analyses on which the person relies to justify a hearing, as specified in 21 CFR 314.300. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that no genuine and substantial issue of fact precludes the action taken by this order, or if a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) who request(s) the hearing, making findings and conclusions and denying a hearing. All submissions must be filed in three copies, identified with the docket number appearing in the heading of this order, and filed with the Dockets Management Branch.

The procedures and requirements governing this order, a notice of participation and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and grant or denial of a hearing are contained in 21 CFR 314.300.

All submissions under this order, except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR

Part 430: Administrative practice and procedure, Antibiotics.
Part 436: Antibiotics.
Part 440: Antibiotics.
Part 442: Antibiotics.
Part 446: Antibiotics.
Part 455: Antibiotics.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 430, 436, 440, 442, 446, and 455 are amended as follows:

PART 430—ANTIBIOTIC DRUGS; GENERAL

1. The authority citation for 21 CFR part 430 continues to read as follows:

Authority: Secs. 201, 501, 502, 503, 505, 507, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 351, 352, 353, 355, 357, 371); secs. 215, 301, 351 of the Public Health Service Act (42 U.S.C. 216, 241, 262).

§ 430.6 [Amended]

2. Section 430.6 *Definitions of the terms "unit" and "microgram" as applied to antibiotic substances* is amended in paragraph (b)(34) by removing "1.066" and replacing it with "1.056".

PART 436—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

3. The authority citation for 21 CFR part 436 continues to read as follows:

Authority: Sec. 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

§ 436.215 [Amended]

4. Section 436.215 *Dissolution test* is amended in the footnote to the table in paragraph (b) by removing the second "of" and replacing it with "or", and in paragraph (c)(10)(iii) by removing "absorbence" and replacing it with "absorbance".

PART 440—PENICILLIN ANTIBIOTIC DRUGS

5. The authority citation for 21 CFR part 440 continues to read as follows:

Authority: Sec. 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

6. Section 440.9a is amended by revising paragraphs (a)(1) (vii) and (viii) to read as follows:

§ 440.9a Sterile ampicillin sodium.

(a) * * *
(1) * * *
(vii) Its ampicillin content is not less than 84.5 percent, except if the high-performance liquid chromatographic (HPLC) assay method is used, then the ampicillin content standard is not applicable.
(viii) The potency-base titration concordance is such that the difference between the potency value divided by 10 and the percent ampicillin content of the sample determined by the nonaqueous base titration is not more than 6, except if the HPLC assay method is used, then the concordance standard is not applicable.

* * * * *

§ 440.209b [Amended]

7. Section 440.209b *Sterile ampicillin sodium and sulbactam sodium* is amended in paragraph (b)(1)(iii)(B) by removing "5,000" and replacing it with "3,500", and in paragraph (b)(1)(iii)(C) by removing "4.0" and replacing it with "1.2".

PART 442—CEPHA ANTIBIOTIC DRUGS

8. The authority citation for 21 CFR part 442 continues to read as follows:

Authority: Sec. 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

9. Section 442.15 is amended in paragraph (a)(1) by removing "3-etheryl" and replacing it with "3-ethenyl", by revising the second sentence in paragraph (b)(1)(ii)(A) and the last sentence in paragraph (b)(1)(ii)(C), and in paragraph (b)(1)(iii)(E) by adding "=" after (*k*) in the first formula and after t_m in the second formula to read as follows:

§ 442.15 Cefixime trihydrate.

* * * * *
(b) * * *
(1) * * *
(ii) * * *
(A) * * * Further dilute quantitatively to a final concentration of 0.2 milligram of cefixime activity per milliliter in 0.1 *M* phosphate buffer, pH 7.0. * * *

* * * * *

(C) * * * Immediately prior to chromatography, further dilute 10 milliliters of stock solution to 100 milliliters with 0.1 *M* phosphate buffer, pH 7.0 to obtain a solution containing 0.2 milligram of cefixime activity per milliliter (estimated).

* * * * *

PART 446—TETRACYCLINE ANTIBIOTIC DRUGS

10. The authority citation for 21 CFR part 446 continues to read as follows:

Authority: Section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

11. Section 446.60 is amended in paragraph (b)(1)(iii)(*e*) by revising the first formula and in paragraph (b)(1)(iv) by revising the line beginning "C_s =" appearing under "where:" to read as follows:

§ 446.60 Minocycline hydrochlorides.

* * * * *
(b) * * *
(1) * * *
(iii) * * *
(*e*) * * *

$$K' = \frac{t_m - t_s}{t_s}$$

* * * * *
(iv) * * *

where:

* * * * *
C_s = Milligrams of minocycline sample per milliliter of sample solution; and
* * * * *

12. Section 446.260 is amended by revising the first sentence in paragraph (b)(1)(ii)(*a*) to read as follows:

§ 446.260 Sterile minocycline hydrochloride.

* * * * *
(b) * * *
(1) * * *
(ii) * * * (*a*) Calculate the minocycline content of the single-dose vial as follows:
* * * * *

PART 455—CERTAIN OTHER ANTIBIOTIC DRUGS

13. The authority citation for 21 CFR part 455 continues to read as follows:

Authority: Sec. 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

§ 455.62a [Amended]

14. Section 455.62a *Sterile sulbactam sodium* is amended in paragraph (b)(1)(iii)(B) by removing "4,000" and replacing it with "3,500".

Dated: October 31, 1989.

Sammie R. Young,

Deputy Director, Office of Compliance Center for Drug Evaluation and Research.

21 CFR Parts 864 and 880

[Docket No. 87P-0336]

Medical Devices; Specimen Transport and Storage Container; Exemption From Most Current Good Manufacturing Practice Requirements

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is exempting the generic type of device specimen transport and storage container from most of the current good manufacturing practice (CGMP) requirements for devices. FDA has determined that compliance with all of the CGMP requirements is unnecessary to assure that this device is safe and effective. This action is being taken in response to a citizen petition.

EFFECTIVE DATE: December 13, 1989.

FOR FURTHER INFORMATION CONTACT: Alicia B. Abbott, Center for Devices and Radiological Health (HFZ-332), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1128.

SUPPLEMENTARY INFORMATION: On September 28, 1987, Richard-Allan Medical Industries, Richland, MI 49083, submitted to FDA a petition (87P-0336) requesting that FDA exempt the petitioner's dry (empty) and prefilled specimen transport and storage containers from the CGMP regulations in 21 CFR part 820, with the exception of §§ 820.180 and 820.198. FDA requested additional information from the petitioner, and that information was submitted on February 4, 1988.

On May 10, 1989, FDA published in the **Federal Register** (54 FR 20147-20148) a proposed rule. Interested persons were invited to submit comments by July 10, 1989. One comment was received. The comment agreed with the proposal to exempt specimen transport and storage containers from premarket notification and most of the CGMP regulations. The comment, however, pointed out that if 21 CFR 880.6175 were removed, specimen containers used for the collection and transportation of body waste, body exudate, or tissue samples that are not to be used for diagnostic examination, would not be covered by any regulation. The comment suggested that the identification section of 21 CFR 864.3250 be revised to include these devices.

FDA agrees with the comment. The omission was inadvertent. FDA has revised the regulation accordingly. Pursuant to § 880.6175, the devices in question were already classified in class I and exempt from premarket notification procedures and the CGMP requirements with the exception of §§ 820.180 and 820.198.

Environmental Impact

The agency has determined under 21 CFR 25.24(e)(2) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore,

VOL 54 ISS 217 NO 13 1989 UMI

neither an environmental assessment nor an environmental impact statement is required.

Economic Impact

FDA has carefully analyzed the economic effects of this rule and has determined that the rule will not have a significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act. In accordance with section 3(g)(1) of Executive Order 12291, the impact of this rule has been carefully analyzed, and it has been determined that the rule does not constitute a major rule as defined in section 1(b) of the Executive Order. The effect of the rule will be only to relieve an unnecessary burden on the manufacturers of the devices subject to § 864.3250.

List of Subjects

21 CFR Part 864

Blood, Medical devices, Packaging and containers.

21 CFR Part 880

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 864 and 880 are amended as follows:

PART 864—HEMATOLOGY AND PATHOLOGY DEVICES

1. The authority citation for 21 CFR part 864 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

2. Section 864.3250 is revised to read as follows:

§ 864.3250 Specimen transport and storage container.

(a) *Identification.* A specimen transport and storage container, which may be empty or prefilled, is a device intended to contain biological specimens, body waste, or body exudate during storage and transport in order that the matter contained therein can be destroyed or used effectively for diagnostic examination. If prefilled, the device contains a fixative solution or other general purpose reagent to preserve the condition of a biological specimen added to the container.

(b) *Classification.* Class I (general controls). If the device is not intended for over-the-counter (OTC) distribution, it is exempt from the premarket notification procedures in subpart E of part 807 of this chapter. If the device is not labeled or otherwise represented as sterile, it is exempt from the current good manufacturing practice regulations in Part 820 of this chapter, with the exception of § 820.180, with respect to the general requirements concerning records, and § 820.198, with respect to complaint files.

PART 880—GENERAL HOSPITAL AND PERSONAL USE DEVICES

3. The authority citation for 21 CFR part 880 continues to read as follows:

Authority: Secs. 501, 510, 513, 515, 520, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 360, 360c, 360e, 360j, 371).

§ 880.6175 [Removed]

4. Section 880.6175 *Specimen container* is removed from subpart G.

Dated: October 19, 1989.

Ronald G. Chesemore,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD11-89-20]

Regulated Navigation Area; San Francisco Bay

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a regulated navigation area in San Francisco Bay and implementing temporary mandatory participation in the existing Vessel Traffic Service system. This action is necessary due to the significant increase in vessel ferry traffic operating in the Bay. Increased ferry service is being used to provide alternate means of mass transportation since the normal traffic corridors in the Bay Area remain closed for repairs following structural damage resulting from the earthquake on October 17, 1989. Mandatory participation will be terminated and voluntary participation resumed as soon as the normal traffic corridors reopen and the need for increased vessel ferry service subsides.

EFFECTIVE DATE: This regulation becomes effective on 25 October, 1989 and will remain in effect until the normal traffic corridors in the Bay area are reopened. Local officials estimate that repairs to the landside bridges and highway approaches may take one to three months. This emergency will be terminated by publication of a document in the Federal Register.

ADDRESSES: Comments should be mailed to Commander (oan), Eleventh Coast Guard District, 400 Oceangate, Long Beach, CA 90822-5399. The comments will be available for inspection and copying at the Union Bank Building, 400 Oceangate, Room 701. Office hours are 7:00 a.m. to 4:00 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Van Houten, Eleventh Coast Guard District Aids to Navigation and Waterways Management Branch, Long Beach, California. Telephone number (213) 499-5414.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553 a Notice of Proposed Rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after Federal Register publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to facilitate the safety of navigation in San Francisco Bay.

Although this regulation is published as a final rule without prior notice, an opportunity for public comment is nevertheless desirable to ensure that the regulation is both reasonable and workable. Accordingly, persons wishing to comment may do so by submitting written comments to the office listed under "ADDRESS" in this preamble. Commenters should include their names and addresses, identify the docket number for the regulations, and give reasons for their comments. Based upon comments received, the regulation may be changed.

Drafting Information

The drafters of this regulation are Mr. Mike Van Houten, project officer for the Eleventh District Aids to Navigation and Waterways Management Branch, and Lieutenant Allen Lotz, project attorney for the Eleventh District Legal Office.

Discussion of Regulation

The circumstances requiring this regulation resulted from the disruption of normal landside traffic corridors (specifically the Oakland Bay Bridge and its highway approaches) due to structural damage sustained in the earthquake that struck the Bay Area on October 17, 1989. This has resulted in a significant increase in the volume of vessel ferry traffic operating in San Francisco Bay as an alternate means of mass transportation for commuters. Many of these vessels will be using new routes which cross existing vessel traffic lanes. Mandatory participation in the Vessel Traffic Service system is required to effectively monitor the increased commercial vessel traffic operating in the Bay, thereby facilitating the safety of navigation. This temporary regulation will be terminated as soon as the normal traffic corridors are reopened and the volume of ferry traffic decreases correspondingly. The intent of this regulation is to parallel the VTS procedures published in the "VTS San Francisco User's Manual" dated July 1984, with the one exception being that participation in the VTS will be mandatory rather than voluntary. Mariners holding this publication are encouraged to continue abiding by the procedures published therein.

This regulation is issued pursuant to 33 U.S.C. 1231 as set out in the authority citation for all of part 165.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Safety measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, subpart D of part 165 of title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05-1(g), 6.04-1, 6.04-6, 160.5, 49 CFR 1.46.

2. A new § 165.T1193 is added to read as follows:

§ 165.T1193 San Francisco Bay—Regulated Navigation Area.

(a) *The following is a regulated navigation area.* The waters of San Francisco Bay from the San Francisco Approach Large Navigation Buoy in position 37-45.0 N and 122-41.5 W shoreward through the Bay and up the tributaries of the Bay as far inland as Stockton and Sacramento.

(b) *Purpose and applicability.* (1) This regulation is intended to facilitate orderly vessel traffic movement and enhance the safety of navigation during a period of increased ferry vessel service in San Francisco Bay following disruption of normal landside traffic corridors in the aftermath of the October 17 earthquake.

(2) This regulation is applicable to all commercial and public vessels, United States flag and foreign flag, transiting the area that are:

(i) 300 or more gross tons and propelled by machinery.

(ii) Carrying more than six passengers for hire while operating as a ferry or on an excursion.

(iii) 26 feet or over in length engaged in towing another vessel astern, alongside, or pushing ahead.

(iv) Likely by reason of size, special operation, intended route, cargo, or difficulty of maneuvering, to restrict or affect navigation of other vessels; or

(v) A hazard to navigation by reason of distress such as fire, collision, grounding, or mechanical, or personnel failure.

(c) *Effective dates.* This regulation becomes effective on October 25, 1989 and will be terminated as soon as the normal traffic corridors in the Bay area are reopened and the increased vessel ferry traffic subsides. Local officials estimate the repairs to landside bridges and highways may take one to three months.

(d) *Definition of terms.*

(1) *Vessel Traffic Service (VTS):* Vessel Traffic Service is a general term encompassing all elements of a system employed to manage vessel movements in a port or other congested area.

(2) *Vessel Traffic Center (VTC):* The facility operated by the Coast Guard on Yerba Buena Island, receives, evaluates, displays and disseminates verbal information concerning ship movements and other matters concerning safe navigation within the San Francisco Vessel Traffic Service Area.

(3) *Traffic Routing System (TRS):* A system of charted Traffic Separation Schemes (TSS), consisting of traffic lanes with separation lines, limited traffic areas, precautionary areas and recreation areas designed to coordinate the flow of vessel traffic into, within and out of a port or waterway.

(4) *Limited Traffic Area (LTA):* An area which should be traversed only after certain safety precautions have been observed.

(5) *Traffic Lane:* An area, specifically defined on charts by boundary lines and separation lines, intended for use by vessel traffic proceeding in approximately the same direction.

(6) *Separation Line:* A charted line separating traffic lanes for vessels proceeding in opposite or nearly opposite directions.

(7) *Boundary Line:* A charted line defining the lateral limits of traffic lanes. Special caution should be exercised when navigating near traffic lane boundary lines.

(8) *Precautionary Area:* An area at the convergence of two or more traffic separation schemes where special caution should be exercised.

(9) *Recreation Area:* An area intended primarily for use by recreational craft.

(10) *Deep-Draft Vessels:* Vessels which cannot safely adhere to the TSS because of insufficient water depths along the prescribed route.

(11) *Radar Area:* The portion of the regulated navigation area where the VTC has radar coverage and is defined as follows: The area from the San Francisco Approach Large Navigation Buoy to East Brothers Island to the North and San Mateo Bridge to the South.

(12) *Vessel Movement Reporting System Area (VMRS):* The portion of the regulated area in which there is no radar coverage. Vessel movements are tracked by radio telephone reports. This is the area North of East Brothers Island and South of the San Mateo Bridge.

(e) *Description.* The purpose of the San Francisco Vessel Traffic Service is accomplished through three basic elements: a traffic routing system, a communications network and a surveillance system. All three elements are coordinated from the Vessel Traffic Center (VTC) located on Yerba Buena Island. The VTC is manned by Coast Guard personnel trained in the collection, correlation, analysis and dissemination of vessel movement information.

(f) *Concept of operations.* (1) The normal and predominant role of the VTC is to INFORM. The VTC will inform a participant of other vessels in the vicinity, hazards to navigation, discrepancies in aids to navigation and other items of mutual concern. This will be done either at the participant's request or, when in the interest of safety, such information is considered beneficial. Operation at the *INFORMATIONAL* level constitutes the majority of VTC San Francisco's actions.

(2) In certain circumstances, the VTC will *RECOMMEND* action be taken by a participant to prevent a potentially dangerous situation. Such recommendations are designed to assist the participant in avoiding hazardous situations well before they would otherwise occur. For example, a modest change in speed now could prevent a potentially hazardous meeting situation later in a narrow channel.

(3) In an emergency, or when a dangerous situation is imminent, VTC San Francisco, acting for the Coast Guard Captain of the Port, will *DIRECT* the movement of participating vessels within the VTS area. Such direction will normally take place after either or both of the previous actions (*INFORMATION* and *RECOMMENDATION*) have failed to alleviate the potentially dangerous situation.

VOL 54 ISS 217 NO 13 1989 UMI

(g) *Communication Rules.* (1) San Francisco Vessel Traffic Service maintains a continuous radiotelephone watch on Channel 13 (156.65 MHz FM) and Channel 16 (156.80 MHz FM). The call sign is "San Francisco Vessel Traffic Service". After communications have been established, the abbreviated call sign "TRAFFIC" may be used. Participants should call and work "TRAFFIC" on Channel 13. Should communication on Channel 13 be lost, call "TRAFFIC" on Channel 16 and be prepared to shift to either channel 12 (156.60 MHz FM) or Channel 18A (156.90 MHz FM) for further communications with VTS. All communications with the VTC should be in the English language and use the 24 hour clock system.

(2) Nothing in these procedures contravenes or modifies the Vessel Bridge-to-Bridge Radiotelephone Regulations.

(i) Channel 13 is the frequency assigned by these regulations for operators of approaching vessels to communicate their intentions to each other.

(ii) The responsibility for complying with the Vessel Bridge-to-Bridge Radiotelephone Act, and making reports required of participants in the Vessel Traffic Service, remains with the master or person in charge of the vessel, or the person designated by the master or person in charge to pilot or direct the movement of the vessel. However, should the pilot be required to shift to another frequency the master must maintain the listening watch required on Channel 13 and make the required reports.

(iii) Since Channel 13 serves as both Bridge-to-Bridge and VTS frequency in the San Francisco VTS Area, VTS participants are not excused from the requirement, set forth in 47 CFR 83.2245, to monitor Channel 16 (156.80 MHz), the national distress, safety and calling frequency. The requirement to monitor Channel 16 does not apply to single channel stations installed in compliance with the Vessel Bridge-to-Bridge Radiotelephone Regulations.

(h) *Radar Coverage Area Rules*—(1) *Initial Report.* Active participants should make initial reports to the VTC upon entering the regulated navigation area from seaward or upon getting underway from within the RADAR AREA, giving the following information:

Vessel Name
Position or Location
Destination
Route (if not within the TRS)
Anticipated Pilot Change (if applicable)
Pilot Designation
Description of Tow (if applicable)
Deepest Draft (If Vessel Greater Than 300 Tons)

(2) *Additional Radar Area Reports.* (i) When passing under any bridge. (This allows reconfirmation of the identity of the radar contact. The bridges are merely convenient geographical check points.)

(ii) Upon completion of pilot change, departure of pilot or other change in person directing the movement of the vessel.

(iii) When previously reported conditions or intentions change.

(iv) When intending to deviate from the TRS.

(v) In emergency situations (after completing maneuvers necessary to protect the safety of life, property, or environment), giving all information pertinent to safety of navigation.

(vi) To report any condition (concentration of non-participants, weather, debris, vessel in distress, aid to navigation discrepancy, etc.) considered to be a hazard to navigation.

(3) *Radar Area Final Report.* Upon docking, anchoring, mooring or upon departing from the boundaries for the Radar Area the place and time should be reported to the VTC.

(4) *Loss of Radar Coverage.* In the event of loss of radar capability, the Radar Area will be declared a Vessel Movement Reporting System Area and vessels will be advised by the VTC what interim reports to make.

(i) *Vessel Movement Reporting System (VMRS) Rules.* The VMRS is in effect where there is no radar coverage in the VTS area. It is served solely by radiotelephone reports from participants. These reports are recorded and movements tracked by the VTC.

(1) *VMRS Area Initial Reports.* Participants should make initial reports to the VTC upon preparing to get underway from within the VMRS Area, giving applicable information from that prescribed for intial reports in the Radar Area.

(2) *VMRS Area Follow-up Reports.* Follow-up reports should be made:

(i) When actually underway.

(ii) When passing the following points in the northern VMRS:

POINT SAN PABLO, RIO VISTA BRIDGE, ANTIOCH BRIDGE, CARQUINEZ BRIDGE, LIGHT 51, PRISONERS POINT, S.P. RAILROAD BRIDGE, SACRAMENTO, STOCKTON, NEW YORK POINT

(iii) When entering or departing Petaluma River Entrance Channel or Mare Island Strait.

(iv) When passing the following points in the southern VMRS:

HUNTERS POINT, SAN MATEO BRIDGE

(v) When previously reported conditions or intentions change.

(vi) When intending to deviate from normally traveled routes.

(vii) In an emergency situation (after completing maneuvers necessary to protect the safety of life, property or environment), giving all information pertinent to safety of navigation.

(viii) To report any condition (concentration of nonparticipants, weather, debris, vessel in distress, aid to navigation discrepancy, etc.) considered to be a hazard to navigation.

(3) *VMRS Area Final Report.* (i) Upon docking, anchoring, mooring or departing the VMRS Area, the place and time should be reported to the VTC.

(ii) All reports should advise the time of the event being reported.

(4) *Read-back.* The VTC will acknowledge the receipt of reports by "reading back" the information received. The vessel can then confirm the accuracy of the information received at the VTC. If the VTC believes the report to be incomplete or in error, the vessel will be requested to repeat the report.

(j) *Traffic Routing System (TRS).* (1) A Traffic Routing System (TRS) is established in that portion of the VTS area seaward of the Golden Gate and, in the Bay, north of Hunters Point and south of Carquinez Strait. The TRS is composed of traffic lanes, precautionary areas, a limited traffic area, and recreation areas, and is shown on charts of the San Francisco area.

(2) The traffic lanes of the TRS are designed to separate the flow that a vessel traffic in such a way as to reduce the likelihood of a vessel moving in one direction will meet or cross the bow of another vessel bound in an opposite or nearly opposite direction. The lateral limits of the traffic lanes are defined by a separation line or boundary lines. Traffic proceeds within the lanes in the direction which holds the separation line on the port side of the vessel.

(3) Where traffic lanes converge or cross, precautionary areas are established. A circular area west of the Golden Gate and a circular area east of Alcatraz Island are designated precautionary areas. Potentially hazardous crossing encounters are limited by the traffic lanes to these relatively obstruction-free areas.

(4) All vessels should adhere to the TRS. The final decision to deviate from the TRS remains that of the master, pilot, or person in command. All intentions to proceed contrary to the TRS should be made known to the VTC *as far in advance as possible* to permit evaluation and dissemination of necessary warnings to other participants.

(5) All vessels (including public vessels) should navigate within the vessel traffic lanes. Excepted are those vessels engaged in intra-harbor movements whose routes do not infringe on the traffic separation scheme.

(6) Vessels navigating within the traffic lanes should keep the separation line to the port side of the vessel and should maintain a course which conforms with the direction of the lane.

(7) Vessels should avoid crossing the TSS whenever possible. When it is necessary to cross a TSS, this should be done at as close to a right angle as practicable.

(8) Except when joining, leaving, crossing or navigating within a vessel traffic lane or precautionary area, vessels should stay clear of the lanes and precautionary areas by as wide a margin as practicable. Vessels choosing to operate outside of the lanes may do so, but should remain well outside.

(9) Vessels are encouraged to join and leave the traffic lanes at the precautionary areas or at the ends of the lanes. When it is necessary for a vessel to join or leave the traffic lane at some point other than the precautionary areas or a lane termination, the vessel should join or leave the traffic lane at as small an angle as practicable.

(10) Vessels within the traffic lanes who cannot comply with these traffic separation procedures because of an emergency should complete whatever maneuvers are required for safe navigation. Notify VTC of the circumstances as soon as possible.

(11) Vessels that for some reason other than an emergency, cannot comply with the traffic separation procedures should notify the VTC sufficiently in advance of each impending deviation to allow for evaluation and coordination with other vessels. This includes any vessel whose draft precludes it from following the traffic lanes. Even though similar deviations are made repeatedly, a vessel should inform VTC each and every time it proposes to deviate from the guidelines. The following are situations that may require a vessel to deviate from the TRS:

(i) Vessels inbound to ports in Oakland may desire to transit the D–E span of the Oakland Bay Bridge to facilitate safe entry into the Oakland Bar Channel. This is normally acceptable, provided there is no conflicting traffic for that span or the Limited Traffic Area south of Yerba Buena Island during the period of transit. The VTC should be notified of such intentions well in advance. In the event of conflicting traffic, the vessel will have the option of waiting until that route is clear, or using the TSS through A–B or B–C span.

(ii) Vessels whose draft precludes adherence to the TRS are considered "deep-draft vessels." Such vessels, when bound from sea to Anchorage 9 should use the "Deep-Draft Route" east of the Golden Gate Bridge. This route is eastbound in the westbound lane, north of Harding Rock and Alcatraz Island, east of Blossom Rock, then through the C–D or D–E span of the Oakland Bay Bridge to Anchorage 9. The Pilot or Master will determine the need to use this route and should report his decision to VTS. When such a vessel enters the Bay, the VTC informs other vessels in advance. During periods of traffic congestion, a Coast Guard escort may be provided to warn other vessels that the deep-draft vessel will be proceeding contrary to the TSS.

(12) The recreational boating public is generally aware of the TRS and has legitimate expectations that ships will adhere to it. It is normally not possible for the VTC to contact recreational vessels on the VTS radio frequencies and often they do not appear on radar. Therefore, particularly in the area north and south of Alcatraz Island (where many small boats are present both day and night), the hazards of deviation from the TRS are most pronounced. For these reasons, the VTS will recommend adherence whenever a proposal to deviate from the TRS is based only on convenience. In cases of known contrary movements, the VTC may make a Marine Safety Broadcast on channels 16 and 22A to warn the boating public of the impending deviation.

(13) Ferry vessels should notify VTC of their intended route upon departure and at any time during their transit when their progress is slowed or their route is changed. The VTC should again be notified upon completion of the movement. Ferry and tour boats are expected to comply with the TRS as closely as their routes will allow.

(14) Recreation areas should be avoided by vessels other than recreational craft. They should not be used by vessels of 300 gross tons or more for through passage or for any other purpose, except in case of emergency of special circumstances.

(15) The Pinole Shoal Channel in San Pablo Bay should be considered a ONE-WAY CHANNEL whenever an explosive or hazardous-material-laden vessel or a vessel with a draft of 30 feet or greater is transiting the channel.

(16) Explosive or hazardous-material-laden vessels should comply with the Captain of the Port guidelines for vessels with dangerous cargoes. All other vessels should proceed in such a manner as to limit meeting or passing situations with explosive or hazardous-material-laden vessels to those which are unavoidable.

(17) Any vessels that cannot enter port immediately upon arrival at the pilot station may proceed on various courses within the seaward portion of the VTS area in such a way as not to present a hazard to navigation. Alternatively they may seek safe anchorage in an area four miles due north of the charted position of the San Francisco large Navigation Buoy "SF". Ships so anchoring should inform the VTC.

(k) *Limited Traffic Area Procedures.* (1) In San Francisco Bay there is one area which, due to its location, is considered to present high risk of collision to vessels meeting within its boundaries. For this reason it has been designated a Limited Traffic Area (LTA). This area is located immediately south of Yerba Buena Island. It extends from the boundary lines of the vessel traffic lanes eastward to encompass the Oakland Bar Channel, Inner and Outer harbor Entrance Channels and Oakland Outer harbor. Within this area vessel movement is normally restricted to one-way traffic. The VTC will monitor and assist vessels in coordinating their movements through this area.

(2) The limited Traffic Area south of Yerba Buena Island should be used by only one vessel at a time or by vessels proceeding generally in the same direction.

(3) Vessels 300 gross tons or over intending to transit this area should notify the VTC of the intended period of transit. This should be done at least 15 minutes before entering the area and prior to committing the vessel to an unchangeable action. Such vessels should not enter the Limited Traffic Area when another vessel 300 gross tons or over is in the area proceeding in the opposite direction. However, under favorable conditions, and only after clear understanding has been reached on Channel 13 between vessels as to the point and manner of passing, two vessels may agree to pass within this area. The VTC will monitor and evaluate each such arrangement.

(4) In the event no safe passing arrangements are reached or the VTC does not consider the intended arrangement to be safe, the VTC will so inform the participants, recommending alternate action. If the situation is not resolved or the VTC is not convinced a safe passage can be made, the VTC may

direct action which will resolve the problem.

(5) The VTC will advise each vessel stating an intention to transit this area

direct action which will resolve the problem.

(5) The VTC will advise each vessel stating an intention to transit this area whenever its intended transit conflicts with the known intent of any other vessel. Vessels should notify the VTC immediately of any change in intended transit period to prevent unnecessary delays of other vessels.

(1) Regulated Navigation Area Check-in Locations—

(i) Transit from Pilot area to locations within San Francisco Bay:

(A) Participating vessels check-in upon picking up pilot.

(B) Check-in when passing under the Golden Gate Bridge.

(C) Check-in when passing Alcatraz Island.

(ii) South Bay Transit:

(A) Check-in when passing under the Oakland Bay Bridge.

(B) Check-in when passing Oakland Inner Harbor buoys 5 and 6 (Oakland Estuary transits).

(C) Check-in when passing under San Mateo Bridge (South Bay transits).

(D) Check-in when mooring.

(iii) Port of Sacramento/Stockton:

(A) Check-in when passing under the Richmond-San Rafael Bridge.

(B) Check-in when entering Pinole Shoals Channel (East Brothers area).

(C) Check-in when passing under the Carquinez Straits Bridge.

(D) Check-in when passing under the Southern Pacific Railroad Bridge.

(E) Check-in when passing New York Point.

(iv)Sacramento:

(A) Check-in when passing under the Rio Vista Bridge.

(B) Check-in when passing River marker 56 in the Sacramento Deep Water Ship Channel.

(C) Check-in when mooring at the Port of Sacramento.

(V) Stockton:

(A) Check-in when passing Antioch Point.

(B) Check-in when passing Prisoners Point.

(C) Check-in when mooring at the Port of Stockton. When proceeding outbound the same check-in locations apply.

Dated: October 25, 1989.

J.W. Kime,

Rear Admiral, U.S. Coast Guard Commander, Eleventh Coast Guard District.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3679-5; KY-062]

Approval and Promulgation of Implementation Plans KY: Approval of Revisions to Appendix N

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA today approves a revision to Appendix N of the Kentucky State Implementation Plan (SIP). Appendix N consists of regulations developed by the Air Pollution Control District of Jefferson County (the District), and applies only in Jefferson County, Kentucky; they are implemented by the District. EPA approval of the regulations enables the District to retain authority for all subject activities in Jefferson County.

EFFECTIVE DATE: This action will be effective January 12, 1990, unless notice is received within 30 days that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register.**

ADDRESSES: Written comments should be addressed to Richard A. Schutt of EPA Region IV's Air Programs Branch (see EPA Region IV address below). Copies of the material submitted by Kentucky may be examined during normal business hours at the following location:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460

Region IV Air Programs Branch, Environmental Protection Agency, 345 Courtland Street, Atlanta, Georgia 30365

Kentucky Department for Environmental Protection, Frankfort Office Park, 18 Reilly Road, Frankfort, Kentucky 40601

Air Pollution Control, District of Jefferson County, 914 East Broadway, Louisville, Kentucky 40204.

FOR FURTHER INFORMATION CONTACT: Richard A. Schutt of the EPA Region IV Air Programs Branch at 404-347-2864 (FTS-257-2864) and at the above address.

SUPPLEMENTARY INFORMATION: The Air Pollution Control District of Jefferson County (the district) develops and implements air quality regulations in Jefferson County, Kentucky. The District's regulations are at least as stringent as corresponding Kentucky regulations. The District's regulations are incorporated by the State as part of the Kentucky SIP; in this manner, the State has the authority to implement the regulations in Jefferson County if the District cannot.

The SIP revision affected by today's approval was adopted by the Air Pollution Control Board of Jefferson County on April 19, 1989, and submitted to EPA by Kentucky on August 2, 1989. The regulation being approved by this notice is 2.05 Prevention of Significant Deterioration of Air Quality. On September 1, 1989, at 54 FR 36307, EPA approved Kentucky's regulation 51:017 Prevention of Significant Deterioration of Air Quality. In the August 2, 1989, submittal letter, the secretary of the Kentucky Natural Resources and Environmental Protection Cabinet stated that "Regulation 2.05 has been reviewed by the Cabinet and has been found to be not less stringent than the corresponding state regulation" (that has recently been federally approved).

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective January 12, 1990 unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted.

If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective January 12, 1990.

Final Action: EPA is today finalizing approval of the addition of Regulation 2.05 contained in Appendix N of the Kentucky State Implementation Plan.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214-2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for a period of two years.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 12, 1990. This action may not be challenged later in proceedings to enforce its requirements (see 307(b)(2)).

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any State implementation plan. Each request for revision to the State implementation plan shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Intergovernmental relations.

Note: Incorporation by reference of Kentucky State Implementation Plan was approved by the Director of the Federal Register on July 1, 1982.

Dated: October 30, 1989.

Joe R. Franzmathes,

Acting Regional Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart S—Kentucky

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401-7642.

2. Section 52.920 is amended by adding paragraph (c)(65) to read as follows:

§ 52.920 Identification of plan.

* * * * *

(c) * * *

(65) Addition of Jefferson County Regulation 2.05, Prevention of Significant Deterioration of Air Quality, submitted on August 2, 1989, by the Kentucky Natural Resources and Environmental Protection Cabinet.

(i) Incorporation by reference.

(A) Jefferson County Regulation 2.05, Prevention of Significant Deterioration of Air Quality. This regulation became effective April 19, 1989.

(ii) Other material.

(A) August 2, 1989, letter from the Natural Resources and Environmental Protection Cabinet.

BILLING CODE 6560-50-M

40 CFR Part 52

[MS-013 FRL-3679-6]

Approval and Promulgation of Implementation Plans; Mississippi: PM_{10} SIP Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: On July 26, 1988, the State of Mississippi submitted revisions to its State Implementation Plan (SIP) for particulate matter. The revisions became State-effective on June 4, 1988. The revisions were adopted pursuant to the requirements of Section 110 of the Clean Air Act to provide for the attainment of EPA's new particulate matter standards, known as "PM_{10}" standards. EPA proposed approval of these revisions on March 2, 1989 (54 FR 8764), and no comments were received.

DATE: This rule will become effective on December 13, 1989.

ADDRESSES: Copies of the State's submittal are available for review during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Environmental Protection Agency, Region IV, Air Programs Branch, 345 Courtland Street NE., Atlanta, Georgia 30365

Mississippi Department of Natural Resources, Bureau of Pollution Control, 2380 Highway 80 West, Jackson, Mississippi 39205

FOR FURTHER INFORMATION CONTACT: Ms. Rosalyn D. Hughes, Air Programs Branch, EPA Region IV, at the above address and telephone number (404) 347-2864 or FTS 257-2864.

SUPPLEMENTARY INFORMATION: Pursuant to the 1977 amendments to the Clean Air Act, EPA, on July 1, 1987 (52 FR 24634), promulgated revised primary and secondary National Ambient Air Quality Standards (NAAQS) for particulate matter by replacing the total suspended particulate matter standard with a standard that included only those particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers. The particles are referred to as PM_{10}.

The PM_{10} standards cover a size range of particles that is different than the range of particles covered by the former particulate standard for total suspended particulates (TSP). This means that States must develop and implement PM_{10} control programs. The process being used generally follows the basic approach used in the development and implementation of TSP control programs. First, EPA evaluated the probabilities of PM_{10} air quality levels predicted from actual TSP data and concluded that Mississippi was a Group III area, which means that the existing particulate matter control strategy is believed to be largely adequate to attain and maintain the PM_{10} standards. However, the Mississippi SIP still needed to be revised to address the PM_{10} NAAQS in the following ways:

(a) To include State ambient air quality standards for PM_{10} at least as stringent as the NAAQS,

(b) To trigger preconstruction review for new or modified sources which would emit significant amounts of either PM or PM_{10} emissions,

(c) To invoke the emergency episode plan to prevent PM_{10} concentrations from reaching the significant harm level of 600 $\mu g/m^3$,

(d) To meet ambient PM_{10} monitoring requirements of 40 CFR part 58, and

(e) To meet the requirements of 40 CFR 51.322 and 51.323 to report actual annual emissions of PM_{10} (beginning with emissions for 1988) for point sources emitting 100 tons per year or more.

Mississippi revised its SIP to address the PM_{10} NAAQS and EPA proposed approval of these revisions on March 2, 1989 (54 FR 8764). No comments were received. The definitions for "Total suspended particulate," "Particulate matter emissions," "PM_{10}," and "PM_{10} emissions" are being added or modified to read the same as the federal definitions. The other existing definitions in the SIP are being recodified.

In the new source review permit regulations, the definition of "Offset policy" was modified to identify the version of the federal regulations adopted. Also, definitions for "Significance levels" and "Significant impact" were added. The Redesignated Offset Policy was restructured so that the applicability requirement was recodified with two criteria and a new section was added defining prohibitions, more stringent that the federal conditions, on receiving a construction permit.

In the Emergency Episode Regulations several revisions were made. In the Episode Criteria Section, the paragraphs for Alert, Warning and Emergency were revised to add the criterion for PM_{10}, to delete the criteria for particulates and for particulates and SO_2 combined and to add wording which matches the federal definition regarding continuation or recurrence of high pollutant concentration. The State took this opportunity to make additional changes unrelated to PM_{10}. The paragraph about air pollution forecasts was modified to contain the proper name of the air pollution agency; "oxidants" was changed to "ozone" in the Alert, Warning and Emergency paragraphs; and the ozone concentration criteria in

VOL
54
ISS
2
1
7
NO
13
1989
UMI

the Emergency paragraph were modified to match the federal definition.

In the Emergency Orders Section, "Suspended particulate matter" was deleted from the Air Pollution Alert and Air Pollution Warning paragraphs and replaced with "PM_{10}."

Mississippi also submitted an updated Air Quality Surveillance Plan which included the ambient PM_{10} monitoring requirements of 40 CFR Part 58 and the reporting requirements of 40 CFR 51.322 and 51.323. The Air Quality Surveillance Plan is part of the narrative portion of the Mississippi SIP, chapter 9.0, Air Monitoring. Other revisions to the narrative portion of the SIP that reflect the addition of PM_{10} include the following sections:

1.15 Notification of Public Hearing for Plan Revision for PM_{10} Requirements
3.6 Legal Authority for the PM_{10} Plan Revision
5.5 Control Strategy for the Development of Emission Regulations for PM_{10}
6.9 Control Regulations for PM_{10} Revisions
14.1.4 Health Effects of the PM_{10} Plan Revisions
14.3.4 Economic Effects of the PM_{10} Plan Revisions
14.5.4 Social Effects of the PM_{10} Plan Revisions
14.6.4 Air Quality Effects of the PM_{10} Revisions

The Prevention of Significant Deterioration (PSD) program in Mississippi is delegated by EPA. The delegation was updated to reflect the addition of PM_{10} on May 20, 1988. Regulation APC–S–1, Section 6.2, paragraph 2 was revised to indicate the delegation update. The Ambient Air Quality Standards (AAQS), Regulation APC–S–4, were revised to incorporate PM_{10}. The PSD delegation and the AAQS are not part of the federally approved SIP but were submitted as attachments to the SIP.

Final Action: EPA has reviewed the submitted material and found it to meet the requirements of 40 CFR Part 51. Therefore, EPA is today approving Mississippi's revisions for PM_{10}.

For further information on EPA's analysis, the reader may consult a Technical Support Document which contains a detailed review of the materials submitted. This is available at the EPA address given above.

Under Section 307(b)(1) of the Act, petition for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by [60 days from date of publication]. This action may not be challenged later in proceedings to enforce its requirements (see Section 307(b)(2)).

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the Federal Register on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for a period of two years.

BILLING CODE 6560–50–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 672

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of modification of fishery closure; request for comments.

SUMMARY: NOAA announces a modification of a closure to bottom trawling for groundfish in the Gulf of Alaska, by allowing additional bottom trawling for flounder by vessels that participate in a special observer program, until an additional Pacific halibut (halibut) mortality in the flounder fishery reaches 80,000 pounds (36 metric tons (mt)). This action is necessary to provide additional fishing opportunity to harvest the available total allowable catch (TAC) for flounder while minimizing the catch of halibut. It is intended to accomplish the goals and objectives of the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP).

EFFECTIVE DATE: This notice is effective November 12, 1989. Comments are invited until November 22, 1989.

ADDRESS: Comments on this action may be sent to, and copies of the special observer program may be requested from, Steven Pennoyer, Regional Director, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Management Biologist, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION:

Background

The FMP was developed under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and is implemented by regulations appearing at 50 CFR 611.92 and part 672. Under

§ 672.20(f)(1) of the regulations, trawling with gear other than pelagic trawls was prohibited on September 2, 1989 (54 FR 37110, September 7, 1989), when projected mortality of halibut inflicted by groundfish fishing operations reached the specified prohibited species catch (PSC) limit of 2,000 mt established at 54 FR 6524 (February 13, 1989). Reasons for that closure are contained in the Federal Register notice and include a projection that bottom trawling results in an average 4.5 percent halibut bycatch rate and a subsequent mortality rate of 50 percent of halibut that are caught. The North Pacific Fishery Management Council (Council) reviewed this closure at its September 26–29, 1989 meeting with respect to its overall objectives pertaining to groundfish fishing while protecting halibut, which are important to other U.S. fishermen.

The Council received public testimony from representatives of fishermen who participated in the flounder fishery. This testimony made reference to groundfish catch and halibut bycatch data gathered by fishery observers and reported by the Alaska Department of Fish and Game (ADF&G). Some of these data showed that fishing for deepwater species of flounder (i.e., rex sole and dover sole) resulted in halibut bycatch rates that were less than the 4.5 percent rate used to project the fishery closure. The Council then voted to recommend that further bottom trawling be allowed to continue for flounder by operators who had demonstrated a substantially lower halibut bycatch rate than the projected rate until the additional halibut mortality reached 80,000 pounds.

The Secretary of Commerce (Secretary) has reviewed the Council's recommendation and regulations implementing the FMP that govern the halibut PSC. Under the regulations, the Director, Alaska Region, NMFS (Regional Director) is authorized to allow some or all vessels to which a PSC limit applies to continue to fish for groundfish under specified conditions after issuing relevant findings about the following considerations:

(A) The risk of biological harm to halibut stocks and of socioeconomic harm to authorized halibut users posed by continued bottom trawling by these vessels;

(B) The extent to which these vessels have avoided incidental halibut catches up to that point in the year;

(C) The confidence of the Regional Director in the accuracy of the estimates of incidental halibut catches by these vessels up to that point in the year;

(D) Whether observer coverage of these vessels is sufficient to assure adherence to the prescribed conditions and to alert the Regional Director to increases in their incidental halibut catches; and

(E) The enforcement record of owners and operators of these vessels, and the confidence of the Regional Director that adherence to the prescribed conditions can be assured in light of available enforcement resources.

After having reviewed the above considerations, the Regional Director has determined that further fishing for flounder with bottom trawls is warranted and hereby makes the following findings:

(A) An additional 36 mt of halibut mortality will not pose a significant risk of biological harm to halibut stocks or socioeconomic harm to authorized halibut users, because halibut stocks are healthy and 36 mt (80,000 pounds) represents only 0.16 percent of the 1989 halibut quota of 49 million pounds available for commercial harvest in the Gulf of Alaska;

(B) Available ADF&G observer information shows halibut bycatch rates by vessles making flounder landings through September 2, 1989, were less than the average 4.5 percent projected for the trawl fishery. Therefore, based on this information, the Regional Director believes that these rates reflect the ability of vessels targeting on flounders to reduce halibut bycatches;

(C) Because observer coverage of vessels participating in the flounder fishery was acceptable with respect to statistical sampling design, the Regional Director is confident in the accuracy of reported halibut bycatch rates;

(D) Operators of vessels that participate in additional flounder fishing must comply with an observer program prepared by the Regional Director. Therefore, the Regional Director is confident that observer coverage of these vessels will be sufficient to assure adherence to the prescribed conditions while bottom trawling in the Gulf of Alaska and to alert him to increases in incidental halibut catches; and

(E) Enforcement resources are sufficient to assure adherence to the prescribed conditions.

On the basis of the Regional Director's findings, the Secretary modifies the previously issued closure notice by reopening the Gulf of Alaska to bottom trawling for flounder by operators of vessels that agree to comply with specified conditions stated in an observer plan as requested by the Regional Director under 50 CFR 672.27 and available from him upon request at the above address. In making this decision, the Secretary recognizes that all vessel operators wishing to fish for flounder, not just those that had fished earlier and could demonstrate a low halibut bycatch rate, will be given the opportunity to participate, and that the increase in PSC limit is more than that recommended by the Council. The Secretary did not define during the course of the 1989 fishery what a low halibut bycatch was or what levels of observer coverage would be considered adequate to substantiate a bycatch rate. For reasons of fairness, the Secretary is allowing further flounder fishing by all fishermen, subject to the observer plan. The Secretary also notes that the amount of halibut (18 mt) recommended by the Council was based only on testimony from a single processor about what might be needed to support flounder catches by that processor. Since more than one processor is expected to participate in the fishery, the Secretary believes 18 mt of halibut would likely not be adequate, based on the best available information. Rather than open a fishery without adequate provision for halibut bycatch, the Secretary has determined that the larger PSC amount of 36 mt is more reasonable.

The observer plan requires each operator of any vessel that participates in the flounder fishery to comply with the following standards.

(1) Each vessel must carry an observer for purposes of observing halibut bycatch rates while bottom trawling.

(2) The accounting period for purposes of measuring halibut bycatch rates during this fishery shall be weekly from midnight (Alaska Standard Time), Sunday morning until midnight (Alaska Standard Time), the following Saturday night.

(3) The operator of any vessel must cease bottom trawling in the Gulf of Alaska for the remainder of the fishing year if:

(a) The observed average halibut bycatch rate for a vessel reaches 4.5 percent of the total amount of fish retained on board and fish products, calculated in round weight equivalents, that are retained on board at the end of the first accounting period in which that vessel participates, or;

(b) The observed average halibut bycatch rate for a vessel reaches 3.0 percent of the total amount of fish retained on board and fish products, calculated in round weight equivalents, that are retained on board at the end of any subsequent accounting period, or;

(c) If the aggregated halibut bycatch by all vessels participating in the bottom trawl flounder fishery reaches 36 metric tons of halibut mortality.

VOL 54 ISS 217 NOV 13 1989 UMI

(4) While bottom trawling, vessels may not catch and retain other groundfish species in amounts that are 20 percent or more of the amount of fish and fish products retained on board a vessel, calculated in round weight equivalents. This restriction is intended to provide additional fishing opportunity to harvest flounder, while minimizing the harvest of other groundfish species for which the halibut bycatch rates are higher.

If a vessel operator fails to comply with any standard contained in the observer plan, that vessel's participation under the observer plan will be considered terminated.

Classification

This action is taken under §§ 672.20(f) and 672.27 and is in compliance with Executive Order 12291. The Secretary finds for good cause that it is impracticable and contrary to the public interest to provide prior notice and opportunity to comment on this action or to delay for 30 days its effective date under sections 553 (b) and (d) of the Administrative Procedure Act (APA). Bottom trawling for flounder must commence immediately under this notice in order to provide adequate fishing opportunity to harvest available flounder during the remainder of the fishing year. The Secretary also finds that this action relieves a restriction under section 553(d) of the APA by removing the prohibition on fishing with gear other than pelagic gear in the Gulf of Alaska. The Secretary invites comments until November 22, 1989. These comments will be considered in administering this notice, and in determining whether to modify or rescind it.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 7, 1989.

Richard H. Schaefer,

Director of Office of Fisheries, Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register

Vol. 54, No. 217

Monday, November 13, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1135

[DA-90-001]

Milk in the Southwestern Idaho-Eastern Oregon Marketing Area; Notice of Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Prepared suspension of rule.

SUMMARY: This notice invites written comments on a proposal to continue a suspension of portions of the Southwestern Idaho-Eastern Oregon Federal milk order. The provisions proposed to be suspended relate to limits on the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. This action was requested by the Dairymen's Creamery Association, Inc. (DCA), an association of producers that supplies much of the market's fluid needs and handles reserve milk supplies. DCA has requested continuation of the suspension to prevent uneconomic movements of milk. The proposed suspension would begin in December 1989 and continue for an indefinite period. The same order provisions have been suspended since December 1988.

DATE: Comments are due on or before November 20, 1989.

ADDRESS: Comments (two copies) should be filed with the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-4829.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under the criteria contained therein.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), the suspension of the following provisions of the order regulating the handling of milk in the Southwestern Idaho-Eastern Oregon marketing area is being considered for an indefinite period beginning December 1989:

In § 1135.13, paragraphs (f) (3), (4), (5), and (6).

All persons who want to send written data, views or arguments about the proposed suspension should send two copies of them to the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, by the 7th day after publication of this notice in the **Federal Register**. The period for filing comments is limited to 7 days because a longer period would not provide the time needed to complete the required procedures to make the action effective beginning with December 1989.

The comments that are sent will be made available for public inspection in the Dairy Division during normal business hours (7 CFR 1.27(b)).

Statement of Consideration

The Dairyment's Creamery Association, Inc. (DCA), an association of producers that supplies much of the market's fluid milk needs and handles much of the market's reserve milk supplies, has requested an indefinite suspension. The requested action would continue the suspension of provisions that limit the amount of producer milk that a cooperative association or other handler may divert from pool plants to nonpool plants. These provisions have been suspended since December 1988 through two previous suspension actions.

The order provides that a cooperative association may divert up to 80 percent of its total member milk received at all pool plants or diverted from pool plants during any month. Also, a proprietary bulk tank handler may divert up to 80 percent of the producer milk it delivers to, or diverts from, pool plants during any month. Finally, the operator of a pool plant may divert up to 80 percent of its receipts of producer milk (for which the pool plant operator is the handler during the month) during any month. DCA indicates that the reasons for an indefinite suspension relate to the persisting conditions that led to the two prior six-month suspensions of the same order provisions. These include the costs of unloading and re-loading of about 2,000,000 pounds of milk through a supply plant each month to meet diversion requirements, which results in increased exposure of the milk to contamination and in shrinkage of milk weights. In addition, continuing uncertainties regarding production trends, economic conditions, and milk utilization percentages make it difficult to establish a diversion percentage that would allow an effective allocation of the milk supply.

DCA indicates that milk production in the southeastern portion of the marketing area continues to increase in terms of the number of dairy farms and the size of dairies. With present and anticipated increases in milk prices to dairymen, DCA believes future production in the region will likely increase over this year. According to DCA, even though sales of Class I products have increased about 6 percent in 1989, production is still projected to surpass Class I needs for the market.

Finally, DCA believes that an indefinite suspension of the diversion requirements will meet the needs of the order and not cause disruption to producers who have historically supplied the needs of the Southwestern Idaho-Eastern Oregon marketing area. DCA also stated that when conditions are more settled, they would be in a position to propose an amendment to the order.

Farmers Home Administration

7 CFR Part 1948

Intermediary Relending Program; Correction

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule; Correction.

SUMMARY: The Farmers Home Administration corrects a proposed rule published October 11, 1989 (54 FR 41626). In the subject proposed rule errors were made which could affect the interpretation of the proposal and therefore could possibly affect the public comment process. This action is taken to correct those errors. The intended effect is to make the proposed rule read as intended.

DATES: Comments on the proposed rule must be received on or before November 13, 1989.

ADDRESSES: Submit written comments in duplicate to the Chief, Directives and Forms Management Branch, Farmers Home Administration, Room 6348, South Agriculture Building, 14th and Independence Avenue, SW, Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection during regular working hours at the above address.

FOR FURTHER INFORMATION CONTACT: M. Wayne Stansbery, Business and Industry Loan Specialist, Farmers Home Administration, USDA, Room 6327, South Agriculture Building, 14th and Independence Avenue, SW, Washington, DC 20250, Telephone (202) 475–3819.

SUPPLEMENTARY INFORMATION: The following is a list of the errors being corrected by this document:

1. In § 1940.123(c)(1)(i), regarding priority for obtaining other funds, the word "loan" was inadvertently omitted. This may cause a reader to incorrectly interpret the sources of other funds that would result in the award of priority points.

2. In § 1948.123(c)(2)(iii), the words "that the ultimate recipient" were inadvertently omitted. This could cause a reader to incorrectly interpret that the intermediary would be required to make a certification that is intended to to be required from the ultimate recipient.

Accordingly, the Farmers Home Administration is correcting its proposed revisions to title 7, chapter XVIII, part 1948, of the Code of Federal Regulations, as published on October 11, 1989 (54 FR 41626), as follows:

PART 1948—RURAL DEVELOPMENT

Subpart C—Intermediary Relending Program (IRP)

On page 41628, section 1948.123, paragraphs (c)(1)(i) introductory text and (c)(2)(iii) introductory text, are correctly revised to read as follows:

§ 1948.123 Filing and processing applications for loans.

* * * * *

(c) * * *

(1) * * *

(i) The intermediary will obtain non-Federal loan or grant funds to pay part of the cost of the ultimate recipients' projects. The amount of funds from other sources will average:

* * * * *

(2) * * *

(iii) The intermediary will require as a condition of eligibility for a loan to an ultimate recipient that the ultimate recipient certify in writing that it will employ the following percentage of its workforce from members of families with income below the poverty line:

* * * * *

Dated: November 6, 1989.

Neal Sox Johnson,
Acting Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-CE-30-AD]

Airworthiness Directives; Cessna 208 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This Notice proposes to adopt a new Airworthiness Directive (AD), applicable to certain Cessna 208 series airplanes, which would require inspection of the engine mount ring lower attachment points and replacement of the nose landing gear shimmy dampener. This proposal is prompted by several reports of failure of the shimmy dampener which have led to severe shimmy of the nose wheel. The proposed actions will lower the possibility of nose landing gear shimmy, detect cracks in the engine mount ring, and preclude separation of the engine from the airplane.

DATES: Comments must be received on or before December 13, 1989.

ADDRESSES: Cessna Caravan Service Bulletin CAB88–14, dated April 8, 1988, applicable to this AD, may be obtained from the Cessna Aircraft Company, P.O. Box 7704, Wichita, Kansas 67277. This information also may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–CE–30–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Douglas W. Haig, Wichita Aircraft Certification Office, Mid-Continent Airport, 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone (316) 946–4409.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–CE–30–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

The FAA has received a report that a Cessna Model 208 airplane experienced severe shimmy of the nose wheel assembly during landing. Upon examination, it was determined that failure of the nose landing gear shimmy dampener allowed the gear to vibrate, which in-turn induced cracks in the lower corners of the engine mount ring. The FAA is also aware of several similar occurrences of cracked engine mount rings being found after nose gear shimmy encounters. The service records of the Cessna Aircraft Company indicate 17 additional reports of cracks in the lower portion of the engine mount ring. If these cracks are allowed to develop through the mount ring, the reduced stiffness of the engine support system may result in a whirl mode flutter instability of the propeller-powerplant system. Additionally, complete failure of the engine mount could result in separation of the engine from the airplane.

Cessna has incorporated a different shimmy dampener on more recently manufactured 208 series airplanes. This new design utilizes two servicing ports to assist in fluid filling and air expulsion during servicing operations. Cessna has issued Cessna Service Bulletin CAB88–14, dated April 8, 1988, specifying the new and improved shimmy dampener, Part No. 2643090–1, for affected Model 208, 208A, and 208B airplanes. This new shimmy dampener will lower the possibility of nose landing gear shimmy and minimize the potential for structural damage to the engine mount ring. Since the condition described is likely to exist or develop in other Cessna 208 series airplanes of the same design, the proposed AD would require replacement of the shimmy dampener in accordance with Service Bulletin CAB88–14, and an inspection of the engine mount ring for cracks on Cessna 208 series airplanes.

The FAA has determined there are approximately 212 Cessna 208 series airplanes affected by the proposed AD. The cost of replacing the shimmy dampener and inspecting the engine mount ring in accordance with the proposed AD is estimated to be $1,421 per airplane. The total cost is estimated to be $301,252. The FAA has determined that all but 35 of these affected airplanes have already complied with the referenced service instructions. Therefore, the proposed actions will not have a significant financial impact on any entities operating these airplanes.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Felxibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows.

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

Cessna: Applies to Models 208 and 208A (Serial Numbers 20800001 through 20800130), and Model 208B (Serial Numbers 20830001 through 20830086) airplanes certificated in any category.

Compliance: Required within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished. To prevent nose landing gear shimmy and failure of the engine mount ring, accomplish the following:

(a) Visually inspect the lower portion of the engine mount ring for misalignment and cracks.

(1) If any ring has a visible misalignment, or has a crack longer than 1.7 inches, prior to further flight replace the ring with a serviceable part.

(2) If any ring has a crack less than 1.7 inches, prior to further flight repair the ring in accordance with the Cessna Model 208 Maintenance Manual, P/N 02678–2–13.

(b) Replace the shimmy dampener (Part Number 2643007–1 or –2) with a Part Number 2643090–1 shimmy dampener in accordance with the instructions in Cessna Caravan Service Bulletin CAB88–14, dated April 8, 1988.

(c) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(d) Alternate method of compliance or adjustment of the compliance time which provides an equivalent level of safety, may be approved by the Manager, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Room 100, Wichita, Kansas 67209; Telephone (316) 946–4400.

Note: The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office.

All persons affected by this directive may obtain copies of the document referred to herein upon request to the Cessna Aircraft Company, P.O. Box 7704, Wichita, Kansas 67277; or may examine this document at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on October 31, 1989.

Barry D. Clements,
Manager, Small Airplane Directorate Aircraft Certification Service.

[FR Doc. 89-26533 Filed 11-9-89; 8:45 am]
BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-ASW-40]

Airworthiness Directives; Sikorsky Model S-58T Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require inspection of the engine combining gear box/angle gear box drive shaft assembly for cracks and loose balance weights on S–58T series helicopters. The proposed AD is needed to prevent failure of the engine combining gear box/angle gearbox drive shaft assembly which could result in loss of the helicopter.

VOL 54 ISS 217 NO 13 1989 UMI

DATE: Comments must be received on or before December 28, 1989.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Regional Rules Docket, Office of the Assistant Chief Counsel, FAA, Fort Worth, Texas 76193–0007, or delivered in duplicate to Office of the Assistant Chief Counsel, FAA, 4400 Blue Mound Road, Building 3B, Room 158, Fort Worth, Texas. Comments delivered must be marked: Docket No. 89–ASW–40.

Comments may be inspected at the above location in Room 158 of Building 3B, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The applicable service bulletin (SB) may be obtained from Mr. R.E. Warren, Sikorsky Aircraft Division, United Technologies Corporation, North Main Street, Stratford, Connecticut 06601, or may be examined in the Regional Rules Docket.

FOR FURTHER INFORMATION CONTACT: Terry Fahr, Boston Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273–7103.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the FAA before any final action is taken on the proposed rule. The proposal contained in this notice may be changed in light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Regional Rules Docket, FAA, 4400 Blue Mound Road, Building 3B, Room 158, Fort Worth, Texas, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: Comments to Docket No. 89–ASW–40. The postcard will be date/time stamped and returned to the commenter.

There have been two reported incidents of loose balance weights on the engine combining gear box/angle gear box drive shaft on S–58T series helicopters. One of the incidents resulted in a fatigue crack of the drive shaft. Since this condition is likely to exist or develop on other helicopters of the same design, the proposed AD would require inspection, and removal if necessary, of the engine combining gear box/angle gear box drive shaft assembly on these helicopters.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this proposed regulation involves only 41 helicopters and the approximate cost would be $240 per helicopter if an inspection only is required, plus an additional $4,000, if replacement of the drive shaft is required. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR part 39:

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

PART 39—AIRWORTHINESS DIRECTIVES

Accordingly, pursuant to the authority delegated to me by the Administrator, the FAA proposes to amend § 39.13 of part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

Sikorsky Aircraft: Applies to Model S–58T series helicopters, certificated in any category. (Docket No. 89–ASW–40)

Compliance is required as indicated, unless already accomplished.

To prevent possible failure of the engine combining gearbox/angle gear box drive shaft assembly, part number (P/N) 58350–10030–045, which could result in loss of the helicopter, accomplish the following:

Within the next 50 hours' time in service after the effective date of this AD, inspect the engine combining gear box/angle gear box drive shaft assembly for cracks and loose balance weights as follows:

(a) Remove the engine combining gear box/angle gear box drive shaft assembly from the helicopter.

(b) Check the engine combining gear box/angle gear box drive shaft assembly for loose balance weights and a gap at the riveted joint between the balance weight and shaft as follows:

(1) Using a feeler gage, check for a gap greater than 0.002 inch in the immediate area of the attaching rivets which secure the balance weights to the shaft.

Note.—On balance weights which require two rivets, do not check at the mid-span.

(2) If a gap greater than 0.002 inch exists in the immediate area of the riveted joint, remove the engine combining gear box/angle gear box drive shaft assembly from service and reinstall an airworthy part in accordance with the standard maintenance instructions.

(3) If the gap at the rivets is 0.002 inch or less, further inspect the engine combining gear box/angle gear box drive shaft assembly as follows:

(i) Mask off an area on the engine combining gear box/angle gear box drive shaft assembly about 0.5 inch from all sides of the balance weights.

(ii) Remove the protective finish, paint, and primer from the engine combining gear box/angle gear box drive shaft assembly using paint remover, MIL–R–81294 or equivalent.

(iii) Remove the masking tape from the engine drive shaft assembly.

(iv) Clean the surface with methyl ethyl ketone, Federal Spec. TT–M–261 or equivalent.

(v) Fluorescent-penetrant-inspect the cleaned area in accordance with MIL–I–6866, Type 1, Method C or equivalent.

(vi) If any cracks are found, remove the engine combining gear box/angle gear box drive shaft assembly from service and reinstall an airworthy part in accordance with the standard maintenance instructions.

(vii) If no cracks are found, remove the developer background used in the fluorescent penetrant inspection. Use a blacklight to aid in complete removal of the developer.

(viii) Apply two coats of AMLGUARD, in accordance with MIL–C–85084 (TS), Type 1, or equivalent, over all the surfaces in the inspection area. Allow a ½-hour drying time between coats.

(c) Install the engine combining gear box/angle gear box drive shaft assembly on the helicopter in accordance with standard maintenance instructions.

Note.—Sikorsky Alert Service Bulletin No. 58B35–30, dated May 17, 1988, applies to this AD.

(d) The aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where compliance can be accomplished.

(e) An alternate method of compliance or adjustment of the compliance times, which provides an equivalent level of safety, may be used if approved by the Manager, Boston Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, 12 New England Executive Park, Burlington, Massachusetts.

Note.—The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the manager of the Boston Aircraft Certification Office.

Issued in Fort Worth, Texas, on October 30, 1989.

James D. Erickson,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 142

Manufacturer/Shipper Identification Required at Time of Entry

AGENCY: U.S. Customs Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to amend the Customs Regulations to require that all importers provide the name and address of the manufacturer or shipper of imported merchandise on each invoice. The addition of this information on the invoice is necessary to enhance Customs ability to perform its cargo documentation and improve overall efforts to process entries as expeditiously as possible with a minimum of processing delays.

DATE: Comments must be received on or before December 13, 1989.

ADDRESS: Comments (preferably in triplicate) may be submitted to and inspected at the Regulations and Disclosure Law Branch, U.S. Customs Service, Room 2119, 1301 Constitution Avenue, NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Leonard Cianciotto or Patricia Flynn, Office of Inspection and Control, U.S. Customs Service (202) 566–5354.

SUPPLEMENTARY INFORMATION:

Background

As part of its ongoing effort to improve the processing of cargo and thus provide quicker, more efficient service to importers, Customs has developed several methods which take advantage of the developing automated information-processing technology. A principal element of that effort has been the adoption of the Automated Commercial System (ACS). Through this system, importers are able to have their merchandise quickly cleared through the entry documentation process. One of the critical elements which enables the ACS process to function efficiently is an item known as the "Manufacturer ID". Instruction for standardized construction of this code, which is intended to provide a unique piece of data to be used in various automated systems, were provided in T.D. 87–66, 52 FR 24084, June 26, 1987. Use of this "Manufacturer ID" was required as of July 27, 1987, for all forms processed through the cargo selectivity module of the ACS.

At the time the "Manufacturer ID" requirement was implemented, Customs had no record of many of the manufacturers for whom ID's were being developed. Additionally, new manufacturers appear constantly. For the ACS cargo selectivity module used in entry processing to work efficiently, it is necessary that the system to able to verify the "manufacturer ID" against a known manufacturer's or shipper's name and address. There is no specific requirement in the Customs Regulations that the name and address of the manufacturer or shipper of the merchandise being imported appear on any entry document. Section 142.6(a) sets forth the required contents of the invoice to be submitted at the time of entry. Informaiton regarding the manufacturer/supplier is not required, but is optional. Section 141.86, sets forth the required contents of the invoice for submission with the entry summary. This summary must be filed no later than 10 days after the filing of the entry documentation. However, the regulations provide the importer with the option of providing information on either the seller or the shipper of the merchandise, neither of which may be the actual manufacturer.

The Customs cargo documentation system needs to have a readily verifiable procedure to match manufacturers and merchandise. By requiring that the name and address of the manufacturer or shipper appear on the invoice submitted at the time of entry, Customs will have the information necessary to realize the full potential of the ACS. Accordingly, Customs is proposing to amend its regulations to achieve this objective.

Comment Period

Because all delays in obtaining the information sought by the amendment will seriously detract from Customs ability to perform necessary cargo inspection and processing operations, it has been deemed necessary to limit the comment period on the proposed amendment to 30 days from the date of the publication of this Notice in the Federal Register.

Comments

Before adopting the proposed amendment, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations and Disclosure Law Branch, Room 2119, U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, DC.

Regulatory Flexibility Act

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), it is certified that, if adopted, the proposed amendment will not have a signficant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to the Office of Management and Budget, Paperwork Reduction Project (1515–_____), Washington, DC 20503, with copies to the U.S. Customs Service at the address previously specified.

The collection of information contained in this regulation is in § 142.6(a). This information is required

VOL 54 ISS 217 NO 13 1989 UMI

by the U.S. Customs Service to enable it to perform necessary cargo inspection and processing operations. This information will be used to verify the validity of manufacturer/shipper identification numbers which are used in the Customs Automated Commercial System (ACS). The likely respondents are businesses or other for-profit institutions.

Estimated total annual reporting and/or recordkeeping burden: 6000 hours.

Estimated average annual burden per respondent and/or recordkeeper: 12 hours.

Estimated number of respondents and/or recordkeepers: 500.

Drafting Information

The principal author of this document was Peter T. Lynch, Regulations and Disclosure Law Branch, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 142

Entry process.

The Proposed Amendment

It is proposed to amend 19 CFR part 142 as set forth below.

PART 142—[AMENDED]

1. The authority citation for part 142 would continue to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1624.

2. In § 142.6, paragraph (a) introductory text is republished and a new paragraph (a)(5) is added to read as follows:

§ 142.6 Invoice requirements.

(a) Contents

The commercial invoice, or the documentation acceptable in place of a commercial invoice in those instances listed in § 141.83(d) of this chapter, shall be furnished with the entry and before release of the merchandise is authorized. The commercial invoice or other acceptable documentation shall contain:

* * * * *

(5) The name and complete address of the individual or firm who is responsible for invoicing the merchandise (for example, the manufacturer or the shipper).

Approved: November 3, 1989.

Michael H. Lane,

Acting Commissioner of Customs.

Dennis M. O'Connell,

Acting Assistant Secretary of the Treasury.

[FR Doc. 89-26558 Filed 11-9-89; 8:45 am]

BILLING CODE 4820-02-M

RAILROAD RETIREMENT BOARD

20 CFR Part 212

RIN 3220-AA70

Military Service

AGENCY: Railroad Retirement Board.

ACTION: Proposed rule.

SUMMARY: The Railroad Retirement Board (Board) proposes to amend part 212 of its regulations by adding a new period of military service which is now creditable under the Railroad Retirement Act (RRA) in certain cases in order to reflect certain Amendments to that Act.

DATE: Comments must be submitted on or before December 13, 1989.

ADDRESSES: Secretary to the Board, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

FOR FURTHER INFORMATION CONTACT: Stanley Jay Shuman, General Attorney, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611, (312) 751-4568 (FTS 386-4568).

SUPPLEMENTARY INFORMATION: Military service is creditable under the RRA if it was performed during a war service period and was preceded by railroad service. See section 3(i)(2) of the RRA. Section 1(g)(2) of the RRA defines a war service period as any war period, or, with respect to any individual who was in military service at the end of a war period, the period during which such individual was required to remain in service following the end of the war period, or a period of involuntary military service or a period after September 7, 1939, with respect to which there was proclaimed a state of national emergency. Section 7304(a) of the Railroad Unemployment Insurance and Retirement Improvement Act of 1988 (Title VII of Public Law 100-647) amended section 1(g)(2) of the RRA to provide that military service between June 15, 1948 and December 15, 1950 (the period between the end of the national emergency which had been proclaimed with respect to World War II and the beginning of the next state of national emergency resulting from the Korean conflict) shall be deemed a war service period with respect to an individual if, following the employee's release from active military service, he or she returned to railroad service in the year he or she was separated from service or the following year without any other intervening employment.

The Board has determined that this is not a major rule for purposes of Executive Order 12291. Therefore, no Regulatory Impact Analysis is required. In addition, this part does not impose any requirement for the collection of information within the meaning of the Paperwork Reduction Act of 1980.

List of Subjects in 20 CFR Part 212

Railroad employees, Railroad retirement.

For the reasons set out in the preamble, part 212, Chapter II, title 20 of the Code of Federal Regulations is proposed to be amended as follows:

PART 212—MILITARY SERVICE

1. The authority citation for part 212 is revised to read as follows:

Authority: 45 U.S.C. 231f.

2. Section 212.4, paragraph (f) is revised to read as follows:

§ 212.4 Periods of creditable military service.

* * * * *

(f) June 15, 1948 through December 15, 1950. This service is creditable if:

(1) Entered into involuntarily; or

(2) Entered into voluntarily, but only if:

(i) The individual who seeks credit for this service performs service as an employee for an employer as defined in part 202 of this chapter either in the year of his release from active military service or in the year following such release, and;

(ii) Does not engage in any employment not covered by part 203 between his release from active military service and his commencement of service for an employer.

* * * * *

Dated: November 3, 1989.

By Authority of the Board.

Beatrice Ezerski,

Secretary to the Board.

AGENCY: Department of Veterans Affairs.

ACTION: Proposed regulatory amendments.

SUMMARY: The Department of Veterans Affairs (VA) is proposing to amend its loan guaranty regulations (38 CFR part 36) to comply with certain provisions of Public Law 100-198, the Veterans' Home Loan Program Improvements and Property Rehabilitation Act of 1987, as amended by Public Law 100-253, the Veterans' Home Loan Program Emergency Amendments of 1988. Changes which VA proposes to incorporate into the regulations by these amendments are: (1) An increase in the maximum amount of entitlement from $27,500 to $36,000, (2) a revision of the method for calculating the guaranty amount, (3) a revision of the occupancy requirements, and (4) a revision of the requirements for refinancing loans.

DATES: Comments must be received on or before December 13, 1989. Comments will be available for public inspection until December 26, 1989. VA proposes to make these regulatory amendments effective 30 days after publication of the final regulations.

ADDRESSES: Interested persons are invited to submit written comments, suggestions or objections regarding this proposal to the Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420. All written comments will be available for public inspection in Room 132, Veterans Service Unit, at the above address between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays) until December 26, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Alan Schneider, Assistant Director for Loan Policy (264), Loan Guaranty Service, Veterans Benefits Administration, (202) 233-3042.

SUPPLEMENTARY INFORMATION: VA is proposing to incorporate into its regulations several changes to comply with certain provisions of Public Law 100-198 as amended by Public Law 100-253.

Section 36.4302 of 38 CFR part 36 describes the method for calculating the guaranty for loans guaranteed under 38 U.S.C. 1810. Prior to enactment of Public Law 100-198 VA would guarantee lenders against loss at a rate of 60 percent of the loan amount, up to a maximum of $27,500. The maximum amount of entitlement has been increased from $27,500 to $36,000 and a two-tiered guaranty has been established based on the loan amount. For loans of $45,000 or less, 50 percent of the loan is guaranteed, and for loans above $45,000, 40 percent of the loan is guaranteed up to $36,000, whichever is less, but not less than $22,500. VA is proposing to amend § 36.4302 to reflect this change.

Occupancy requirements for VA guaranteed loans are contained in various sections of the regulations. The occupancy requirements for loans guaranteed under 38 U.S.C. 1810, including regular refinancing loans, as well as interest rate reduction refinancing loans (loans to refinance in order to lower the interest rate where the original loan was guaranteed by VA), are contained in §§ 36.4303, 36.4306, and 36.4306a respectively.

Prior to enactment of Public Law 100-198 the veteran was required to physically occupy the property to obtain a VA guaranteed loan. The new law provides that the occupancy requirements will be met in the case of a veteran who is unable to occupy the property because of active duty status in the Armed Forces if the veteran's spouse certifies that he or she will occupy the property as his or her home. VA proposes to amend §§ 36.4303, 36.4306, and 36.4306a to reflect this change.

Public Law 100-198 also provides that for interest rate reduction refinancing loans closed on or after January 21, 1988, previous occupancy by the veteran or spouse will satisfy the occupancy requirements. VA proposes to amend § 36.4306a to delete the requirement that the veteran or spouse still occupy the property at the time of refinancing the existing VA guaranteed loan.

Public Law 100-198 reduced the amount of a refinancing loan to not more than 90% of the appraised value of the property, and VA proposes to amend § 36.4306 to reflect this reduction.

Public Law 100-198 extended the term of interest rate reduction refinancing loans. The new loan term is for up to 10 years longer than the term of the original loan, subject to the maximum of 30 years and 32 days. VA proposes to amend § 36.4306a to conform to this change.

The provisions of Public Law 100-198 included in the appropriate regulations by this amendment have been implemented administratively. Similar changes concerning the increase in entitlement, calculation of the guaranty amount, and occupancy requirements affect loans for manufactured homes guaranteed by VA under 38 U.S.C. 1812. These changes are being made to the 4200 series of 38 CFR part 36 separately.

The Secretary hereby certifies that these proposed regulatory amendments will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601-612. The proposed amendments simply update VA regulations to incorporate the changes which have already been made by Public Law 100-198 as amended by Public Law 100-253.

The Secretary has also determined that the proposed regulatory amendments are not a major rule within the meaning of Executive Order 12291, Federal Regulation. They will not have an annual effect on the economy of $100 million or more, and will not cause a major increase in costs or prices for consumers or individual industries, nor will they have other significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance Program numbers are 64.114 and 64.118.

These amendments are proposed under Public Law 100-198 as amended by Public Law 100-253 and the authority granted the Secretary by section 210(c) of title 38, United States Code.

List of Subjects in 38 CFR Part 36

Condominiums, Handicapped, Housing loan program—housing and community Development, Manufactured homes, Veterans.

Approved: October 19, 1989.

Edward J. Derwinski,

Secretary.

PART 36—[AMENDED]

38 CFR part 36, Loan Guaranty, is proposed to be amended as follows:

§ 36.4302 [Amended]

1a. In § 36.4302 redesignate paragraphs (b) through (i) as paragraphs (c) through (j) respectively.

b. In § 36.4302 in newly designated paragraphs (d)(1) through (3) remove the words "$27,500" wherever they appear and add, in their place, the words "$36,000".

c. In § 36.4302 in newly designated paragraphs (d)(1) through (3) remove the numbers "1819" wherever they appear and add, in their place, the numbers "1812".

d. In § 36.4302 paragraph (a) is revised and paragraph (b) is added, an authority citation is added to newly designated paragraph (d)(2), and the authority citation to newly designated paragraph (d)(3) is revised to read as follows:

§ 36.4302 Computation of guaranties or insurance credits.

(a) With respect to a loan to a veteran guaranteed under 38 U.S.C. 1810 the guaranty shall not exceed the lesser of—

(1)(i) 50 percent of the original principal loan amount where the loan amount is not more than $45,000; or

(ii) The lesser of $36,000 or 40 percent of the original principal loan amount where the loan amount exceeds $45,000, except that the guaranty amount shall not be less than $22,500; or

(2) The maximum amount of guaranty which may be guaranteed in connection with a loan under 38 U.S.C. 1810(d)(1)(A) or (B) or (d)(2) as limited by 38 U.S.C. 1810(d)(3).

(b) The amount of guaranty computed under paragraph (a) of this section may be increased by the amount of the loan fee paid to the lender by the veteran, the amount of the loan fee paid to the lender by the seller on behalf of the veteran, and the amount of the loan fee paid to the lender by the veteran and refunded to the veteran by the seller, but only to the extent that the loan fee does not exceed 1 percent of the loan amount. The amount of guaranty computed under paragraph (a) of this section may be increased by the amount of the discount points paid to the lender by the veteran, the amount of the discount points paid to the lender by the seller on behalf of the veteran, and the amount of the discount points paid to the lender by the veteran and refunded to the veteran by the seller, but only to the extent that the discount points do not exceed 4 percent of the loan amount. The amount of guaranty computed under paragraph (a) of this section may be increased by the amount of the funding fee paid to the lender by the veteran, the amount of the funding fee paid to the lender by the seller on behalf of the veteran, and the amount of the funding fee paid to the lender by the veteran and refunded to the veteran by the seller, but only to the extent that the funding fee does not exceed 1 percent of the loan amount. The amount of guaranty computed under paragraph (a) of this section may be increased by the amount of the origination fee paid to the lender by the veteran, the amount of the origination fee paid to the lender by the seller on behalf of the veteran, and the amount of the origination fee paid to the lender by the veteran and refunded to the veteran by the seller, but only to the extent that the origination fee does not exceed 1 percent of the loan amount. The amount of guaranty computed under paragraph (a) of this section may be increased by the amount of the assumption fee paid to the lender by the veteran, the amount of the assumption fee paid to the lender by the seller on behalf of the veteran, and the amount of the assumption fee paid to the lender by the veteran and refunded to the veteran by the seller, but only to the extent that the assumption fee does not exceed 1 percent of the loan amount. The amount of guaranty computed under paragraph (a) of this section may be increased by the amount of the loan fee paid to the lender by the veteran, the amount of the loan fee paid to the lender by the seller on behalf of the veteran, and the amount of the loan fee paid to the lender by the veteran and refunded to the veteran by the seller, but only to the extent that the loan fee does not exceed 1 percent of the loan amount.

(Authority: 38 U.S.C. 1803(a), 1812(c))

(3) * * *

(Authority: 38 U.S.C. 1803(a), 1812(c))

* * * * *

2. In § 36.4303 paragraph (f) is revised to read as follows:

§ 36.4303 Reporting requirements.

* * * * *

(f) Evidence of a guaranty will be issued by the Secretary by appropriate endorsement on the note or other instrument evidencing the obligation, or by a separate certificate at the option of the lender. Notice of credit to an insurance account will be given to the lender. Unused certificates of eligibility issued prior to March 1, 1946, are void. No certificate of commitment shall be issued and no loan shall be guaranteed or insured unless the lender, the veteran, and the loan are shown to be eligible. Evidence of guaranty or insurance will not be issued on any loan for the purchase or construction of residential property unless the veteran or the veteran's spouse in the case of a veteran who cannot occupy the property because of active duty status with the Armed Forces, certifies in such form as the Secretary shall prescribe, that the veteran, or spouse of the active duty veteran, intends to occupy the property as his or her home. Guaranty or insurance evidence will not be issued on any loan for the alteration, improvement, or repair of any residential property or on a refinancing loan unless the veteran, or spouse of an active duty service member, certifies that he or she presently occupies the property as his or her home. An exception to this is if the home improvement or refinancing loan is for extensive changes to the property which will prevent the veteran or the spouse of the active duty veteran from occupying the property while the work is being completed. In such a case the veteran or spouse of the active duty veteran must certify that he or she intends to occupy or reoccupy the property as his or her home upon completion of the substantial improvements or repairs. All of the mentioned certifications must take place at the time of loan application and closing except in the case of loans automatically guaranteed, in which case veterans or in the case of an active duty veteran, the veteran's spouse shall make the required certifications only at the time the loan is closed.

(Authority: 38 U.S.C. 1804(c))

* * * * *

3. In § 36.4306, paragraphs (a)(1) and (a)(2) are redesignated as paragraphs (a)(2) and (a)(3) respectively, the introductory text of paragraph (a) is revised, paragraph (a)(1) is added, paragraph (c), the last sentence of paragraph (g)(5) and the authority citation to paragraph (g) are revised to read as follows:

§ 36.4306 Refinancing of mortgage or other lien indebtedness.

(a) Any loan for the purpose of refinancing (38 U.S.C. 1810(a)(5)) an existing mortgage loan or other indebtedness secured by a lien of record on a dwelling or farm residence owned and occupied or to be reoccupied if the refinancing loan is for the completion of major alterations, repairs or improvements to the property, by an eligible veteran as the veteran's home, or in the case of an eligible veteran unable to occupy the property because of active duty status in the Armed Forces, occupied or to be reoccupied by the veteran's spouse as the spouse's home, shall be eligible for guaranty in an amount as computed under § 36.4302(a) provided that—

(1) The amount of the loan may not exceed an amount equal to 90 percent of the reasonable value of the dwelling or farm residence which will secure the loan, as determined by the Secretary.

(Authority: 38 U.S.C. 1810(e)(1) and 1810(h))

* * * * *

(c) Nothing shall preclude guaranty of a loan to an eligible veteran having home loan guaranty entitlement to refinance under the provisions of 38 U.S.C. 1810(a)(5) a VA guaranteed or insured (or direct) mortgage loan made to him or her which is outstanding on the dwelling or farm residence owned and occupied or to be reoccupied after the completion of major alterations, repairs, or improvements to the property, by the veteran as a home, or in the case of an eligible veterans unable to occupy the property because of active duty status in the Armed Forces, occupied or to be reoccupied by the veteran's spouse as the spouse's home.

(Authority: 38 U.S.C. 1810(e)(1))

* * * * *

(g) * * *

(5) * * * However, the total guaranty may not exceed 50 percent of the new loan if the new loan amount is $45,000 or less, or 40 percent up to $36,000 of the new loan if the new loan amount is more than $45,000, but may not be less than $22,500 if the loan amount exceeds $45,000.

(Authority: 38 U.S.C. 1803(a))

4. In § 36.4306a paragraphs (a) and (b) are revised to read as follows:

§ 36.4306a Interest rate reduction refinancing loan.

(a) Pursuant to 38 U.S.C. 1810(a) (8) and (9)(B)(i), a veteran may refinance an existing VA guaranteed, insured or direct loan to reduce the interest rate payable on the existing loan provided the following requirements are met:

(1) The loan must be secured by the same dwelling or farm residence as the loan being refinanced; and

(2) The veteran must own the dwelling or farm residence securing the loan and

(i) Must occupy the dwelling or residence as his or her home; or

(ii) Must have previously occupied the dwelling or residence as his or her home and must certify, in such form as the Secretary shall require, that he or she has previously occupied the dwelling or residence; or

(iii) In any case in which the veteran is on, or was on, active duty status as a member of the Armed Forces and is unable, or was unable, to occupy the residence of dwelling as a home because of such active duty status, the spouse of the veteran must occupy, or must have previously occupied, such dwelling or residence as the spouse's home and must certify to that occupancy in such form as the Secretary shall require.

(Authority: 38 U.S.C. 1810(e)(1))

(3) The amount of the refinancing loan may not exceed an amount equal to the sum of the balance of the loan being refinanced and such closing costs as authorized by § 36.4312(d) and a discount not to exceed a dollar amount determined in accordance with § 36.4312(d)(7)(i);

(4) The dollar amount of the guaranty of the 38 U.S.C. 1810(a) (8) or (9)(B)(i) loan may not exceed the original dollar amount of guaranty applicable to the loan being refinanced, less any dollar amount of guaranty previously paid as a claim on the loan being refinanced; and

(5) The term of the refinancing loan (38 U.S.C. 1810(a)(8)) may not exceed the original term of the loan being financed plus ten years or the maximum loan term allowed under 38 U.S.C. 1803(d)(1), whichever is less. For manufactured home loans that were previously guaranteed under 38 U.S.C. 1812 the loan term, if being refinanced under 38 U.S.C. 1810(a)(9)(B)(i), may exceed the original term of the loan but may not exceed the maximum loan term allowed under 38 U.S.C. 1803(d)(1).

(Authority: 38 U.S.C. 1810(e)(1))

(b) Notwithstanding any other regulatory provision, the interest rate reduction refinancing loan may be guaranteed without regard to the amount of guaranty entitlement available for use by the veteran, and the amount of the veteran's remaining guaranty entitlement, if any, shall not be charged for an interest rate reduction refinancing loan. The interest rate reduction refinancing loan will be guaranteed with the lesser of the entitlement used by the veteran to obtain the loan being refinanced or the amount of the guaranty as calculated under § 36.4302(a) of this part. The veteran's loan guaranty entitlement originally used for a purpose as enumerated in 38 U.S.C. 1810(a) (1) through (7) and (9)(A) (i) and (ii) and subsequently transferred to an interest rate reduction refinancing loan (38 U.S.C. 1810(a) (8) or (9)(B)(i)) shall be eligible for restoration when the interest rate reduction refinancing loan or subsequent interest rate reduction refinancing loans on the same property meets the requirements of § 36.4302(h).

(Authority: 38 U.S.C. 1803(a))

* * * * *

5. Section 36.4502 is revised to read as follows:

§ 36.4502 Use of guaranty entitlement.

The guaranty entitlement of the veteran obtaining a direct loan which is closed on or after February 1, 1988, shall be charged with the lessor of the loan amount or an amount which bears the same ratio to $36,000 as the amount of the loan bears to $33,000. The charge against entitlement of a veteran who obtained a direct loan which was closed prior to the aforesaid date, shall be the amount which would have been charged had the loan been closed subsequent to such date.

(Authority: 38 U.S.C. 1811(d)(2)(A))

§ 36.4503 [Amended]

6a. In § 36.4503 paragraph (a) remove the words "October 1, 1980" where they appear and add, in their place, the words "February 1, 1988".

b. In § 36.4503 paragraph (a) remove the words "$27,500" and add, in their place, the words "$36,000".

c. In § 36.4503 in the authority citation remove the words "(1) and" so the authority citation correctly reads "38 U.S.C. 1811(d)(2)(A)".

BILLING CODE 8320-01-M

POSTAL RATE COMMISSION

39 CFR Part 3001

[Docket No. RM89-5]

Procedures for Consideration of Contract Rates

Issued November 6, 1989.

AGENCY: Postal Rate Commission.

ACTION: Further invitation for comments.

SUMMARY: The Postal Rate Commission received a petition for a rulemaking to create procedures for consideration of rates arrived at by contractual negotiation between the Postal Service and one or more mailers. Interested persons were invited (54 FR 30557, July 21, 1989) to file initial comments concentrating on the legal feasibility of such a mechanism under the Postal Reorganization Act.

On consideration of these comments, the Commission has concluded that possible reorientation of the existing mail classification system would be a more profitable direction in which to seek the advantages said to be associated with contract ratemaking. This notice solicits comments and suggestions for such a reorientation.

DATE: Comments must be received by February 12, 1990.

ADDRESS: Written comments and correspondence should be addressed to Charles L. Clapp, Secretary, Postal Rate Commission, 1333 H Street NW., Suite 300, Washington, DC 20268-0001 (telephone: 202/789-6840).

FOR FURTHER INFORMATION CONTACT: David F. Stover, General Counsel, Postal Rate Commission (telephone: 202/789-6820).

SUPPLEMENTARY INFORMATION:

Introduction

This notice sets forth and explains our disposition of the petition for rulemaking filed by Advo-System, Inc. (Advo) and made the subject of initial comments by our July 17, 1989, notice in this docket. We asked commenters to concentrate on the legal feasibility of Advo's proposal that we establish one or more sets of procedures to consider contract rates, though they were also free to state preliminary views on other relevant matters. Twelve participants [1] filed comments.

While analysis of the postal ratemaking statute, aided by the comments filed in this docket, shows that new procedural rules for consideration of contract rates—as Advo's petition uses that term—would serve no practical purpose, the petition does raise important questions about how postal services are defined and priced. We are therefore maintaining this docket in existence, but redirecting it toward exploration of mechanisms that might secure the advantages Advo claims for the contract rates described in its petition, without contravening the Postal Reorganization Act. In this Order we (i) describe Advo's two alternative proposals; (ii) explain our conclusion that they are, respectively, inconsistent with the Act and in practice duplicative of existing mechanisms; and finally (iii) describe and explain the direction we find most profitable for further inquiry.

The Advo Proposals

Advo describes two different forms of contract rate it believes the Commission should consider:

1. The Commission might, after considering cost and other relevant evidence, establish a range of permissible rates for particular subclasses; the Postal Service and individual mailers would be free to negotiate rates within this range.

2. The Postal Service and one or more mailers would negotiate a rate and service package which would then (i) be submitted to the Commission for review, and (ii) thereafter be available on the same terms to all potential users.

Apart from the general question whether the Act contemplates or permits contract rates in any form, the commenters most often dealt with Advo's two alternatives separately.

Contract Rates Under the Act

The most obvious question is whether the Act permits (any form of) contract rates. Advo argues that it does, with varying degrees of support from DJ, MPA, and the Postal Service; others argue that it does not.

Advo's main arguments are that the Act does not in terms forbid negotiated rates; and that since the Act generally

[1] Advo, American Newspaper Publishers Association (ANPA), Association of Business Publishers (ABP), Coalition of Non-Postal Media (CNPM), Dow Jones & Company (DJ), Magazine Publishers Association (MPA), National Newspaper Association (NNA), the Commission's Office of the Consumer Advocate (OCA), Third Class Mail Association (TCMA), United Parcel Service (UPS), the Postal Service, and Warshawsky & Company.

VOL 54 ISS 217 NO 13 1989 UMI

aimed at reform and streamlining of the postal system, such negotiation is at least consistent with the overall statutory purpose. Advo concedes that the Act does not specifically permit negotiated rates and that they were not employed either before or since its passage. However, it argues that the contracting power granted the Service [39 U.S.C. section 401(2)] is not elsewhere limited by the Act and is broad enough to encompass ratemaking by contract. Moreover, it contends that neither of its proposals would bypass the procedures of 39 U.S.C. ch. 36, since both involve Postal Rate Commission review of the negotiated rates. With certain qualifications, including the important caveat that cost avoidance would be the principal rationale for any contract rate lower than the rate charged the subclass generally, MPA supports this reasoning.

Opposition to Advo's position takes a number of forms. Some commenters argue that it would effectively bypass the present, mandatory ch. 36 procedures. ABP, for instance, argues that public hearings are mandatory in the development of rates, and that the proposals delegate to private parties the initiative, properly the Service's alone, under section 3622(a), to launch rate changes. CNPM, NNA, and UPS also argue that the proposals improperly limit the Commission's role. The OCA points out that unilateral rate-changing authority is granted only by sections 3627 (failure of appropriations for revenue forgone) and 3641 (failure to complete rate case in 10 months), and that the Postal Service's contracting power furnishes no counterargument since the Governors are a necessary participant in lawful ch. 36 rate changes. ANPA and UPS make the point that section 3622 contemplates ratemaking by class and subclass of mail [8] and that rates for individual customers conflict with this structure. TCMA questions whether recommending a range of rates would discharge our duty to make a recommendation on specific rate changes.

Besides suggesting that contract rates would violate procedural requirements, some comments question whether such rates would not in principle violate substantive ratemaking standards—not just the criteria of section 3622(b) but also general policy rules in ch. 1 of the Act and, particularly, section 403(c) forbidding undue or unreasonable discrimination or preference.[9] Thus even if it were established that Advo's proposals for Commission involvement in contractual ratemaking satisfied the procedural requirements of ch. 36, some issues would remain as to whether any contract rate, simply by virtue of being a contract rate, would under the statute be impossible for the Commission to approve.

Of particular importance here are suggestions that because the Act calls for classification of mail, and for fixing of rates by classes, there is simply no place for exceptional "non-class" rates established by contract. ANPA observes that of two identically-situated mailers one might succeed in negotiating a lower rate than the other, and that if this possibility is accepted it is evident that relative skill or opportunity in negotiation can be the only source of the difference. As ANPA argues, this is not a recognized criterion under the Act. UPS takes a similar position, and cites case law and legislative history for the proposition that—

> Congress recognized that the political pressures exerted on postal economics caused the widespread public impression that the influence of special interests had a determining effect on the structure of postal rates * * * * To permit large mailers to negotiate special contractual deals would only resurrect and reinforce that impression.
>
> Advo proposes to inject into the ratemaking process the very same influences that the Act was intended to eradicate.
>
> * * * *

UPS Initial Comments at 9. The OCA makes similar arguments.

These arguments from overall statutory purpose are particularly interesting because, in large measure, we are asked to draw inferences from the silence of the statute rather than from its positive language. Advo's argument, somewhat simplified, is: Contract rates are a recognized pricing technique generally; the Act does not specifically forbid them in postal pricing; therefore the Commission may entertain them. Arguments of this type are undercut, however, if there is reason to think that the overall purpose of the statute (which may fail to forbid them specifically only because, as Advo recognizes, they were not in use in 1970) would be disserved by the suggested new mechanism.

We need not rest our determination wholly on an attempt to settle this broad question, because we are not in the situation of, e.g., a court faced with an actual attempt by the Postal Service and a mailer to negotiate a non-tariff rate. The question before us is the more modest one whether a new set of procedures allowing for such rates would be likely to serve any useful purpose.

The Basic Structure of Ratemaking Under the Act.

Some of the dispute outlined above may be resolved, so far as it need be for our purposes, by examining more closely the fundamental structure of ratemaking under the Act. One foundation of Advo's argument for the lawfulness of contract ratemaking is that the Commission would continue to review the rates in question. This raises the issue, on which neither Advo nor most other commenters focus, of whether the Commission's function is to "review" rates or, with the final concurrence of the Governors, to "make" rates in some more fundamental sense.

It is quite true that the Commission does not, sua sponte, initiate rate change proceedings; that power belongs to the Postal Service under section 3622(a).[4] Likewise, it is customary—though, significantly, not mandatory [5]—for the Service to include specific proposals for new rates in its section 3622 filings. In other respects, however, the structure of the Act suggests that the Commission was thought of as more than a mere reviewer of Postal Service proposals.

First, the Act—despite plenty of precedent in other ratemaking statutes—did not provide a mechanism whereby the Commission could allow a rate change to go into effect without review proceedings. Rates can be changed only following a recommended decision by the Commission and its acceptance by the Governors.[6] In ratemaking statutes where the underlying assumption is that the agency *reviews* rates established in the first instance by the regulated firm[7],

[8] Subsections [b] [2], [3], and [7] specifically refer to these classificational units.

[9] Even if it were assumed, arguendo, that contract rates could lawfully be established without observance of ch. 36 requirements, they would still be subject to these provisions, which apply directly to the Postal Service as well as to the Commission's ratemaking process.

[4] Section 3662 provides that interested parties may file complaint cases alleging illegality of a rate currently charged, and that such cases lead to issuance of a recommended decision under §§ 3624-3625.

[5] Section 3622(a) reads: "From time to time the Postal Service shall request the Postal Rate Commission to submit a recommended decision on changes in a rate or rates of postage or in a fee or fees for postal services if the Postal Service determines that such changes would be in the public interest and in accordance with the policies of this title. *The Postal Service may submit such suggestions for rate adjustments as it deems suitable.*" [Emphasis added.]

[6] This point must be distinguished from the question whether the Commission can make a recommended decision without *hearings*. Section 3624(b)(5) makes it clear that, if all parties agree, it may.

[7] This distinction emerged in some detail in *United Gas Pipe Line Co.* v. *Mobile Gas Service*

Continued

it has been common to provide that the rates become effective at some fixed time after being filed with the agency, unless the agency suspends them and schedules hearings. Our statute takes the opposite approach: in a normal case [8] there can be no rate change until the Commission has held hearings (or accepted a settlement) and issued a decision, and the Governors have registered their approval. The natural inference is that the ch. 36 process itself generates the rate change, and is not provided simply to review an otherwise independently effective rate change by the Postal Service.

Moreover, the courts have treated the Commission as the agency principally responsible for cost allocation and rate design decisions. *National Association of Greeting Card Publishers* v. *U.S. Postal Service*, 462 U.S. 810, 821 (1983); *Time, Inc.* v. *U.S. Postal Service*, 685 F.2d 760, 771 (2d Cir. 1982); *National Association of Greeting Card Publishers* v. *U.S. Postal Service*, 607 F.2d 392, 401 (D.C. Cir. 1979), *cert. denied*, 444 U.S. 1025 (1980). None of these decisions, of course, considered the precise question now before us; but they counsel caution in accepting the proposition that review of a negotiated rate agreement, which may not rest on a fully articulated cost analysis, or indeed on any analysis at all,[9] would fulfill the Commission's statutory function. Certain other practical questions are glossed over by generalized references to the Commission's "reviewing" negotiated rate and service arrangements. Advo does not discuss whether, and to what extent, its proposal would permit the Commission to modify the negotiated arrangement submitted to it for "review." That this is by no means an imaginary problem is clear from the settlement agreements submitted in some ch. 36 cases [10]: they commonly recite that the agreed-upon disposition must be accepted as a whole and not modified, or the agreement ceases to exist. If Advo's intent is that the Commission simply vote "yea" or "nay" on a submitted agreement, it seems clear that the "review" contemplated by its proposal amounts to considerably less than that exercised in a normal ch. 36 proceeding.

Another area of doubt arises from the statutory directive that in recommending rates we consider the interests of competitors [section 3622(b)(4), (5)]. The Supreme Court has made it clear that we are to carry out this mandate when we assign institutional cost responsibility to the classes of mail. *National Association of Greeting Card Publishers* v. *U.S. Postal Service*, 462 U.S. 810, 829, fn. 24 (1983). We can presume that a competitor of the Postal Service will not be party to contract-rate negotiations between the Service and a mailer. Since the competitor's legal interest in the resulting rate entails adequately knowing the contract mailer's attributable cost, so that the implicit institutional-cost contribution can be tested against the statute, there is additional cause for concern about the possibility of inadequately-documented contract rate filings.

As a result, there is substantial uncertainty as to whether the Commission review supposedly preserved in the Advo proposals in fact corresponds to what Congress expected of us. It will therefore be particularly important to see if the advantages Advo points to (assuming for the moment that they do exist) in fact distinguish its proposal from a more conventional review mechanism.

The Discrimination Problem

As noted above, § 403(c) forbids undue or unreasonable discrimination or preferences. While the potential interaction of this provision and the suggestions made by Advo could be stated in a number of ways, we think it adequate to reduce it to two questions:

1. Does any contract rate system whatever violate § 403(c), simply by virtue of being a contract rate system?

2. Even if 1. is answered "no," do (various kinds of) contract rate mechanisms present such a substantial opportunity for improperly discriminatory or preferential arrangements as to be, themselves, undesirable?

MPA makes the useful point that one would expect cost savings to be the basis for any contractual arrangement providing a rate lower than that charged the subclass generally. In ratemaking terms, this amounts to saying that if a particular mailer imposes attributable costs that are less than those for the subclass as a whole, a corresponding contractual reduction in its rate might be appropriate. We may accept for argument's sake that such a reduction, assuming it to be otherwise lawful, would not constitute undue or unreasonable discrimination. That failing is customarily defined as a difference in price for substantially similar service, rendered contemporaneously, under substantially similar conditions. If the mailer shows that the conditions under which a service is rendered to it are materially less onerous and costly than is usual in the relevant subclass, one of the conditions for undue discrimination is not met.

This formulation implies that negotiated differences in contribution to institutional cost would not escape section 403(c). A single-customer price reduction based on cost-of-service differences is theoretically justifiable even where price discrimination in general is most strongly condemned.[11] However, it is not so clear that accepting a lower rate of return from one customer than is demanded from another, similar customer comports with antidiscrimination provisions like section 403(c). It has sometimes been approved:

> Manifestly, the loss of Cooperative Customers [who were capable of generating electricity for themselves], which account for over 90% of Delmarva's annual revenues from

Corp., 350 U.S. 332 (1956), interpreting the Natural Gas Act. The Federal Power Act is structurally similar. The OCA (Comments at 10) raises the question whether, under *Mobile* and its companion case (*FPC* v. *Sierra Pacific Power Co.*, 350 U.S. 348 (1956)), the Service might bind itself by long-term fixed-rate contracts, so that some mailers could escape the next general increase effectuated under § 3622. The cases perhaps do raise that question—but only if we assume that the Service has the kind of inherent unilateral price-setting power that was attributed to gas pipelines and electric utilities by the *Mobile* and *Sierra* decisions. If it does not, then it is hard to see how it could by contract insulate selected mailers from the effects of a general increase. We think the ratemaking statute establishes that no such power exists, and so we do not consider further the objection based on the *Mobile-Sierra* doctrine.

[8] That is, one where the 10-month deadline of § 3624(c)(1) is met.

[9] It is not uncommon under some regulatory schemes for rate-case settlement agreements to declare explicitly that the rate agreed on is not supported by any particular analytical method but represents a simple "dollar settlement."

[10] Settlements of cases in which supporting materials have been filed by the Service, and opportunity for hearings on the record afforded by the Commission, as the statute requires, are not unknown. In those cases, if the settlement is unanimous, it can be recommended to the Governors simply because all the supporting facts of record are undisputed. If it is not unanimous, the Commission may not recommend it *as a settlement*, though we may still recommend it as a controverted disposition on the merits. *Pennsylvania Gas & Water Co.* v. *FPC*, 463 F.2d 1342 (D.C. Cir. 1972); *Michigan Consolidated Gas Co.* v. *FPC*, 283 F.2d 204 (D.C. Cir.), *cert. denied sub nom. Panhandle Eastern Pipe Line Co.* v. *Michigan Consolidated Gas Co.*, 364 U.S. 913 (1960). This is to be distinguished from the possibility implicit in Advo's proposal: that a change in rates might be *initially submitted* without enough supporting material to permit proper Commission analysis.

[11] The Robinson-Patman Act 15 U.S.C. 13(a), allows for a cost-justification defense of otherwise prohibited price discrimination: " . . . nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered[.]"

wholesale sales, could have a crippling effect on Delmarva's ability to supply electrical energy to its Tariff Customers at rates which the Tariff Customers could afford to pay. Under such circumstances, *where the initiation of rates is vested in the utility, subject to a determination by the Federal Power Commission that the rates are just and reasonable, and are not unduly discriminatory,* Delmarva had the right to elect not to earn a rate of return which the Commission found fair, but which would have the potential effect of destroying its major wholesale market. By the same token, this evidence fully justified the Commission in deciding that the rate charged the Cooperative Customers, though . . . one which earned a lesser rate of return than that earned on sales to Tariff Customers, was not *unduly* discriminatory. . . .

St. Michaels Utilities Commission v. *Federal Power Commission*, 377 F.2d 912, 917 (4th Cir. 1967) (italics added). The considerations that led this court to sanction a difference as "not *unduly* discriminatory" were thus that—as noted above—the FPC's role was not to generate just and reasonable rates through its own proceedings, but rather to test those filed by jurisdictional utilities against the statutory standard; and that the utility acted reasonably in accepting a diminished return for shareholders rather than risk losing valuable customers altogether. Neither of these considerations is present in our case. We have explained our conclusion that the Commission's ratemaking role is different in kind from the FPC's. And the rate of return at issue in *St. Michaels* is not analogous to institutional cost contribution in postal ratemaking,[12] even though a species of value-of-service [13] consideration played a role in the utility's opting for a lowered return.

The Relevance of Ratemaking for Classes

In this respect, it is of great significance that—as some commenters have noted—the Act speaks in terms of institutional cost contribution by classes of mail and types of mail service. 39 U.S.C. 3622(b)(3). This may of course be interpreted in more than one way. In what follows, we discuss these interpretations in some detail. While the discussion may appear academic, it is of considerable practical importance in elucidating the underlying structure of postal ratemaking and demonstrating the degree to which rates that really depend on negotiation are foreign to it.

First, the mandate of section 3622(b)(3) could be read to mean that on the average a subclass is to produce the contribution to attributable cost that the Commission factors into the rates later established by the Governors. So interpreted (and considered in isolation) this requirement is not necessarily violated by charging different rates—as long as the (presumably lower) contract rates do not bring the class-wide institutional cost contribution below the established level. Such a deficiency would in turn be avoided if (i) the contractually-based reductions strictly reflected attributable-cost differences and nothing else, and the corresponding, unchanged institutional-cost contribution were stated on a per-piece basis; [14] or (ii) the class-wide rate were set using an inflated institutional-cost contribution (markup) to allow for a reasonably-estimated loss of such contribution through subsequent contract-rate arrangements. The second alternative would clearly raise serious questions of undue discrimination, in that the tariff customer would effectively be taxed, in advance, for the benefit of the customer able to negotiate a favorable contract.[15] We believe it is simply outside the range of ratemaking practicality.

The alternative reading of section 3622(b)(3) would make each piece in a given subclass responsible for making the same contribution to institutional costs. This interpretation in effect presupposes the averaging of cost per piece by virtue of the inclusion of all relevant pieces in the same subclass. Once that averaging is accepted, and the average cost per piece made part of the operational description of the subclass, further pricing computations are relatively plain sailing. By definition, all pieces in the subclass are deemed to have the same attributable cost [16]; the per-piece contribution (again, equal for each piece) can be expressed indifferently by a cents-per-piece add-on or a percentage markup. *See* fn. 14, above. It is evident that this reading of section 3622(b)(3) is, by virtue of these presupposed equalities, quite inconsistent with a mechanism for varying rates within the subclass by contract.

It may be objected that the reading last explained is unrealistic and thus wrong, since "everybody knows" that not every piece in a subclass costs the same to handle. But to argue thus simply amounts to pointing out that uniformity of attributable cost is being imposed as a methodological rule, rather than presented as an empirical result. We postulate uniform cost not because our cost measurements are defective but simply because discrete rates based on individual attributable costs for each piece of mail are a patent impossibility. Hence we must, under section 3622(b)(3) as well as section 3623, price postal services by classes. As in any system of regulated prices where classes of service are defined, the question is not so much "Are all the sales in a class uniform with respect to cost of service?" (to which the answer will generally be "no") as "Are the classes so drawn as to cover no unjustifiably large variations in cost of service between one sale and another?" [17]. Especially where individual transactions run into the billions, as with the Postal Service,[18] it

[12] While reasonable return on equity can be thought of as an economic cost, it is not, in the traditional utility ratemaking techniques underlying *St. Michaels*, part of the total cost of service, which was fully allocated to customer classes. (As interest on a utility's debt must be paid, at a fixed rate, it can be treated as at least analogous to such a cost.) By contrast, the Postal Service's total revenues must equal total accrued costs. Its institutional costs are not analogous, in this respect, to a return on equity but are simply the theoretically or in some cases empirically unallocable portion of accrued costs—all of which must be paid. Hence the Governors have no latitude to decide to forgo recovering some of them.

[13] *Cf.* 39 U.S.C. 3622(b)(2).

[14] Clearly, reducing the attributable-cost basis in the case of a particular mailer, and then applying to the reduced basis the same percentage markup as applied for the class-wide ratemaking computation, would lead to a shortfall in the class's institutional cost contribution. Percentage markups as used in § 3622 proceedings effectively presuppose a uniform attributable cost for every piece in the subclass. We can of course derive a percentage markup arithmetically by dividing the aggregate attributable cost into the class's revenue target. However, we cannot then get back to that revenue target by performing a series of computations wherein the individual attributable costs of less-than-average-cost pieces are multiplied by the markup to obtain an individual-piece revenue. At the purely theoretical level, we might do so (if volume effects are neglected) by performing such a computation for every piece rather than just those with lower-than-average attributable cost. But this would presuppose mailers prepared to contract with the Service for a rate higher than the one the schedule offers on the basis of intraclass cost averaging. The comments in this docket do not support this as a practical possibility. Accordingly, we think it more realistic, as well as more economical, to regard percentage markups as essential presupposing cost averaging within the relevant subclass.

[15] In addition, estimating the amount of "cushion" needed to be reasonably sure that the whole subclass would recover its designed institutional-cost contribution might well be infeasible.

[16] For simplicity, we are here postulating a subclass with no more than a single base rate and with no worksharing discounts. Adding these features would merely complicate the reasoning without changing its essence.

[17] There are, of course, numerous other criteria to be observed in setting up class boundaries. We have discussed them in some detail—most recently in Docket R87–1, in connection with the proposal for a bulk third-class carrier route subclass.

[18] In distinguishing Federal Power Commission regulation of gas pipelines from other forms of ratemaking, the Supreme Court observed that ". . .

Continued

seems pointless to hope for a manageable) classification system that would produce cost uniformity in fact.

Nor is it a useful answer to argue that we need only abandon percentage markup as a pricing device and substitute cents per piece. Cents-per-piece has potential usefulness as a criterion of institutional-cost responsibility, most obviously for *interclass* comparisons. In the present analysis, making it the ruling criterion within a subclass simply returns us to the first alternative interpretation: we have in effect decided to add a uniform contribution in cents to each individual attributable cost imposed by the successive pieces in the subclass, and total the results.

This discussion implies, first, that any systematically authorized departures from tariffed rates must be justified mathematically by cost savings.[19] If we read the statutory mandate that mail be classified and that each class produce an appropriate contribution to institutional costs as referring only to aggregate contribution, then the only way in which contract rates lower than the tariff rate could be accommodated without inviting unlawful discrimination is to restrict the departures from the tariff to demonstrated attributable-cost differences. On the other hand, if we read section 3622(b)(3) as requiring the same contribution from each piece in the subclass, then at least so long as we compute rates using percentage markups we have as an additional hurdle the postulate of (artificially) uniform attributable costs throughout the subclass.

A second implication is that a good many of the arguments offered in favor of rate contracts may be satisfied by reforming mail classification rather than permitting outright exceptions to it.

Is Advo's Second Proposal Really a Scheme for Mail Classification Reform?

Advo's second proposal is for negotiated rate and service arrangements that would (i) be filed with the Commission and, if approved, (ii) be available on demand by any other user with qualifying mail. A number of commenters have questioned whether this amounts to more than a greatly ramified system of mail classification, and if so whether the "contract" aspect of the proposal has any real meaning.

Advo considers the distinction between the present classification system and a system involving contract rates to be that the former allows only what it calls "unilateral contracts"; i.e., it is a regime in which the Postal Service must provide a service, defined in advance, at the stated price to anyone tendering qualifying mail. Its own suggestions, it says, involve "bilateral" contracting. However, Advo's second proposal appears to qualify this distinction in that a rate and service arrangement, once sanctioned by the Commission, would be generally available on demand—i.e., on the same "unilateral contract" basis as the present subclasses defined in the *Domestic Mail Classification Schedule*.

We are persuaded that this circumstance substantially undercuts the arguments in favor of substituting a contractual regime for the present system of classifications and fixed rates. That it has been seriously made, however, does suggest that the implementation of the present system may be insufficiently flexible. TCMA argues that a certain amount of informal modification and adjustment of services is done even today, when there is no price differential reflecting it.[20] When a particular modification—particularly in the form of worksharing—becomes or is expected to become sufficiently widespread, we create a new classification (rate category) to reflect the savings. But it is still broadly true that, even for classes where fairly elaborate operations on the part of the mailer as well as the Postal Service are the rule, the system assumes that subclasses are defined, "end-to-end" services purchased as a unit by the mailer.

TCMA has suggested that this approach may be due for reconsideration. Without necessarily endorsing the idea that classes of mail are merely collections of successive, or distinguishable, functional operations that could just as well be sold piecemeal, we recognize that both the willingness and the capacity of mailers to perform some of these operations for themselves has increased over the years.[21] It may therefore be time to consider whether the presumption that a subclass of mail is a unit, which may be sold at different prices if there is enough evidence of worksharing arrangements yielding quantifiable savings to the seller, should be reassessed by comparing it to a potential alternative approach that (i) identifies manageable subunits, operationally defined, and (ii) presumes that these subunits will be available separately at individually tariffed prices.

Further Steps

Accordingly, we have decided to request comments from those interested—whether or not they have previously filed comments in this docket—on several broad issues:

1. Would it be desirable to reorient mail classification to deemphasize the unitary character of at least some classes or subclasses, and treat them more as groupings of separable operational functions? What would be the advantages of such a reorientation? Its disadvantages?

2. To what extent, and for what reasons, would a reorientation as described in (1)—

a. Promote, or interfere with, the broad policies of the Postal Reorganization Act?

b. Be consistent, or inconsistent, with specific mandates of the Act?

c. Assist, or interfere with, the regulatory program embodied in ch. 36 of the Act?

d. Affect nonpostal sectors of society or of the economy, in either beneficial or harmful ways?

3. What, if any, alternative approaches (other than the contract rate mechanisms discussed in the petition

the [Natural Gas] Act is in marked contrast to the Interstate Commerce Act, which in effect precludes private rate agreements by its requirement that the rates to all shippers be uniform, a requirement which made unnecessary any provision for filing contracts [with the ICC] . . . . The vast number of retail transactions of railroads made policing of individual transactions administratively impossible; effective regulation could be accomplished only by requiring compliance with a single schedule of rates applicable to all shippers. On the other hand, only a relatively few wholesale transactions are regulated by the Natural Gas Act and these typically require substantial investment in capacity and facilities for the service of a particular distributor."

United Gas Pipe Line Co. v. *Mobile Gas Service Corp.*, 350 U.S. 332, 338–339 (1956). It seems clear that the Postal Service more closely resembles the railroads than the pipelines. As if in recognition of this circumstance, Congress instructed the Commission that rates should exhibit "simplicity of structure . . . and simple, identifiable relationships between the rates or fees charged the various classes of mail . . . ." [§ 3622(b)(7)].

[19] We note again, but without pursuing the point, that the comments do not consider the question whether, in a contract rate regime, the Postal Service would be authorized to refuse service at the tariffed rate on account of exceptionally high costs for a particular mailing, and instead propose to negotiate with the mailer for an appropriate surcharge. *See* fn. 14, above.

[20] Of course in many instances none would be expected. We have frequently recommended classification provisions that define eligible mail as being prepared or tendered as "prescribed by the Postal Service" (see, e.g., *DMCS* 200.625). Since rates attach to classes, not to pieces or mailings (*see* PRC Op. C85–1, paras. 024–025), one would not expect to see a price adjustment asked or offered where variations are called for in characteristics the DMCS commits to Postal Service discretion.

[21] For one thing, access to cheap computing power, a relatively recent phenomenon, has made the handling of great volumes of operational information feasible for mailers or their service companies as well as for the Service.

BILLING CODE 7710-FW-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 52, 63, and 61

[CGD 88-057]

RIN 2115-AD11

Automatic Auxiliary Boilers

AGENCY: Coast Guard, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard proposes to revise the requirements for automatic auxiliary boilers contained in 46 CFR part 63. The scope and applicability of part 63 will be clarified to minimize confusion, and industry consensus standards will replace existing regulations where these standards provide an equivalent level of safety when compared with the existing requirements. Also, a specific safety provision will be added to reduce the possibility of an explosion during the postpurge cycle. The end result of implementing this proposed rulemaking will be a reduction in costs and time delays for the approval process without compromising safety.

DATE: Comments must be submitted on or before February 12, 1990.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G-LRA-2/3600)/(CGD 88-057), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593-0001. Comments may be delivered to, and are available for inspection and copying at, the Marine Safety Council, U.S. Coast Guard, Room 3600, 2100 Second Street, SW., Washington, DC, between 8 a.m. and 3 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Randall N. Crenwelge, Office of Marine Safety, Security, and Environmental Protection; Marine Technical and Hazardous Materials Division, Room 1218, U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593-0001, (202) 267-2206. Normal office hours are from 7:30 a.m. until 4:00 p.m., Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking procedure by submitting written comments, data, or arguments. Each comment should include the name and address of the person submitting the comment, identify this notice (CGD 88-057), the specific section of the proposal to which the comment applies, and the reason for the comment. No public hearing is anticipated at this time, however, one may be held if written requests for a hearing are received, and it is determined that the opportunity to make oral presentations will benefit the rulemaking process. All comments will be reviewed and considered by the Coast Guard before taking further rulemaking action.

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

Drafting Information

The principal persons involved in drafting this proposal are Mr. Randall N. Crenwelge, Project Manager, and Lieutenant Commander Don M. Wrye, Project Counsel, Office of Chief Counsel.

Discussion of Proposed Regulations

a. Background

In 1965, the Coast Guard recognized the need to develop guidance for plan review of merchant vessels having centralized control systems and automatic boilers. A series of Navigation and Vessel Inspection Circulars (NVICs) were issued to express policy and provide guidance for field inspection offices. These NVICs were used to ensure a general level of safety for automatic auxiliary boilers at least equal to that required for manually operated auxiliary boilers.

Prior to 1968, only automatic steam boilers operating at pressures exceeding 30 pounds per square inch and used for purposes other than propulsion were covered by regulations under 46 CFR 162.026. In 1968, new marine engineering requirements were codified. These regulations were included in 46 CFR parts 50 through 63. Specific industrial codes, standards, and specifications were incorporated by reference for the design, construction, fabrication, operation, maintenance, and repair of boilers, pressure vessels, pressure piping, and propelling and auxiliary machinery. Codes, standards, and specifications which are incorporated by reference have the same force and effect as other U.S. Coast Guard regulations.

For automatic auxiliary boilers, an industry standard was not available that the Coast Guard considered suitable for incorporation into the regulations. Portions of part 63 were derived from the experience the Coast Guard had gained from implementing the NVICs and Part 162.026; however, most of part 63 was developed to express new requirements.

Since the publication of the marine engineering regulations in 1968, the American Society of Mechanical Engineers (ASME) has developed and published a standard, "Controls and Safety Devices for Automatically Fired Boilers" which has been adopted by the American National Standards Institute (ANSI). This standard has also been adopted into law by many federal and state regulatory agencies. The Coast Guard has reviewed this document and concluded that it contains many provisions which are suitable for incorporation into the proposed regulations. These should be included along with design parameters which are unique to the marine environment. This regulatory project has been initiated to accomplish these goals.

b. Issues Addressed

(1) *Scope and applicability.* The scope of part 63 should be clarified. Presently, automatic auxiliary boilers are divided into three broad categories which are large automatic auxiliary boilers, small automatic auxiliary boilers, and electric storage tank hot water supply boilers. It is not presently clear from the language of Part 63 which types of boilers and heating equipment fall within the scope of the existing categories. Although not stated in the present regulations, boilers should be classified by their service, control systems, pressure and temperature boundaries, heat input ratings, and firing medium. The services of automatic auxiliary boilers are clearly defined. Those control systems and automatic boilers which are governed by other parts and sections of the regulations are specified. Therefore, boilers governed by Part 63 should include large and small auxiliary

boilers, automatic heating boilers, automatic waste heat boilers, donkey boilers, miniature boilers, electric boilers, electric hot water supply boilers, auxiliary unit heaters, automatic incinerators, and fired thermal fluid heaters. However, only automatic auxiliary boilers having firing rates of less than 12,500,000 Btu/hr. will be covered by this proposed rule. Power boilers and auxiliary boilers having firing rates of 12,500,000 Btu/hr. and above must meet the requirements of Part 52, and their control systems must meet the requirements of Part 62. New sections will be added for incinerators and exhaust gas boilers. The Coast Guard is expecting a large influx of incinerator approval requests due to the adoption of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 (MARPOL 73/78 Annex V, Garbage Disposal Restrictions).

(2) Safety. In accordance with section 63.05-25(h)(3) of the existing regulations, an auxiliary boiler's control system must ensure that the length of the postpurge period is at least 15 seconds after the fuel valve is closed. The postpurge period should automatically occur when a boiler is being secured; however, when an emergency trip occurs, the air flow to the boiler should not automatically increase. In 1983, an auxiliary boiler explosion occurred on the SS PRESIDENT LINCOLN. A Coast Guard investigation determined that after repeated attempts to light off, during the automatic postpurge cycle, an increase in air flow occurred creating an explosive atmosphere. The National Fire Protection Association (NFPA) Standard for the Prevention of Furnace Explosions in Fuel Oil Fired Multiple Burner Boiler Furnaces, NFPA 85D, Chapter 5-2.5.3, requires postpurge in such cases to be under manual control. The proposed regulations will incorporate this provision.

(3) Adoption of Industry Consensus Standards. An industry consensus standard, "Controls and Safety Devices for Automatically-Fired Boilers", ANSI/ASME CSD-1-1982/CSD-1a-1984, has been developed by an American Society of Mechanical Engineers (ASME) committee composed of independent product certification agencies, insurance companies, control system manufacturers, industry associations, and other regulatory agencies, and has been adopted by ANSI. This standard covers automatic control system design, construction, installation, certification, and testing. It contains a self-certification procedure which is performed by the manufacturer, and it is currently used by industry and other regulatory agencies. The Coast Guard proposes to adopt this industry standard and eliminate the burden of detailed plan review and component inspections. In the proposed rule, certification by the manufacturer that the automatic auxiliary boiler and its control systems meet the requirements of part 63 will indicate compliance with the regulations.

c. Discussion of Proposed Regulations

Section 52.01-10 Automatic controls. Paragraph (b) is revised and paragraph (c) is added to specify which particular parts of the regulations apply to an auxiliary boiler based on its heat input ratings. Part 63 applies to boilers having heat input ratings less than 12,500,000 Btu/hr. This limit is specified in ANSI/ASME CSD-1-1982/CSD-1a-1984 as the maximum cutoff point for which this standard applies. Controls and safety devices for boilers with fuel input ratings of 12,500,000 Btu/hr. or above fall within the scope of part 62.

Section 52.01-135 Inspection and tests. Paragraph (d) is revised to reflect that the requirements of the current §§ 63.05-90 and 63.10-90 are removed from part 63 and placed in part 61.

Section 52.25-15 Fired Thermal Fluid Heaters. Paragraph (d) is added to this section to cross-reference the test and inspection requirements found in subpart 61.30.

Section 52.25-20 Exhaust Gas Boilers. This section is revised to cross-reference the requirements for automatic exhaust gas boiler control systems found in § 63.25-7 and subpart 61.35.

Section 61.30-20 Automatic control and safety tests. In this section, the requirement for the tests to be conducted in accordance with the procedures in the heater instruction booklet has been removed. Also, the requirement to submit a test procedure for approval to the Officer in Charge, Marine Inspection has been removed. The new regulations do not require the submittal of instruction booklets for approval.

Subpart 61.35—Design Verification and Periodic Testing for Automatic Auxiliary Boilers. This subpart is added to cross-reference test and inspection requirements for automatic auxiliary boilers. The test and inspection requirements currently found in §§ 63.05-90 and 63.10-90 are moved to this subpart so that all test and inspection requirements for boilers, pressure vessels, fired thermal fluid heaters, machinery, and piping systems are located in one subpart. Test and inspection requirements for automatic auxiliary boilers are also revised to be consistent with those for main power boilers without being overly burdensome.

Part 63—Automatic Auxiliary Boilers. The Coast Guard proposes to revise the whole of part 63. A discussion of each subpart, as revised, follows.

Subpart 63.01—General Provisions. This subpart is revised to state the purpose, scope, and applicability (including exceptions) of part 63. Automatic auxiliary boilers are classified by their service, control systems, pressure and temperature boundaries, heat input ratings, and firing medium. The types of automatic auxiliary boilers covered by this part and those control systems and automatic boilers which are governed by other parts and sections of the regulations are specified. This proposed subpart differs from the existing regulations in that it establishes design criteria based on a particular boiler's service, control systems, pressure and temperature boundaries, heat input ratings, and the firing medium. This additional information is provided for convenience, clarification, and ease of interpretation of the regulations.

Subpart 63.05—Reference Specifications. This subpart is revised by listing standards accepted by the Coast Guard as meeting the safety requirements for automatic auxiliary boiler controls and components. Since the 1st revision to part 63, industry standards have been developed which cover automatic boiler control system design, operation, and testing. The provisions in these standards provide an equivalent level of safety when compared with the existing regulations. The standards listed in this subpart already have been adopted by other state and federal regulatory agencies.

Subpart 63.10—Miscellaneous Submittals. This subpart is revised by eliminating the requirements to submit equipment descriptions, detailed plans, schematics, logic diagrams, bills of materials, and operating instructions. Plans will no longer be approved; however, the submittal of test procedures will still be required. A requirement for the manufacturer to submit a certification report in accordance with ANSI/ASME CSD-1-1982/CSD-1a-1984 has been added. This will allow the manufacturer to certify an automatic auxiliary boiler as complying with the provisions of this part and the referenced industry consensus standards.

Subpart 63.15—General Requirements. This subpart is revised by referencing construction

requirements for automatic auxiliary boilers, their accessories, and marine environmental design parameters which are required for safe operation. Tests

TABLE 1—Continued

Proposed regulation	Reference

of Regulations Policy, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, Attn: Desk Officer, U.S. Coast Guard. Persons submitting comments to OMB

(c) Each automatically controlled auxiliary boiler with a heat input rating of 12,500,000 Btu/hr. (3.66 megawatts) or above, must meet the requirements for automatic safety controls in part 62 of

§ 61.30-20 Automatic control and safety tests.

Operational tests and checks of all safety and limit controls, combustion controls, programming controls and

§ 61.35-3 Required tests and checks.

(a) Tests and checks must include the following:

(1) *Safety (Programming) controls.*

VOL 54 ISS 217 NOV 13 1989 UMI

requirements for automatic auxiliary boilers, their accessories, and marine environmental design parameters which are required for safe operation. Tests and inspection requirements for automatic auxiliary boilers found in part 61 are cross-referenced.

Subpart 63.20—Additional Control System Requirements. This subpart is added to consolidate the requirements for the programming control system, operating control system, flame safeguard control system, limit control system, combustion control system, ignition system, water level controls, and low water cut off controls found in ANSI/ASME CSD-1-1982/CSD-1a-1984 and the existing regulation. The unique marine requirements found in the existing regulations have been retained. The procedure for purging after an emergency trip has been added to reduce the possibility of furnace explosions.

Subpart 63.25—Requirements for Specific Types of Automatic Auxiliary Boilers. This subpart is added to specify requirements which are unique to small auxiliary boilers (firing rates of 3 gallons per hour (gph) or less), electric hot water supply boilers, fired thermal fluid heaters, exhaust gas boilers, and incinerators. The requirements in this subpart apply to the above listed boilers in addition to the requirements found in other subparts which apply to all automatic auxiliary boilers.

Reference Tables. Table 1 is provided for convenience when comparing the proposed regulations with existing regulations. It lists the proposed regulations, and the corresponding existing provisions in title 46 of the Code of Federal Regulations and industry consensus standards.

Regulatory Evaluation

The proposed regulations are considered to be nonmajor under Executive Order 12291 and nonsignificant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of these regulations is expected to be minimal. Since the impact of this rulemaking is expected to be minimal, the Coast Guard certifies that this rulemaking, if adopted, would not have a significant economic impact on a substantial number of small entities. The public is specifically invited to comment on the expected cost to implement these regulations, if adopted.

Paperwork Reduction Act

This proposed rulemaking contains information collection and record-keeping requirements in § 63.10-1. They have been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act of 1980 (44 USC 3501 *et seq.*). Persons desiring to comment on these recordkeeping and information collection requirements should submit their comments to: Office of Regulations Policy, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, Attn: Desk Officer, U.S. Coast Guard. Persons submitting comments to OMB are also requested to submit a copy of their comments to the Coast Guard as indicated under "ADDRESSES".

Environmental Impact

The Coast Guard has considered the environmental impact of the proposed regulations, and in accordance with section 2.B.2. of Commandant Instruction M16475.1B, has determined that this rulemaking is categorically excluded from further environmental documentation.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects

46 CFR Part 52

Incorporation by reference, Reporting and recordkeeping requirements, Vessels.

46 CFR Part 61

Incorporation by reference, Reporting and recordkeeping requirements, Vessels.

46 CFR Part 63

Incorporation by reference, Reporting and recordkeeping requirements, Vessels.

In consideration of the foregoing, chapter I of title 46, Code of Federal Regulations is proposed to be amended as follows.

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

2. Section 52.01-10 is amended by revising paragraph (b) and adding new paragraph (c) to read as follows:

§ 52.01-10 Automatic controls.

* * * * *

(b) Each automatically controlled auxiliary boiler having a heat input rating of less than 12,500,000 Btu/hr. (3.66 megawatts) must meet the requirements of part 63 of this chapter.

(c) Each automatically controlled auxiliary boiler with a heat input rating of 12,500,000 Btu/hr. (3.66 megawatts) or above, must meet the requirements for automatic safety controls in part 62 of this chapter.

3. Section 52.01-135 is amended by revising paragraph (d) to read as follows:

§ 52.01-135 Inspection and tests (modifies PG-90 through PG-100).

* * * * *

(d) *Operating tests.* In addition to the hydrostatic tests prescribed in paragraph (c) of this section, automatically controlled auxiliary boilers must be subjected to operating tests as specified in §§ 61.30-20, 61.35-1, 61.35-3, 63.15-9, 63.25-3, and 63.25-5 of this chapter, as appropriate, or as directed by the Officer in Charge, Marine Inspection, for propulsion boilers. These tests are to be performed after final installation.

4. Section 52.25-15 is amended by adding new paragraph (d) to read as follows:

§ 52.25-15 Fired thermal fluid heaters.

* * * * *

(d) Each fired thermal fluid heater must be tested and inspected in accordance with the requirements of subpart 61.30 of this chapter.

5. Section 52.25-20 is revised to read as follows:

§ 52.25-20 Exhaust gas boilers

Exhaust gas boilers with a maximum allowable working pressure greater than 103 kPa gage (15 psig) or an operating temperature greater than 454° C. (850° F.) must be designed, constructed, inspected, tested and stamped in accordance with the applicable provisions in this part. The design temperature of parts exposed to the exhaust gas must be the maximum temperature that could normally be produced by the source of the exhaust gas. This temperature must be verified by testing or by the manufacturer of the engine or other equipment producing the exhaust. Automatic exhaust gas boiler control systems must be designed, constructed, tested, and inspected in accordance with § 63.25-7 of this chapter.

PART 61—[AMENDED]

6. The authority citation for Part 61 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

7. Section 61.30-20 is revised to read as follows:

§ 61.30-20 Automatic control and safety tests.

Operational tests and checks of all safety and limit controls, combustion controls, programming controls and safety relief valves must be conducted by the owner, chief engineer, or person in charge at the inspection for certification, and when directed by the Officer in Charge, Marine Inspection, to determine that the control components and safety devices are functioning properly and are in satisfactory operating condition. These tests and checks must be conducted in the presence of a marine inspector. They must include the following: proper prepurge, burner ignition sequence checks, operation of the combustion controls, limit controls, fluid flow controls, fluid level controls, high temperature control, proper postpurge control, and verification of the flame safeguard.

8. Subpart 61.35 is added to read as follows:

Subpart 61.35—Design Verification and Periodic Testing for Automatic Auxiliary Boilers

Sec.
61.35-1—General.
61.35-3—Required tests and checks.

Subpart 61.35—Design Verification and Periodic Testing for Automatic Auxiliary Boilers

§ 61.35-1 General.

(a) All automatic auxiliary boilers except fired thermal fluid heaters must be tested and inspected in accordance with this subpart and subpart 61.05 of this part.

(b) Fired thermal fluid heaters must be tested and inspected in accordance with subpart 61.30 of this part.

(c) All controls, safety devices, and other control system equipment must be tested and inspected to verify their proper design, construction, installation, and operation.

(d) All tests must be performed after installation of the automatic auxiliary boiler and its control system(s) aboard the vessel.

(e) As far as practicable, test techniques must not simulate monitored system conditions by misadjustment, artificial signals, improper wiring, tampering, or revision of the system tested. The use of a synthesized signal or condition applied to a sensor is acceptable if the required test equipment is maintained in good working order and is periodically calibrated. Proper operation and proper calibration of test equipment must be demonstrated to the Officer in Charge, Marine Inspection.

§ 61.35-3 Required tests and checks.

(a) Tests and checks must include the following:

(1) *Safety (Programming) controls.* Safety controls must control and cycle the unit in the proper manner and sequence. Proper prepurge, ignition, postpurge, and modulation must be verified. All time intervals must be verified.

(2) *Flame safeguard.* The flame safeguard system must be tested by causing flame and ignition failures. Operation of the audible alarm and visible indicator must be verified. The shutdown times must be verified.

(3) *Fuel supply controls.* Satisfactory shutdown operation of the two fuel control solenoid valves must be verified.

(4) *Fuel oil pressure limit control.* A safety shutdown must be initiated by lowering the fuel oil pressure below the value required for safe combustion. System shutdown and the need for manual reset prior to automatic startup must be verified.

(5) *Fuel oil temperature limit control.* (Units designed to burn heavy fuel oil). A safety shutdown must be initiated by lowering the fuel oil temperature below the designed temperature. System shutdown and the need for manual reset prior to automatic startup must be verified.

(6) *Combustion controls.* Smooth and stable operation of the combustion controls must be verified.

(7) *Draft limit control.* The draft loss interlock switch must be tested by stopping the blower motor or blocking the draft opening. The draft limit control must cause burner shutdown and prevent startup when an inadequate air volume is supplied to the burner(s).

(8) *Limit controls.* Shutdown caused by the limit controls must be verified.

(9) *Water level controls.* Water level controls must be tested by slowly lowering the water level in the boiler. Each operating water level control must be individually tested. The upper low water cutoff and the lower low water cutoff must each be tested. The audible alarm and visible indicator associated with the lower low water cutoff must be tested. The manual reset device must be tested after the lower low water cutoff has been activated.

(10) *Feed water flow controls.* The feed water flow limit device (found in steam boilers and water heaters without water level controls) must be tested by interrupting the feed water supply. Manual reset must be required prior to restarting the boiler.

(11) *Low voltage test.* The fuel supply to the burners must automatically shut off when the supply voltage is lowered.

VOL 54 ISS 217 NOV 13 1989 UMI

(12) *Switches.* All switches must be tested to verify satisfactory operation.

9. Part 63 is revised to read as follows:

63.25–7 Exhaust Gas Boilers.
63.25–9 Incinerators.

Authority: 46 U.S.C. 3306, 3703, E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

PART 63—AUTOMATIC AUXILIARY BOILERS

Subpart 63.01—General Provisions

§ 63.01–1 Purpose.

This part specifies the minimum requirements for safety for each automatic auxiliary boiler, including its design, construction, testing and operation.

§ 63.01–3 Scope and applicability.

(a) This part contains the requirements for automatic auxiliary boilers, including their controls, control system components, electrical devices, safety devices, and accessories. Types of automatic auxiliary boilers which are covered include large and small automatic auxiliary boilers, automatic heating boilers, automatic waste heat boilers, donkey boilers, miniature boilers, electric boilers, fired thermal fluid heaters, automatic incinerators, and electric hot water supply boilers. Automatic auxiliary boilers are classified by their service, control systems, pressure and temperature boundaries, heat input ratings, and firing mediums as follows:

(1) Automatic auxiliary boilers listed in Table 54.01–5(A) of this chapter which reference this part for regulation of their automatic controls.

(2) Automatic control systems for automatic auxiliary boilers having a heat input rating of less than 12,500,000 Btu/hr. (3.66 megawatts) (20 gph).

(3) Electric hot water supply boilers (heaters) containing electric heating elements rated at 600 volts or less.

(4) Exhaust gas boilers, and their controls and accessories used to heat water and/or generate steam.

(5) Incinerators (and their control systems) used for the generation of steam and/or oxidation or ordinary waste materials and garbage. This part also includes incinerators which serve as automatic auxiliary boilers.

(b) *Exceptions.* Automatic boilers have heat input ratings of 12,500,000 Btu/hr. (3.66 megawatts) (20 gph) and above must meet the requirements of part 52 of this chapter. Their control systems must meet the requirements of part 62 of this chapter. Electric cooking equipment must comply with § 111.77–3 of this chapter. Electric oil immersion heaters must comply with subpart 111.85 of this chapter. Electric air heating equipment must company with subpart 111.87 of this chapter.

Subpart 63.05—Reference Specifications

§ 63.05–1 Incorporation by reference.

(a) Certain materials are incorporated by reference into this part with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a). To enforce any edition other than the one listed in paragraph (b) of this section, notice of change must be published in the **Federal Register** and the material made available to the public. All approved material is on file at the Office of the Federal Register, 1100 L Street, NW., Washington, DC and at the U.S. Coast Guard, Marine Technical and Hazardous Materials Division (G–MTH–2), 2100 Second Street, SW., Washington, DC 20593–0001, and is available from the source listed in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part and the sections affected are:

American Society of Mechanical Engineers:
345 East 47th St., New York, NY 10017
ANSI/ASME CSD–1–1982 with Addenda CSD–1a–1984, Controls and Safety Devices for Automatically Fired Boilers, Nov. 15, 1984.... 63.10–1; 63.15–1; 63.20

Underwriters' Laboratories, Inc. (UL):
333 Pfingsten Road, Northbrook, IL 60062

American Gas Association:
1515 Wilson Blvd, Arlington, VA 22209
ANSI/AGA Z21.22–86 Relief Valves and Automatic Shut off Devices for Hot Water Supply Systems, Mar. 28, 1986..... 63.25–3

Subpart 63.10—Miscellaneous Submittals

§ 63.10–1 Test procedures and certification report.

(a) Two (2) copies of the following items must be submitted to the Commanding Officer, U.S. Coast Guard Marine Safety Center, 400 Seventh Street, SW., Washington, DC 20590–0001.

(1) Detailed instructions for operationally testing each automatic auxiliary boiler, its controls, and safety devices.

(2) A certification report for each automatic auxiliary boiler which:

(i) Meets paragraph CG–510 of ANSI/ASME CSD–1/CSD–1a; and

(ii) Certifies that each automatic auxiliary boiler, its controls, and safety devices comply with the additional requirements of this part.

Subpart 63.15—General Requirements

§ 63.15–1 General.

(a) Each automatic auxiliary boiler must be designed and constructed for its intended service according to the requirements of the parts referenced in Table 54.01–5(A) of this chapter.

(b) Controls and safety devices for automatic auxiliary boilers must meet the applicable requirements of ANSI/ASME CSD–1/CSD–1a, except Paragraph CG–310.

(c) All devices and components of an automatic auxiliary boiler must satisfactorily operate within the marine environment. The boiler must satisfactory operate with a momentary roll of 30°, a list of 15°, and a permanent trim of 5° with it installed in a position as specified by the manufacturer.

(d) An electrical control used to shut down the automatic auxiliary boiler must be installed in accordance with § 58.01–25 of this chapter. This device must stop the fuel supply to the fuel burning equipment.

(e) Mercury tube actuated controls are prohibited from being installed and used on automatic auxiliary boilers.

§ 63.15–3 Fuel system.

(a) Firing of an automatic auxiliary boiler by natural gas is prohibited unless specifically approved by the Marine Safety Center.

(b) When heavy fuel oil is used, a thermostatically-controlled electric oil heater and a level device must be furnished in accordance with Subpart 111.85 of this chapter.

(c) The fuel oil service pump and its piping system must be designed in accordance with § 56.50–65 of this chapter. All materials must meet the requirements of subpart 56.60 of this chapter. The use of cast iron or malleable iron is prohibited.

(d) The fuel oil service system (including the pump) must meet the pressure classification and design criteria found in Table 56.04–2 of this chapter.

(e) When properly selected for the intended service, fuel pumps meeting the performance and test requirements of ANSI/UL 343 meet the requirements of this section.

§ 63.15–5 Strainers.

(a) Strainers must be installed in the fuel supply line. Each strainer must be self-cleaning, fitted with a bypass, or be capable of being cleaned without interrupting the fuel oil supply.

(b) The strainer must not allow a quantity of air to be trapped inside which would affect the rate of fuel flow to the burner or reduce the effective area of the straining element.

(c) Strainers meeting the requirements for strainers found in ANSI/UL 296 meet the requirements of this section.

§ 63.15–7 Alarms.

(a) An audible alarm must automatically sound when a flame safety system shutdown occurs. A visible indicator must indicate that the shutdown was caused by the flame safety system.

(b) Means must be provided to silence the audible alarm. The visible indicators must require manual reset.

(c) For steam boilers, operation of the lower low water cutoff must automatically sound an audible alarm. A visual indicator must indicate that the shutdown was caused by low water.

§ 63.15–9 Inspections and tests.

(a) All automatic auxiliary boilers must be inspected and tested in accordance with the requirements of part 61 of this chapter.

Subpart 63.20—Additional Control System Requirements

§ 63.20–1 Specific systems requirements.

In addition to the requirements found in ANSI/ASME CSD–1/CSD–1a, the following requirements apply for specific control systems:

(a) *Primary safety control system.* Following emergency safety trip control operation, the air flow to the boiler must not automatically increase. For this condition, postpurge must be accomplished manually.

(b) *Combustion control system.* A low fire interlock must ensure low fire start when variable firing rates are used.

(c) *Water level controls and low water cut off controls.* Water level controls must be constructed and located to minimize the effects of vessel roll and pitch. Float chamber low water cutoffs using stuffing boxes to transmit the motion of the float from the chamber to the external switches are prohibited. No outlet connection other than pressure controls, water columns, drains, and steam gages may be installed on the float chamber or on the pipes connecting the float chamber to the boiler. The water inlet valve must not feed water into the boiler through the float chamber. The boiler feed piping must comply with the applicable requirements of § 56.50–30 of this chapter.

Subpart 63.25—Requirements for Specific Types of Automatic Auxiliary Boilers

§ 63.25–1 Small automatic auxiliary boilers.

(a) Small automatic auxiliary boilers, defined as having a heat input rating of 400,000 Btu/hr. and less (117 kilowatts and less) (3 gph and less), must meet the following additional requirements.

(1) Small automatic auxiliary boilers must be equipped with a visual indicator which indicates when the low water cutoff has activated.

(2) A prepurge period of a sufficient duration to ensure at least four changes of air in the combustion chamber and stack, but not less than 15 seconds must be provided. Ignition must occur only before or simultaneously with the opening of the fuel oil valve.

§ 63.25–3 Electric hot water supply boilers.

(a) Electric hot water supply boilers which have a capacity not greater than 454 liters (120 U.S. gallons), a heat input rate not greater than 200,000 Btu/hr. (58.6 kilowatts), meet the requirements of ANSI/UL 174 or ANSI/UL 1453, and are protected by a pressure relief device are not required to meet any other requirements of this section.

(b) Each hot water supply boiler must be constructed in accordance with the applicable requirements of part 52 or part 53 of this chapter.

(c) Branch circuit conductors for hot water supply boilers which have a capacity not greater than 454 liters (120 U.S. gallons) must have a current carrying capacity of not less than 125 percent of the current rating of the appliance. Branch circuit conductors for hot water supply boilers with capacities of more than 454 liters (120 U.S. gallons) must have a current carrying capacity not less than 100 percent of the current rating of the appliance. Wiring materials and methods must comply with subpart 111.60 of this chapter. A hot water supply boiler having a current rating of more than 48 amperes and employing resistance type heating elements must have the heating elements on subdivided circuits. Each subdivided load, except for an electric hot water supply boiler employing a resistance type immersion electric heating element, must not exceed 48 amperes, and it must be protected at not more than 60 amperes. An electric hot water supply boiler employing a resistance type immersion electric heating element may be subdivided into circuits not exceeding 120 amperes and protected at not more than 150 amperes. Overcurrent

VOL 54 ISS 217 NOV 13 1989 UMI

protection devices must comply with subpart 111.50 of this chapter.

(d) Heating elements must be insulated electrically from the water being heated, guarded against mechanical injury and contact with outside objects, and securely supported. Consideration must be given to sagging, opening, and other adverse conditions of the elements resulting from continuous heating, and flexion of supports and wiring due to alternate heating and cooling. Wrap-around elements must be secured in a manner which prevents loosening.

(e) Iron and steel parts must be protected against corrosion by enameling, galvanizing, or plating. Iron and steel storage tanks having a wall thickness less than ¼-inch (6.4 mm) must have the inside surface protected against corrosion.

(f) Each heating element must have a temperature regulating device. The device must limit the water from obtaining a temperature greater than 90° C. (194° F.). If the control has a marked off position, the control must disconnect the heating element from all ungrounded conductors, and it must not respond to temperature when placed in the off position.

(g) An independent temperature limiting device must prevent the water in the upper 25 percent of the tank from attaining a temperature higher than 99° C. (210° F.). This device must require manual resetting, be trip free from the operating means, open all ungrounded power supply conductors to the heater, and be readily accessible.

(h) Electric hot water supply boilers must have pressure and temperature relieving valves. The valve temperature setting must not be more than 99° C. (210° F.). The pressure relief setting must not be higher than the marked working pressure of the boiler. The pressure and temperature relief valves must meet subpart 53.05 of this chapter. The pressure and temperature relief valves may be combined into a pressure-temperature relief valve. When combined, the valve must meet the requirements of ANSI/AGA Z21.22 in lieu of subpart 53.05 of this chapter.

(i) Electric hot water supply boilers must be marked in a visible location with the manufacturer's name, model or other identification number, water capacity, and the electrical ratings of each heating element. When two or more heating elements are installed, the maximum wattage or current consumption must be indicated. The cold water inlet and the hot water outlet must each be clearly distinguished or marked for identification purposes.

(j) All electric hot water supply boilers must have their pressure relief devices tested as required by part 52 or part 53 of this chapter, as applicable. Electric hot water supply boilers which meet the requirements of ANSI/UL 174 or ANSI/UL 1453 and have heating elements, temperature regulating controls, and temperature limiting controls are satisfactory for installation and service without further testing. All electric hot water supply boilers not meeting the requirements of ANSI/UL 174 or ANSI/UL 1453 must have their heating elements, temperature regulating controls, and temperature limiting controls tested by the marine inspector.

§ 63.25-5 Fired thermal fluid heaters.

(a) *Construction.* Fired thermal fluid heaters must meet the requirements of Part 52 of this chapter, as applicable.

(b) *Controls.* Fired Thermal Fluid heaters must have a low fluid level cutoff device or a low flow device. When the rate of fluid flow through the heating coils is insufficient to ensure proper heat transfer, the device must cut off the fuel supply to the burner. If the fluid temperature exceeds the designed maximum operating temperature, a high temperature limit device must cut off the fuel supply to the burner. These devices must be of the manual reset type.

§ 63.25-7 Exhaust gas boilers.

(a) *Construction.* An auxiliary exhaust gas boiler must meet the applicable construction requirements of part 52 or part 53 of this chapter as determined from Table 54.01-5(A) of this chapter.

(b) *Controls.* Each drum type exhaust gas steam boiler must have a feed water control system. The system must automatically supply the required amount of feed water and maintain it at the proper level. For boilers without a fixed water level, the control system must supply the feed water at a rate sufficient to ensure proper heat transfer. The system must adequately fill the boiler when cold.

(c) *Alarms.* When a condition arises which results in inadequate heat transfer, a high temperature alarm or low flow alarm must be activated. An audible alarm must automatically sound, and a visual indicator must indicate when the fluid temperature exceeds the maximum operating temperature or when the fluid/steam flowing through the heat exchanger is insufficient to ensure proper heat transfer.

§ 63.25-9 Incinerators.

(a) *Construction.* Incinerators which produce hot water or generate steam must meet the requirements of part 52 or part 53 of this chapter, as applicable.

(b) A high temperature limit device must be installed in the combustion chamber and flue gas duct of the incinerator. Each limit device must be of the manual reset type and cause an automatic shutdown when a temperature higher than the maximum operating temperature is detected.

Dated: October 16, 1989.

M.J. Schiro,

Captain, U.S. Coast Guard, Acting Chief, Office of Marine Safety, Security and Environmental Protection.

46 CFR Part 164

[CGD 84-068]

RIN 2115-AB70

Personal Flotation Device (PFD) Components

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes procedures for obtaining Coast Guard acceptance of non-standard components, self-certification requirements for standards components, and production quality control requirements for all components used in the manufacture of Coast Guard approved personal flotation devices (PFD's). This notice also proposes to prohibit the use of cotton thread as a PFD component, designate specified nylon and polyester threads as standard components, and add new performance requirements for non-standard thread. Industry-wide conversion to the use of non-standard PFD components made of synthetic materials has caused a substantial backlog in Coast Guard review and acceptance of non-standard components. Also, a significant number of failures of non-standard components have been observed in random production testing. The purpose of these rules, as proposed, would be to reduce the time and effort involved to obtain Coast Guard acceptance of non-standard PFD components, and to reduce the number of failures observed in random testing of these components. The proposed regulations in this NPRM relating to standard PFD components and to certain non-standard PFD components essentially represent a codification of longstanding procedures and requirements that are currently applied to those components.

DATES: Comments must be submitted on or before January 12, 1990.

ADDRESSES: 1. Comments may be mailed to the Executive Secretary, Marine Safety Council (G-LRA-2/36), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC, 20593-0001. Comments may be delivered to and will be available for inspection and copying at the Marine Safety Council (G-LRA-2/36), Room 3600, U.S. Coast Guard, 2100 Second Street SW., Washington, DC, between the hours of 8 a.m. and 4 p.m. Monday through Friday, except holidays.

2. A draft Regulatory Evaluation has been included in the public docket for this rulemaking, and may be inspected and copied at the Marine Safety Council (G-LRA/36) at the address listed above.

FOR FURTHER INFORMATION CONTACT: Mr. Kurt J. Heinz, Office of Marine Safety, Security, and Environmental Protection (G-MVI-3), Room 1404, U.S. Coast Guard Headquarters, Washington, DC 20593-0001, (202)-267-1444.

SUPPLEMENTARY INFORMATION:

1. Request for Comments

Interested persons are invited and encouraged to participate in this proposed rulemaking (NPRM) by submitting written views, data, or arguments. Comments should include the names and addresses of the persons making them, identify this NPRM (CGD 84-068) and the specific section or paragraph of the NPRM to which each comment applies, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped self-addressed envelope is enclosed. The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if a written request for a hearing is received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

2. Drafting Information

The principal persons involved in drafting this proposal are Kurt J. Heinz, Project Manager, Office of Marine Safety, Security, and Environmental Protection and William R. Register, Project Counsel, Office of the Chief Counsel.

3. RIN Number

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

4. Discussion of the Proposed Regulations

Background—Quality Control for Non-standard Components

Each of the existing PFD subparts in 46 CFR, Part 160 contains a section or sections containing requirements for the materials (generally referred to as components) used in the construction of the PFD concerned. Components which comply exactly with all of the requirements of one of these sections are commonly referred to as standard components. Standard components currently include such items as cotton fabric and webbing, cotton and synthetic threads, and metal closure hardware. Existing regulations in Part 160 require component manufacturers to provide affidavits (the content of which is not currently defined in the regulations) as certification that the components they provide comply with all applicable requirements, and they require PFD manufacturers to retain these affidavits as records.

Quality control requirements for standards components are not specifically defined in regulation, although in most cases, standard components must comply with military or federal specifications which do contain detailed quality control provisions. The quality control requirements in Part 160 are geared toward the end product, or PFD, and require periodic visits to the PFD manufacturing plant by marine inspectors; periodic inspection of specific PFD components in production is not required. Because concisely defined standard components were used almost exclusively in PFD manufacture at the time the existing regulations in part 160 became effective, visual inspections of PFD's in production were considered adequate to assure quality control of both components and the end product.

In the ensuing decades, however, many new materials and technologies were developed which demonstrated potential for equivalent or improved performance at similar or lower cost when properly used. Since the 1970's the Coast Guard has evaluated these materials (such as synthetic fabrics in place of cotton, and plastic buckles in place of metal closure hardware) on an individual basis for suitability as PFD components. Components demonstrated to be equivalent in performance to standard components are commonly referred to as "non-standard components", and are accepted by the Coast Guard for use in PFD's as if they were standard components. Non-standard components are now in extensive use.

Individual performance testing of non-standard components, which was established in the 1970's as non-standard components first came into usage, was intended to control and monitor the quality of materials for which there originally was little field service history. Because there was little or no practical experience with entire generic categories of non-standard components (e.g., nylon fabrics), each prospective non-standard component had to be evaluated for equivalence individually rather than based upon known characteristics of a large group of similar products.

There are currently two methods in use by the Coast Guard for demonstrating equivalence and obtaining acceptance as a non-standard component: the Coast Guard "letter of acceptance", and component "recognition" by a recognized laboratory. The choice of which method to use lies with the component manufacturer. (Currently, Underwriters Laboratories is the only recognized laboratory, and the UL Recognition program is the only accepted component recognition program. Guidelines for acceptance of other laboratories and programs are included in these proposed rules. For convenience in this discussion, "recognition" will be used to refer to any accepted recognized laboratory program of initial product testing and subsequent oversight of quality control during production.)

To obtain a Coast Guard letter of acceptance for a non-standard component, the component manufacturer submits data directly to the Coast Guard (in the form of test results, samples, etc.) demonstrating that the component meets the appropriate equivalence requirements. The Coast Guard, after reviewing the application, then issues the letter of acceptance which establishes the conditions and restrictions under which the component is acceptable for use in approved PFD's. A Coast Guard letter of acceptance is valid for a period of five years (the same as for Coast Guard approval of PFD's and other materials and equipment), after which the manufacturer must resubmit performance data and product specifications as for a new acceptance. As for standard components, a condition of each Coast Guard letter of acceptance is that the component manufacturer must provide an affidavit

VOL
54
ISS
2
1
7
NO
13
1989
UMI

with each shipment, which references the letter of acceptance and which certifies that the components shipped meet all of the conditions of the acceptance and all of the applicable performance requirements. Each letter of acceptance also indicates that the acceptance is contingent upon the component manufacturer maintaining a quality control program sufficient to substantiate the required affidavits. This required quality control program is not more specifically defined.

The other method of obtaining acceptance as a non-standard component, component recognition by a recognized laboratory, is handled directly by the recognized laboratory. The component manufacturer submits samples of the prospective non-standard component to the recognized laboratory for testing against performance requirements similar to those used in evaluating components for which a Coast Guard letter of acceptance is requested. The recognized laboratory then prepares a test report and draft procedures for production inspections of the component, which are submitted to the Coast Guard for review. The Coast Guard review checks for both adequacy of the test results and accuracy and completeness of the product description in the production inspection procedure. After resolving any discrepancies, the Coast Guard notifies the laboratory in writing that the submission is acceptable if the product is found to meet all of the applicable requirements. The laboratory then commences recognition of the product in accordance with their established procedures, and marks the product in production with the "recognition mark" of the laboratory. The recognition mark is considered adequate evidence that a component meets appropriate non-standard component performance requirements, and serves the same function as an affidavit under the letter of acceptance program.

The key difference between component recognition and the Coast Guard letter of acceptance program for non-standard components is that under component recognition, the component manufacturer's production quality control program is supplemented by a program of oversight by the recognized laboratory. This quality control oversight program requires the manufacturer to perform certain production tests and inspections, and includes periodically witnessing or supervising the manufacturer performing those tests and inspections, auditing the manufacturer's quality control records, and selecting random product samples for follow-up product testing at the laboratory. Beyond product testing to obtain acceptance every five years, the Coast Guard letter of acceptance program contains no specific provision for Coast Guard or independent laboratory oversight over quality control in production.

While the use of non-standard components in PFD's was in the developmental stage, the existing procedures for acceptance functioned generally well. However, the use of non-standard components has not increased to almost completely replace standard components in the manufacture of PFD's. Experience with certain generic categories of components has grown to where individual testing has become in many cases redundant, since many non-standard components are virtually identical, and many generic products have established a sufficient satisfactory field service history that they may now be considered, as classes, to provide a degree of safety equivalent to standard components. The volume of testing currently being done, coupled with the associated administrative efforts involved in processing requests for Coast Guard letters of acceptance, has overloaded the system to create a perpetual backlog of acceptance requests. This backlog often causes lengthy delays in processing new requests. These dalays may limit the flexibility of PFD manufacturers in selecting component suppliers, which can lead to production delays and additional production costs which are then passed on to the consumer. The staff time required to effectively administer the program also causes inordinate delays in other activities of interest to the industry, such as review of submissions for component recognition and approval of PFD's and other equipment.

Particularly for fabric, the nature of the manufacturing process has made the Coast Guard letter of acceptance program ineffective. In many instances, the person nominally responsible for the quality of the product (who signs the affidavit certifying the same) in reality has very limited direct knowledge of or control over the specific lot to which the affidavit applies. The supplier of a fabric (referred to within the industry as a "converter"), who purchases rough or "greige" goods from a weaving mill and then coordinates the necessary processing through one or more dyers and finishers, in all likelihood never actually comes in contact with the fabric he/she is certifying. Some dyers and finishers do not even maintain laboratories, and so do not have the ability to test the fabric in production. The effect of this lack of direct involvement by the fabric converter in the manufacturing process and in quality control at the various manufacturing steps and locations is that fabrics accepted under Coast Guard letters of acceptance exhibit sufficient variance in production that they have recently been prone to frequent failures when randomly tested for compliance by a recognized laboratory. The prevalence of failures during random laboratory testing strongly suggests that some fabric used in the construction of Coast Guard approved PFD's may not meet the performance requirements that were used to evaluate the component when originally submitted to the Coast Guard pursuant to requesting a letter of acceptance. As the primary structural component of a PFD, failure of PFD fabric creates a significant potential for failures of PFD's resulting in serious injuries or fatalities.

Considered Alternatives

Three alternative approaches to the resolution of the problems of the existing acceptance program for non-standard components were considered and will be discussed individually, with the selected alternative which is the basis of this proposal discussed last.

Under the first alternative, component manufacturer self-certification, specific production quality control requirements for all components, both standard and non-standard, would be established in regulation. These specific production quality control requirements would be similar to those currently in use under the recognized laboratory component recognition program, which were developed jointly with the Coast Guard. The component manufacturer would provide certification directly to the PFD manufacturer that the components meet the applicable requirements. There would be no Coast Guard or recognized laboratory oversight over production quality control. This alternative would be similar to the existing program applied to standard and non-standard components, except that specifically defined production quality control requirements would be provided in place of the existing general requirement to have a quality control program. This alternative is not considered to be an effective solution to the existing problems. Many manufacturers of non-standard components either do not have any established quality control program, even though required by the letter of acceptance to have one, or they have a nominal program but do not implement it effectively enough to assure the quality of the product. Without an additional enforcement mechanism such as "in factory" oversight of a production quality control program, it is apparent that the industry will not readily comply with any requirement to have a quality control program. The problem of inadequate non-standard components being used in the construction of Coast Guard approved PFD's could be expected to remain.

The second alternative considered is essentially the same as the first, but also with oversight by Coast Guard marine inspectors over production quality control for non-standard components. This alternative is considered not to be viable due to limited Coast Guard resources. Existing regulations in 46 CFR part 160 require visits to PFD manufacturers by inspectors. Due to limited Coast Guard personnel resources, visits by Coast Guard inspectors were replaced in 1983 by implementation of the independent laboratory production testing and inspection procedures in 46 CFR 159.007. There has been no change in the level of Coast Guard personnel resources which would make a return of the marine inspectors to the PFD or component manufacturers feasible.

The third alternative, which forms the basis for this proposal, is establishment of detailed production quality control requirements for all components as in the first and second alternatives, in conjuction with requirements for quality control oversight of non-standard components by a recognized laboratory (component recognition). This proposal, which is similar to the previous alternative except that quality control oversight of non-standard components in production would be provided by a recognized laboratory at the component manufacturer's expense rather than by the Coast guard, addresses the problems left unresolved by the other considered alternatives. The presence of an independent oversight organization would be intended to encourage a non-standard component manufacturer to tighten up a previously lax quality control program, resulting in a more consistent product. For fabric, this may mean exerting additional control and ovesight over the various facilities involved in the manufacturing process. The potential for unsatisfactory product entering the market would thus be significantly reduced. The reduced Coast Guard review time for submissions for component recognition as compared to the time involved to process letters of acceptance would consequently reduce delays in acceptance of components.

The proposed quality control requirements for standard components and recognized non-standard components principally represent a codification of longstanding practice. Standard components and recognized non-standard components have had a generally good record of quality control. Accordingly, these proposed rules as they address these products should have little or no impact. The purpose of this proposal as it addresses these products is to explain current practice and to provide an opportunity for public comment.

Performance Requirements for Thread

The present requirements for thread used in PFD's are contained in 46 CFR 160.001–2(j), which requires that thread for wearable PFD's, depending upon its composition, meet the requirements of one of three federal specifications. The three acceptable compositions are cotton, nylon, and polyester. Requirements for thread for securing beckets on commercial ring buoys (throwable PFD's) are contained in 46 CFR 160.050–3(e), which specifies a federal specification for nylon thread and allows for other threads of equivalent size and strength.

Cotton thread has been the cause of several reported PFD failures. Although cotton thread is stronger for a particular size than synthetic thread when new, it is susceptible to deterioration from fungal attack (i.e., mildew). Field reports of equipment failures strongly suggest that cotton thread's vulnerability to environmental elements typical of expected PFD use conditions make it unsuitable for use in PFD's. The nature of thread's role in a PFD means that a failure of thread could lead to a total failure of the device in which it is used if any load is applied. For that reason, these proposed rules would eliminate cotton thread as an acceptable PFD component in structural applications.

This prohibition of cotton thread is to a large extent academic, since there are presently no PFD manufacturers using cotton thread in construction. The availability of cotton thread on the market is very limited. Cotton thread is generally not considered to be suitable for use with synthetic fabrics, and so a natural consequence of the industry's conversion to the use of synthetic fabrics is that the use of cotton thread was discontinued.

An analysis of all thread acceptances issued since the inception of the component acceptance program revealed that all accepted threads to date have met the requirements of either a federal specification in 46 CFR 160.001–2(j) (for sizes other than those specified), or one of two other military specifications, MIL–T–43548 for polyester core thread and MIL–T–43624 for spun polyester thread. All of these specifications contain detailed quality control provisions which are considered to be equivalent to the quality control provisions in these proposed rules. In view of the excellent field service history and lack of failures (in either the field or the laboratory) involving these currently non-standard threads, quality control oversight is not considered to be necessary. Accordingly, these rules would redesignate standard components all synthetic threads certified to comply with the specified portions of the referenced federal and military specifications. It is anticipated that there would be few, if any, non-standard threads.

Future Additional Projects

Future proposed rules will address performance requirements for fabric and other PFD components. A separate subpart will be devoted to each component. In this rulemaking, only the general subpart 46 CFR 164.019, which applies to all components, and 46 CFR 164.023, which deals specifically with thread, are included. It is envisioned that future proposed rules relating to other components will follow closely the structure and format of the thread subpart and will include proposals to adopt performance standards similar to those currently applied to non-standard components under the Coast Guard letter of acceptance program. These performance standards may be presented as referenced to appropriate voluntary industry standards, where suitable such standards exist.

Cross Reference to Existing Regulations

Some revisions to existing regulations in title 46 CFR would be necessary to implement these proposed rules. References to the component acceptance procedures and quality control and certification requirements in proposed subpart 164.019 would be added to the "Materials" section(s) of each of existing subparts 160.001, 160.002, 160.005, 160.047, 160.048, 160.049, 160.050, 160.052, 160.053, 160.055, and 160.077. Existing requirements for thread in the "Materials" section(s) of each of existing subparts 160.001, 160.002, 160.005, 160.047, 160.048, 160.049, 160.050, 160.052, 160.055, and 160.077 would be replaced with references to the requirements in proposed subpart 164.023. Proposed subpart 164.023 would be referenced as an exception to the

VOL 54 ISS 217 NO 13 1989 UMI

material requirements of the military specification referenced in 46 CFR 160.053-3(a).

5. Draft Regulatory Evaluation

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under DOT regulatory policies and procedures (44 FR 11034, February 26, 1979). A draft regulatory evaluation has been prepared and placed in the rulemaking docket. It may be inspected and copied at the address listed under **ADDRESSES**. Copies may also be obtained by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

The cost of these proposed rules is estimated to be $11,500.00 annually for the first five years. This figure represents the cost for five existing manufacturers/converters of non-standard component fabrics not currently under a quality control oversight program of a recognized laboratory to enter and maintain their products in such a program over that period. Based upon an average 7 million PFD's produced and sold each year, this cost would be refelected in an increase in the cost of an approved PFD of 0.615 cents over the initial five year period if all added component manufacturer costs were passed on to the PFD manufacturer and then to the consumer. Continuing costs in subsequent years are estimated to be similar.

Thread is the only PFD component other than fabric for which a significant number of non-standard products not under recognized laboratory quality control oversight are in use. However, because these proposed rules would in effect convert all existing non-standard component threads to standard components, the proposed requirement for quality control oversight for non-standard components would not be expected to result in any increased costs for thread manufacturers.

The proposed production quality control requirements would be expected to have little or no impact on manufacturers of standard components and non-standard components currently under recognized laboratory quality control oversight. As stated previously, the proposed regulations essentially represent a codification of longstanding procedures and requirements that are currently applied to these components.

These proposed rules would be expected to result in a savings to the Coast Guard of an estimated one half man-year of professional staff effort currently spent in the administration of the non-standard component letter of acceptance program, a benefit of approximately $30,000.00 annually. The increase in available staff time would also benefit PFD and PFD component manufacturers, since it would expedite the processing of PFD approval and component acceptance submissions, thus reducing the potential for manufacturing and delivery delays due to long waits for Coast Guard review.

The effective conversion of all non-standard component threads currently accepted under Coast Guard letters of acceptance to standard components would result in a savings to the industry of an estimated $500.00 per product every five years. This figure represents the cost of sending detailed product specifications and performance test results to the Coast Guard for renewal of the letter of acceptance every five years. Based on approximately 25 products currently accepted under letters of acceptance, the total savings to the industry would be $12,500.00 over a five year period or an average of $2,500.00 per year.

It is expected that the proposed additional quality control requirements for non-standard components would reduce the incidence of failures of these components currently seen in random performance testing. Although difficult to quantify, the potential for future injuries or fatalities due to failures of components which do not meet the specified minimum performance requirements would therefore be reduced.

An intangible benefit of these proposed rules is that previously unpublished policies and procedures would be made readily available to the public, reducing the likelihood of errors and misinterpretations of existing policy.

6. Environmental Analysis

This proposed rulemaking has been thoroughly reviewed by the Coast Guard and it has been determined to be categorically excluded from further environmental documentation in accordance with sections 2.B.2.c and 2.B.2.1 of Commandant Instruction (COMDTINST) M16475.1B. A Categorical Exclusion Determination statement has been prepared and is included as part of the regulatory package.

7. Federalism Assessment

This NPRM has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this proposed rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

8. Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act (5 U.S.C. 601 through 612), the Coast Guard has considered whether this rulemaking is likely to have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses which are not dominant in their field and which would otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632).

There are an estimated five fabric manufacturers or converters who would be required to obtain component recognition for PFD component fabric under these proposed rules. The added cost per manufacturer would be an estimated $11,435.00 over the initial five-year period, or $2,287.00 per year. Based upon the quantity of fabric produced, this cost would represent less than one-tenth of one percent of gross revenues for PFD component fabric. It is likely that this cost would be partially or entirely passed on to the PFD manufacturer and ultimately the PFD buyer. In view of these considerations, and the fact that PFD component fabric generally represents only a small portion of a fabric manufacturer's business, the impact on these manufacturers is considered to be minor.

Based upon these estimates, the Coast Guard certifies that the proposed regulations would not have a significant economic impact on a substantial number of small entities.

However, if you feel that your business qualifies as a small entity and would suffer significant, negative, economic impact, please explain why your business qualifies as a small entity and to what degree the proposed regulations would economically affect your business. Cost data submitted will be thoroughly evaluated before publication of the final rule.

9. Paperwork Reduction Act

This proposed rulemaking contains information collection and recordkeeping requirements. Some of these requirements have previously been reviewed and approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (Pub. L. 96-511, 44 U.S.C. 3501 *et seq.*). The section numbers of these requirements in 46 CFR and the corresponding OMB approval numbers are as follows:

Section	OMB approval number
§ 164.019-7	2115-0141
§ 164.019-9	2115-0141
§ 164.019-13	2115-0141
§ 164.019-15	2115-0141

Other information collection and recordkeeping requirements are either new or have not been approved by OMB. They have been submitted to the OMB for approval under the provisions of the Paperwork Reduction Act (Pub. L. 96-511, 44 U.S.C. 3501 *et seq.*). Persons desiring to comment on these information collection and recordkeeping requirements should submit their comments to: Office of Regulatory Policy, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503, ATTN: Desk Officer, Coast Guard. Persons submitting comments to OMB are also requested to submit a copy of their comments to the Coast Guard as indicated under **ADDRESSES**. The section numbers in 46 CFR are as follows:

§ 164.019-5
§ 164.023-15

List of Subjects in 46 CFR Part 164

Fire prevention, Marine safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Coast Guard proposes to amend chapter I, part 164 of title 46 of the Code of Federal Regulations as follows:

1. By adding a new subpart 164.019 to read as follows:

Subpart 164.019—Personal Flotation Device Components

Sec.
164.019-1 Scope.
164.019-3 Definitions.
164.019-5 Standard components.
164.019-7 Non-standard components.
164.019-9 Procedure for acceptance of revisions of design, process, or materials.
164.019-11 Certification (Affidavits).
164.019-13 Production-quality control requirements.
164.019-15 Component manufacturer records.
164.019-17 Recognized laboratory.

Subpart 164.019—Personal Flotation Device Components

Authority: 46 U.S.C. 3306, 3703, 4104, 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 164.019-1 Scope.

(a) This subpart contains requirements for standard personal flotation device (PFD) components, procedures for acceptance of non-standard PFD components, and production quality control requirements for all PFD components.

(b) Other regulations in this part contain specific requirements applicable to particular PFD components.

(c) Other regulations in part 160 of this subchapter contain specific requirements and limitations concerning the use of PFD components in the construction of particular PFD's.

(d) PFD's may be constructed only with PFD components meeting the requirements of this subchapter.

(e) PFD components may be used in the construction of PFD's only in accordance with their Use Codes.

§ 164.019-3 Definitions.

(a) *Acceptance* means certification by the Coast Guard that a component is suitable for use in the manufacture of approved PFD's.

(b) *Commandant* means the Chief of the Survival Systems Branch, Office of Marine Safety, Security, and Environmental Protection, U.S. Coast Guard. Address: Commandant (G-MVI-3/14), U.S. Coast Guard Headquarters, 2100 Second St. SW., Washington, DC 20593-0001. Telephone: 202-267-1444.

(c) *Component manufacturer* means either the manufacturer of a component, or a component supplier who has obtained acceptance of a component.

(d) *First quality workmanship* means construction which is free from any defect materially affecting appearance or serviceability.

(e) *Inspector* means a recognized laboratory or Coast Guard inspector.

(f) *Non-standard component* means a PFD component which is equivalent in performance to a standard component.

(g) *PFD Type* means the performance type designation as shown in 33 CFR 175 and this subchapter.

(h) *Standard component* means a PFD component which complies in all respects with the material, construction, and performance requirements of a subpart in this part or part 160 of this subchapter.

(i) *Use Code* means an alphanumeric code assigned to a PFD component to designate the PFD Type(s) in which it may be used. Use codes are as listed in Table 164.019-3 of this section.

TABLE 164.019-3

Use code	PFD type acceptable for use
1	I, II, and III.
2	II and III.
3	III.
4B	IV (all Ring Buoys).
4BC	IV (Buoyant Cushions).
4RB	IV (Recreational Ring Buoys only).
5	Wearable Type V (intended use must be specified).
5SB	V (Sailboard devices).
5WV	V (Work vests).
6	Special, limited, or restricted use.
Suffix A	Adult only.
Suffix C	Child only.

§ 164.019-5 Standard components.

(a) Except as provided in paragraph (b) of this section:

(1) Each shipment of standard components must be accompanied by an affidavit complying with § 164.019-11;

(2) A sample affidavit, or a copy of the affidavit provided with the first shipment of a standard component to a PFD manufacturer, must be provided to the Commandant; and

(3) A new sample affidavit must be provided any time the information on the affidavit materially changes.

(b) Affidavits are not required to be provided for standard components under the quality control oversight program of a recognized laboratory.

(c) Each standard component must have one or more Use Codes.

§ 164.019-7 Non-standard components.

(a) *General.* To be used in the construction of PFD's, a non-standard component must be accepted by the Coast Guard.

(b) *Use Codes.* Each non-standard component must have one or more Use Codes.

(c) *Request for acceptance.* To request acceptance of a non-standard component, a letter must be sent to the Commandant. The letter must be provided by the component manufacturer or the recognized laboratory which performs the acceptance testing required by the applicable subpart in this part or part 160. The letter must include the following information:

(1) A statement of the intended use of the component by the PFD manufacturer, and the Use Codes for which acceptance is requested. Intended uses must be taken from the following list:

(i) Outer Envelope Fabric (exterior fabrics on wearable PFD's);

(ii) Cover Fabric (for throwable PFD's);

(iii) Inner Envelope Fabric;

(iv) Closure and Adjustment Hardware;

(v) Body Strap;

(vi) Grab Strap (applies to buoyant cushions only);

(vii) Tie Tape;

VOL 54 ISS 217 NO 13 1989 UMI

(viii) Reinforcing Tape;
(ix) Zipper;
(x) Thread;
(xi) Flotation Foam; or
(xii) Other (specify).

(2) A statement identifying the component in detail and including the unique style, part, or model number, and any other manufacturer's identifying data, if available. No two components which differ in any way, e.g., size, material composition, construction, etc., may utilize the same identification.

(3) A report of a recognized laboratory's test data for the component in accordance with the "Acceptance Tests" section of the applicable subpart of this part. Each report must include the name of the laboratory and a description of the test equipment and test methods used, and must be signed and dated by an authorized laboratory official.

(4) A sample of each component that is being considered. Where the lightest and darkest colors are being tested, samples of both colors must be submitted.

(5) A list of all materials used in the construction of the particular component. The list must contain specific identification and quantity of all materials used.

(6) The identification data required by the applicable subpart of this part.

(7) For mechanical components, i.e. hardware, scaled drawings showing details (and dimensions) of the mechanism.

(8) A statement of tolerances to be maintained in production.

(9) A description of the quality control procedures that will be in effect during production.

(10) A detailed description of the recognized laboratory's procedures for oversight of the manufacturer's program of production quality control, including marking of complying products with the certification marking(s) of the laboratory.

(11) Any appropriate installation or use guidelines for the component.

(d) *Documentation of acceptance.* After review of the request for acceptance, the Coast Guard provides written notice to the applicant that the component, and the procedures for production quality control and recognized laboratory oversight, are accepted, that additional testing or documentation is required, or that the component is not acceptable.

(e) *Alternate requirements.* A component that does not meet the requirements of this subpart may still be accepted if it:

(1) meets other requirements prescribed by the Commandant in lieu of or in addition to the requirements in this subpart; and

(2) provides at least the same degree of safety as provided by a component that does comply with this subpart.

(f) *Additional Tests.* The Commandant may prescribe additional tests, if necessary, to determine the acceptability or suitability of a particular product.

(g) *Suspension or termination of acceptance.* The procedures in § 2.75 of this chapter for suspension and termination of approvals also apply to acceptances of PFD components.

§ 164.019-9 Procedure for acceptance of revisions of design, process, or materials.

(a) Any change in design, material, manufacturing process, or construction of a non-standard component must be accepted by the Commandant before being used in component production.

(b) Requests for revisions must be submitted in writing, and describe the revised design, material, process, or construction in a similar degree of detail to that originally accepted.

§ 164.019-11 Certification (affidavits).

Where affidavits are required to be supplied, the affidavit must be a notarized certification, provided by the component manufacturer or by an independent laboratory accepted by the Commandant in accordance with part 159, subpart 159.010 of this chapter to make the certification that a standard component complies in all respects with the material requirements of a subpart in this part or part 160 of this subchapter. As a minimum, each affidavit must contain the following information:

(a) Name and address of company;

(b) Name and title of signing company or recognized laboratory official;

(c) Description of the component by use of the unique style, part, or model number, and other applicable distinctive characteristics such as weight, size, denier, treatments or coatings, etc.;

(d) Production data (to include lot, batch number, and quantity shipped) in sufficient detail to enable the manufacturer or purchaser to trace a shipment of components back to the lots of raw materials used in its manufacturer;

(e) The intended use of the component, from the list in § 164.019-7(c)(1);

(f) The PFD Type(s) for which the component is a standard component, as determined by one of the following:

(1) The PFD Type(s) for which the component complies with the standard component material requirements in the applicable PFD subpart in Part 160 of this subchapter; or

(2) The Use Code(s) of the component;

(g) A statement indicating the specific provision(s) in this subchapter with which the component complies; and

(h) A copy of the records of all required production tests for the lots of components covered by the affidavit.

§ 164.019-13 Production quality control requirements.

(a) *General.* Each component manufacturer must have procedures for maintaining quality control of the materials used in production, manufacturing operations, and the finished product.

(b) *Recognized laboratory oversight.* For non-standard components, the manufacturer's procedures for assuring production quality control must be supplemented by a program of oversight by a recognized laboratory, as described in the oversight procedures submitted for component acceptance in accordance with § 164.019-7(c)(10). The laboratory's oversight program is performed at the place of manufacture or other location at the option of the laboratory inspector and the Coast Guard.

(c) *Production tests and inspections.* Production tests and inspections must be conducted in accordance with this section and part 159, subpart 159.007 of this chapter.

(d) *Responsibilities.* Each component manufacturer and each recognized laboratory inspector must comply with the following, as applicable:

(1) *Component manufacturer.* Each component manufacturer must:

(i) Perform all production tests and inspections required by the applicable subpart of this part;

(ii) Adhere to the accepted quality control procedures for the component as submitted for component acceptance in accordance with § 164.019-7(c)(9); and

(iii) Have a continuing program of employee training and a program for maintaining production and test equipment.

(2) *Recognized laboratory.* The same recognized laboratory that performed the acceptance testing must, as part of its oversight program, at least quarterly, or more frequently if required by the applicable subpart of this part or by the oversight procedures submitted in accordance with § 164.019-7(c)(10):

(i) Audit the component manufacturer's records required by § 164.019-15;

(ii) Perform or supervise the component manufacturer performing each of the tests required by this section, the applicable subpart in this part, and the accepted quality control and oversight procedures.

(3) During each inspection, the inspector must check for noncompliance by the manufacturer with the manufacturer's established quality control program.

(e) *Component lots*—(1) *Lot numbers.* A lot number must be assigned to each group of components manufactured. A new lot must be started whenever any change is made in materials, design, or production method, and whenever any substantial discontinuity in the manufacturing process (such as a change in shift) occurs. Changes in lots of incoming materials must be treated as changes in materials. Lots must be numbered serially. The lot number assigned, in combination with the unique product name/identification, must enable the component manufacturer (or supplier), by referring to the records required by this subpart, to determine the source(s) of all raw materials used in that lot.

(2) *Lot size.* The maximum lot size for any particular component must be as defined in the subpart in this part that covers the component.

(f) *Samples*—(1) *General.* Procedures for selection of test samples, and required sample sizes, must be as specified in the appropriate subpart of this part which covers the particular component.

(2) The inspector must select different samples than were tested by the manufacturer.

(g) *Detailed product examination*—(1) *General.* In addition to the tests and inspections required by the applicable subpart in this part, the manufacturer or the inspector must examine each sample component to determine that:

(i) The construction, markings, and workmanship conform to the information submitted in the request for acceptance; and

(ii) The component is not otherwise defective.

(2) *Inspection responsibility.* This inspection must be performed by a manufacturer's representative who is familiar with the performance requirements for the component, and all of the production quality control requirements. This person must not be responsible for meeting production schedules, or be supervised by someone who is.

(h) *Accept/Reject criteria.*—(1) A component lot passes production testing if each sample tested passes each test.

(2) For test failures in which the basis of acceptability is an average result, a second sampling with an identical number of samples must be taken. The results of this second sampling must be averaged with the initial results. If the average result passes the test, then the lot may be accepted.

(3) For test failures in which the basis of acceptability is individual sample results, a second sampling must be taken. The size of the second sampling must be as specified in the subpart in this part which covers the component. If each sample in this sampling passes the test, then the lot may be accepted.

(4) A rejected lot of components may be resubmitted for testing, examination, or inspection if the manufacturer first removes each component having the same type of defect or, if authorized by the Commandant or the recognized laboratory, reworks the lot to correct the defect.

(5) A rejected lot or rejected component may not be sold or offered for sale with the representation that it meets the requirements of this subpart or is accepted by the Coast Guard, and may not be used in the contruction of Coast Guard approved PFD's.

(i) *Facilities and equipment*—(1) *General.* The manufacturer must provide the test equipment and facilities described in the applicable subpart in this part and in the quality control and oversight procedures submitted in accordance with § 164.019-7(c)(9)-(10) for performing production tests, examinations, and inspections.

(2) *Calibration.* The manufacturer must have the calibration of all test equipment checked at least every 6 months by a weights and measures agency or the equipment manufacturer, distributor, or dealer.

(3) *Facilities for inspector's use.* The manufacturer must provide a suitable place and the necessary apparatus for the inspector to use in conducting or supervising tests. For the detailed product examination, the manufacturer must provide a suitable working environment and a smooth-top table for the inspector's use.

(4) *Access to test facilities.* The inspector must be admitted to any place in the factory where work is being done on PFC components or where components are stored, and may take samples of parts or materials entering into production or completed components for further examinations, inspections, or tests.

(j) *Alternate procedures for standard components.* For standard components, in lieu of the quality control procedures specified in this section, the quality control procedures in a federal or military specification with which the component is required to comply by this subchapter, or alternate equivalent procedures, may be used.

(k) *Additional tests.* The Commandant may prescribe additional production tests and inspections if needed to maintain quality control and check for compliance with the requirements in this subpart.

§ 164.019-15 Component manufacturer records.

(a) Each component manufacturer must keep the records required by § 159.007-13 of this chapter.

(b) Each record required by § 159.007-13 of this chapter must also include the following information:

(1) For each test, the serial number of the test instrument used if there is more than one available;

(2) For each test and inspection, the identification of the samples used, the lot number, the unique component identification, and the quantity of the component in the lot; and

(3) For each lot rejected, the cause for rejection, any corrective action taken, and the final disposition of the lot.

(c) The description or photographs of procedures and apparatus used in testing is not required for the records prescribed in § 159.007-13 of this chapter if the manufacturer's procedures and apparatus meet the requirements of the applicable subpart in this part or the follow-up inspection procedure.

(d) Each component manufacturer must also keep the following records:

(1) Records for all materials used in production, including name and address of the supplier, date of purchase and receipt, and lot number;

(2) A copy of this subpart, and other subparts as applicable to the component manufactured;

(3) Each document incorporated by reference in the applicable subpart(s) of this part;

(4) A copy of the accepted specifications and identifying data; and

(5) Records of calibration of all test equipment, including the identity of the agency performing the calibration, date of calibration, and results.

(e) The records required by paragraph (d)(1) of this section must be kept for at least 60 months after preparation.

(f) Records of tests conducted by the manufacturer, and records of materials entering into construction, including affidavits by suppliers that applicable requirements are met, must be made available to the inspector or to the Commandant (G-MVI-3) for review upon request.

§ 164.019-17 Recognized laboratory.

(a) *General.* To be designated a

VOL
54
ISS
2
1
7
NO
13
1989
UMI

recognized laboratory under this subpart, the laboratory must be:

(1) Accepted by the Coast Guard as an independent laboratory under subpart 159.010 of this subchapter;

(2) Engaged regularly in the examination, testing, and evaluation of the safety of materials and devices for marine use; and

(3) Established in factory production inspection and listing and labeling by having an existing program and standards for evaluation, listing, and marking components that are acceptable to the Commandant.

(b) *Designated recognized laboratories.* A current listing of recognized laboratories is available from the Commandant upon request.

2. By adding a new subpart 164.023 to read as follows:

Subpart 164.023—Thread for Personal Flotation Devices

Sec.

164.023–1 Scope.
164.023–3 Specifications and standards incorporated by reference.
164.023–5 Performance—standard thread.
164.023–7 Performance—non-standard thread.
164.023–9 Samples submitted for acceptance.
164.023–11 Acceptance tests.
164.023–13 Production tests and inspections.
164.023–15 Marking.

Subpart 164.023—Thread for Personal Flotation Devices

Authority: 46 U.S.C. 3306, 3703, 4104, 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 164.023–1 Scope.

This subpart contains performance requirements, acceptance tests, and production testing and inspection requirements for thread used in the construction of personal flotation devices (PFD's) approved under part 160 of this subchapter.

§ 164.023–3 Specifications and standards incorporated by reference.

(a) Certain materials are incorporated by reference into this subpart with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a). To enforce any edition other than the one listed in paragraph (b) of this section, notice of change must be published in the **Federal Register** and the material made available to the public. All approved material is on file at the Office of the Federal Register, 1100 L Street, NW., Washington, DC 20408, and at the U.S. Coast Guard, Survival Systems Branch (G–MVI–3), Washington, DC 20593–0001, and is available from the sources indicated in paragraph (b) of this section.

(b) The materials approved for incorporation by reference in this subpart, and the sections affected are:

(1) Federal Standards and Test Method Standards:

(i) Federal Test Method Standard No. 191 (Textiles, Test Methods, A):

(A) Method 4010, Length-Weight Relation; Thread; Yards Per Pound (m/kg), 164.023–11

(B) Method 4100, Strength and Elongation, Breaking; and Tenacity; of Thread and Yarn; Single Strand, 164.023–7, 164.023–11

(C) Method 5804, Weathering Resistance of Cloth; Accelerated Weathering Method, 164.023–7

(ii) Reserved

(2) Federal Specifications:

(i) V–T–285—Thread, Polyester, E, 164.023–5

(ii) V–T–295—Thread, Nylon, E, 164.023–5

(3) Military Specifications:

(i) MIL–T–43548—Thread, Polyester Core: Cotton-, Rayon-, or Polyester-Covered, C, 164.023–5

(ii) MIL–T–43624—Thread, Polyester. Spun, A, 164.023–5

All reference materials are available from the Naval Publications and Forms Center, Customer Service, Code 1052, 5801 Tabor Ave., Philadelphia, PA 19120

§ 164.023–5 Performance—standard thread.

(a) *Use Codes 1, 2, 3, 4BC, 4RB, 5 (any).* Each thread which complies with all of the requirements of a specification listed in Table 164.023–5(a) is assigned Use Codes 1, 2, 3, 4BC, 4RB, and 5 (any).

TABLE 160.023–5 (A)—USE CODES 1, 2, 3, 4BC, 4RB, 5 (ANY)

Federal or military specification	Material	Type	Class	Ticket No. or letter size
V–T–285E	Polyester	I or II	1	E
V–T–295E	Nylon	I or II	A	E
MIL–T–43624A	Polyester			24
MIL–T–43548C	Polyester cover only			30

(b) *Use Code 4B.* Each thread which meets the requirements of Federal specification V–T–295, Type II, Class A, number size 4, is assigned a Use Code of 4B.

§ 164.023–7 Performance—non-standard thread.

(a) *Use Codes 1, 2, 3, 4BC, 4RB, 5 (any).* Each non-standard thread which meets all of the requirements of paragraphs § 164.023–7(a) (1)–(3) below is assigned Use Codes of 1, 2, 3, 4BC, 4RB, and 5 (any).

(1) *Single strand breaking strength.* The thread, as received, must have a single strand breaking strength of not less than 5.7 pounds, when tested in accordance with Test Method 4100 in Federal Test Method Standard No. 191 using a Constant-Rate-of-Traverse (CRT) testing machine.

(2) *Single strand breaking strength (after weathering).* After exposure in a carbon-arc weatherometer in accordance with Test Method 5804 in Federal Test Method Standard No. 191 for a period of 100 hours, the thread must retain at least 60 percent of its single strand breaking strength as received, and have a breaking strength of at least 4.7 pounds.

(3) *Loop breaking strength.* The thread must have a loop breaking strength of not less than 10.0 pounds, when tested in accordance with Test Method 4100 in Federal Test Method Standard No. 191 using a CRT testing machine, except that:

(i) Each sample must consist of two 14-inch pieces of thread;

(ii) Both ends of one piece of thread must be secured without twisting in one clamp of the testing machine so that the length of the loop formed equals one half the distance between the clamps. One end of the second piece must then be passed without twisting through the loop formed by the first, and both ends must be secured in the other clamp of the machine. The breaking strength must then be determined as for the single strand test.

(b) *Use Code 4B.* Each non-standard thread which meets all of the requirements of paragraphs 164.023–7(b)(1)–(2) below is assigned a Use Code of 4B.

(1) *Single strand breaking strength.* The thread as received must have a single strand breaking strength of not less than 30.0 pounds, when tested in accordance with Test Method 4100 in Federal Test Method Standard No. 191 using a CRT testing machine.

(2) *Single strand breaking strength (after weathering).* After exposure in a carbon-arc weatherometer in accordance with Test Method 5804 in Federal Test Method Standard No. 191 for a period of 100 hours, the thread must retain at least 60 percent of its single strand breaking strength.

(c) *Structural applications prohibited.* Cotton thread, and monofilament thread of any composition, may not be used in structural applications.

§ 164.023–9 Samples submitted for acceptance.

A product sample submitted for acceptance as required by § 164.019–7(c)(4) must consist of at least one unit of put-up of thread.

§ 164.023–11 Acceptance tests.

(a) *Performance testing.* Conduct the following performance tests on the samples specified:

(1) *Single strand breaking strength (as received and after accelerated weathering).* The tests described in § 164.023–7 (a)(1) and (a)(2) must each be performed on a minimum of five samples in each condition in each of the lightest and darkest colors submitted for acceptance.

(2) *Loop breaking strength.* The test described in § 164.023–7(a)(3) must be performed on a minimum of five samples in each of the lightest and darkest colors submitted for acceptance.

(b) *Identification testing.* Conduct the following identification tests on samples as specified in the referenced test methods:

(1) *Length/weight ratio.* The average length/weight ratio of the thread in yards per pound must be determined in accordance with Test Method 4010 in Federal Test Method Standard 191.

(2) *Composition.* The generic chemical composition of the thread must be determined by qualitative infrared analysis, thermogravimetric analysis, differential scanning calorimeter, or other equivalent means adequate to conclusively identify the composition of the product tested.

(3) *Elongation.* Elongation at break for the same samples tested in accordance with § 164.023–11(a)(1) must be determined in accordance with Test Method 4100 in Federal Test Method Standard 191.

§ 164.023–13 Production tests and inspections.

(a) *Manufacturer's test equipment and facilities.* The manufacturer must provide the following test equipment and facilities for use in production tests and inspections:

(1) A Constant Rate of Traverse tensile testing machine, capable of initial clamp separation of ten inches and a rate of separation of 12 inches per minute.

(2) Fletcher, Callaway, or U.S. Rubber clamps, or equivalent cam-actuated clamps to prevent slippage and twist of the samples.

(3) An analytical balance or grain-yarn scale, accurate to within 0.25 percent of the measured value.

(b) *Lot size.* Lot size must not exceed 500,000 yards or 100 pounds of any color.

(c) *Sample selection.* Samples must be selected at random by the manufacturer (or inspector, as applicable) after the entire lot of thread has been completed.

(d) *Second sampling.* A second sampling, where required, must consisted of five times the original sample size.

(e) *Manufacturer's production tests.* The following tests must be performed on the samples indicated on each lot of thread:

(1) *Breaking strength.* One sample must be tested in accordance with § 164.023–7(a)(1) or § 164.023–7(b)(1), as applicable.

(2) *Length-weight ratio.* One sample must be tested in accordance with § 164.023–11(b)(1).

(f) *Recognized laboratory production tests.* For non-standard components, the following tests and inspections must be performed by a recognized laboratory:

(1) *Composition.* At least annually, one sample of each accepted thread must be tested in accordance with § 164.023–11(b)(2).

(2) *Breaking strength.* At least quarterly, one sample in each of the lightest and darkest colors accepted must be tested in accordance with § 164.023–7(a)(1) or § 164.023–7(b)(1), as applicable. This test may be either performed by a recognized laboratory, or witnessed by a recognized laboratory inspector at the manufacturer's plant, at the laboratory's discretion.

(3) *Elongation.* At least annually, one sample of each accepted thread in each of the lightest and darkest colors accepted must be tested in accordance with § 164.023–11(b)(3). This test may be either performed by a recognized laboratory, or witnessed by a recognized laboratory inspector at the manufacturer's plant, at the laboratory's discretion.

(g) *Accept/reject criteria.* A lot may be accepted provided that the results of required production testing meet the following criteria:

(1) Breaking strength test results must be within 10 percent below and 20 percent above the acceptance testing values.

(2) Length/weight values must be within 5 percent of the acceptance testing values.

(3) Elongation values must be within 20 percent of the acceptance testing values.

(4) Composition testing must indicate that the sample tested is of identical composition to the sample tested for acceptance.

§ 164.023–15 Marking.

(a) *General.* Each shipping label, and each spool or individual unit of put-up, must be permanently and clearly marked in a color which contrasts with the color of the surface on which the marking is applied. Each label shall be marked with:

(1) The manufacturer's or supplier's name, trade name, or symbol.

(2) The unique style, part, or model number of the thread.

(3) The size of the thread.

(4) The composition of the thread.

(5) The lot number of the thread.

(b) *Non-standard thread.* In addition to the markings specified in paragraph (a) of this section, each unit of put-up of non-standard thread must be marked with the appropriate recognized laboratory's certification marking(s).

Dated: October 16, 1989.

M.J. Schiro,

Captain, U.S. Coast Guard Acting Chief, Office of Marine Safety, Security and Environmental Protection.

Practice and Procedure; Miscellaneous Amendments; Revisions

AGENCY: Interstate Commerce Commission.

ACTION: Proposed rule; Extension of time to file comments.

SUMMARY: Notice of the Commission's proposal to revise the above-numbered parts of Title 49, Code of Federal Regulations, was published in the *ICC Register* and **Federal Register** on

VOL 54 ISS 217 NO 13 1989 UMI

October 11, 1989. (54 FR 41643). The due date for comments was set as November 13, 1989. National Motor Freight Traffic Association, Inc., Central States Motor Freight Bureau, Inc., Eastern Central Motor Carriers Association, Inc., Middle Atlantic Conference, Middlewest Motor Freight Bureau, New England Motor Rate Bureau, Inc., Niagara Frontier Tariff Bureau, Inc., Pacific Inland Tariff Bureau, Inc., Rocky Mountain Motor Tariff Bureau, Inc., and Southern Motor Carriers Rate Conference have requested jointly that the time for filing comments be extended. The Commission has granted a 30-day extension until December 13, 1989.

DATES: Comments may be filed on or before December 13, 1989.

ADDRESSES: Send an original and 10 copies of comments, referring to Ex Parte No. 55 (Sub-No. 73), to: Office of the Secretary Case Control Branch Interstate Commerce Commission Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Paul W. Schach (202) 275-7885 or Richard B. Felder (202) 275-7691.

Decided: November 6, 1989.

By the Commission, Heather J. Gradison, Chairman.

Noreta R. McGee,

Secretary.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. 89-029N]

SLD Policy Memoranda; Semi-Annual Listing

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document lists and makes available to the public a memorandum issued by the Standards and Labeling Division (SLD), Regulatory Programs, Food Safety and Inspection Service (FSIS), which contain significant new applications or interpretations of the Federal Meat Inspection Act, the Poultry Products Inspection Act, the regulations promulgated thereunder, or departmental policy concerning labeling.

FOR FURTHER INFORMATION CONTACT: Ashland L. Clemons, Director, Standards and Labeling Division, Regulatory Programs, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington DC 20250, (202) 447-6042.

SUPPLEMENTARY INFORMATION: FSIS conducts a prior approval program for labels or other labeling (specified in 9 CFR 317.4, 317.5, 381.132 and 381.134) to be used on federally inspected meat and poultry products. Pursuant to the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*), and the regulations promulgated thereunder, meat and poultry products which do not bear approved labels may not be distributed in commerce.

FSIS's prior label approval program is conducted by label review experts within SLD. A variety of factors, such as continuing technological innovations in food processing and expanded public concern regarding the presence of various substances in foods, has generated a series of increasingly complex issues which SLD must resolve as part of the prior label approval process. In interpreting the Acts or regulations to resolve these issues, SLD may modify its policies on labeling or develop new ones.

Significant or novel interpretations or determinations made by SLD are issued in writing in memorandum form. This document lists one SLD policy memorandum issued from April 1, 1989, through October 1, 1989.

Persons interested in obtaining a copy of the following SLD policy memorandum, or in being included on a list for automatic distribution of future SLD policy memoranda, may write to: Printing and Distribution Section, Paperwork Management Branch, Administrative Services Division, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington DC 20250.

Memo No.	Title and date	Issue	Reference
119	Labeling of Safe Thawing Instructions on Consumer Packages, September 28, 1989.	What guidelines should be followed when thawing instructions for frozen meat and poultry products appear on a label?.	NA

The SLD policies specified in this memorandum will be uniformly applied to all relevant labeling applications unless modified by future memoranda or more formal Agency action. Applicants retain all rights of appeal regarding decisions based upon this memorandum.

Done at Washington DC, on: November 7, 1989.

Ashland L. Clemons,

Director, Standards and Labeling Division, Regulatory Programs, Food Safety and Inspection Service.

DEPARTMENT OF COMMERCE

Agency Form Under review by the Office of Management and Budget (OMB)

The Commerce Department has submitted a request for review request to OMB for clearance of the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: U.S. Commerce Department
Title: Solicitations: Request for Proposal (RFP) or Invitation for Bids (IFB)
Form number: OMB 0605-0010
Type of request: Extension of a currently approved collection of information.
Burden: 14,000 respondents; 591,000 reporting hours.
Average hours per response: 42¼ hours
Needs and uses: Solicitations are used to request offers from firms wishing to compete for a DOC contract. Federal law requires that solicitations be distributed to the widest number of potential sources. The forms and format of the solicitations are required by the Federal Acquisition Regulation, the government-wide acquisition regulation required to be followed by all Federal agencies. The costs and burdens imposed by the DOC solicitations are not additional to those imposed by the FAR and Federal acquisition laws.
Affected public: Businesses or other for profit, non-profit institutions, and small businesses or organizations.
Frequency: On occasion.
Respondent's obligation: Required to obtain a benefit.
OMB Desk Officer: Donald Arbuckle, 395-7340.

The interview questions are printed below. A copy of the complete clearance package can be obtained by calling or writing the DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, 14th and Constitution Avenue, Washington, DC 20230.

Written comments and recommendations for the information collection should be sent to Donald

Bureau of Export Administration

Computer Systems Technical Advisory Committee; Closed Meeting

A meeting of the Computer System Technical Advisory Committee will be held November 28 & 29, 1989, 9:00 a.m., in the Herbert C. Hoover Building, Room 1617F, 14th & Constitution Avenue, NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions which affect the level of export controls applicable to computer systems or technology.

The Committee will meet only in Executive Session to discuss matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1988, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings or portions of meetings of the Committee and of any Subcommittees thereof, dealing with the classified material listed in 5 U.S.C. 552(c)(1) shall be exempt from the provisions relating to public meetings found in section 10 (a)(1) and (a)(3) of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Washington, DC 20230. For further information, contact Lee Ann Carpenter at (202) 377-2583.

Dated: November 3, 1989.

Foreign-Trade Zones Board

[Order No. 448]

Resolution and Order Approving the Application of the Quad-City Foreign-Trade Zone, Inc., for Special-Purpose Subzone Status at Maytag Plants in Galesburg and Herrin, IL, and Newton, IA; Proceedings of the Foreign-Trade Zones Board, Washington, DC

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Quad-City Foreign-Trade Zone, Inc., grantee of Foreign-Trade Zone 133, filed with the Foreign-Trade Zones Board (the Board) on April 25, 1988, requesting special-purpose subzone status at the large home appliance manufacturing plants of Maytag Corporation in Galesburg and Herrin, Illinois, and Newton, Iowa, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations would be satisfied and that the proposal would be in the public interest if approval were subject to certain restrictions, approves the application, subject to the following restrictions:

1. Privileged foreign status shall be elected on foreign steel mill products prior to manipulation or manufacturing in the subzones, if the same items are being produced by a domestic plant.

2. Privileged foreign status shall be elected on foreign refrigeration compressors prior to manipulation or manufacturing in the subzones.

3. Privileged foreign status shall be elected on any foreign merchandise that is subject to antidumping or countervailing duty orders at the time of admission to the subzones.

The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority

Whereas, by an act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Board's Regulations (15 CFR 400.304) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, the Quad-City Foreign-Trade Zone, Inc., grantee of Foreign-Trade Zone 133, has made application (filed April 25, 1988, FTZ Docket 22–88, 53 FR 16303), in due and proper form to the Board for authority to establish special-purpose subzones at the large appliance manufacturing plants of Maytag Corporation, located in Galesburg and Herrin, Illinois, and Newton, Iowa, adjacent to the Quad-Cities, St. Louis, and Des Moines Customs ports of entry;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations would be satisfied and that the proposal would be in the public interest if approval were given subject to the restrictions in the resolution accompanying this action;

Now, therefore, in accordance with the application filed April 25, 1988, the Board hereby authorizes the establishment of subzones at the Maytag plants in Galesburg and Herrin, Illinois, and Newton, Iowa, designated on the records of the Board as Foreign-Trade Subzone Nos. 133A, 133B, and 133C respectively, at the locations mentioned above and more particularly described on the maps and drawings accompanying the application, said grant of authority being subject to the provisions and restrictions of the Act and regulations issued thereunder, to the restrictions in the resolution accompanying this action, and also to the following express conditions and limitations:

Activation of the subzones shall be commenced within a reasonable time from the date of issuance of the grant, and prior thereto the Grantee shall obtain all necessary permits from federal, state, and municipal authorities.

Officers and employees of the United States shall have free and unrestricted access to and throughout the foreign-trade subzones in the performance of their official duties.

The grant shall not be construed to relieve the Grantee from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said subzones, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and the Army District Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In witness whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer at Washington, DC, this 1st day of November, 1989, pursuant to Order of the Board.

Foreign-Trade Zones Board.

Eric I. Garfinkel,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 89-26512 Filed 11-9-89; 8:45 am]

BILLING CODE 3510-DS-M

[Order No. 446]

Approval for Expansion of Foreign-Trade Zone 86, Tacoma, WA

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), and the Foreign-Trade Zones Board Regulations (15 CFR part 400), the Foreign-Trade Zones Board (the Board) adopts the following Resolution and Order:

Whereas, the Puget Sound Foreign-Trade Zone Association, Grantee of Foreign-Trade Zone No. 86, has applied to the Board for authority to expand its general-purpose zone at the Port of Tacoma, Washington, within the Tacoma Customs port of entry, and for authority for manufacturing within the zone on behalf of the tubular goods assembly operation of Kawasaki Thermal System, Inc. (KTS);

Whereas, the application was accepted for filing on January 25, 1988, and notice inviting public comment was given in the Federal Register on February 10, 1988 (Docket 6–88, 53 FR 3907);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to improve and expand zone services in the Tacoma area; and,

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations would be satisfied, and that the application would be in the public interest, provided approval is subject to a restriction requiring KTS to elect privileged foreign status on any foreign steel mill products admitted to its zone manufacturing operation;

Now, therefore, the Board hereby orders:

That, subject to the foregoing restrictions on the KTS activity, the Grantee is authorized to expand its zone in accordance with the application filed January 25, 1988. The Grantee shall notify the Board for approval prior to the commencement of any additional manufacturing or assembly operations. The authority given in this Order is subject to settlement locally by the district Director of Customs and the District Army Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, DC, this 3rd day of November 1989.

Eric I. Garfinkel,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zone.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

[A-331-602]

Certain Fresh Cut Flowers From Ecuador; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to requests by the petitioner and one respondent, the Department of Commerce has conducted an administrative review of the antidumping duty order on certain fresh cut flowers from Ecuador. The review covers four producers and/or exporters of this merchandise and the period November 3, 1988 through February 29, 1988. The review indicates the existence of dumping margins for certain firms during the period.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: November 13, 1989.

FOR FURTHER INFORMATION CONTACT: Joseph A. Fargo or Laurie A. Lucksinger, Office of Antidumping Duty Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-5255/5253.

SUPPLEMENTARY INFORMATION:

Background

On March 18, 1987, the Department of Commerce ("the Department") published in the Federal Register (52 FR 8494) the antidumping duty order on certain fresh cut flowers from Ecuador. The Floral Trade Council, the petitioner, and Florisol Cia Ltda., a respondent, requested in accordance with 19 CFR 353.53a(a) (1988) that we conduct an administrative review. We published a notice of initiation on April 27, 1988 (53 FR 15083). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by the review are shipments of certain fresh cut flowers from Ecuador (standard carnations, standard chrysanthemums, and pompom chrysanthemums). During the review period such merchandise was classifiable under item 192.17 of the Tariff Schedules of the United States Annotated ("TSUSA"). This merchandise is currently classifiable under HTS item 0603.10.30. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive. The review covers four producers and/or exporters of certain fresh cut flowers from Ecuador to the United States and the period November 3, 1988 through February 29, 1988.

United States Price

In calculating United States price for the one responsive firm, Florisol Cia, the Department used exporter's sales price as defined in section 772(c) of the Tariff

1988, we published a notice of amendment to the final determination of sales at less than fair value and antidumping duty order (54 FR 29365). In these preliminary results we have used

Furthermore, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required on shipments of certain fresh cut flowers

failed to respond to our questionnaire. As a result, we have determined to use the best information available for cash deposit and appraisement purposes.

Enamelware Enterprise Ltd., and its related third-country reseller in Hong Kong, Lucky Enamelware Factory Ltd., who exported the POS cooking ware to

exporters not covered in this review, a cash deposit shall be required at the rates published in the final results of the last administrative review for each of

VOL 54 ISS 217 NO 13 1989 UMI

United States Price

In calculating United States price for the one responsive firm, Florisol Cia, the Department used exporter's sales price as defined in section 772(c) of the Tariff Act because all sales were made to unrelated parties after importation of the merchandise into the United States. Exporter's sales price was based on the delivered, packed price to unrelated purchasers in the United States. We made deductions for foreign and U.S. inland freight, brokerage and handling charges, credit, and commissions. No other adjustments were claimed or allowed.

We believe that monthly averaging of United States prices provides an adequate measure of fair value. Accordingly, we have continued to calculate a monthly United States price, as was done in the fair value investigation leading to the antidumping duty order.

Foreign Market Value

In calculating foreign market value ("FMV") for the one responsive firm, Florisol Cia, the Department used home market price as defined in section 773 of the Tariff Act, since there were sufficient sales of such or similar merchandise in the home market. Home market price was based on f.o.b. warehouse prices to unrelated purchasers in the home market. We made adjustments to FMV for credit, commission, and the difference in packing expenses of home market and U.S. sales. Florisol Cia claimed an inland freight expense for shipment of the merchandise from the farm to the warehouse. Since the expense from the farm to the airport was deducted from the U.S. selling price, it was necessary to also deduct the freight expense from the farm to the warehouse from the home market selling prices to achieve a proper comparison. No other adjustments were claimed or allowed.

Preliminary Results of the Review

Three firms failed to respond to the Department's antidumping questionnaire: Eden Flowers, Inverflora, and Terraflor. For these firms we relied on the best information otherwise available for purposes of assessment and cash deposit of estimated antidumping duties. As best information otherwise available we used the highest margin in the antidumping duty order. This margin was subsequently increased pursuant to the judgement on March 22, 1989 by the Court of International Trade, sustaining the final determination of sales at less than fair value on remand (court No. 87-04-00627). On July 13, 1988, we published a notice of amendment to the final determination of sales at less than fair value and antidumping duty order (54 FR 29586). In these preliminary results we have used the amended rate as best information otherwise available.

As a result of our review, we preliminarily determine that the following margins exist for the period November 3, 1986 through February 29, 1988:

Manufacturer/Exporter:	Margin (percent)
Eden Flowers	23.5
Florisol Cia Ltda	0
Inverflora	23.5
Terraflor	23.5

Although we initiated a review of Flores Equinoctiales, we have determined that this firm was excluded from the final determination of sales at less than fair value (52 FR 2118, January 20, 1987). Therefore, the Customs Service has not suspended liquidation of entries of this producer's merchandise and we have not conducted an administrative review of its shipments. Six firms withdrew their requests for administrative review. Therefore, we have terminated our review of Flores del Ecuador, Flores del Quinche, Florescarde, Flores de Ibarra, Flores de Puembo, and Flores de Pichincha. We have instructed the Customs Service to liquidate entries of merchandise during the period November 3, 1986 through February 29, 1988 produced by these firms at the cash deposit rates in effect at the time of entry.

Interested parties may request disclosure within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication or the first workday thereafter. Case briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues in those comments, may be filed not later than 37 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Furthermore, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required on shipments of certain fresh cut flowers from Ecuador by the companies under review. For any shipments from the remaining known manufacturers/exporters not covered by this review the cash deposit will continue to be at the rate applicable to each firm (52 FR 8404, March 18, 1987). For any future entries of this merchandise from a new producer and/or exporter, not covered in this review or in the original investigation, whose first shipments occurred after February 29, 1988, and who is unrelated to the reviewed firms or any firm which was subject to the original investigation, no cash deposit shall be required. These deposit requirements are effective for all shipments of certain fresh cut flowers from Ecuador entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.22 of our antidumping regulations published in the Federal Register on March 28, 1989 (54 FR 12742) (to be codified at 19 CFR 353.22).

Dated: November 2, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-570-506]

Porcelain-on-Steel Cooking Ware From the People's Republic of China; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import administration, Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to a request from an importer, the Department of Commerce has conducted an administrative review of the antidumping duty order on porcelain-on-steel cooking ware from the People's Republic of China. The review covers one manufacturer and its related third-country reseller in Hong Kong of this merchandise to the United States and the period December 1, 1987 through November 30, 1988. Clover Enamelware Enterprise Ltd., China, and Lucky Enamelware Factory Ltd., Hong Kong, failed to respond to our questionnaire. As a result, we have determined to use the best information available for cash deposit and appraisement purposes.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: November 13, 1989.

FOR FURTHER INFORMATION CONTACT: Sheila E. Forbes or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On December 2, 1988, the Department of Commerce ("the Department") published in the Federal Register (51 FR 43414) an antidumping duty order on porcelain-on-steel cooking ware ("POS cooking ware") from the People's Republic of China ("PRC"). An importer, Jacamar Gift Co., Inc., requested in accordance with § 353.53a(a)(1988) that we conduct an administrative review. We published a notice of initiation of antidumping duty administrative review on April 6, 1989 (54 FR 13913). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by the review are shipments of POS cooking ware including tea kettles, which do not have self-contained electric heating elements. All of the foregoing are constructed of steel and are enameled or glazed with vitreous glasses. During the review period, such merchandise was classifiable under item 654.0815, 654.0824, and 654.0827 of the Tariff Schedules of the United States Annotated. The merchandise is currently classifiable under HTS item 7323.94.00. HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the shipments of one manufacturer in the PRC, Clover Enamelware Enterprise Ltd., and its related third-country reseller in Hong Kong, Lucky Enamelware Factory Ltd., who exported the POS cooking ware to the United States, and the period December 1, 1987 through November 30, 1988.

Clover Enamelware and Lucky Enamelware failed to respond to our questionnaire. As a result, the Department used the best information available for appraisement and estimated cash deposit purposes. The best information available is the rate published in the antidumping duty order.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the following margins exists for the period December 1, 1987 through November 30, 1988:

Manufacturer/Third-Country Reseller:	Margin (percent)
Clover Enamelware Enterprise Ltd./Lucky Enamelware Factory Ltd. (Hong Kong)	68.65

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication, or the first workday thereafter. Prehearing briefs and/or written comments may be submitted not later than 30 days after the date of publication. Rebuttal briefs or rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 37 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of any such comments or hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions directly to the Customs Service.

Further, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required. For any future entries of this merchandise from a new exporter, not covered in this administrative review, whose first shipments occurred after November 30, 1988, and who is unrealted to any reviewed firm, a cash deposit of 68.65 percent shall be required. For any shipments from the remaining known manufacturers/exporters not covered in this review, a cash deposit shall be required at the rates published in the final results of the last administrative review for each of those firms.

These deposit requirements are effective for all shipments of porcelain-on-steel cooking ware from the People's Republic of China entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)), and § 353.22a of the Commerce Department's regulations published in the Federal Register on March 28, 1989 (54 FR 12742) (to be codified at 19 CFR 353.22a).

Dated: November 2, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

Portable Electric Typewriters From Japan; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to a request by both petitioner, Smith Corona Corporation, and the respondent, Tokyo Juki Industrial Co., Ltd., the Department of Commerce has conducted an administrative review of the antidumping duty order on portable electric typewriters from Japan. The review covers one manufacturer/exporter of this merchandise to the United States and the period May 1, 1982 through February 28, 1983. We preliminarily found a dumping margin of .0004 percent.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: November 13, 1989.

FOR FURTHER INFORMATION CONTACT: Kathleen Kelleher or Maureen Flannery, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2923.

SUPPLEMENTARY INFORMATION:

Background

On October 19, 1988, the Department published in the Federal Register (53 FR 40811) an antidumping duty order on portable electric typewriters from Japan. The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

Imports covered by this review are portable electric typewriters incorporating a calculating mechanism and those incorporating text memory are within the scope of the antidumping duty order. During the review period, such merchandise was classifiable under item 676.3200 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item 8469.11.00. HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers one manufacturer/exporter of this merchandise to the United States, Tokyo Juki Industrial Co., Ltd., and the period May 1, 1982 through February 28, 1983.

Preliminary Results of the Review

As a result of our review, we preliminarily found a dumping margin of .0004 percent.

We received information from Tokyo Juki. We found no sales for Tokyo Juki below its cost of production during the review period.

Therefore, pursuant to section 353.55 of the Commerce Regulations, we will instruct the Customs Service to assess antidumping duties on all appropriate entries of this merchandise during the period May 1, 1982 through February 28, 1983 at the cash deposit rate in effect at the time of entry.

Interested parties may request disclosure within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication or the first workday thereafter. Case briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues in those comments, may be filed not later than 37 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Furthermore, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required on shipments of portable electric typewriters from Japan by the companies under review. For any shipments from the remaining known manufacturers/exporters not covered by this review the cash deposit will continue to be at the rate applicable to each firm (49 FR 19370, May 7, 1984). For any future entries of this merchandise from a new producer and/or exporter, not covered in this review or in the original investigation, whose first shipments occurred after February 28, 1983, and who is unrelated to the reviewed firms or any firm which was subject to the original investigation, no cash deposit shall be required. These deposit requirements are effective for all shipments of portable electric typewriters from Japan entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.22a of the Commerce Department's regulations published in the Federal Register on March 28, 1989 (54 FR 12742) (to be codified at 19 CFR 353.22a).

Dated: November 2, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

Certain Cut-to-Length Carbon Steel Plate From the Federal Republic of Germany; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to requests by the petitioners and a respondent, the Department of Commerce has conducted an administrative review of the antidumping duty order on certain cut-to-length carbon steel plate from the Federal Republic of Germany. The review covers one manufacturer/exporter of this merchandise to the United States and the period May 1, 1987 through April 30, 1988. We preliminarily determine that sales have been made below the foreign market value. If these preliminary results are adopted in our final results of administrative review, we will instruct Customs to assess antidumping duties equal to the difference between the United States price and the foreign market value.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: November 13, 1989.

FOR FURTHER INFORMATION CONTACT: Maureen Flannery or Kathleen Kelleher, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2923.

SUPPLEMENTARY INFORMATION:

Background

On December 2, 1988, the Department of Commerce ("the Department") published in the Federal Register (53 FR 48466) an antidumping duty order on certain cut-to-length carbon steel plate from the Federal Republic of Germany ("FRG"). The petitioners and a respondent, Thyssen Stahl AG, requested in accordance with § 353.53a(a)(1988) that we conduct an administrative review. We published a notice of initiation of antidumping duty administrative review on April 6, 1989 (54 FR 13913). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by the review are shipments of certain cut-to-length carbon steel plate. During the review period, such merchandise was classifiable under item 607.1900 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item 7208.31.00. HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the shipments of one manufacturer/exporter in the FRG, Thyssen Stahl AG, and the period May 1, 1987 through April 30, 1988.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that a margin exists for the period May 1, 1987 through April 30, 1988:

Manufacturer/Exporter	Margin (percent)
Thyssen Stahl AG	3.00

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication, or the first workday thereafter. Prehearing briefs and/or written comments may be submitted not later than 30 days after the date of publication. Rebuttal briefs or rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 37 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of any such comments or hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions directly to the Customs Service.

Further, as provided by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required. For any future entries of this merchandise from a new exporter, not covered in this administrative review, whose first shipments occurred after April 30, 1988, and who is unrelated to any reviewed firm, a cash deposit of 3.00 percent shall be required. For any shipments from the remaining known manufacturers/exporters not covered in this review, a cash deposit shall be required at the rates published in the final results of the last administrative review for each of those firms.

These deposit requirements are effective for all shipments of certain cut-to-length carbon steel plate from the FRG entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)), and § 353.22a of the Commerce Department's regulations published in the Federal Register on March 28, 1989 (54 FR 12742) (to be codified at 19 CFR 353.22a).

Dated: November 2, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

VOL 54 ISS 217 NO 13 1989 UMI

SUPPLEMENTARY INFORMATION:

Background

On October 19, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 40926) the final results of its last administrative review of the antidumping duty order on portable electric typewriters from Japan (45 FR 30618, May 9, 1980). The petitioner, Smith Corona Corporation ("SCM"), and the respondent, Tokyo Juki Industrial Co., Ltd. ("Tokyo Juki"), requested that we conduct the administrative review in accordance with § 353.53a(a) of the Commerce Regulations (1988). We published a notice of initiation of the antidumping duty administrative review on October 3, 1988. The Department has now conducted the administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by the review are shipments of non-automatic portable electric typewriters from Japan that do not incorporate a calculating mechanism, in accordance with the scope determination made in the final results of the administrative review of the antidumping duty order for the May 1, 1981 through April 30, 1982 period (52 FR 1504, January 14, 1987). During the review period, such merchandise was classifiable under items 676.0510 and 676.0540 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item numbers 8469.21, 8469.29, 8469.31, and 8469.39. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

On March 18 and November 23, 1988, the Department submitted to the Court of International Trade final results of a revised determination with respect to the scope of the antidumping duty oder pursuant to the remand orders from the Court in *Smith Corona Corporation* v. *United States* (Slip Op. 87–145, December 31, 1987 and Slip Op. 88–127, September 20, 1988). In the revised determination we determined that portable electric typewriters incorporating a calculating mechanism and those incorporating text memory are within the scope of the antidumping duty order. If this decision is finally affirmed by the courts we will publish our redetermination in the **Federal Register**, suspend liquidation on future entries, and separately review any unliquidated entries of portable electric typewriters incorporating a calculating mechanism and/or text memory for Tokyo Juki for the period May 1, 1982 through February 28, 1983.

The review covers one manufacturer/exporter of Japanese portable electric typewriters and the period May 1, 1982 through February 28, 1983.

United States Price

In calculating United States price, the Department used purchase price, as defined in section 772 of the Tariff Act. Purchase price was based on the FOB packed price to an unrelated trading company for export to the United States. Where applicable, deductions were made for foreign inland freight, handling charges, and customs clearance fees. An addition was made for duties on imported raw materials not collected when the materials were used to produce subsequently exported merchandise, in accordance with § 353.41(d)(ii) of the Department's regulations published in the **Federal Register** on March 28, 1989 (54 FR 12742) (to be codified at 19 CFR 353.41(d)(ii)). No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value, the Department used home market prices, as defined in section 773 of the Tariff Act, since sufficient quantities of such or similar merchandise were sold in the home market to provide a basis of comparison.

Hme market prices were based on packed FOB or delivered prices to unrelated purchasers in Japan, with appropriate deductions for freight and handling charges. We made a deduction for Japanese customs brokerage charges incurred on imported parts upon withdrawal from bonded warehouse. We also made adjustments, where applicable, for differences in packing and credit expenses. We made further adjustments for differences in merchandise, in accordance with § 353.57 of the Department's regulations. No other adjustments were claimed or allowed.

Because of an allegation by the petitioner regarding sales in the home market at prices below the cost of production we requested cost information from Tokyo Juki. We found no sales for Tokyo Juki below its cost of production during the review period.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the following margin exists:

Manufacturer/Exporter	Period	Margin (percent)
Tokyo Juki Industrial Co., Ltd.	05/01/82–02/28/83	0.0004

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication, or the first workday thereafter. Prehearing briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 37 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of any written or oral comments.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may differ from the percentage stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, as provided for by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties of 2.40 percent shall be required for shipments by Tokyo Juki. This rate is based on the final results of the last administrative review (53 FR 40926, October 19, 1988), which covered May 1, 1985 through April 30, 1986 sales by Tokyo Juki. For any shipments of this merchandise manufactured or exported by the remaining known manufacturers and/or exporters not covered in this review, the cash deposit will continue to be at the rate published in the final results of the last administrative review for each of those firms.

For any future entries of this merchandise from a new exporter, not covered in this or prior administrative reviews, whose first shipments occurred after April 30, 1986, and who is unrelated to Tokyo Juki or any previously reviewed firm, the cash deposit of 8.85 percent established as the rate for new exporters in the final results of the last review shall remain in effect.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.22 of the Department's regulations.

Dated: November 2, 1989.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

Leather Wearing Apparel From Uruguay; Final Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of final results of countervailing duty administrative review.

SUMMARY: On August 16, 1989, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty order on leather wearing apparel from Uruguay. We have now completed that review and determine the net subsidy to be *de minimis* for nine firms and 2.10 percent *ad valorem* for all other firms during the period January 1, 1986 through December 31, 1986. For the period January 1, 1987 through December 31, 1987, we determine the net subsidy to be *de minimis* for 12 firms and 3.21 percent *ad valorem* for all other firms.

EFFECTIVE DATE: November 13, 1989.

FOR FURTHER INFORMATION CONTACT: Patricia W. Stroup or Paul J. McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On August 16, 1989, the Department of Commerce ("the Department") published in the **Federal Register** (54 FR 33751) the preliminary results of the administrative review of the countervailing duty order on leather wearing apparel from Uruguay (47 FR 31032; July 16, 1982). The Department has now completed that review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

Imports covered by this review are shipment of Uruguayan leather wearing apparel and parts and pieces thereof. During the period of review, such merchandise was classifiable under items 791.7620, 791.7640, and 791.7660 of the Tariff Schedules of the United States Annotated. These products are currently classifiable under item numbers 4203.10.4030, 4203.10.4060 and 4203.10.4090 of the Harmonized Tariff Schedule. The HTS numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period January 1, 1986 through December 31, 1987, and four programs.

Final Results of Review

We gave interested parties an opportunity to comment on the preliminary results. We received no comments.

As a result of our review, we determine the net subsidy to be 0.003 percent *ad valorem* for nine firms, and 2.10 percent *ad valorem* for all other firms during the period January 1, 1986 through December 31, 1986. We determine the net subsidy to be 0.001 percent *ad valorem* for twelve firms, and 3.21 percent *ad valorem* for all other firms during the period January 1, 1987 through December 31, 1987. The Department considers any rate less than 0.50 percent *ad valorem* to be *de minimis*.

1. The Department will instruct the Customs Service to liquidate, without regard to countervailing duties, shipments of this merchandise form the nine firms listed below and to assess countervailing duties of 2.10 percent of the f.o.b. invoice price on shipments from all other firms exported on or after January 1, 1986 and on or before December 31, 1986.

1. Cubalan, S.A.
2. Fair Play, Ltda.
3. Laren, S.A.
4. Modur, S.A.
5. Ness, Ltda.
6. Orolon, S.A.
7. Osami, S.A.
8. Paris New York, S.A.
9. Sirfil, S.A.

2. The Department will also instruct the Customs Service to liquidate, without regard to countervailing duties, shipments of this merchandise from the 12 firms listed below and to assess countervailing duties of 3.21 percent of the f.o.b. invoice price on shipments from all other firms exported on or after January 1, 1987 and on or before December 31, 1987.

1. Bicrea, S.A.
2. Cleson, S.A.
3. Cubalan, S.A.
4. Exportador Esporadico
5. Ladibell, S.A.
6. Modur, S.A.
7. Ness, Ltda.
8. Orolon, S.A.
9. Orwix, S.R.L.
10. Osami, S.A.
11. Raulin, S.A.
12. Union Euroamericana, S.A.

Further, the Department will instruct the Customs Service to waive cash deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, on shipments of this merchandise from the 12 firms listed in section 2 above, and to collect cash deposits of estimated countervailing duties of 3.21 percent of the f.o.b. invoice price on shipments of this merchandise from all other firms which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.22 of the Commerce Regulations published in the **Federal Register** of December 27, 1988 (53 FR 52306) (to be codified at 19 CFR 355.22).

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

USDA–ARS, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, was being manufactured in the United States at the time the foreign instruments were ordered.

Docket Numbers: 88–205R and 88–206R. *Applicant:* USDA–ARS, Beltsville, MD 20705 and Philadelphia, PA 19118.

VOL 54 ISS 217 NO 13 1989 UMI

Instrument: NMR Spectrometer, Model MSL-400 (System C) and Model MSL-300 (System A). *Manufacturer:* Bruker Analytische Messtechnik, West Germany. *Intended Use:* See notices at 53 FR 22685, June 17, 1988. *Order Date:* September 11, 1987.

Reasons: The foreign instrument provides CRAMPS capability and superior CP/MAS performance. *Advice Submitted by:* National Institutes of Health, September 29, 1989.

Docket Number: 89-163. *Applicant:* The College of William and Mary, Gloucester Point, VA 23062. *Instrument:* Electronic Fish Measuring Boards, Model IV. *Manufacturer:* Limnoterra Atlantic, Inc., Canada. *Intended Use:* See notice at 54 FR 30788, July 24, 1989. *Order Date:* May 31, 1989.

Reasons: The foreign instrument provides a waterproof, multiplexed data capture station for logging fish lengths and related information *in situ*. *Advice Submitted by:* National Oceanic and Atmospheric Administration, September 18, 1989.

The National Institutes of Health and the National Oceanic and Atmospheric Administration advise that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value to any of the foreign instruments for the applicant's intended use being manufactured at the time the foreign instrument was ordered.

We know of no other domestic instrument or apparatus of equivalent scientific value to any of the foreign instruments being manufactured at the time it was ordered.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 89-26507 Filed 11-9-89; 8:45 am]

BILLING CODE 3510-DS-M

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Public Law 89-651; 80 Stat. 897; 15 CFR 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with §§ 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 89-051R. *Applicant:* University of Mississippi Medical Center, Department of Preventive Medicine, 2500 N. State Street, Jackson, MS 39216-4505. *Instrument:* Automated Image Analysis Microscope System for Chromosome Analysis, Model Cytoscan RK2. *Manufacturer:* Image Recognition Systems, United Kingdom. Original notice of this resubmitted application was published in the **Federal Register** of February 21, 1989.

Docket Number: 89-063R. *Applicant:* Michigan State University, Department of Chemistry, East Lansing, MI 48824-1322. *Instrument:* Rotating Anode X-Ray Generator. *Manufacturer:* Rigaku Corporation, Japan. Original notice of this resubmitted application was published in the **Federal Register** of February 24, 1989.

Docket Number: 89-093R. *Applicant:* University of Florida, Department of Pediatric Genetics, Box J-296, JHMHC, Gainesville, FL 32610-0296. *Instrument:* Rapid Karyotyping Analysis System, Model RK1. *Manufacturer:* Image Recognition Systems, United Kingdom. *Intended Use:* The instrument will be used for studies of human chromosomes from various tissues, including amniocytes, lymphocytes, fibroblasts, tumor cells, and chorionic villi. The experiments to be conducted will include:

(a) origin of market chromosomes,
(b) breakpoints in structural chromosomal abnormalities (translocation, deletions, inversions, etc.),
(c) structure of fragile site in X-linked mental retardation,
(d) origin of clones in *in situ* culture preparations,
(e) immunoaffinity selection of human tumor cells, and
(f) gene mapping by *in situ* hybridization.

The instrument will also be used for science-related educational purposes in the following courses:

(1) BCH 7979-Advanced Research,
(2) GMS 7979-Advanced Research,
(3) CMS 5205-Medical Aspects of Human Genetics, and
(4) BCC 5150, BCC 5130 & BMS 5600-Cytogenetics Rotation for Pediatric, Obstetrics and Gynecology and Pathology Residents respectively.

The original notice of this resubmitted application was received by Commissioner of Customs: February 28, 1988.

Docket Number: 89-101R. *Applicant:* Ohio State University, Polar Research Center, 125 South Oval Mall, Columbus, OH 43210. *Instrument:* Light Element Isotope Ratio Mass Spectrometer, Model Delta E. *Manufacturer:* Finnigan MAT, West Germany. Original notice of this resubmitted application was published in the **Federal Register** of April 5, 1989.

Docket Number: 89-234. *Applicant:* U.S. Geological Survey, Box 25046, Mail Stop 963, Denver Federal Center, Denver CO 80225. *Instrument:* Filament Degasser Assembly. *Manufacturer:* VG Instruments, United Kingdom. *Intended Use:* Studies of rocks and minerals from a variety of geologic sites and contexts. Experiments will be conducted to obtain isotopic analysis of U, Th, Pb, Nd, Sm, Sr, Rb, K, Ca and possibly other elements separated from naturally occurring rocks and minerals. The objective of the investigations will be determination of the geologic ages of various rocks and minerals in order to understand the evolution of the earth's crust at various localities. *Application Received by Commissioner of Customs:* September 21, 1989.

Docket Number: 89-235. *Applicant:* University of Minnesota, 1919 University Avenue, St. Paul, MN 55104. *Instrument:* Preparative Quench and Stopped-Flow Spectrometer, Model PQ/SF-53. *Manufacturer:* Hi-Tech Scientific, Ltd., United Kingdom. *Intended Use:* The instrument will be used for studies of myosin, actin and staphylococcal nuclease with the objective of understanding mechanisms and detecting intermediate states in the formation of protein structures. *Application Received by Commissioner of Customs:* September 25, 1989.

Docket Number: 89-236. *Applicant:* University of Akron, 225 South Forge Street, Akron, OH 44325. *Instrument:* Mass Spectrometer, Model VG AutoSpec. *Manufacturer:* VG Instruments, Ltd., United Kingdom. *Intended Use:* The instrument will be used to explore the chemistry of simple yet elusive neutrals including hypervalent species, radicals, biradicals, carbenes, atomic and molecular clusters, and molecules apt to rapid intermolecular interactions. *Application Received by Commissioner of Customs:* September 25, 1989.

Docket Number: 89-237. *Applicant:* Old Dominion University, Research Foundation, P.O. Box 6369, Norfolk, VA 23508-0369. *Instrument:* Nitrogen Dioxide Detector, Model 2200. *Manufacturer:* Scintrex/Unisearch, Canada. *Intended Use:* The instrument will be used to perform the research project, ^{15}N and Inhibitor Studies of Nitrogen Cycling Within a Salt Marsh. The goals of the project are to develop and test techniques for the *in situ*

measurement of microbial nitrogen cycling processes in wetland ecosystems. *Application Received by Commissioner of Customs:* September 25, 1989.

Docket Number: 89-239. *Applicant:* National Institute of Standards and Technology, Radiometric Physics Division, Physics Bldg., Room A221, Gaithersburg, MD 20899. *Instrument:* Cryogenic Radiometer. *Manufacturer:* NPL, United Kingdom. *Intended Use:* The instrument will be used for measuring absolute optical power in the spectral range of the ultra violet to the far infrared. Experiments will be conducted for the improvement of NIST's present scales, research into the extension of measurement capabilities in uncharacterized spectral regions, and research of the transfer of highly accurate measurements to detectors with greater uncertainties. *Application Received by Commissioner of Customs:* September 26, 1989.

Docket Number: 89-240. *Applicant:* University of California, San Diego, Department of Biology, B-0222, La Jolla, CA 92093. *Instrument:* Electron Microscope, Model JEM-1200EX. *Manufacturer:* JEOL, Japan. *Intended Use:* The instrument will be used primarily to study the ultrastructure of white blood cells, cells derived from blood vessels, tumor cells, and kidney tissues. Most specimens will be of biological origin, some from experimental animals, some from normal humans, and some from patients with pathological disorders. *Application Received by Commissioner of Customs:* September 26, 1989.

Docket Number: 89-241. *Applicant:* Michigan Technological University, College of Engineering, Houghton, MI 49931. *Instrument:* Cambustion Fast Fuel Concentration and Hydrocarbon Analyser, Model HFR Series. *Manufacturer:* Cambustion, Ltd., United Kingdom. *Intended Use:* The instrument will be used for the study of the ignition of methanol in the optical diesel engine. The objective is to systematically study several ignition techniques, evaluate the performance of each and provide comparison information which will lead to the selection and development of an optimized ignition process in the methanol fueled diesel engine. In addition, the instrument will be used for science-related educational purposes in the courses: ME500 Graduate Research in Mechanical Engineering and ME800 Doctoral Research. *Application Received by Commissioner of Customs:* September 27, 1989.

Docket Number: 89-242. *Applicant:* Yale University Medical School, 333 Cedar Street, New Haven, CT 06510. *Instrument:* Electron Microscope, Model JEM-1200EX II. *Manufacturer:* JEOL, Japan. *Intended Use:* The instrument will be used for studies of brain tissue and neurons from laboratory animals such as rats in experiments focused on the ultrastructural organization of neurons, particularly synapses, axons, dendrites, dendritic spines, and growth cones. *Application Received by Commissioner of Customs:* September 27, 1989.

Docket Number: 89-243. *Applicant:* Cornell University, N.Y. State College of Veterinary Medicine, Ithaca, NY 14853-6401. *Instrument:* Electron Microscope, Model EM 902 PC. *Manufacturer:* Carl Zeiss, West Germany. *Intended Use:* The instrument will be used to provide both routine service and high performance transmission electron microscopy for a wide variety of specimens ranging from surface spread single molecules through stained and unstained ultrathin, thin and thick sections of cells and tissues. Specific research project areas will include: (1) The role of vitamin D in calcium metabolism, (2) the effects of lead and other heavy metals on cardiac development and performance, (3) the regulation of cell division, (4) distribution of ions and specific protein during tumorigenesis, and (5) metabolic regulation of the intestine. *Application Received by Commissioner of Customs:* September 28, 1989.

Docket Number: 89-244. *Applicant:* The Salk Institute for Biological Studies, 10010 North Torrey Pines Road, La Jolla, CA 92037. *Instrument:* Mass Spectrometer, Model JMS-HX110. *Manufacturer:* JEOL, Japan. *Intended Use:* The instrument will be used for analyzing peptides, proteins and other biological materials that will be isolated in extremely small quantities. Experiments will include both routine analysis of samples and developmental work such as the identification of new peptide or protein carriers that will improve ionization of the samples and result in more sensitive analyses. *Application Received by Commissioner of Customs:* October 2, 1989.

Docket Number: 89-245. *Applicant:* Washington State University, Purchasing Office, French Administration, Room 220, Pullman, WA 99164. *Instrument:* Rapid Kinetics Instrument, multi-mixing. *Manufacturer:* Biologic, Co., France. *Intended Use:* The instrument will be used to study the reactions of a number of different enzymes, principally 5-enolpyruvylshikimate-3-phosphate synthase, deoxyarabinoheptulosonate-7-phosphate synthase, chorismate mutase and triosephosphate isomerase, all of which are isolated from recombinant bacteria or yeast. Experiments will involve spray freezing (in about 1 msec) of a rapidly mixed (*ca.* 2 msec) aqueous solution of enzyme and isotopically enriched (with ^{13}C, or ^{15}N) substrate. The resultant "snow" will then be examined by cryoenzymological solid-state nuclear magnetic resonance spectroscopy. This technique should allow a structural determination of short-lives enzyme-intermediate complexes to be made at low temperatures. *Application Received by Commissioner of Customs:* October 3, 1989.

Docket Number: 89-246. *Applicant:* Medical University of South Carolina, Department of Pharmacy, 171 Ashley Avenue, Charleston, SC 29425. *Instrument:* Mass Spectrometer, Model JMS-HX110/HX110. *Manufacturer:* JEOL, Japan. *Intended Use:* The instrument will be used to study the convalent structures of biological molecules such as proteins, polysaccharides, lipids, glycolipids, glycoproteins and lipoproteins and via chemical modifications, aspects of their three dimensional structure and function. In addition, the instrument will be used for educational purposes in the courses: Biomedical Applications of Mass Spectrometry, Research, Thesis Research and Dissertation Research. *Application Received by Commissioner of Customs:* October 3, 1989.

Docket Number: 89-247. *Applicant:* Thomas Jefferson University, Jefferson Medical College, Laboratory of Penna Muscle Institute, IID2, 1020 Locust Street, Philadelphia, PA 19107. *Instrument:* Quadruple Force Transducer Bridge Amplifier & Transducers. *Manufacturer:* Dr. K. Guth, West Germany. *Intended Use:* The instrument will be used for the measurement of force production by preparations of isolated smooth and striated muscles. The muscles are mounted in a chamber containing a physiological salt solution; the ends of the muscles are fixed to the transducer for the measurement of force and to a micrometer for measurement and control of length. *Application Received by Commissioner of Customs:* October 3, 1989.

Docket Number: 89-248. *Applicant:* Pennsylvania State University, University Park, PA 16802. *Instrument:* Ultrahigh Vacuum Surface Analysis System, Model LHS-12E. *Manufacturer:* Leybold Vacuum Products Inc., West Germany. *Intended Use:* The instrument will be used for research on metal-support interactions in catalytic systems involving the study of hydrogenation

reactions over Pt and Pd in contact with titania. Reaction rates and absorbed species will be determined using HREELW, XPS, and AES and the

Japan. *Intended Use:* See notice at 54 FR 2190, May 16, 1989.

Reasons: The foreign instrument provides optical rotary dispersion

Kingdom. *Intended Use:* See notice at 54 FR 24372, June 7, 1989.

Reasons: The foreign instrument can digitize single photon events in X-Y

manufacturers, the public, and State and local governments. The purpose of this notice is to solicit such views.

reactions over Pt and Pd in contact with titania. Reaction rates and absorbed species will be determined using HREELW, XPS, and AES and the specially-designed high pressure reactor chamber. The principal education uses will be in ChE 600 and 601 courses, which involve thesis-related research. *Application Received by Commissioner of Customs:* October 3, 1989.

Docket Number: 89-249. *Applicant:* University of California, San Francisco, School of Pharmacy, San Francisco, CA 94143-0446. *Instrument:* Stopped-Flow Spectrofluorimeter, Model SF. 17MV. *Manufacturer:* Applied Photophysics, Ltd., United Kingdom. *Intended Use:* The instrument will be used to investigate the rapid kinetics of hemoprotein catalysis and inactivation by mechanism-based inactivating agents under aerobic and strictly anaerobic conditions, with UV and fluorescence detections, and at ambient and low temperatures. The purpose of the work is to define the structures and mechanisms of hemoprotein monooxygenases, peroxidases, dioxygenases. In addition, the instrument will be used to train graduate students and postdoctoral fellows in the use of stopped flow techniques for the analysis of rapid enzyme kinetics. *Application Received by Commissioner of Customs:* October 4, 1989.

BILLING CODE 3510-DS-M

The University of Texas at Austin, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 89-133. *Applicant:* The University of Texas at Austin, Austin, TX 78722. *Instrument:* Circular Dichroism Spectropolarimeter, Model J-20A and Optical Rotary Dispersion Instrument. *Manufacturer:* JASCO Inc., Japan. *Intended Use:* See notice at 54 FR 2190, May 16, 1989.

Reasons: The foreign instrument provides optical rotary dispersion spectra along with circular dichroism measurements.

Docket Number: 89-135 *Applicant:* University of Alaska, Fairbanks, Fairbanks, AK 99709. *Instrument:* Isotope Ratio Mass Spectrometer, Model SIRA Series II. *Manufacturer:* VG Instruments, United Kingdom. *Intended Use:* See notice at 54 FR 21090, May 16, 1989.

Reasons: The foreign instrument provides an external precision of 0.04‰ with a continuous flow inlet.

Docket Number: 89-136. *Applicant:* Vanderbilt University, Nashville, TN 37235. *Instrument:* Rapid Kinetics Spectrometer Accessory, Model RX 1000. *Manufacturer:* Applied Photophysics, United Kingdom. *Intended Use:* See notice at 54 FR 21091, May 16, 1989.

Reasons: The foreign article directly delivers mixed reagent solutions to the observation cell of an existing spectrophotometer.

Docket Number: 89-142. *Applicant:* University of California, Berkeley, CA 94720. *Instrument:* 3-Syringe Stopped-Flow System, Model SFM-3/PC. *Manufacturer:* Bio-Logic, France. *Intended Use:* See notice at 54 FR 22000, May 22, 1989.

Reasons: The foreign instrument provides: (1) Precise and independent control of the speed of 3 syringes, (2) a vertical observation chamber and (3) temperature control.

Docket Number: 89-146. *Applicant:* U.S. Department of Agriculture, Urbana, IL 61801. *Instrument:* Juice Extraction Press. *Manufacturer:* Erich Pollahne, West Germany. *Intended Use:* See notice at 54 FR 23509, June 1, 1989.

Reasons: The foreign instrument provides a roller type press with rolls that rotate in opposite directions against each other and is capable of processing 240 items per hour.

Docket Number: 89-149. *Applicant:* Knox College, Galesburg, IL 61401. *Instrument:* Stopped-flow Spectrophotometer, Model SF-1B. *Manufacturer:* Hi-Tech Scientific, United Kingdom. *Intended Use:* See notice 54 FR 23509, June 1, 1989.

Reasons: The foreign instrument is designed to facilitate instruction of kinetics experiments in undergraduate level chemistry lab courses.

Docket Number: 89-154. *Applicant:* Medical University of South Carolina, Charleston, SC 29425. *Instrument:* Imaging Photon Detector. *Manufacturer:* Instrument Technology Limited, United Kingdom. *Intended Use:* See notice at 54 FR 24372, June 7, 1989.

Reasons: The foreign instrument can digitize single photon events in X-Y coordinates for subsequent computer analysis in studies of biological phosphorescence and luminescence in the UV region.

The National Institutes of Health advises in its memoranda dated September 28, 1989 that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

National Institute of Standards and Technology

[Docket No. 91034-9234]

RIN 0693-AA79

Proposed Federal Information Processing Standard for Gosip Conformance and Interoperation Testing and Registration

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Request for comments.

SUMMARY: This proposed Federal Information Processing Standard will adopt conformance and interoperability testing requirements for the Government Open Systems Interconnection Profile (GOSIP). The FIPS establishes the policies, procedures and criteria for conformance and interoperation testing, provides for registration of GOSIP reference entities, and discusses laboratory accreditation and other procedures. This FIPS deals with conformance and interoperability testing for GOSIP Version 1, and not to the GOSIP Version 2 proposed revision. GOSIP is based on international standards and implementation agreements developed by the NIST Workshop for Implementors of OSI.

Prior to the submission of this proposed standard to the Secretary of Commerce for review and approval, it is essential to assure that consideration is given to the needs and views of manufacturers, the public, and State and local governments. The purpose of this notice is to solicit such views.

This proposed standard contains two sections: (1) An announcement section, which provides information concerning the applicability, implementation, and maintenance of the standard; and (2) a specification section. Only the announcement section of the standard is provided in this notice. Interested parties may obtain a copy of the specification section from the Standards Processing Coordinator (ADP), National Institute of Standards and Technology, Technology Building, Room B-64, Gaithersburg, MD 20899, telephone (301) 975-2816. The information collection requirements subject to the Paperwork Reduction Act in the specification section have been approved by the Office of Management and Budget under Control No. 0693-0003.

DATE: Comments on this proposed standard must be received on or before February 12, 1990.

ADDRESS: Written comments concerning the proposed standard should be sent to: Director, National Computer Systems Laboratory, ATTN: Proposed FIPS for GOSIP Conformance Testing, Technology Building, Room B154, National Institute of Standards and Technology, Gaithersburg, MD 20899.

Written comments received in response to this notice will be made part of the public record and will be made available for inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Mr. Richard J. Linn, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone (301) 975-3624.

Dated: November 6, 1989.

Raymond G. Kammer,

Acting Director.

Federal Information Processing Standards Publication_____

(date)

Announcing the Standard for GOSIP Conformance and Interoperation Testing and Registration

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology after approval by the Secretary of Commerce pursuant to Section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Public Law 100-235.

1. *Name of Standard.* GOSIP Conformance and Interoperation Testing and Registration.

2. *Category of Standard.* Hardware and Software Standards, Computer Network Protocols.

3. *Explanation.* This FIPS identifies requirements for conformance testing and interoperability testing of GOSIP protocols and protocol stacks. GOSIP defines a common set of data communication protocols which enable systems developed by different vendors to interoperate and enable the users of different applications on these systems to exchange information.

4. *Approving Authority.* Secretary of Commerce.

5. *Maintenance Agency.* U.S. Department of Commerce, National Institute of Standards and Technology, National Computer Systems Laboratory.

6. *Cross Index.*

a. FIPS PUB 146, Government Open Systems Interconnection Profile (GOSIP).

b. NBS Special Publication 500-150, Stable Implementation Agreements for Open Systems Interconnection Protocols, Version 1, Edition 1.

c. NIST Special Publication 500-163, GOSIP Users Guide.

d. General Agreements of the OSINET, OSINET Steering Committees; to be published September 1989.

7. *Related documents.* Related documents are listed in the Reference Section of the specifications.

8. *Objectives.* The primary objectives of this standard are:

a. To reduce the overall information systems costs by making it easier and less expensive to maintain information technology applications and to transfer these applications among different information systems, including replacement systems.

b. To protect the technical assets and staff time of the Federal government by assuring to the extent possible that products (off-the-shelf or government developed) brought into the Federal inventory comply with FIPS.

c. To identify test methods and competent test laboratories for assisting government agencies in procuring products that comply with FIPS.

d. To increase the likelihood of interoperation of products that conform to GOSIP.

9. *Specifications.* Federal Information Processing Standards Publication _____, GOSIP Conformance and Interoperation Testing Registration (affixed).

10. *Applicability.* This FIPS applies to the acquisition of computer network products and services and communications systems or services that provide the functionality defined in FIPS PUB 146, GOSIP, GOSIP, Version 1, supports Message Handling Systems and File Transfer, Access and Management Applications, and the interconnection of the following network technologies: CCITT Recommendation X.25; Carrier Sense Multiple Access with Collision Detection (IEEE 802.3); Token Bus (IEEE 802.4); and Token Ring (IEEE 802.5).

11. *Implementation.* After August 15, 1990, Federal agencies shall require that OSI protocols and protocol stacks procured for GOSIP Version 1 must be successfully tested and registered in accordance with the provisions for this standard. An implementation schedule establishing requirements for testing of protocols procured for GOSIP Version 2 will be announced at a later date.

12. *Waivers.* Under certain exceptional circumstances, the heads of Federal departments and agencies may approve waivers to Federal Information Processing Standards (FIPS). The head of such agency may redelegate such authority only to a senior official designated pursuant to section 3506(b) of Title 44, U.S. Code. Waivers shall be granted only when:

a. Compliance with a standard would adversely affect the accomplishment of the mission of an operator of a Federal computer system, or

b. Cause a major adverse financial impact on the operator which is not offset by Governmentwide savings.

Agency heads may act upon a written waiver request containing the information detailed above. Agency heads may also act without a written waiver request when they determine that conditions for meeting the standard cannot be met. Agency heads may approve waivers only by a written decision which explains the basis on which the agency head made the required finding(s). A copy of each such decision, with procurement sensitive or classified portions clearly identified, shall be sent to: National Institute of Standards and Technology; ATTN: FIPS Waiver Decisions, Technology Building, Room B-154; Gaithersburg, MD 20899.

In addition, notice of each waiver granted and each delegation of authority to approve waivers shall be sent promptly to the Committee on Government Operations of the House of Representatives and the Committee on Government Affairs of the Senate and shall be published promptly in the Federal Register.

When the determination on a waiver applies to the procurement of equipment and/or services, a notice of the waiver determination must be published in the *Commerce Business Daily* as a part of the notice of solicitation for offers of an acquisition or, if the waiver determination is made after that notice is published, by amendment to such notice.

A copy of the waiver, any supporting documents, the document approving the waiver and any supporting and accompanying documents, with such deletions as the agency is authorized and decides to make under 5 U.S.C. sec. 552(b), shall be part of the procurement documentation and retained by the agency.

13. *Special Information.* The testing requirements for OSI protocols specified in this standard supersede in entirity the Section 2. Conformance, Interoperability, and Performance Testing of FIPS PUB 146, GOSIP, August 1988.

14. *Where to Obtain Copies.* Copies of this publication are for sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA 22161. When ordering, refer to Federal Information Processing Standards Publication _____ (FIPSPUBS _____), and title. Specify

VOL 54 ISS 217 NO 13 1989 UMI

microfiche if desired. Payment may be made by check, money order, or NTIS deposit account.

BILLING CODE 3510-CW-M

National Oceanic and Atmospheric Administration

Caribbean Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Caribbean Fishery Management Council will hold a public meeting of its Enforcement Committee on November 20, 1989, at 10 a.m., at the Hotel Pierre (De Diego Avenue), Santurce, Puerto Rico. The Committee will discuss fishery management plan enforcement activities, budget issues, billfish regulations, and future actions.

FOR MORE INFORMATION CONTACT: Miguel A. Rolon, Executive Director, Caribbean Fishery Management Council, Banco de Ponce Building, Suite 1108, Hato Rey, Puerto Rico 00918-2577; telephone: (809) 766-5926.

Dated: November 3, 1989.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management National Marine Fisheries Service.

[FR Doc. 89-26578 Filed 11-9-89; 8:45 am]

BILLING CODE 3510-22-M

Caribbean Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Caribbean Fishery Management Council will hold a public meeting of its Education and Information Committee on November 21, 1989, at 9 a.m., at the Hotel Pierre (De Diego Avenue), Santurce, Puerto Rico. The Committee will revise its goals and objectives, discuss fishery management and information needs, desktop publishing, as well as a meeting schedule for fishermen's organizations.

FOR MORE INFORMATION CONTACT: Miguel A. Rolon, Executive Director, Caribbean Fishery Management Council, Banco de Ponce Building, Suite 1108, Hato Rey, Puerto Rico 00918-2577; telephone: (809) 766-5926.

Dated: November 3, 1989.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Endangered Species; Application for Permit; Sea World Research Institute (P167E)

Notice is hereby given that the Applicant has applied in due form for a Permit to take endangered species as authorized by the Endangered Species Act of 1973 (16 U.S.C. 1531-1543) and the NOAA Fisheries regulations governing endangered fish and wildlife permits (50 CFR part 217 through 222).

1. Applicant: Peter Dutton and Donna McDonald, Sea World Research Institute, 1700 South Shores Road, San Diego, California 92109.

2. Type of Permit: Scientific Purposes.

3. Name and Number of Species:

Green (*Chelonia mydas*)
Olive ridley sea turtles (*Lepidochelys olivacea*)
Loggerhead (*Caretta*)

50 turtles total are proposed to be tagged and released.

4. Type of Take: The applicant proposes to conduct scientific studies on Green, Olive ridley, and Loggerhead sea turtles. The applicant estimates there to be approximately 50 total sea turtles on these three species in the study area (San Diego Bay). A net will be set across the channel where they are found. Each turtle captured will be brought into a boat, tagged and released. Turtles captured that have already been tagged will be released. This will continue until over a period of two years.

5. Location and Duration of Activity: The collecting efforts will be in San Diego Bay adjacent to the entrance of the effluent channel of the San Diego Gas and Electric Power Plant. Turtles will be tagged and released every two weeks until all turtles are tagged, then recapture will take place throughout San Diego Bay monthly over a two-year period.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, NOAA Fisheries, National Oceanic and Atmospheric Administration, 1335 East-West Highway, Silver Spring, Maryland 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of NOAA Fisheries.

Documents submitted in connection with the above application are available for review by interested persons in the following offices:

Office of Protected Resources, NOAA Fisheries, 1335 East-West Highway, Silver Spring, Maryland 20910; and

Director, Southwest Region, NOAA Fisheries, 300 South Ferry Street, Terminal Island, California 90731-7415.

Dated: November 6, 1989.

Morris M. Pallozzi,

Director, Office of Enforcement, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Taiwan

November 6, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the commissioner of customs adjusting limits.

EFFECTIVE DATE: November 7, 1989.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566-6791. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for carryover and carryforward used. In accordance with a letter dated October 26, 1988, Gorup II is adjusted further to conform with the Harmonized System.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 49345, published on December 7, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 6, 1989.

Commissioner of Customs,
Department of the Treasury, Washington, DC.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 2, 1988 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Taiwan and exported during the period which began on January 1, 1989 and extends through December 31, 1989.

Effective on November 7, 1989, the directive of December 2, 1988 is being amended further to adjust the limits for the following categories, as provided under the terms of the bilateral agreement of November 18, 1982, as amended and extended:

Category	Adjusted 12-month limit [1]
Group I	
200-227, 229, 300-317, 326, 360-369, 400, 410, 414, 464-469, 600-629 and 665-670, as a group.	558,604,356 square meters equivalent
Sublevels in group I	
200	580,501 kilograms
218	17,467,397 square meters
219	17,540,478 square meters
220	11,223,109 square meters
225/317/326	29,196,119 square meters
226	6,738,931 square meters
229-F [2]	565,495 kilograms
313	31,254,577 square meters
314	34,339,783 square meters
315	22,237,948 square meters
360	990,272 numbers
363	13,179,248 numbers
369-L [3]	1,270,988 kilograms
604	246,312 kilograms
613/614/615/617	16,236,716 square meters
669-P [4]	255,645 kilograms
669-T [5]	893,400 kilograms
670-F [6]	1,875,715 kilograms
670-H [7]	15,741,803 kilograms
670-L [8]	36,591,215 kilograms
Group II	
237, 239, 330-354, 359, 431-448, 459, 630-664 and 666, as a group.	823,723,550 square meters equivalent
Sublevels in group II	
237	999,932 dozen
239	2,527,189 kilograms
333/334	83,076 dozen
335	96,129 dozen
336	91,992 dozen
Category	Adjusted 12-month limit [1]
341	368,556 dozen
342	205,959 dozen
350	165,545 dozen
351	364,794 dozen
352	953,223 dozen
353/354/653/754	242,308 dozen
359-H [9]	2,162,943 kilograms
433	13,935 dozen
434	9,674 dozen
435	29,511 dozen
436	4,573 dozen
438	37,008 dozen
440	10,510 dozen
442	46,961 dozen
443	99,014 numbers
445/446	131,425 dozen
447/448	19,232 dozen
631	4,489,999 dozen pairs
632	4,887,983 dozen pairs
634	982,720 dozen
635	1,951,780 dozen
639	5,067,394 dozen
640	3,028,371 dozen of which not more than 1,693,825 dozen shall be in Category 640-Y [10]
642	707,841 dozen
643	492,000 numbers
644	1,556,294 numbers
645/646	4,126,558 dozen
647	2,777,899 dozen
648	3,222,464 dozen
649	718,850 dozen
650	51,595 dozen
651	496,191 dozen
652	1,485,540 dozen
659-B [11]	750,668 kilograms
659-C [12]	553,236 kilograms
659-H [13]	2,630,176 kilograms
659-S [14]	2,119,691 kilograms
Group III 631-644 and 646-658, as a group.	7,866,768 square meters equivalent
Level not in a group 845	855,279 dozen

[1] The limits have not been adjusted to account for any imports exported after December 31, 1988.

[2] In Category 229-F, only HTS numbers 5608.11.0000, 5608.19.1010 and 5608.19.1020.

[3] In Category 369-L, only HTS numbers 4202.12.4000, 4202.12.8020, 4202.12.8060, 4202.92.1500, 4202.92.3015 and 4202.92.6000.

[4] In Category 669-P, only HTS numbers 6305.31.0010, 6305.31.0020 and 6305.39.0000.

[5] In Category 669-T, only HTS numbers 6306.12.0000, 6306.19.0010 and 6306.22.9000.

[6] In Category 670-F, only HTS number 4202.32.9550.

[7] In Category 670-H, only HTS numbers 4202.22.4030 and 4202.22.8050.

[8] In Category 670-L, only HTS numbers 4202.12.8030, 4202.12.8070, 4202.92.3020, 4202.92.3030 and 4202.92.9020.

[9] In Category 359-H, only HTS numbers 6505.90.1530 and 6505.90.2060.

[10] In Category 640-Y, only HTS numbers 6205.30.2010, 6205.30.2020, 6205.30.2050 and 6205.30.2060.

[11] In Category 659-B, only HTS numbers 6114.30.2010 and 6114.30.2020.

[12] In Category 659-C, only HTS numbers 6103.23.0055, 6103.43.2020, 6103.49.2000, 6103.49.8038, 6104.63.1020, 6104.69.8010, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.4015, 6211.33.0010, 6211.33.0017 and 6211.43.0010.

[13] In Category 659-H, only HTS numbers 6502.00.9030, 6504.00.8015, 6504.00.9060, 6505.90.5060, 6505.90.6060, 6505.90.7060 and 6505.90.8060.

[14] In Category 659-S, only HTS numbers 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Textile and Apparel Categories With Harmonized Tariff Schedule of the United States Annotated; Changes to the 1989 Correlation

November 8, 1989.

AGENCY: Committee for the Implementation of Textile agreements (CITA).

ACTION: Changes to the 1989 Correlation.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-3400.

The Correlation: **Textile and Apparel Categories with Harmonized Tariff Schedule of the United States Annotated (1989)** presents the harmonized tariff numbers under each of the cotton, wool, man-made fiber, silk blend and other vegetable fiber categories used by the United States in monitoring imports of these textile products and in the administration of the bilateral agreements program. A notice was published in the **Federal Register** on July 3, 1989 (54 FR 27924) announcing changes to this Correlation, which were published in the fourth supplement of the Harmonized Tariff Schedule of the **United States. The Correlation should be** amended further to reflect the changes indicated below:

HTS No.	Category No.
6108.91.0015	Change from 350 to 352.
6108.91.0025	Change from 350 to 352.
6108.92.0015	Change from 650 to 652.
6108.92.0025	Change from 650 to 652.
6108.10.0009	Change from 352 to 338.
6108.90.1003	Change from 652 to 638.
Category	*Change*
350	Add 6108.91.0000—Women's negligees, bathrobes and similar articles of cotton, knitted or crocheted. Add 6108.91.0040—Girls' negligees, bathrobes and similar articles of cotton, knitted or crocheted.
600	Delete 5402.39.3030 Delete 5402.39.6060 Add 5402.39.3010—Other single textured yarn, of polethylene or polypropylene, not put up for retail sale.

VOL 54 ISS 217 NO 13 1989 UMI

HTS No.	Category No.
	Add 5402.39.3090—Other single textured yarn, other than polethylene or polypropylene, not put up for retail sale.
	Add 5402.39.6010—Other textured yarn, multiple (folded) or cabled yarn, not put up for retail sale, of polyethylene or polypropylene.
	Add 5402.39.6090—Other textured yarn, multiple (folded) or cabled yarn, other than polyethylene or polypropylene not put up for retail sale.
606	Delete 5402.49.0040
	Add 5402.49.0060—Synthetic filament yarn (other than sewing thread), not put up for retail sale, multifilament, with twist of 5 turns or more per meter, of polyethylene or polypropylene.
	Add 5402.49.0080—Synthetic filament yarn (other than sewing thread), not put up for retail sale, multifilament, with twist of 5 turns or more per meter, other than of polethylene or polypropylene.
650	Add 6108.92.0030—Women's negligees, bathrobes and similar articles of man-made fiber, knitted or crocheted.
	Add 6108.92.0040—Girls' negligees, bathrobes and similar articles of man-made fiber, knitted or crocheted

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1990; Additions and Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to and Deletion from Procurement List.

SUMMARY: This action adds to and deletes from Procurement List 1990 commodities to be produced and services to be provided by workshops for the blind or other severly handicapped.

EFFECTIVE DATE: December 13, 1989.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: On August 25, September 1, 8, 15 and 22, 1989, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (54 FR 35366, 36369, 37356, 38266 and 39034) of proposed additions to and deletion from Procurement List 1990, which was published on November 3, 1989 (54 FR 46450).

Additions

No comments were received concerning the proposed additions to the Procurement List. After consideration of the material presented to it concerning capabiltiy of qualified workshops to produce the commodities and provide the services at a fair market price and impact of the additions on the current or most recent contractors, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.6.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodities and services listed.

c. The actions will result in authorizing small entities to produce the commodities and provide the services procured by the Government.

Accordingly, the following commodities and services are hereby added to Procurement List 1990:

Commodities

Cushion Seat, Vehicular
2540-737-3309

Pad, Mattress
7210-01-306-3243

Procurement List 1990; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1990 commodities to be produced by workshops for the blind or other severely handicapped. Comments must be received on or before: December 13, 1989.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities to Procurement List 1990, which was published on November 3, 1988 (54 FR 46540):

Extension of Closing Date for New Awards Under the Desegregation of Public Education

AGENCY: Department of Education.

ACTION: Notice of extension of closing date for new awards under the desegregation of Public Education: State Educational Agency Desegregation Program for fiscal year (FY) 1990.

SUMMARY: On August 8, 1989, the Department of Education published in the Federal Register a notice inviting applications under the State Education Desegregation Program for FY 1990. The purpose of this notice is to extend the closing date for transmittal of applications from October 16, 1989 to November 24, 1989, to provide applicants additional time to submit applications. Applicants that have already submitted applications may supplement or revise their applications until November 24, 1989. Three copies of any supplementary information or the revised application must be received by the Application Control Center by November 24, 1989. The Intergovernmental Reiew deadline is also extended from December 18, 1989 to January 24, 1990.

FOR APPLICATIONS OR INFORMATION CONTACT: Sylvia Wright, U.S. Department of Education, 400 Maryland Avenue, SW., Room 2089, FOB #6, Washington, DC 20202-6439. Telephone (202) 732-4358.

Authority: 42 U.S.C. 2000C-2000C-2, 2000C-5.

Dated: November 7, 1989.

Daniel F. Bonner,

Acting Assistant Secretary for Elementary and Secondary Education.

DEPARTMENT OF ENERGY

Solicitation of Comments From the General Public on the Research, Development, Demonstration, Testing and Evaluation (RDDT&E) Plan, a Chapter of the Environmental Restoration and Waste Management Five-Year Plan

AGENCY: Office of the Secretary, DOE.

ACTION: Notice of availability of the Research, Development, Demonstration, Testing, and Evaluation (RDDT&E) Plan, a complementary document to the Environmental Restoration and Waste Management Five-Year Plan for the general public's review and comment.

SUMMARY: As stated in the Energy Restoration and Waste Management Five-Year Plan, DOE/S-0070 (see 54 FR 36372 (September 1, 1989)), and publicly on numerous occasions, and as testified to before the Congress, the Department of Energy has been preparing the RDDT&E Plan to complement the Environmental Restoration and Waste Management Five-Year Plan and to become a chapter of that document. The RDDT&E Plan has now been completed. The Plan addresses management and direction of programs and activities, establishes an aggressive national program for research and development, identifies technologies to solve problems in an efficient and economical manner, and directs the development of new technologies. The Department is making available for interested groups and individuals the RDDT&E Plan for review and comment. All comments will be considered in the preparation of the updated Plan (1992-1996) which will be available for review and comment in May 1990.

DATES: Comments on the RDDT&E Plan will be accepted through December 13, 1989.

VOL 54 ISS 217 NO 13 1989 UMI

ADDRESSES: Persons requiring copies of the Plan should submit their requests to Mr. R.P. Whitfield, Office of Defense Waste and Transportation Management, DP–12, ATTN: RDDT&E Plan, Department of Energy, Washington, DC 20545 or call (301) 353–4000. Written comments should be addressed to Mr. R.P. Whitfield at the same address.

FOR FURTHER INFORMATION CONTACT: Mr. R.P. Whitfield at (301) 353–3555.

Leo P. Duffy,

Special Assistant to the Secretary for Coordination of DOE Waste Management.

Federal Energy Regulatory Commission

[Docket No. RP90–18–000]

El Paso Natural Gas Co. v. West Texas Gathering Co.; Petition for Issuance of a Declaratory Order, Complaint, and Motion for Expedited Relief

November 6, 1989.

Take notice that on October 27, 1989, El Paso Natural Gas Company (El Paso), a Delaware corporation, whose mailing address is Post Office Box 1492, El Paso, Texas 79978, filed a petition for issuance of a declaratory order, complaint, and motion for expedited relief at Docket No. RP90–19 under section 5(e) of the Administrative Procedure Act (5 U.S.C. 554(e) (1982)) and Rule 207(a)(2) of the Commission's Rules of Practice and Procedure (18 CFR 385.207(a)(2) (1989)), under sections 5(a) and 16 of the Natural Gas Act (15 U.S.C. 717d(a) and 717o (1982)) and Rule 206 of the Commission's Rules of Practice and Procedure (18 CFR 385.206 (1989)), and under Rule 212 of the Commission's Rules of Practice and Procedure (18 CFR 385.212 (1989)). El Paso's pleading consists of the following:

(i) a petition for issuance of a declaratory order finding:

(a) a Texas district court action brought by West Texas Gathering Company (West Texas), a jurisdictional "natural-gas company" as defined in Section 2(6) of the Natural Gas Act (15 U.S.C. 717a(6) (1982)), against El Paso seeking to enforce the minimum purchase provisions of its tariff is preempted by Commission Order Nos. 380 and 500; and

(b) the variable minimum purchase provisions of West Texas' Rate Schedule X–1, as reflected in the West Texas-El Paso Gas Purchase Agreement dated January 8, 1958, as amended, are inoperative and of no effect at law under the Commission's Regulations at 18 CFR 154.111 (1988);

(ii) a complaint against West Texas requesting a Commission order directing West Texas to cease and desist from its efforts to enforce the minimum purchase provisions of its tariff; and

(iii) a motion for expedited relief.

Respondent West Texas Gathering Company must file an answer to the complaint with the Commission pursuant to Rules 206(b) and 213 of the Commission's Rules of Practice and Procedure (18 CFR 385.206(b) and 385.213 (1989)). Any other person desiring to be heard or to make any protest with reference to said pleading should, on or before Dec. 6, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a protest or motion to intervene in accordance with the requirements of Rule 211 or 214, respectively, of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214 (1989)) and the Regulations Under the Natural Gas Act (18 CFR 157.10 (1989)). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection. Answers to this complaint shall be due on or before December 6, 1989.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM90–7–28–000]

Panhandle Eastern Pipe Line Co.; Proposed Changes in FERC Gas Tariff

November 6, 1989.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on October 31, 1989, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

First Revised Sheet No. 3–C.10
First Revised Sheet No. 3–C.11
First Revised Sheet No. 3–C.12

The proposed effective date of these revised tariff sheets is December 1, 1989.

Panhandle states that the revised tariff sheets filed herewith reflect revisions to the Order No. 500 take-or-pay direct billing amounts approved by Commission Orders dated November 25, 1988 and January 26, 1989 in Docket No. RP89–9–000, *et al.*

Panhandle further states that the revised tariff sheets referenced above reflect the first annual adjustment to carrying charges and monthly TOP Fixed Surcharges in accordance with sections 23.4 (c) and (d) of Panhandle's FERC Gas Tariff, Original Volume No. 1.

Panhandle states that copies of its filing have been served on all parties, affected jurisdictional customers and appropriate state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM90–6–28–000]

Panhandle Eastern Pipe Line Co.; Proposed Changes in FERC Gas Tariff

November 6, 1989.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on October 31, 1989, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

First Revised Sheet No. 3–C.13
First Revised Sheet No. 3–C.14
First Revised Sheet No. 3–C.15

The proposed effective date of these revised tariff sheets is December 1, 1989.

Panhandle states that the revised tariff sheets filed herewith reflect revisions to the Order No. 500 take-or-pay direct billing amounts approved by Commission Orders dated November 25, 1988, January 26, 1989, and October 10, 1989 and Docket No. RP89–10–000, *et al.*

Panhandle further states that the revised tariff sheets referenced above reflect the first annual adjustment to carrying charges and monthly TOP Fixed Surcharges in accordance with section 24 of Panhandle's FERC Gas Tariff, Original Volume No. 1.

Panhandle states that copies of its filing have been served on all parties, affected jurisdictional customers and appropriate state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. RP90–30–000]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

November 6, 1989.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on October 31, 1989 tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, six copies of the tariff sheets listed on Appendix A of the filing.

Texas Eastern states that the purpose of this filing is to update Texas Eastern's Fifth Revised Volume No. 1 to reflect changes required as the result of the execution of Service Agreements under Rate Schedules CD–1, CD–2, FT–1 and I by Algonquin Gas Transmission Company (Algonquin) and certain customers on October 13, 15, and 27, 1989. By this filing, Texas Eastern is also updating the Index of Purchasers and the Table of Contents for Texas Eastern's FERC Gas Tariff, Fifth Revised Volume No. 1. The agreements executed before October 26, 1989 are effective November 1, 1989. Texas Eastern states that the service agreements are being filed with the Commission in a separate filing.

Texas Eastern states that the tariff sheets listed on Appendix A of the filing, proposed to be effective October 26, 1989, reflect the following changes required as a result of the execution of Rate Schedule CD–1, CD–2, FT–1 and I Service Agreements by certain customers referenced in the filing:

(1) Revisions to reflect certain companies' names changes;

(2) The shift of certain companies obligation for Contract Adjustment Demand Charges from Rate Schedule DCQ to Rate Schedule CD–1;

(3) The reduction in certain companies' annual sales entitlements as a result of their election to reduce their Annual Contract Quantities under Rate Schedule CD–1, and to reflect the reduction in certain companies' annual sales entitlements as a result of elections to reduce Annual Contract Quantities under Rate Schedule CD–2;

(4) The Monthly Inventory Determinants applicable to the Contract Year which commenced on November 1, 1989 as specified in the executed Rate Schedule CD–1 and CD–2 service agreements, as applicable;

(5) The reduction of Demand-2 Quantity Nominations under Rate Schedules CD–1 and CD–2 as a result of the amount of service converted to Rate Schedule FT–1 on an annual basis.

Texas Eastern states that the tariff sheets listed on Appendix A of the filing proposed to be effective November 1, 1989 reflect the following changes:

(1) The shift of certain other companies' obligation for Contract Adjustment Demand Charges from Rate Schedule DCQ to Rate Schedule CD–1; the deletion of Contract Adjustment Demand Charge language from Rate Schedule DCQ since it is not applicable to the remaining Rate Schedule DCQ customers;

(2) The Monthly Inventory Determinants applicable to the Contract Year which commences November 1, 1989, as specified in the executed Rate Schedule CD–1 and CD–2 service agreements, as applicable, and nominated by one company under Rate Schedule DCQ in a letter to Texas Eastern dated October 9, 1989, for the Contract Year commencing November 1, 1989, electing to remain a Rate Schedule DCQ customer;

(3) A revised Index of Purchasers, to be effective November 1, 1989, to reflect

[Docket No. RP90–29–000]

Questar Pipeline Co.; Tariff Filing

November 6, 1989.

Take notice that Questar Pipeline Company on October 27, 1989, tendered for filing and acceptance certain tariff sheets to its FERC Gas Tariff.

Questar Pipeline states that this filing is made pursuant to 18 CFR 154.63, in compliance with ordering paragraph (C) of the Commission's October 6, 1989, order issued in Docket No. RP88–63, et al. and consistent with the Acceptance of Modified Settlement filed by Questar Pipeline on October 24, 1989.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

Trunkline Gas Co.; Proposed Changes in FERC Gas Tariff

November 6, 1989.

Take notice that on October 31, 1989 Trunkline Gas Company (Trunkline) tendered for filing revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1 as follows:

First Revised Sheet No. 3-A.7
First Revised Sheet No. 3-A.8

The proposed effective date of these revised tariff sheets is December 1, 1989.

Trunkline states that the revised tariff sheets filed herewith reflect revisions to the Order No. 500 take-or-pay direct billing amounts approved by Commission Orders dated November 25, 1988, January 31, 1989 and May 10, 1989 in Docket No. RP89-11-000, *et al.*

Trunkline further states that these revised tariff sheets reflect the first annual adjustment to carrying charges and monthly TOP Fixed Surcharges as provided in section 21.4(c) of Trunkline's FERC Gas Tariff, Original Volume No. 1.

Trunkline states that copies of its filing have been served on all parties, affected jurisdictional customers and appropriate state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP89-157-002]

Valley Gas Transmission, Inc.; Filing

November 6, 1989.

Take notice that on October 30, 1989, Valley Gas Transmission, Inc. (Valley) filed certain tariff sheets to its FERC Gas Tariff, Original Volume Nos. 1 and 2, to be effective November 1, 1989.

Valley states that these tariff sheets were accepted for filing and suspended for five months by Commission order dated May 31, 1989 (47 FERC 61,309). Valley states that this filing moves these suspended tariff sheets into effect as of November 1, 1989, and requests that the Commission grant any waivers necessary in order that these tariff sheets take effect.

Valley states that a copy of this filing has been served on all of its customers.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure [18 CFR 385.214, 385.211 (1989)]. All such protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Office of Hearings and Appeals

Determination of Excess Petroleum Violation EScrow Funds for Fiscal Year 1990

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of determination of excess amount of petroleum violation escrowed amounts pursuant to the Petroleum Overcharge Distribution and Restitution Act of 1986.

SUMMARY: The Petroleum Overcharge Distribution and Restitution Act of 1986 requires the Secretary of Energy to determine annually the amount of oil coverage funds held in escrow that is in excess of the amount needed to make restitution to injured parties. Notice is hereby given that $40,616,459.94 of the amounts currently in escrow is determined to be excess funds for fiscal year 1990 and, pursuant to the statutory directive, will be made available to state governments for use in specified energy conservation programs.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Roger Klurfeld, Assistant Director, Office of Hearings and Appeals, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-2094 [Mann]; (202) 586-2383 [Klurfeld].

SUPPLEMENTARY INFORMATION: The Petroleum Overcharge Distribution and Restitution Act of 1986 (hereinafter "PODRA"), contained in title III of the Omnibus Budget Reconciliation Act of 1986, Public Law No. 99-509, establishes certain procedures for the disbursement of funds collected by the Department of Energy (hereinafter "DOE") pursuant to the Emergency Petroleum Allocation Act of 1973 (hereinafter "EPAA") or the Economic Stabilization Act of 1970 (hereinafter "ESA"). These funds, commodity referred to as oil overcharge funds, are moneys obtained through enforcement actions instituted to remedy or alleged violations of those Acts.

PODRA requires the DOE, through the Office of Hearings and Appeals (hereinafter "OHA"), to conduct proceedings under 10 CFR part 205, subpart V, to accept claims for restitution from the public and to refund oil overcharge moneys to persons injured by violations of the EPAA or the ESA. In addition, PODRA requires the Secretary of Energy to determine annually the amount of oil overcharge funds that will not be required for restitution to injured parties in refund proceedings and to make this excess available to state governments for use in four energy conservation programs. This determination is required to be published in the Federal Register within 45 days after the beginning of each fiscal year. The Secretary has delegated this responsibility to the OHA Director.

Notice is hereby given that based on currently available information, $40,616,459.94 is in excess of the amount that is needed to make restitution to injured parties.

To arrive at that figure, the OHA has reviewed all accounts in which moneys covered by PODRA are deposited. PODRA generally covers all funds now in DOE escrow which are derived from alleged violations of the EPAA or the ESA, with certain exclusions. Excluded are funds which (1) have been identified for indirect restitution in orders issued prior to enactment of PODRA; (2) have been identified for direct restitution in a judicial or administrative order; or (3) are attributable to alleged violations of regulations governing the pricing of crude oil and subject to the settlement agreement in *In re The Department of Energy Stripper Well Exemption Litigation*, M.D.L. No. 378 (D. Kan., July 7, 1986). As of September 30, 1989, the total amount subject to the PODRA procedures was $434,390,105.84.

The OHA has employed the following methodology to determine the excess amount of funds subject to PODRA. We took special account of the provision of PODRA which directs that "primary consideration [be given] to assuring that at all times sufficient funds (including a reasonable reserve) are set aside for making [direct] restitution." Thus, in proceedings in which refund claims are pending, we have on a claim-by-claim basis examined pending claims and established reserves sufficient to pay the entire amount of all claims. The amount of those reserves also includes all refunds ordered by the OHA since the end of the last fiscal year on September 30, 1989. For proceedings in which all claims have been considered or in which no claims have been filed, and the deadline for filing claims has passed, all funds remaining are excess. Small amounts of interest accrued, until transfer, on funds in accounts that were closed (with a zero balance) in the fiscal year 1989 PODRA determination (53 FR 45378 (1988)) are included as part of the "excess" for fiscal year 1990. In accordance with § 3002(c)(3) of PODRA, escrowed amounts are not deemed "excess" where they were designated, prior to the enactment of PODRA, for disbursement to specific persons or classes of persons as indirect restitution. In addition, a relatively small amount of oil overcharge funds is currently subject to the control of the Department's Economic Regulatory Administration, which finds, as it has found in the past, that none of those funds are currently excess. No "other commitments" are reflected in the reserves. On October 10, 1989, the OHA issued a proposed decision tentatively granting a refund claim from the Century Refining subaccount in excess of the reserve established for that subaccount in the fiscal year 1987 PODRA determination. We have made an adjustment in this notice to increase the amount of the Century Refining subaccount reserve in anticipation of paying that claim.

As indicated above, the total escrow account equity subject to PODRA is $434,390,105.84. The total amount needed as reserved for direct restitution in those cases is $393,773,645.90. When this figure is subtracted from the former, the remainder—$40,616,459.94—is the amount in fiscal year 1990 that is "in excess" of the amount that will be needed to make restitution to injured persons. Appendix A sets forth for each refund case within the OHA's jurisdiction the total product equity eligible for distribution under PODRA, the amount reserved for direct restitution, and the "excess" amount. Appendix B reflect information supplied by the Economic Regulatory Administration regarding cases subject to PODRA under its jurisdiction.

Accordingly, $40,616,459.94 will be transferred to a separate account within the United States Treasury and made available to the States for use in the four designated energy conservation programs in the manner prescribed by PODRA.

Dated: November 7, 1989.

George B. Breznay,

Director, Office of Hearings and Appeals.

VOL 54 ISS 217 NO 13 1989 UMI

VOL 54 ISS 217 NOV 13 1989 UMI

Appendix B

October 16, 1989.

Memorandum for George B. Breznay,
Director, Office of Hearings and Appeals.
From: Chandler L. Van Orman,
Administrator, Economic Regulatory Administration.
Subject: ERA Input for the PODRA Section 303(c) Report.

We have completed our review of the funds held in escrow as of September 30, 1989, which have not been petitioned under Subpart V. This review was to identify the escrow amount in excess of that necessary to make restitution to persons or classes of persons in accordance with section 3003(b)(1) of the Petroleum Overcharge Distribution and Restitution Act of 1986. Once final payments are made into an escrow account, a Subpart V petition is filed with your office. Consequently, the escrow accounts that we have examined still have balances due. Many of these accounts are for firms in bankruptcy or have been referred to the Department of Justice for collection. Since the extent of possible claims and amounts that will be available to satisfy the claims are not known at this time, it would be inadvisable to consider any of the funds excess.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; Part of Galveston Terminal Agreement

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200302

Title: Port of Galveston Terminal Agreement.

Parties: Port of Galveston (Port), Companhia Maritima Nacional (CMN).

Synopsis: The Agreement provides that CMN vessels shall be granted a container berth and two container cranes at the Port's East End Container Terminal, Port of Galveston. The Port agrees to maintain a Galveston to Houston to Galveston shuttle service at $33.00 per one-way move for 12 months. Should CMN's service provide less than 7,500 annual moves, the Port may, at the end of the 12 month period, increase the $33.00 charge to $40.00 per move. Rates and charges will be those provided in the Port's Container Terminal Tariff 1-B.

By Order of the Federal Maritime Commission.

Dated: November 6, 1989.

Joseph C. Polking,
Secretary.

FEDERAL RESERVE SYSTEM

Agency Forms under Review

November 6, 1989.

Background

Notice is hereby given of final approval of proposed information collection(s) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.9 (OMB Regulation on Controlling Paperwork Burdens on the Public).

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer: Frederick J. Schroeder—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3822)

OMB Desk Officer: Gary Waxman—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503 (202-395-7340)

Final Approval Under OMB Delegated Authority Of The Implementation Of The Following Report

1. Report title: Survey of Currency Handling Practices of Depository Institutions.
Agency form number: FR 3060.
OMB Docket number: 7100-0241.
Frequency: One-time.
Reporters: Commercial banks, savings and loan associations, and credit unions in the U.S.
Annual reporting hours: 1384.
Estimated average hours per response: 1.5.
Number of respondents: 923.
Small businesses are affected.
General description of report:

This survey is voluntary [12 U.S.C. 248(d)] and is given confidential treatment [5 U.S.C. 552(b)(4)].

The survey will provide a general assessment of the costs incurred by depository institutions in the handling of United States paper currency, with particular attention to the effects of currency quality on handling costs. This survey will also determine the probable effects on depository institution currency handling costs that would be associated with changes in the quality of currency paid out by the Federal Reserve System.

Board of Governors of the Federal Reserve System, November 6, 1989.

William W. Wiles,
Secretary of the Board.

BILLING CODE 6210-01-M

Fleet/Norstar Financial Group, Inc., Providence, RI; Proposal To Conduct Private Placements as Agent of All Types of Securities and Engage in Investment Advisory and Full Service Brokerage Activities

Fleet/Norstar Financial Group, Inc., Providence, Rhode Island, and its wholly-owned subsidiary, Fleet/Norstar New York, Inc., Albany, New York (together "Fleet/Norstar"), have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.23(a)(3) of the Board's Regulation Y (12 CFR 225.23(a)(3)), for permission to engage through their wholly owned subsidiary, Adams McEntee, Fleet Norstar Securities, Inc., New York, New York ("Company"), in the placement, as agent for issuers, of all types of securities (not including securities that are registered under the Securities Act of 1933), and providing investment advisory services. Fleet/Norstar is proposing that Company will engage in these activities on a nationwide basis.

Fleet/Norstar is currently authorized to engage indirectly in providing discount brokerage services, as well as underwrite and deal in obligations of the United States, general obligations of states and their political subdivisions, and other obligations that state member banks are authorized to underwrite and deal in under 12 U.S.C. 24 and 335. Fleet/Norstar is also authorized to engage through Company in underwriting and dealing to a limited extent in commercial paper and certain municipal revenue bonds.

Fleet/Norstar proposes to provide investment advisory services as permitted by 12 CFR 225.25(b)(4), as well as providing investment advisory and brokerage services on a combined basis subject to all of the conditions of 12 CFR 225.25(b)(15), *Bank of New England Corporation,* 74 Federal Reserve Bulletin 700 (1988), and *PNC Financial Corp.,* 75 Federal Reserve Bulletin 386 (1989), including brokering and recommending to both institutional and retail customers bank-eligible securities in which Company has a principal's position. Fleet/Norstar has stated that Company will not trade as principal in this situation with respect to bank-ineligible securities.

Fleet/Norstar has also applied to engage, through Company, in the placement, as agent for issuers, of all types of securities within the following limitations: (i) Company will act only as agent, without recourse, solely upon the order and for the account of clients, and will not assume market risk with respect to the securities being placed; (ii) Company will place securities only with a minimum purchase price that meets the requirements of the Securities and Exchange Commission's ("SEC") Regulation D (17 CFR 230.501-506); (iii) Company will place securities only with a limited number of financially sophisticated institutions and individuals who meet the standards for sophisticated investors contained in the SEC's Regulation D; (iv) Company will not offer securities to the general public or make any general solicitation or advertisement of the securities it places; (v) Company will not simultaneously provide placement services and underwriting services respecting the same securities for the same issuer.

Company and its affiliates will also abide by the conditions numbered 2-16 and 18-20 contained in the Board's Order authorizing Fleet/Norstar to underwrite and deal to a limited extent in certain securities, as if references in such conditions to securities underwritten or distributed and to underwriting and distribution were references to securities privately placed and to private placement, as the context may require. *Fleet/Norstar Financial Group, Inc.,* 74 Federal Reserve Bulletin 619 (1988). *See also Citicorp, J.P. Morgan & Co., Incorporated, and Bankers Trust New York Corporation,* 73 Federal Reserve Bulletin 473, 503 (1987). Fleet/Norstar has also agreed to abide by condition number 17 contained in the Board's Order noted above, in a manner consistent with the Board's recent modification of that condition. *Order Approving Modifications to Section 20 Orders,* 75 Federal Reserve Bulletin _____ (Order dated September 21, 1989).

The Board has not previously determined that the proposed combination of activities is permissible under section 4(c)(8) of the Bank Holding Company Act. Section 4(c)(8) provides that a bank holding company may, with Board approval, engage in any activity "which the Board after due notice and opportunity for hearing has determined (by order or regulation) to be so closely related to banking as to be a proper incident thereto." Fleet/Norstar

VOL 54 ISS 217 NO 13 1989 UMI

maintains that the proposed placement activities are closely related to banking because banks generally provide private placement services.

In determining whether an activity is a proper incident to banking, the Board must consider whether the proposal may "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Fleet/Norstar contends that permitting Company to engage in the proposed activities would enhance competition and help make Company a stronger participant in the private placement market. Fleet/Norstar maintains that approval of its proposal would result in increased efficiencies for Fleet/Norstar as well as increased convenience for customers. Furthermore, states Fleet/Norstar, any potential adverse effects or conflicts of interest that might be said to arise from the proposed activities are adequately addressed by the commitments noted above, as well as the disclosure obligations and antifraud provisions of the various federal securities laws, and the anti-tying provisions of various banking and antitrust statutes including the Bank Holding Company Act and the Federal Reserve Act.

Fleet/Norstar further contends that approval of the application would not be barred by section 20 of the Glass-Steagall Act (12 U.S.C. 377), relying on *Securities Industry Ass'n* v. *Board of Governors*, 807 F.2d 1052 (D.C.Cir. 1986), *cert. denied*, 107 S.Ct 3228 (1987).

Any request for a hearing on this application must comply with § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)).

The application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Boston.

Any comments or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than November 30, 1989.

Board of Governors of the Federal Reserve System, November 6, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Ameritrust Corp., et al., Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than November 27, 1989.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Ameritrust Corporation*, Cleveland, Ohio; to acquire MVestment Corp, Dallas, Texas, and its wholly-owned subsidiaries, MTrust Corp, National Association, Dallas, Texas; MSecurities Corp, Dallas, Texas, and Houston, Texas; MRealty Corp, Dallas, Texas, and Houston, Texas, and MPetroleum Corp, Dallas, Texas, and thereby engage in trust company activities pursuant to § 225.25(b)(3); investment advisory activities pursuant to § 225.25(b)(4); real estate appraisal activities pursuant to § 225.25(b)(13); and arranging real estate equity financing pursuant to § 225.25(b)(14) of the Board's Regulation Y.

2. *PNC Financial Corp*, Pittsburgh, Pennsylvania; through BHC Holding, Inc., Philadelphia, Pennsylvania, a 19.97 percent owned subsidiary of Provident National Investment Corporation, a wholly-owned subsidiary of PNC; to acquire Lomas Securities USA, Inc., Houston, Texas, and thereby engage in securities brokerage activities pursuant to § 225.25(b)(15); and acting as investment or financial advisor pursuant to § 225.25(b)(4) of the Board's Regulation Y.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Donnelly Bancshares, Inc.*, Donnelly, Minnesota; to acquire Farmers & Merchants Insurance Agency, Donnelly, Minnesota, and thereby engage in general insurance agency activities in a town with a population of less than 5,000 pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. These activities will be conducted in Donnelly, Minnesota, and surrounding areas.

Board of Governors of the Federal Reserve System, November 6, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies; Central Capital Corp

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than November 27, 1989.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Central Capital Corp.*, Halifax, Nova Scotia, Canada, and Central Guaranty Trustco Ltd., Toronto, Ontario, Canada; to acquire 19.9 percent of the voting shares of U.S. Trust Corporation, New York, New York, and thereby indirectly acquire United States Trust Company of New York, New York, New York, and United States Trust Company of Florida, N.A., Palm Beach, Florida.

B. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas, 75222:

1. *The Stribling Family Trust*, San Angelo, Texas; to acquire 20 percent of the voting shares of Eden Financial Corporation, San Angelo, Texas, and thereby indirectly acquire The Eden State Bank, San Angelo, Texas.

Board of Governors of the Federal Reserve System, November 6, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

BMR Financial Group, Inc., et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than November 30, 1989.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street NW., Atlanta, Georgia 30303:

1. *BMR Financial Group, Inc.*, Atlanta, Georgia; to acquire 100 percent of the voting shares of Meigs County Bancshares, Inc., Decatur, Tennessee, and thereby indirectly acquire Meigs County Bank, Decatur, Tennessee.

2. *Dahlonega Bancorp, Inc.*, Dahlonega, Georgia; to merge with First Union Bancorp, Inc., Blairsville, Georgia, and thereby indirectly acquire First National Bank of Union County, Blairsville, Georgia.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Hogue Holding Company, Inc.*, Weiner, Arkansas; to become a bank holding company by acquiring at least 80 percent of the voting shares of Bank of Weiner, Weiner, Arkansas.

C. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *First Security Corporation*, Salt Lake City, Utah; to acquire 100 percent of the voting shares of United Savings Bank, Salem, Oregon.

Board of Governors of the Federal Reserve System, November 6, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Stichting Amro et al.; Proposal To Act as Riskless Principal in Buying and Selling Securities

Stichting Amro and Amsterdam-Rotterdam Bank N.V., both of Amsterdam, the Netherlands, have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.23(a) of the Board's Regulation Y (12 CFR 225.23(a)), to act as riskless principal in buying and selling securities through Henry Krieger/DBI, L.P., New York, New York, in connection with Henry Krieger/DBI's securities brokerage activities. *See* 54 **Federal Register** 40,521 (1989). Applicants propose to conduct these activities on a worldwide basis.

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with Board approval, engage in any activity "which the Board after due notice and opportunity for hearing has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Board has previously determined that acting as a riskless principal is closely related to banking and a proper incident thereto. Bankers Trust New York Company, 75 Federal Reserve Bulletin _____ 1989) (Order dated October 30, 1989) ("Bankers Trust"). Applicants have applied to conduct riskless principal activities through Henry Kreiger/DBI, L.P. in accordance with the limitations set forth in Bankers Trust.

Applicants believe the proposed activity will benefit the public by resulting in increased convenience to customers and in increased efficiencies for Henry Kreiger/DBI, L.P.

Any comments or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than November 28, 1989. Any request for a hearing on this applicant must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of the reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, November 7, 1989

Jennifer Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Advisory Committee; Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meeting and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

MEETING: The following advisory committee meeting is announced:

VOL 54 ISS 217 NO 13 1989 UMI

Anti-Infective Drugs Advisory Committee

Date, time, and place

November 28 and 29, 1989, 8 a.m., Conference Rm. D, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person

Closed presentation of data, November 28, 1989, 8 a.m. to 11:30 a.m.; open committee discussion, 1:30 p.m. to 4:30 p.m.; open public hearing, November 29, 1989, 8 a.m. to 9 a.m., unless public participation does not last that long; open committee discussion, 9 a.m. to 10:30 a.m.; closed presentation of data, 10:30 a.m. to 2:30 p.m.; Thomas E. Nightingale, Center for Drug Evaluation and Research (HFD–6), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5455.

General function of the committee

The committee reviews and evaluates available data on the safety and effectiveness of marketed and investigational human drugs for use in infectious diseases.

Agenda—Open public hearing

Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before November 14, 1989, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion

On November 28, 1989, the committee will discuss: (1) The use of fluorophotometry as an endpoint for ocular inflammation; and (2) blepharitis as an indication for ocular quinalones. On November 29, 1989, the committee will discuss treatment of traveler's diarrhea with trimethoprim/sulfamethoxazole.

Closed presentation of data

On November 28, 1989, the committee will discuss trade secret and/or confidential commercial information on new drug application (NDA) 19–879. On November 29, 1989, the committee will review trade secret and/or confidential commercial information on NDA 50–637 and investigational new drug 21,804. These portions of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this Federal Register notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

Details on the agenda, questions to be addressed by the committee, and a current list of committee members are available from the contact person before and after the meeting. Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI–35), Food and Drug Administration, Rm. 12A–16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (Pub. L. 94–409), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably, deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (5 U.S.C. App. I), and FDA's regulations (21 CFR part 14) on advisory committees.

Dated: November 2, 1989.

James S. Benson,

Acting Deputy Commissioner of Food and Drugs.

BILLING CODE 4160–01–M

Health Care Financing Administration

Reconsideration of Disapproval of New York State Plan Amendment; Hearing

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on December 20, 1989 in New York, New York to reconsider our decision to disapprove New York State Plan Amendment (SPA) 88–4.

Closing Date: Requests to participate in the hearing as a party must be received by the Docket Clerk November 28, 1989.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, HCFA Hearing Staff, 300 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone: (301) 966–4471.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove the effective date of the dementia provisions of New York State plan amendment (SPA) number 88–4.

Section 1116 of the Social Security Act and 42 CFR part 430 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid Agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues that will be considered at the hearing, we will also publish that notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained in 42 CFR 430.76(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained in 42 CFR 430.76(c).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

New York SPA 88–4 would revise the methods and standards for determining payment rates for residential health care facilities under the State's resource utilization groups (RUG) long-term care reimbursement methodology. Specifically, this amendment contains four revisions to the RUG long-term care reimbursement methodology. They include: (1) reimbursement for services provided to head-injured patients; (2) reimbursement for services provided to dementia patients; (3) change in the indirect ceiling corridor; and (4) continuation of the patient review instrument (PRI) process. The State of New York has requested an effective date of January 1, 1988. The issue in this matter is whether New York's requested effective date of January 1, 1988 for the dementia provisions in SPA 88–4 violates the requirements of Federal regulations at 42 CFR 430.12(c), 42 CFR 447.253(f) and 42 CFR 447.205.

Federal regulations at 42 CFR 430.12(c) require a State plan to be amended to reflect new or revised Federal statutes, regulations, policy interpretations and court decisions or material change in any phase of State law, organizaiton, policy, or State agency operation. However, in accordance with Federal regulations at 42 CFR 447.253(f), the Medicaid agency must comply with the public notice requirements in § 447.205 when it is proposing significant changes to its methods and standards for setting payment rates for inpatient hospital or long-term care facility services. Section 447.205(d) requires that the notice be published before the proposed effective date of the change. Section 447.205 (c) and (d) set forth additional requirements regarding the content and publication of the notice.

The State's letter dated March 25, 1988, to Mr. William Toby, New York Regional Administrator, provided a list of the publication dates of the various changes contained in this amendment. Specifically, the change in the indirect ceiling corridor was published on September 2, 1987. Provisions concerning the reimbursement of services provided to head-injured patients were published on October 28, 1987. On December 30, 1987, the State published a notice concerning the continuation of the PRI process. Provisions concerning the reimbursement of services provided to dementia patients were published on January 20, 1988. However, the State requested an effective date of January 1, 1988, for this amendment.

In a letter to the State requesting additional information on this amendment dated May 19, 1988, HCFA advised New York that since the provisions concerning reimbursement for dementia patients were not published until January 20, 1988, the earliest possible effective date for the dementia provisions was January 21, 1988, and not January 1, 1988, as proposed. In the State's response dated April 26, 1989, the State supported its request for a January 1, 1988, effective date for the dementia provisions based on the notice of emergency adoption, which was filed with the Secretary of the State of December 31, 1987. The State contends that this filing of the notice of emergency adoption constitutes effective public notice on December 31, 1987, rather than January 20, 1988, the date on which the notice was actually published in the State register. HCFA disagrees with the State's position. Federal regulations at § 447.205(d)(1) require that the notice actually be published *before* the proposed effective date of the change. Similarly, § 447.205(d)(2) requires that the notice appear as a public announcement in a State register or a newspaper. Because the actual date of publication in the State register was January 20, 1988, HCFA believes the effective date cannot be until January 21, 1988.

The plan amendment was submitted by the State of New York on October 6, 1988, together with assurances and related rate information. the State published public notice which met the requirements of 42 CFR 447.205 for all provisions except the dementia provisions prior to January 1, 1988. Public notice of the dementia provisions

was not published until January 20, 1988. Accordingly, HCFA approved this amendment with an effective date of January 1, 1988 for all provisions other

Dated: November 3, 1989.

Louis B. Hays,

Acting Administrator, Health Care Financing Administration.

to the penalties provided in 43 CFR 8340.0–7 and 43 CFR 9262.1 which include a fine not to exceed $1,000.00 and/or imprisonment not to exceed 12

and burros, and 7,800 AUMs for big game (competitive forage only); improvement in wetland, aquatic and playa habitat; aggressive management of special status plant and animal

INTERSTATE COMMERCE COMMISSION

Intent to Engage in Compensated Intercorporate Hauling Operations

U.S.C. 378a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the

VOL 54 ISS 217 NO 13 1989 UMI

was not published until January 20, 1988. Accordingly, HCFA approved this amendment with an effective date of January 1, 1988 for all provisions other than the dementia provisions. HCFA approved the dementia provisions with an effective date of January 21, 1988, the day following the publication of the State's notice.

The notice to New York announcing an administrative hearing to reconsider the disapproval of the effective date of the dementia provisions of its State plan amendment reads as follows:

Mr. Cesar A. Perales,
Commissioner, New York Department of Social Services, 40 North Pearl Street, Albany, New York 12243

Dear Mr. Perales: I am advising you that your request for reconsideration of the decision to disapprove the effective date of the dementia provisions of New York State plan amendment 88-4 was received on October 5, 1988.

This amendment would revise the methods and standards for determining payment rates for residential health care facilities under the State's resource utilization groups (RUG) long-term care reimbursement methodology. Specifically, this amendment contains four revisions to the RUG long-term care reimbursement methodology. They include: (1) reimbursement for services provided to head-injured patients; (2) reimbursement for services provided to dementia patients; (3) change in the indirect ceiling corridor; and (4) continuation of the patient review instrument process. The State of New York has requested an effective date of January 1, 1988.

The issue in this matter is whether New York's requested effective date of January 1, 1988 for the dementia provision of SPA 88-4 violates the requirements of Federal regulations at 42 CFR 430.12(c), 42 CFR 447.253(f) and 42 CFR 447.205.

I am scheduling a hearing on your request to be held on December 20, 1988 at 10 a.m. in Room 238, 26 Federal Plaza, New York, New York. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties. The hearing will be governed by the procedures prescribed in 42 CFR Part 430. I am designating Mr. Stanley Krostar as the presiding officer.

If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (301) 966-4471.

Sincerely,

Louis B. Hays,
Acting Administrator.

(Section 1116 of the Social Security Act (42 U.S.C. 1316); 42 CFR 430.18)

(Catalog of Federal Domestic Assistance Program No. 13.714, Medicaid Assistance Program)

Dated: November 3, 1989.

Louis B. Hays,
Acting Administrator, Health Care Financing Administration.

BILLING CODE 4120-03-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[OR-100-07-6332-02; GPO-037]

Travel Restrictions; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Establishment of travel restrictions for the North Umpqua Trail and adjacent areas on the Public Lands, Roseburg District, Oregon.

SUMMARY: The North Umpqua Trail is closed to motorized travel on Bureau of Land Management lands from Swiftwater Bridge to Fox Creek except for emergency and maintenance use. Pedestrian, equestrian and non-motorized mountain bike travel is authorized.

Maintenance or emergency use of motorized vehicles on the North Umpqua Trail shall be made only with the approval of the District Manager, Area Manager or their authorized representative.

The only other exception shall be for electric wheel chair travel by the physically disabled where such travel is possible and prudent.

Additionally, BLM lands south of the North Umpqua River and west of forest Road No. 26-3-1.1 in section 1, T. 26 S., R. 3 W., and E½NE¼, section 11, T. 26 S., R. 3 W., W.M., are closed to motorized vehicle use and travel by horse and mule.

DATE: These travel restrictions shall be effective December 1, 1989, and shall remain in effect until further notice.

FOR FURTHER INFORMATION CONTACT: North Umpqua Resource Area Manager, Bureau of Land Management, 777 NW Garden Valley, Roseburg, OR 97470. Telephone (503) 672-4491.

SUPPLEMENTARY INFORMATION: These travel restrictions are being established in order to reduce damage to the North Umpqua Trail and to cultural resources along the North Umpqua River on lands administered by the Roseburg District of the Bureau of Land Management. Authority for these travel restrictions are contained in CFR title 43, chapter 8340, parts 8340.0-8, subparts 8341, 8341.1(c) and 8341.2(a).

Persons who fail to comply with the provisions of this closure may be subject to the penalties provided in 43 CFR 8340.0-7 and 43 CFR 9262.1 which include a fine not to exceed $1,000.00 and/or imprisonment not to exceed 12 months.

Dated: November 3, 1989.

James A. Moorhouse,
District Manager.

BILLING CODE 4310-33-M

[OR 020-4410-10; GPO-0-028]

Notice of Availability of Draft Resource Management Plan and Environmental Impact Statement; Three Rivers Planning Area, Burns District, Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Availability.

SUMMARY: Notice is hereby given of the availability of the Draft Three Rivers Resource Management Plan/Draft Environmental Impact Statement (RMP/EIS) for 1.7 million acres of public land and federal subsurface mineral estate administered by BLM within Harney, Grant, Lake and Malheur Counties in eastern Oregon.

SUPPLEMENTARY INFORMATION: This land use plan focuses on the principles of multiple use and sustained yield as prescribed by section 202 of FLPMA. The plan directs future resource condition objectives, resource and land use allocations, and specific management actions on BLM-administered lands within the Three Rivers Resource Area. Decisions conveyed through the plan are expected to be in effect for a period of 15 to 20 years.

The Draft RMP/EIS utilizes a range of five alternatives. These alternatives are: (a) Emphasize Natural Values; (b) Emphasize Natural Values with Commodity Production; (c) Preferred; (d) Emphasize Commodity Production with Natural Values (this is also the "No Action" or Continuation of Present Management Alternative); and (e) Emphasize Commodity Production. The Preferred Alternative was developed to represent the best estimate of an optimum multiple use mix of land management commitments for these BLM-administered lands. Under the Preferred Alternative, the BLM proposes improvement of water quality on 115 miles of stream; average annual timber harvests of 57.6 MBF from 8,283 acres of commercial forestland; forage allocations of 139,851 AUMs for livestock, 5,808 AUMs for wild horses and burros, and 7,800 AUMs for big game (competitive forage only); improvement in wetland, aquatic and playa habitat; aggressive management of special status plant and animal species; administration of 17,176 acres as Special Recreation Management Areas; designation of 5.4 miles and 1,730 acres for inclusion in the National Wild and Scenic Rivers System as a Wild River; retention of 17,456 acres, and addition of 43,539 acres as ACECs. A total of 38,523 acres of public land would be considered for disposal through exchange or sale over the planning period; provisions would be made for mineral exploration and development; and air, soil and recreation resources would be protected. This document also serves as the draft environmental impact statement requirement for the Wild and Scenic River(s) Act.

DATES AND ADDRESSES: The Three Rivers Draft RMP/EIS 90-day public review and comment period will end on February 1, 1990. BLM encourages interested or affected parties to provide comments. Comments are most useful when they address one or more of the following: (1) errors in the analysis that has been performed; (2) new information that would have a bearing on the analysis; (3) a substantive new alternative not within the range of alternatives considered; (4) need for clarification; and (5) misinformation that may have been utilized and could affect the outcome of the analysis. Interested parties who wish to submit written comments are requested to send them to: Three Rivers RMP/EIS, Bureau of Land Management, HC 74-12533, Highway 20 West, Hines, Oregon 97738. Two informal public meetings have been scheduled to receive comments on the Draft RMP/EIS. They will be held December 4, 1989 at 7 p.m. at the Burns District Office, Hines, Oregon; and December 5 at 7 p.m. at the Bend Riverhouse Motor Inn, Bend, Oregon. All substantive comments received during the 90-day comment period will be analyzed and considered in the preparation of the Three Rivers Proposed RMP/Final EIS.

FOR FURTHER INFORMATION CONTACT: Jay Carlson, Planning Team Leader, Bureau of Land Management, Burns District, telephone (503) 573-5241.

Dated: October 24, 1989.

Donald R. Cain,
Associate District Manager.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination; Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Act". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 3rd day of November 1989.

Alan L. Moss,
Director, Division of Wage Determinations.

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Labor Research Advisory Council; Notice of Meetings and Agenda

The Fall meetings of committees of the Labor Research Advisory Council will be held on November 28, 29, and 30.

The Labor Research Advisory Council and its committees advise the Bureau of Labor Statistics with respect to technical matters associated with the Bureau's programs. Membership consists of union research directors and staff members. The schedule and agenda of the meetings are as follows:

Tuesday, November 28, Room 2437—General Accounting Office, Building—441 G Street, NW., Washington, DC

9:30 a.m.—Committee on Prices and Living Conditions

1. Office of Field Operations, overview
2. Status Reports
   a. International prices
   b. Producer prices
3. Medical care (continued)
4. Other business

1 p.m.—Cognitive Lab Demonstration

(Council members will be invited to participate in testing a new Consumer Expenditure Survey questionnaire.)

2 p.m.—Committee on Employment and Unemployment Statistics

1. Status of the budget situation for labor force statistics
2. Redesign of the Current Population Survey
3. Business Establishment List project
4. Changes in the mass layoff report program
5. Legislation affecting job vacancy statistics
6. Other business

Wednesday, November 29

9:30 a.m.—Committee on Wages and Industrial Relations, Room S-2217 Frances Perkins Building

1. Review of work in progress
2. White-Collar Pay program: 1989 survey results and plans for the 1990 survey
3. Highlights from the 1988 Employee Benefits Survey and plans for the 1990 survey
4. Employment Cost Index: A change in the base year
5. Other business

1:30 p.m.—Committee on Foreign Labor and Trade, Room S-2217, Frances Perkins Building

1. Comparative measures of GDP per capita and per employed person
2. Comparisons of manufacturing hourly compensation
3. Comparisons of labor force, employment, and unemployment

2:30 p.m.—Committee on Productivity, Technology, and Economic Growth—Room S-2217, Frances Perkins Building

1. The newly revised projections for the labor force and employment to the year 2000

Thursday, November 30

9:30 a.m.—Committee on Occupational Safety and Health Statistics—Room S-2217, Frances Perkins Building

1. 1988 annual survey results
2. Program redesign, status report
   a. Pilot projects
   b. Guidelines
   c. Illnesses
   d. Fatalities
   e. Fiscal Year 1990 funding
3. Work injury reports
4. Supplementary data system
5. Other business

The meetings are open. It is suggested that persons planning to attend as observers contact Henry Lowenstern, Executive Secretary, Labor Research Advisory Council on (Area Code 202) 523-1327.

Signed at Washington, DC this 3rd day of November 1989.

Janet L. Norwood,
Commissioner of Labor Statistics.

BILLING CODE 4510-24-M

Pension and Welfare Benefits Administration

Employee Retirement Income Security Act Annual Reports; Compliance With Reporting Requirements

The U.S. Department of Labor will not reject until 1990 annual financial reports by employee benefit plans solely because administrators report realized and unrealized gains or losses using an historical cost approach rather than current value approach.

The reports, called the Form 5500 Series, are required to be filed by employee benefit plans covered under the Employee Retirement Income Security Act of 1974 (ERISA).

The department's decision is in response to a request from the American Bankers Association (ABA) concerning the inability of many banks and other employee benefit service providers to provide plan administrators the information in accordance with clarifying instructions to the 1988 Form 5500.

The instructions accompanying the 1988 form clarify that realized and unrealized gains and losses are to be determined against the current value of the assets as of the beginning of the plan year, as carried forward from the end of the prior plan year.

In a letter to the department, the ABA indicated that many banks and other employee benefit service providers have been determining realized and unrealized gains and losses on the basis of historical cost. Because of programming changes required to accommodate the instructions and the due date of the annual reports, many banks and service providers, according to the ABA, will be unable to provide employee benefit plan clients with the information necessary to comply.

The ABA also expressed concern that many filers may be unaware of the instructions and inadvertently report incorrect information. The ABA has asked the department not to issue deficiency notices for the 1988 annual report and further requested that for subsequent years the historical cost approach be permitted in determining realized and unrealized gains and losses.

In the department's response, dated July 3, 1989, Robert J. Doyle, director of regulations and interpretations for the Pension and Welfare Benefits Administration, noted that "it has long been the view of the department that, consistent with the current value reporting requirements of the Form 5500, realized and unrealized gains and losses are required to be determined against the current value of the assets of the plan as of the beginning of the plan year." He also stressed that the department continues to believe that the reporting of this information on a current value basis provides more accurate data concerning the investment performance of a plan during the plan year.

"For this reason," he added, "the department does not intend to modify the current value reporting requirements applicable to determining realized and unrealized gains and losses."

However, in view of the apparent confusion concerning the reporting of this information and the fact that the 1988 forms were not published in the Federal Register until March 1, the department decided it would not reject annual report filings for the 1989 and 1988 plan years solely because the administrator of a plan determines realized and unrealized gains and losses using an historical cost approach consistent with that utilized by the plan for the 1987 plan year annual report.

For plan years beginning on or after January 1, 1990, all plan administrators will be expected to comply with the instructions to the Form 5500 relating to the use of current value.

FOR FURTHER INFORMATION CONTACT: Gloria Della, telephone (202) 523-8921.

Signed at Washington, DC, this 1st day of November, 1989.

Alan D. Lebowitz,
Deputy Assistant Secretary for Program Operations, Pension and Welfare Benefits Administration.

BILLING CODE 4510-29-M

NUCLEAR REGULATORY COMMISSION

Maine Yankee Atomic Power Co.; Maine Yankee Atomic Power Station; Environmental Assessment and Finding of No Significant Impact

[Docket No. 50-309]

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-36 issued to Maine Yankee Atomic Power Company (the licensee) for operation of the Maine Yankee Atomic Power Station located in Lincoln County, Maine.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would modify the Technical Specifications to reflect current knowledge of the Reactor Pressure Vessel (RPV) fast neutron fluences (E greater than 1.0 Mev.) and materials properties. The proposed amendment would also incorporate revised 10 CFR 50 Appendix G limits. Included are changes for:

- Revised fluence projections which reflect results of measurements and flux reduction achieved in refueling cycle 8.
- Revised damage predictions which reflect the results of measurements and the application of Regulatory Guide (R.G.) 1.99, Revision 2.
- Revised Pressure-Temperature (P/T) limits developed following the requirements of 10 CFR 50 Appendix G.

The proposed action is in accordance with the licensee's application for amendment dated December 2, 1988.

The Need for the Proposed Action

The proposed change to the TS will incorporate the guidance provided in Revision 2 to Regulatory Guide 1.99, "Radiation Embrittlement of Reactor Vessel Materials," which became effective May 1988 and was discussed in Generic Letter 88-11, "NRC Position on Radiation Embrittlement of Reactor Vessel Materials and its Impact on Plant Operations."

VOL 54 ISS 217 NO 13 1989 UMI

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revisions to the TS. The proposed revisions provide up-to-date pressure/temperature limits for the operation of the reactor coolant system during heatup, cooldown, criticality, and hydrotest. These limits provide protection against pressurized thermal shock of the reactor vessel, thereby cntributing to safety. The proposed changes do not increase the probability or consequences of any accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact.

With regard to potential non-radiological impacts, the proposed change to the TS involve systems located within the restricted area as defined in 10 CFR part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendment.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the Federal Register on January 23, 1989 (54 FR 3167). No request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Maine Yankee Atomic Power Station, dated July 1972.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated December 2, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the Wiscasset Public Library, High Street, P.O. Box 367, Wiscasset, Maine 04578.

Dated at Rockville, Maryland, this 3rd day of November 1989.

For the Nuclear Regulatory Commission.

Richard H. Wessman,

Director, Project Directorate I-3, Division of Reactor Projects I-II, Office of Nuclear Reactor Regulation.

[FR Doc. 89-26565 Filed 11-9-89; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Revised Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on November 16–18, 1989 in Room P–110, 7920 Norfolk Avenue, Bethesda, Maryland. Notice of this meeting was published in the Federal Register on October 31, 1989 (54 FR 45629). This revision is necessary due to an additional agenda item on Saturday, November 18.

Saturday, November 18, 1989

8:30 a.m.—12:30 p.m.: Preparation of ACRS Reports to the NRC (Open)—The Committee will discuss proposed ACRS reports to the NRC regarding items considered during this meeting and the scope/nature of the NRC regional activities.

Procedures for the conduct of and participation in ACRS meetings were published in the Federal Register on September 27, 1989 (54 FR 39594). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 301/492–8049), between 7:30 a.m. and 4:15 p.m.

Dated: November 6, 1989.

John C. Hoyle,

Advisory Committee Management Officer

[FR Doc. 89-26567 Filed 11-9-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-263]

Northern States Power Co., Issuance of Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has issued Amendment No. 72 to Facility Operating License No. DPR–22, issued to the Northern States Power Company (the licensee), which revised the Technical Specifications for operation of the Monticello Nuclear Generating Plant, located in Wright County, Minnesota. The amendment is effective as of the date of issuance.

The amendment (1) revises the reactor vessel pressure vs. temperature curves for consistency with Revision 2 of Regulatory Guide 1.99; (2) adds requirements for augmented inservice inspection of piping susceptible to intergranular stress corrosion cracking; and (3) revises the requirements for the periodic Type A containment integrated leak rate test to permit the use of the mass point test method approved by the Commission in a change to 10 CFR part 50, Appendix J, as published in the Federal Register on November 15, 1988 (53 FR 45891).

The licensee's application for the amendment dated March 31, 1989, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings, as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing in connection with this action was published in the Federal Register on June 1, 1989 (54 FR 23553). No request for hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to this action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see (1) the application for the amendment dated March 31, 1989, (2) Amendment No. 72 to License No. DPR–22, (3) the Commission's related Safety Evaluation and (4) the Environmental Assessment dated October 11, 1989 (54 FR 71701). All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the Minneapolis Public Library, Technology and Science Department, 300 Nicollet Mall, Minneapolis, Minnesota 55401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—III, IV, V and Special Projects.

Dated at Rockville, Maryland, this 2nd day of November 2, 1989.

For the Nuclear Regulatory Commission.

William O. Long,

Project Manager, Project Directorate III–1, Division of Reactor Projects—III, IV, V & Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Proposed Information Collection Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980, (44 U.S.C. chapter 35), this notice announces a request submitted to OMB for expedited clearance of a new form, OPM Form 1584, the U.S. Office of Personnel Management 1989 Geographic White-Collar Compensation Survey. The proposed form is to be used for a one-time occupational compensation survey conducted by Mercer, Meidinger, Hansen, Inc., under contract with OPM for research on alternative pay systems to the General Schedule. A sample of private and State and local government employers in 13 Metropolitan Statistical Areas will be surveyed to test survey techniques and to obtain current salary and bonus data by occupation in high, medium, and low cost cities. OPM plans to use the survey results as part of its effort to design systems for implementing a more market-sensitive pay system. Approximately 2,000 establishments are expected to complete the questionnaire form, and the form takes, on average, 4 hours to complete, for a total burden of 8,000 hours. For copies of this proposal, call Lawrence Dambrose (632–0199).

OPM is requesting that OMB clear OPM Form 1584 in 14 days. Following this notice please see a draft copy of the survey questionnaire, cover letter, and descriptions of 3 of the jobs to be surveyed.

DATE: November 23, 1989.

ADDRESSES: Send or deliver comments to: Joseph Lackey, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3002, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Barbara L. Fiss (202) 632–4346.

U.S. Office of Personnel Management.

Constance Berry Newman,

Director.

Draft

United States
Office of Personnel Management,
Washington, D.C. 20415

Company address
XXXXXXXXXXXXXXXX
XXXXXXXXXXXXXXXX

Dear Employer: The United States Office of Personnel Management (OPM) would appreciate your help and participation in a special compensation survey which is part of an important Federal personnel research project.

Currently, the Federal government pays its 1.4 million white-collar workers—in hundreds of occupations and locations—on a single national pay scale. The inflexibility of this monolithic pay structure increasingly handicaps Federal recruitment and retention efforts. As a result, OPM is studying the possibility of a more market-sensitive Federal pay system. The compensation survey being conducted under contract with Mercer Meidinger Hansen, Inc. (MMH), will test a new mix of survey jobs in specific geographic locations. This information will be invaluable in helping OPM to evaluate new approaches for future Federal pay reforms. Your participation will help assure broad representation of your local labor market.

MMH will be responsible for data collection, processing and analysis. All responses will be kept *strictly* confidential by MMH. A summary of the survey results will be provided to all participants *at no cost.*

We would appreciate your completing the enclosed survey questionnaire and returning it to MMH by **** (date). Please call the MMH Project Coordinator, Carl Bruno, at (312) 902–7822 with any survey questions. If you would like to learn more about the OPM pay research and reform initiative, feel free to contact Felicia Nathan Schwenk or Ruth O'Donnell of my staff at (202) 632–7184.

Thank you for your assistance in this important research effort.

Sincerely,

XXXXXXXXXXXXXXXXXXXX

Barbara L. Fiss, CCP,

Assistant Director for Pay and Performance.

Draft

The U.S. Office of Personnel Management 1989 Geographic White-Collar Compensation Survey Questionnaire—Participation Deadline: January 12, 1990 (William M. Mercer Meidinger Hansen Incorporated)

Why a Survey?

For many jobs the amount of pay received is a function of what you do (job content) and where you do it (location). As employers compete aggressively for talent across the country, the objective not to over or under-pay is paramount. Traditionally, many employers recognize geographic pay differences only for clerical and technical personnel. There is a growing concern that geographically-based pay programs should include many exempt positions, including professional, administrative and first-line supervisory jobs.

As a result, the need for accurate and reliable data is critical, today more than ever. The U.S. Office of Personnel Management (OPM) and Mercer Meidinger Hansen have decided to conduct a total cash compensation

survey in 13 locations for a selected sample of professional, administrative and technical jobs.

Administrative and Technical occupations, 20 job families have been selected. Included will be an entry-level position, 2 more senior positions and a

- salary range
- years of experience
- educational background
- degree of match

About OPM

The Office of Personnel Management (OPM) was created by the Civil Service Reform Act of 1978 when most of the

knowledge and skills, regardless of their race, religion, sex, political influence, or other nonmerit factors. The Office's role is to ensure that the Federal

this research is to design options for a more market-sensitive pay system. In lieu of the current practice of paying nationwide rates for most jobs. It is vital

VOL 54 ISS 217 NO 13 1989 UMI

survey in 13 locations for a selected sample of professional, administrative and technical jobs.

What Locations Will Be Surveyed?

This year's survey will collect data on the following metropolitan areas:

- San Francisco
- Los Angeles
- Atlanta
- Boston
- San Antonio
- Dayton
- Anchorage
- Washington
- Baltimore
- San Diego
- St. Louis
- Albuquerque
- Honolulu

What Types of Jobs Will Be Surveyed?

Within the Professional, Administrative and Technical occupations, 20 job families have been selected. Included will be an entry-level position, 2 more senior positions and a first-line supervisor. Examples of the survey job families include:

- Attorney
- Budget Analyst
- Computer Specialist
- Electrical Engineer
- Auditor
- Civil Engineer
- Personnel Specialist
- Registered Nurse
- Purchasing
- Quality Assurance

What Data Will Be Collected?

Simple basic cash compensation and background information will be asked. Included will be:

- base salary
- bonus
- salary range
- years of experience
- educational background
- degree of match

When Will the Survey Be Conducted and Report Published?

The survey questionnaries will be mailed in December and must be returned by January 12, 1990. The report will be mailed in March, 1990.

What type of Output Will I Receive?

Job Code: 017
Job Title: Attorney
Job Description: Responsible for handling a variety of moderately complex assigned legal projects. Typically has four to eight years experience after receiving law degree. Normally reports to a Managing Attorney.

How Much Does It Cost?

The survey report will be *free* to all participants.

Any Questions?

If you have any questions about the survey, please contact either Ruth O'Donnell at OPM (202) 632-7184 or Joyce Cain at Mercer Meidinger Hansen, (800) 333-3070.

About OPM

The Office of Personnel Management (OPM) was created by the Civil Service Reform Act of 1978 when most of the activities of the former United States Civil Service Commission were transferred to OPM. Its Director is appointed by and reports directly to the President.

OPM is responsible for government-wide personnel policy, guidance and assistance in the full range of human resource activities—recruiting, compensation and benefits, employee development and training, performance management, ethics and program evaluation. It administers a merit system for Federal employment that includes recruiting, examining, training, and promoting people on the basis of their knowledge and skills, regardless of their race, religion, sex, political influence, or other nonmerit factors. The Office's role is to ensure that the Federal Government provides an array of personnel services to applicants and employees. Through a range of programs designed to develop and encourage the effectiveness of the Government employee, the OPM supports Government program managers in their personnel management responsibilities and provides benefits to more than 2 million employees and to another 2 million annuitants.

As part of its broad directive, OPM is conducting research to reform the General Schedule pay system used for more than 1.4 million white-collar workers in more than 400 occupations throughout the world. A major thrust of this research is to design options for a more market-sensitive pay system, in lieu of the current practice of paying nationwide rates for most jobs. It is vital that OPM obtain survey information for selected Metropolitan Statistical Areas (MSA) as quickly as possible so staff research can be completed and a course of action recommended to the President.

I will participate. Please send me the questionnaire for the U.S. Office of Personnel Management 1989 Geographic White-Collar Compensation Survey.

General Instructions for the U.S. Office of Personnel Management 1989 Geographic White Collar Compensation Survey

OPM _____-__-____

This is the participation package for the 1989 U.S. Office of Personnel Management Compensation Survey. Instructions for completing the Individual Job Data Sheets are included. When you have finished completing the survey, please use the following checklist before submitting your Individual Job Data Sheets for processing.

Checklist: Have you . . .

- ☐ completed all items with an asterisk (*) (e.g., company name, address, name and title of person providing information, etc)?
- ☐ completed the appropriate sections for each location you are reporting?
- ☐ reproduced your participation package for your own files?

Mail your completed package to:

WILLIAM M. MERCER MEIDINGER HANSEN, INCORPORATED
THE NATIONAL SURVEY GROUP
1417 LAKE COOK ROAD
DEERFIELD, IL 60015

Participation Deadline is: January 12, 1990

If you have any questions on completing this form, please call Joyce Cain at Mercer Meidinger Hansen on (312) 948-7400, extension 2455.

Please complete this questionnaire only for employees at **this** facility. If you have other facilities in this metropolitan area, please duplicate this package and complete one for **each** facility. Please enter the appropriate address of **each** facility in the Company Information item below.

ORGANIZATION DATA

*1. Company Information 01

Company Name (22-57)

Address

City (58-78) | State (79-80) | ZIP Code

*1a. Individual Supplying Information: (This is the person Mercer Meidinger Hansen will contact to resolve any problem areas.) 02

Name (22-45)

Title (46-66)

Telephone Number Including Area Code (67-76) | Extension (77-80)

*2. What is the total number of jobs matched in this survey? (22-24) 13

*2a. What is the total number of employees matched in this survey? (25-28)

*2b. Using the Standard Industrial Classification listing at the end of your questionnaire, please indicate the industry to which you belong. Please supply all five digits requested (29-33)

*2c. What is the total number of employees at this location? (59-62)

*2d. What is the total employment of this company overall? (65-70)

3. Using the following numeric codes, indicate in the box at right the type of organization. (71)
1–Private sector 3–Local government
2–State Government 4–Non-profit organization

4. Using the following numeric codes, indicate in the box at right the level of the organizational unit. (72)
1–Headquarters 3–Plant 5–State Capital 7–Other
2–Regional 4–Sales Office 6–Local government

Instructions for Completing Individual Job Data Sheets

Draft

Please read these instructions before providing individual salary rates in this section.

Job Matching

No company's organization structure or job descriptions will match exactly the jobs defined in a compensation survey. However, you should match your jobs as closely as possible so the results will accurately reflect pay for work of a similar nature and level. Do not match based on job title only. Use the survey job description as the final test of the job match.

Special Guidance on Matching Supervisory Jobs

Although journeyman jobs and first-line supervisors are being separately surveyed, some of the journeyman survey jobs mention possible supervisory duties. Match your job to the journeyman survey job if it is primarily nonsupervisory in nature. For example, jobs that are mainly independent workers with incidental supervisory duties, jobs that supervise only one or two workers, and jobs that function more as leaders than supervisors should be matched to the appropriate journeyman level. If your job functions primarily as a full-fledged, first-time supervisor of an assigned staff, it should be matched to the supervisory survey job.

Data Reporting

Once you have matched your jobs satisfactorily, report the information requested below. Note: Mercer Meidinger Hansen can accept computer runs with compensation data if the runs have all necessary information and are clearly labelled. Attach to the appropriate job data sheet if additional data are also provided on that sheet.

1. Enter the job title and job code of the survey job to which you are matching your job. The job codes are on the survey job descriptions and the back side of the Individual Job Data Sheet.

2. Annual Salary Range—If you have a formal salary rate structure for the job, enter the established annual salary range (Minimum, Mid-Point, Maximum). Report to the nearest whole dollar. Should you have more than one salary range for any job, duplicate the data sheet. Enter the other salary range(s) on the separate sheet(s) listing the employees in each range on the appropriate page.

Note: If you have multiple ranges for the same company job in an area or business unit, you may be reporting more than one job level. Review your job matches and use additional forms for reporting other jobs and levels.

3. Enter the total number of employees in this job. The number should agree with total of the employees reported in the Compensation Data section of the form and on the Individual Job Data Sheet continuation form (if used) or on any computer data sheets if supplied separately.

4. Indicate whether the employees in this job are eligible for an incentive or merit bonus. Provide this even if you cannot report bonus data in the Compensation Data section of the form.

5. Report the typical educational requirements or equivalents for this job at this level. (The amount of education each employee has may vary. Report the normal or usual educational requirements for the job and level.)

6. Report the minimum years of experience required for the job at this level. (Again, the amount of experience may vary with employee. Report that the minimum amount of experience required for this job and level.)

7. Report how well your job matches the survey job. If your job is substantially the same, enter "2". If the job requires somewhat more skill, effort, or responsibility, enter "3". If it requires somewhat less enter "1". Do not match your job to the survey job if your job is substantially different.

8. Enter the job title your organization uses for this job.

9. If the job is a supervisory job, refer to the First-Line Supervisory Job Descriptions and enter the appropriate profiled code.

10. Enter the job code of the survey job that most closely matches the level typically supervised. If the employee supervises subordinates at various levels, report the job code of the highest subordinate level with a substantial number of employees.

Compensation Data

1. Enter the annual base salary as of December 1, 1989, for each employee you have matched to this job. Report data in whole dollars. If you have a 401(k) plan, report the rate before voluntary pay reductions.

2. Enter the total amount of merit or incentive bonuses, if any, received by each employee during the 12 month period ending December 1, 1989. Report data in whole dollars. Report only merit or incentive bonuses. Do not include profit sharing or deferred compensation payments.

3. If this is a supervisory job, enter the number of subordinates reporting to the employee.

4. Use the Job Data Information Sheet continuation form as necessary to report information for all employees in your job matching this survey job.

Note: Your organization may have several employees matched to a survey job who receive identical base salaries, bonuses, and (if first-line supervisors) supervise the identical number of subordinates. Rather than repeating the entries to reflect each of these employees, you may record the total number of employees with these identical characteristics in the shaded area and enter the other data only once in the blocks to the right.

Public Burden Information

Public burden reporting for this collection of information is estimated to vary from 2 hours to 6 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Reports and Forms Management Officer, U.S. Office of Personnel Management, 1900 E Street, N.W., Room 6410, Washington, D.C. 20415; and to the Office of Management and Budget, Paperwork Reduction Project (3206-XXXX), Washington, D.C. 20503.

JOB FAMILY MATRIX—ENGINEERING TECHNICIAN

Engineering Technician—Entry Level (Job code 131)	Engineering Technician—Journeyman I (Job code 132)	Engineering Technician—Journeyman II (Job code 133)	Engineering Technician—First Line Supervisor (Job code 914)
As a trainee, initially works under close supervision and provides semi-professional technical support for engineers. Performs simple, routine tasks such as one or more of the following: assembles or installs equipment requiring simple wiring or soldering; operates test equipment, performs tensile or similar tests; gathers and maintains records of engineering data; plots data and draws graphs. As employee gains experience, follows standard procedures to construct simple equipment or parts, conduct a variety of standard tests, and extract and process engineering data.	This is a full Journeyman level. Under general supervision, provides semi-professional technical support for engineers. Performs and may plan non-routine assignments of substantial variety and complexity. May construct experimental or prototype models, conduct experiments or tests analyze data and apply conventional engineering practices to prepare schematics, designs, or specifications. May be assisted by lower level technicians.	Under general supervision, performs nonroutine and complex assignments of a semiprofessional nature in accordance with objectives and approaches outlined by professional engineer. Typical duties may include one or more of the following: design, development or construction of equipment; evaluation of equipment performance and equipment redesign; preparation of layouts, detailed specifications, parts, estimates and procedures; evaluation of adequacy of drawings and design. May train or be assisted by less experienced technicians.	As a first-line supervisor, exercises both technical and personnel management responsibilities. Supervises at least 3 technical/clerical employees, although staff may be quite large. Staff may include quasi-supervisory leaders, reviewers or coordinators and/or a single supervisory deputy. Categorize jobs at Profile L (limited) as Profile B (broad). *Profile L* Plans and schedules work on a weekly monthly, or project basis to meet deadlines and handles priorities.

May construct experimental or prototype models, conduct experiments or tests analyze data and apply conventional engineering practices to prepare schematics, designs, or specifications. May be assisted by lower level technicians.	Under general supervision, performs nonroutine and complex assignments of a semiprofessional nature in accordance with objectives and approaches outlined by professional accountant. Typical duties may include one or more of the following: design, development or construction of equipment; evaluation of equipment performance and equipment redesign; preparation of layouts, detailed specifications, parts, estimates and procedures; evaluation of adequacy of drawings and design. May train or be assisted by less experienced technicians.	As a first-line supervisor, exercises both technical and personnel management responsibilities. Supervises at least 3 technical/clerical employees, although staff may be quite large. Staff may include quasi-supervisory leaders, reviewers or coordinators and/or a single supervisory deputy. Categorize jobs at Profile L (limited) as Profile B (broad). *Profile L* Plans and schedules work on a weekly monthly, or project basis to meet deadlines and handles priorities.

JOB FAMILY MATRIX—ENGINEERING TECHNICIAN—Continued

Engineering Technician—Entry Level (Job code 131)	Engineering Technician—Journeyman I (Job code 132)	Engineering Technician—Journeyman II (Job code 133)	Engineering Technician—First Line Supervisor (Job code 914)
.....	.....	Journeyman II represents positions assigned the more difficult journeyman level duties and responsibilities. It does not encompass even higher level positions (e.g., "experts" in a narrow aspect of a particular field of engineering) which exist in the occupation.	Decides how to assign and review workload to achieve acceptable quantity and quality of input. Informs subordinates about personnel programs; tell superiors of hiring needs recommends promotions, raises performance, oversees attendance and leave, resolves informal complaints, provides on-the-job training. *Profile B* Within limits, also has authority to change work organization to improve economy and efficiency. Also defines performance standards and issues internal work instructions. Also takes formal actions such as requesting recruitment, selecting candidates, resolving formal grievances, and disciplinary cases. Team leaders, second-line supervisors, and supervisory positions primarily compensated for nonsupervisory work (e.g., personal performance of higher level duties)should *not* be matched.

JOB FAMILY MATRIX—PERSONNEL SPECIALIST

Personnel Specialist—entry level (Job code 106)	Personnel Specialist—Journeyman I (Job code 107)	Personnel Specialist—Journeyman II (Job code 108)	Personnel Specialist—First Line Supervisor (Job code 903)
Initially, works under close supervision and learns to apply personnel management principles, procedures and techniques. Degree of supervision is gradually lessened as employee gains experience. Performs routine duties in *one or more of the following areas:* job analysis/evaluation, salary and benefit administration, recruitment and placement, employee development, employee relations and services, equal employment opportunity and labor relations. Difficulty of assignments gradually increases as employee gains experience. (This is a professional level position; clerical and para-professionals not included.) This is the trainee and developmental level which, depending upon the entry worker's background and abilities, typically continues for one or two years. More advanced subjourneyman positions (e.g., those performing assignments of fairly limited scope and complexity with substantial independence) are excluded.	This is a full journeyman level. Applies technical knowledge, skills and judgment to solve relatively complex technical problems *in one or more of the following areas:* Job analysis/evaluation, salary and benefit administration, recruitment and placement, employee development or relations, equal employment opportunity and labor relations. Advises management on issues requiring broad personnel knowledge and/or highly technical skills. May render final decisions on assigned personnel matters. May assist in evaluating operation of personnel programs against established objectives. Typical duties include: analyzing, evaluating, and defining difficult exempt jobs; planning and conducting broad compensation surveys and recommending pay and benefit adjustments; developing training plans and procedures for an organizational segment; participating in complex employee-management relations issues such as controversies, poor morale, and high turnover; or developing plans and procedures for labor negotiations in a moderately complex organization.	Applies technical knowledge, skills and judgement to solve unusually complex or unprecedented problems or provides comprehensive advice management on complex technical problems/issues *in one or more of the following areas:* Job analysis/evaluation, salary and benefit administration, recruitment and placement, employee development opportunity, and labor relations. May independently evaluate personnel programs against established objectives and recommend improvements. *Typical duties include:* participating in the development of personnel policies and procedures; analyzing, evaluating, and defining unusually difficult jobs, recruiting candidates for one-of-a-kind jobs; participating in employee-management relations where the underlying issues are difficult to identify; planning and administering a comprehensive employee development program; or performing labor relations assignments for a large conglomerate.	As a first-time supervisor, exercises both technical and personnel management responsibilities. Typically supervises about 5 to 30 professional/technical workers, but no fewer than 3 such employees. (Staff may also include additional clerical and blue-collar subordinates.) Supervisory work normally includes work planning and delegation, performance monitoring, providing technical counsel, and evaluating and results. Is usually also responsible for recommending hires and promotions, resolving complaints, effecting minor disciplinary actions, and arranging training. Positions are categorized as Profile 1 (the norm) or Profile 2 (atypical). *Profile 1* jobs have no subordinate supervisors, other than a possible single deputy. *Profile 2* jobs exercise somewhat greater supervisory authorities, directing their staff through work/team leaders or other quasi-supervisory subordinates. Full second-line supervisors, team leaders and supervisory positions primarily compensated for nonsupervisory work (e.g., superjourneyman/expert duties) should *not* be matched.

JOB FAMILY MATRIX—ACCOUNTANT

Accountant—Entry Level (Job code 100)	Accountant—Journeyman I (Job code 101)	Accountant—Journeyman II (Job code 102)	Accountant—First Line Supervisor (Job code 901)
Initially, works under close supervision and learns to apply the principles, theories and concepts of accounting to a specific system. Degree of supervision is gradually lessened as employee gains experience. Assists in the preparation of financial statements by checking for completeness, internal accuracy, conformity with standard accounting classifications. Reconciles reports and financial data with existing statements, prepares charts and tables, computes standard ratios. May prepare simple statements requiring little analysis. Difficulty of assignments gradually increases as employee gains experience. (This is a professional level position; clerical assistants not included). This is the trainee and developmental level which, depending upon the entry worker's background and abilities, typically continues for one or two years. More advanced subjourneyman positions (e.g., those performing assignments of fairly limited scope and complexity with substantial independence) are excluded.	This is a full journeyman level. Under general supervision, applies well-established accounting principles, theories, concepts, and practices to a wide variety of difficult problems. May supervise day-to-day operation of an entire accounting system of moderate complexity, a major segment of a larger and more complex accounting system, or a narrow/specialized segment of a very complex system. Recommends refinements to accounting structure, ledgers, account classifications, and reporting systems. Determines accounting treatment of financial transactions. Assists in recommending solutions to complex problems. May supervise professional accountants.	Under general supervision, applies accounting principles, theories, concepts, and practices to the solution of problems for which no clear precedent exists or performs work which is of greater than average responsibility due to the nature/magnitude of the assignment. Resolves complex technical and managerial problems. Interprets implications of financial data and reports for management. Moderate to significant responsibility for accounting system design and development. Supervises day-to-day operation of an entire accounting system of moderate complexity, a major segment of a larger and more complex system or a narrow, specialized segment of a very complex accounting system. Often supervises professional accountants. Journeyman II represents positions assigned the more difficult journeyman level duties and responsibilities. It does not encompass even higher level positions (e.g., "senior"/"expert"/"superjourneyman") which exist in the occupation.	As a first-line supervisor, exercises both technical and personnel management responsibilities. Typically supervises about 5 to 30 professional/technical workers, but no fewer than 3 such employees. (Staff may also include additional clerical and blue-collar subordinates.) Supervisory work normally includes work planning and delegation, performance monitoring, providing technical counsel, and evaluating and results. Is usually also responsible for recommending hires and promotions, resolving complaints, effecting minor disciplinary actions, and arranging training. Positions are categorized as Profile 1 (the norm) or Profile 2 (atypical). *Profile 1* Jobs have no subordinate supervisors, other than a possible single deputy. *Profile 2* Jobs exercise somewhat greater supervisory authorities, directing their staff through work/team leaders or other quasi-supervisory subordinates. Full second-line supervisors, team leaders and supervisory positions primarily compensated for nonsupervisory work (e.g., superjourneyman/expert duties) should *not* be matched.

BILLING CODE 8025-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-17201; File No. 812-7369]

American Life/Annuity Series, *et al.*

November 3, 1989.

AGENCY: Securities and Exchange Commission (the "Commission").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicants: American Life/Annuity Series ("AL"), American Variable Insurance Series ("VI") and Capital Research and Management Company ("CRMC") (referred to collectively as the "Applicants").

Relevant 1940 Act Sections: Applicants seek an order of the Commission under section 17(b) of the 1940 Act approving certain purchase and sale transactions between AL and VI involving AL's portfolio securities.[1] The proposed transactions will enable shares of VI to be substituted, as the underlying investment for certain variable annuity contracts (the "Contracts") offered by Nationwide Life Insurance Company ("Nationwide") and Transamerica Life Insurance and Annuity Company ("Transamerica"), for shares of AL (the "Substitutions").

Filing Date: The Application was filed on September 12, 1989.

Hearing or Notification of Hearing: If no hearing is ordered, the Application will be granted. Any interested person may request a hearing on this Application or ask to be notified if a hearing is ordered. Any request must be received by the Commission by 5:30 p.m. on November 28, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest either personally or by mail, and also send a copy to the Secretary of the Commission, along with proof of service by affidavit or, in the case of attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, the Commission, 450 5th Street NW., Washington, DC 20549. Applicants, 333 South Hope Street, 52nd Floor, Los Angeles, California 90071.

FOR FURTHER INFORMATION CONTACT: Wendell M. Faria, Staff Attorney, at (202) 272-3450 or Clifford E. Kirsch, Acting Assistant Director, at (202) 272-2061 (Division of Investment Management, Office of Insurance Products and Legal Compliance).

SUPPLEMENTARY INFORMATION: Following is a summary of the Application; the complete Application is available for a fee from either the Public Reference Branch (if applying in person) or the Commission's commerical copier at (800) 231-3282 (in Maryland, (301) 283-4300). Notice of the application was published in the SEC Docket on October 10, 1989 (44 SEC Docket 1415). The Notice was not, however, published in the Federal Register.

Applicants' Statements and Representations

1. AL and VI are open-end diversified management investment companies organized as Massachusetts business trusts. Their registration statements on Form N-1A are on file with the Commission (File Nos. 811-4939 and 811-3857, respectively). CRMC is an investment adviser registered under the Investment Advisers Act of 1940; it is organized as a Delaware corporation.

2. Shares of AL currently serve as the underlying investment for certain Contracts issued by Nationwide and Transamerica. Because of AL's small asset size and high level of expenses, AL intends to discontinue making shares

[1] Applicants also requested an exemption from Section 17(a) pursuant to section 6(c) of the 1940 Act. This request, however, will be withdrawn by an amendment to the Application.

VOL 54 ISS 217 NO 13 1989 UMI

available for use with Contracts as soon as practicable, subject to receipt of the Order requested herein and receipt by Nationwide and Transamerica of Orders from the Commission pursuant to section 26(b) of the 1940 Act. Thereafter, shares of VI will be substituted for shares of AL.[8] AL has five funds (or investment portfolios) which are substantially identical to five of VI's funds (or investment portfolios). CRMC serves as investment adviser to both AL and VI and is not affiliated with either Nationwide or Transamerica. AL will cease operations shortly after the Substitutions are completed.

3. The proposed Substitutions in effect will result in an exchange of an interest in AL for an interest of equal value in VI. To facilitate such exchange, AL will sell all of its portfolio securities to VI for a cash receivable. AL shares representing this asset will in turn be used by Transamerica and Nationwide to purchase shares of VI. All transactions will be made at the current market price of the securities involved.

4. Section 17(a)(1) of the 1940 Act prohibits any affiliated person of a registered investment company, or an affiliated person of an affiliated person, from selling any security or other property to such registered investment company. Section 17(a)(2) of the 1940 Act prohibits any of the persons described above from purchasing any security or other property from such registered investment company.

5. Each Applicant may be deemed to be an affiliated person or affiliated person of an affiliated person of each other Applicant or certain other Applicants under section 2(a)(3) of the 1940 Act, and the proposed transactions may be deemed to entail one or more purchases or sales of securities or property between and among certain Applicants. Therefore, an exemption from section 17(a) of the 1940 Act, pursuant to section 17(b) of the 1940 Act, may be required.

6. Section 17(B) of the 1940 Act provides that the Commission may grant an Order exempting transactions prohibited by section 17(a) of the 1940 Act upon application if evidence establishes that:

(a) The terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned;

(b) The proposed transaction is consistent with the investment policy of each registered investment company concerned, as recited in its registration statement and reports filed under the 1940 Act; and

(c) The proposed transaction is consistent with the general purposes of the 1940 Act.

7. Applicants represent that the terms of the proposed transactions including the consideration paid or received, are reasonable and fair and do not involve overreaching on the part of any person.

8. The investment objectives, policies, and restrictions of the AL and VI funds involved in the transaction are substantially identical. Thus, the purchase and sale transactions are consistent with the objectives, policies and restrictions of VI. Further, the Substitutions will result in an equitable division of assets among the Contracts, which is consistent with the policies of AL and VI.

9. The Substitutions are consistent with the general purposes of the 1940 Act, as enunciated in the Findings and Declaration of Policy in section 1 of the 1940 Act. The proposed transactions do not present any of the issues or abuses that the 1940 Act is designed to prevent. Owners of the Contracts will be fully informed of the terms of the Substitutions through Supplements to the Prospectuses of the Contracts and AL, and owners will have an oppotunity to reallocate investments following the Substitutions.

10. Applicants also note in support of their request for an Order under section 17(b) that the proposed transactions fall within the intent of, but not the literal requirements of Rule 17a–7 under the 1940 Act. That Rule generally exempts from section 17(a) certain purchase and sale transactions between registered investment companies or separate series of registered investment companies, which are affiliated persons of each other, provided certain enumerated conditions are met. Applicants represent that, as a condition to any Order under section 17(b), they will comply with the conditions set forth in subparagraphs (b), (c), (d), and (e) of Rule 17a–7, namely, that:

(b) The transactions will be affected at the independent current market price of the securities;

(c) The transactions are consistent with the policy of AL and VI and the Contracts involved in the Substitutions, as recited in the applicable registration statements and reports filed under the 1940 Act;

(d) No brokerage commission, fee (except for customary transfer fees), or other remuneration will be paid in connection with the transactions; and

(e) The Boards of Trustees of AL and VI, including a majority of the Trustees who are not interested persons, (1) have adopted procedures pursuant to which such purchase or sale transactions may be affected, which are reasonably designed to provide that all the conditions of paragraphs (b) through (d) of Rule 17a–7 are complied with, and (2) will determine that the purchases or sales are affected in compliance with such procedures.

11. Applicants cannot, however, meet the conditions of subparagraphs (a) and (f) of Rule 17a–7. Subparagraph (a) requires the transaction be "for no consideration other than cash payment." Applicants cannot comply because the consideration involved in the transaction will be a cash receivable rather than cash. Subparagraph (f) requires AL and VI to (1) maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in paragraph (e) of Rule 17a–7, and (2) maintain and preserve for a period of not less than six years, the first two years in an easily accessible place, a written record of each such transaction setting forth a description of the security purchased or sold, the identity of the person on the other side of the transaction, the terms of the purchase or sale transaction, and the information or materials upon which the determinations described in paragraph (e) of Rule 17a–7 were made. Since subparagraph (f) contemplates that each party will have continuing operations after a transaction pursuant to Rule 17a–7 (in order to be able to satisfy the record-keeping requirements) AL will not be able to comply. However, VI represents that it will comply with such requirements. Applicants submit that lack of a cash payment and the fact that AL is discontinuing operations after the Substitutions are completed, under the circumstances, do not give rise to the type of potential abuse Rule 17a–7 was designed to guard against. Rather, Rule 17a–7 was designed to permit investment companies to sell securities between themselves at current market prices without necessarily incurring costs, including brokerage costs, to the detriment of Contract owners. Here the transactions involved will be affected at current market price, and thus, in substance, are of the type ordinarily exempted by Rule 17a–7.

Applicants' Conclusion

Applicants submit, for all of the reasons stated herein, that their exemptive request meets the standards set out in section 17(b) of the 1940 Act and that an Order should therefore be granted.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[8] The Substitutions are discussed more fully in the Applications for Orders pursuant to section 26(b) of the 1940 Act that have been filed with the Commission by Nationwide and Transamerica.

[Release No. 35-24960]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

November 2, 1989.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by November 27, 1989 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Public Service Company of Oklahoma (70-6827)

Public Service Company of Oklahoma ("PSO"), P.O. Box 201, Tulsa, Oklahoma 74102, an electric utility subsidiary company of Central and South West Corporation, a registered holding company, and PSO's mining subsidiary company, Ash Creek Mining Company ("Ash Creek"), have filed a post-effective amendment to their application-declaration filed pursuant to sections 6(a), 7, 9(a), 10 and 12 of the Act and Rules 43 and 54 thereunder.

By order dated January 21, 1986 (HCAR No. 24562), PSO's authorization to finance Ash Creek was extended through December 31, 1989 in the maximum principal amount of $2,972,500 outstanding at any one time. PSO and Ash Creek estimate that Ash Creek's indebtedness to PSO at December 31, 1989 will be approximately $2,050,000. PSO now proposes to extend its authorization to finance Ash Creek through December 31, 1991 and to increase the maximum principal amount of such financing to $4 million outstanding at any one time.

New England Energy Incorporated (70-7055)

New England Energy Incorporated ("NEEI"), 25 Research Drive, Westborough, Massachusetts 01582, the fuel supply subsidiary of New England Electric System ("NEES"), a registered holding company, has filed a post-effective amendment to its application filed pursuant to Sections 9(a) and 10 of the Act.

In 1974, the Commission authorized NEEI's participation in oil and gas exploration and development activities in order to provide a fuel supply for NEES system companies (NCAR NO. 18635, October 30, 1974). NEEI has participated in these activities principally through its partnership ("Partnership") with Samedan Oil Corporation ("Samedan"), a subsidiary of Noble Affiliates, Inc., a nonaffiliate company. The Partnership agreement ("Agreement") provides for capital contributions by the partners to be used to pay the costs and expenses of the Partnership. The Agreement, as amended February 5, 1985, provides for two phases of operation, Phase I, which expired on December 31, 1986, and Phase II, which commenced on January 1, 1987. Under Phase II, NEEI elected not to participate in new oil and gas prospects initiated by Samedan after December 31, 1986, but remains obligated to pay its share of expenses for exploration, development and production of Phase I prospects acquired on or before December 31, 1987.

By order dated December 29, 1988 (HCAR No. 24795), NEEI was authorized, through December 31, 1989, to contribute up to $40 million (including approximately $15 million which will relate to Pre-1984 prospects and $15 million to Post-1984 prospects) to the Partnership for exploration and development of oil and gas prospects initiated by the Partnership prior to December 31, 1986.

NEEI now seeks to extend its authorization, through December 31, 1991, and to contribute up to $50 million (including approximately $35 million which will relate to Pre-1984 prospects and $15 million to Post-1984 prospects) to the Partnership for exploration and development of oil and gas prospects initiated by the Partnership prior to December 31, 1988. In addition, NEEI requests authority to invest in the Partnership, through December 31, 1991, an additional $10 million in order to provide for contingencies, for a total authorization of $60 million.

New England Energy Incorporated (70-7035)

New England Energy Incorporated ("NEEI"), 25 Research Drive, Westborough, Massachusetts 01582, a wholly owned, fuel procurement and transportation subsidiary of New England Electric System ("NEES"), a registered holding company, has filed an application pursuant to sections 9(a) and 10 of the Act.

In 1980, NEEI and Keystone Shipping Co. ("Keystone") formed a joint venture, New England Collier Company ("NECCO"), which owns a self-unloading, coal-fired collier ("Energy Independence"). The Commission has previously authorized NEEI's 51% participation in NECCO (HCAR No. 21919, February 13, 1981), the financing arrangements made by NECCO in connection with construction of the Energy Independence (HCAR No. 22146, August 3, 1981), and the chartering of the Energy Independence by NECCO to New England Power Company ("NEP"), the generation and transmission subsidiary of NEES, for a term of 24 and 1/2 years (HCAR No. 22309, December 9, 1981). Since completion of its construction in 1983, the Energy Independence has been engaged in the transportation of coal to generating stations of NEP.

In 1987, NEEI received a demand for arbitration from Keystone alleging that NEEI had breached its duty, as a joint venturer, concerning the charter hire rates paid by NEP for the Energy Independence. Due to this disagreement among the parties, no charter hire rate has been set for 1988 or 1989. NEP has commenced arbitration against NECCO for determination of the charter hire rates for 1988 and 1989. Pending a decision, NEP has been paying NECCO at an estimated rate.

On October 6, 1989, NEEI, NEP, and Keystone executed and delivered a Settlement Agreement subject to and conditioned upon receipt of all necessary approvals of the U.S. Maritime Administration and the Commission. The Settlement Agreement provides for, among other things, the

termination of the arbitration proceedings and the sale by NEEI to Keystone or its affiliate ("New Owner") of all of NEEI's rights, title and interest in NECCO and the Energy

Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1989)) for a license as a

to Room 1408 and at the conclusion of the open portion of the meeting escorted back to the Diplomatic Entrance.

Although this notice is published less than fifteen days in advance of the

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: November 17, 1989.

Description: Conforming Application of American Airlines, Inc., pursuant to

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility

measures should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measured according to the standards expressed in

VOL 54 ISS 217 NO 13 1989 UMI

termination of the arbitration proceedings and the sale by NEEI to Keystone or its affiliate ("New Owner") of all of NEEI's rights, title and interest in NECCO and the Energy Independence. Under the Settlement Agreement, NEP will charter the Energy Independence under a new time charter for an initial term of 18 years and two months with two one-year optional extensions.

NEEI currently has outstanding with NECCO a loan of $10 million having an interest rate of 14.9% due July 15, 2008 ("NEEI Loan"). The Commission authorized the NEEI Loan by its order dated September 14, 1987 (HCAR No. 24459). NEEI is requesting authorization from the Commission to amend the terms of the NEEI Loan as part of the settlement of pending arbitrations. Under the proposed Settlement Agreement, the New Owner will assume all of NECCO's obligations under the NEEI Loan. In order to evidence this loan, the New Owner will execute and deliver to NEEI a new Note Agreement and note. The principal amount of $10 million, interest rate of 14.9%, and maturity date of July 15, 2008, will remain unchanged. NEEI has negotiated additional provisions in the Note Agreement for its benefit and protection including establishment of an escrow fund to assure timely payment of interest and repayment of principal, a restriction on payment of dividends by the New Owner, and security for the loan. The Note Agreement also provides that the New Owner may prepay the loan, in whole or in part, without premium or penalty and that, at the option of the New Owner, the note may be sold to a commercial bank upon payment to NEEI of the outstanding principal amount, together with accrued interest.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

Southern Berkshire Investment Corp.; Issuance of a Small Business Investment Company License

[Application No. 01/01-0348]

On August 8, 1989, a notice was published in the Federal Register (P. 32553) stating that an application has been filed by Southern Berkshire Investment Corporation, with the Small Business Administration (SBA) pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1989)) for a license as a small business investment company.

Interested parties were given until close of business September 8, 1989, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information, SBA issued License No. 01/01-0348 on October 25, 1989, to Southern Berkshire Investment Corporation to operate as a small business investment company.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.

Dated: November 6, 1989.

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

BILLING CODE 8025-01-M

DEPARTMENT OF STATE

[CM-8/1323]

Advisory Committee on Historical Diplomatic Documentation; Meeting

The Advisory Committee on Historical Diplomatic Documentation will meet on November 16, 1989, at 9 a.m. in room 1406 of the Department of State.

The Advisory Committee advises the Bureau of Public Affairs, and in particular the Office of the Historian, concerning problems connected with preparation of the documentary series entitled Foreign Relations of the United States and other responsibilities of that Office.

In accordance with section 10(d) of the Advisory Committee Act (Pub.L. 92-463) it has been determined that certain discussions during the meeting will necessarily involve consideration of matters recognized as not subject to public disclosure under 5 U.S.C. 552 b (c)(1), and that the public interest requires that such activities will be withheld from disclosure. The meeting will therefore be closed when such discussions take place from 2 p.m. to 5 p.m. on Thursday, November 16 and all day Friday, November 17.

Persons wishing to attend the open portion of the meeting should come before 9 a.m. on November 16 to the Diplomatic Entrance of the Department of State at 22nd and C Streets, NW., Washington, DC. They will be escorted to Room 1406 and at the conclusion of the open portion of the meeting escorted back to the Diplomatic Entrance.

Although this notice is published less than fifteen days in advance of the meeting, since complicated arrangements have been made at considerable expense and the Advisory Committee members are not available to convene again in the near future, the meeting will be held on the dates set forth in this notice.

Questions concerning the meeting should be directed to William Z. Slany, Executive Secretary, Advisory Committee on Historical Diplomatic Documentation, Department of State, Office of the Historian, Washington, DC 20520, telephone (202) 663-1122.

John P. Glennon,

Acting Director, Office of the Historian, Department of State.

DEPARTMENT OF TRANSPORTATION

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under subpart Q during the Week ended November 3, 1989. The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 46562.
Date filed: November 3, 1989.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 1, 1989.
Description: Application of Aviateca, S.A. pursuant to section 402 of the Act and subpart Q of the Regulations, requests Reissue or Transfer of Permit issued by the Department in Docket No. 43630 from Empresa to Aviateca, S.A.

Docket Number: 46585.
Date filed: November 3, 1989.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: November 17, 1989.
Description: Conforming Application of American Airlines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations applies for amendment of its certificate of public convenience and necessity for Route 137 so as to add Malaysia and Indonesia to segment 9.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

BILLING CODE 4910-62-M

Office of the Secretary

Fitness Determination of Trans Executive Airlines of Hawaii, Inc. d/b/a Trans Air

AGENCY: Department of Transportation.

ACTION: Notice of commuter air carrier fitness determination—order 89-11-4, order to show cause.

SUMMARY: The Department of Transportation is proposing to find Trans Executive Airlines of Hawaii, Inc. d/b/a Trans Air fit, willing, and able to provide commuter air service under section 419(e)(1) of the Federal Aviation Act.

Responses: All interested persons wishing to respond to the Department of Transportation's tentative fitness determination should file their responses with the Air Carrier Fitness Division, P-56, Department of Transportation, 400 Seventh Street, SW., Room 6401, Washington, DC 20590, and serve them on all persons listed in Attachment A to the order. Responses shall be filed no later than November 20, 1989.

FOR FURTHER INFORMATION CONTACT: Ms. Carol A. Woods, Air Carrier Fitness Division (P-56, Room 6401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-2340.

Dated: November 3, 1989.

Jeffrey N. Shane,

Assistant Secretary for Policy and International Affairs.

[FR Doc. 89-26491 Filed 11-9-89; 8:45 am]

BILLING CODE 4910-62-M

Federal Aviation Administration

Approval of Noise Compatibility Program Barnstable Municipal Airport, (Hyannis), Barnstable, Massachusetts

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the Barnstable Municipal Airport Commission, Barnstable, Massachusetts, under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR part 150. These findings are made in recognition of the description of federal and non-federal responsibilities in Senate Report No. 96-52 (1980). On January 30, 1989, the FAA determined that the noise exposure maps, submitted by the Barnstable Municipal Airport Commission, under part 150, were in compliance with applicable requirements. On July 27, 1989, the Administrator approved the Barnstable Municipal Airport (HYA) noise compatibility program. Out of the 28 proposed program elements, 23 were approved.

EFFECTIVE DATE: The effective date of the FAA's approval of the HYA noise compatibility program is July 27, 1989.

FOR FURTHER INFORMATION CONTACT: John Silva, Federal Aviation Administration, New England Region, Airports Division, ANE-602, 12 New England Executive Park, Burlington, Massachusetts 01803, Telephone (617) 273-7060.

Documents reflecting this FAA action may be obtained from the same individual.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the HYA noise compatibility program, effective July 27, 1989.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter the Act), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulation (FAR) part 150 is a local program, not a federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measured according to the standards expressed in part 150 and the Act, and is limited to the following determinations:

(a) The noise compatibility program was developed in accordance with the provisions and procedures of FAR part 150;

(b) Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

(c) Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

(d) Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the Navigable Airspace and Air Traffic Control Systems, or adversely affecting other powers and responsibilities of the Administrator as prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR part 150, § 150.5. Approval is not a determination concerning the acceptability of land uses under federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA under the Airport and Airway Improvement Act of 1982. Where federal funding is sought, requests for project grants must be submitted to the FAA Regional Office in Burlington, Massachusetts.

The Barnstable Municipal Airport Commission submitted to the FAA, on August 31, 1988, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from September 1985 through

July 1987. The HYA noise exposure maps were determined by FAA to be in compliance with applicable requirements on January 27, 1989. Notice of this determination was published in the Federal Register on February 8, 1988.

The HYA study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to beyond the year 1990. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in Section 104(b) of the Act. The FAA began its review of the program on January 27, 1989, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such a program within the 180 day period shall be deemed to be an approval of such a program.

The submitted program contained 28 proposed actions for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR part 150 have been satisfied. The overall program, therefore, was approved by the Administrator effective July 27, 1989.

Approval was granted for 23 specific program elements. Five elements were disapproved. Element 7 Voluntary Minimum Night Flights, does not need FAA approval because of its voluntary, informal nature. Elements 8 and 9, pertaining to daytime and nighttime noise limits, were disapproved because of insufficient information. Element 11, a proposal to construct a new taxiway, was disapproved as a noise abatement proposal, since it would not necessarily enable the prohibition of intersection departures. Measure 28, soundproofing a hospital, was disapproved because there is reasonable expectation that implementation of the remainder of the NCP would obviate the need. There is also no rationale in the study for application of a 60 Ldn incompatible use determination for the site, as opposed to FAA's land use guideline of 65 Ldn.

The 23 approved program elements include noise abatement flight tracks, minimum VFR altitudes, use of the NBAA noise abatement procedure, a preferential runway program and related nighttime designated calm wind runway, a nighttime aircraft touch-and-go prohibition, full-length runway departures, addition of a noise attenuation wall to an existing earth berm surrounding a run-up pit and a reduction in the number of hours for use of the pit, and the establishment of monetary penalties for violations of maintenance run-up procedures.

Approved administrative measures include the establishment of a Noise Abatement Officer position, noise abatement airport signage, pilot education, noise measurement equipment, a complaint response program, a system to track changes in noise exposure over time, update of the official Noise Exposure Map, the establishment of a permanent noise advisory committee, an annual noise report, and a noise abatement policy statement concerning or affirming many of the NCP measures.

Approved land use measures include the establishment of overlay zones and revisions to subdivision regulations, a recommendation to revise the state building code to include regulations for noise level reduction, and a public education program.

FAA's determinations are set forth in detail in a Record of Approval endorsed by the Administrator on July 27, 1989. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the office of the Barnstable Airport Commission, Barnstable, Massachusetts.

Issued in Burlington, Massachusetts on October 17, 1989.

Vincent A. Scarano,

Manager, Airports Division, New England Region.

BILLING CODE 4910-13-M

Flight Service Station at Minot International Airport Minot, North Dakota

AGENCY: FEDERAL AVIATION ADMINISTRATION (FAA), DOT.

ACTION: Notice of Closing.

SUMMARY: Notice is hereby given that on October 24, 1989, the Flight Service Station (FSS) at Minot, North Dakota was closed. Services to the aviation public in the Minot, North Dakota flight plan area, formerly provided by Minot FSS, are being provided by the automated flight service station (AFSS) at Grand Forks, North Dakota. This information will be reflected in the FAA organization statement the next time it is reissued. [Sec. 313(a), 72 Stat. 752; 49 U.S.C. 1354.]

Dated: October 27, 1989.

Edward J. Phillips,

Acting Regional Administrator Great Lakes Region.

[FR Doc. 89-26531 Filed 11-9-89; 8:45 am]

BILLING CODE 4910-13-M

Urban Mass Transportation Administration

Environmental Impact Statement for Mass Transit Improvements in the Fremont-South Bay Area of Alameda and Santa Clara Counties, California

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Notice of intent.

SUMMARY: The Urban Mass Transportation Administration (UMTA), the Metropolitan Transportation Commission (MTC), and the Santa Clara County Transit District (SCCTD) intend to prepare an Environmental Impact Statement (EIS) for mass transit improvements in the Fremont-South Bay area of Alameda and Santa Clara Counties, California. The UMTA, MTC, and SCCTD will prepare the EIS in conformance with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321), the Regulations for Implementing the Procedural Requirements of NEPA, Council on Environmental Quality (40 CFR parts 1500-1508), Environmental Impact and Related Procedures, UMTA (49 CFR part 622), and related statutes and Executive Orders. In addition, in conformance with the Urban Mass Transportation Act of 1964 and UMTA policy, the Draft EIS will be prepared in conjunction with an Alternatives Analysis, and the Final EIS in conjunction with Preliminary Engineering.

The UMTA published a Notice of Intent on September 25, 1986 initiating the Fremont-South Bay Alternatives Analysis and environmental impact assessment. Subsequent scoping efforts and technical work suggested a need to rescope the study to define clearly a set of transportation improvements that could be considered for UMTA capital assistance. The revised study will focus on alternative bus and light rail transit (LRT) improvements in the Tasman corridor. Extensions of Bay Area Rapid Transit District (BART) rail service are not now being considered as alternatives in this study

FOR FURTHER INFORMATION CONTACT: Ms. Carmen Clark, Urban Mass Transportation Administration, 211 Main Street, Suite 1160, San Francisco, California 94105; Telephone: (415) 974-7317.

Scoping

The UMTA, MTC, and SCCTD invite the public and affected Federal, State, and local agencies to participate in determining the alternatives to be evaluated in the EIS and identifying the significant issues related to the alternatives. Written materials describing the rescoping proposal, the proposed alternatives, the expected impact areas, a citizen involvement program, and the preliminary work schedule are being mailed to affected Federal, State, and local agencies and to interested parties on record.

Others may request these scoping materials by calling or writing to:

Mr. Marc Roddin, Tasman Corridor Project Manager, Metropolitan Transportation Commission, Joseph P. Bort MetroCenter, 101 8th Street, Oakland, CA 94607; Telephone: (415) 464-7827; or

Mr. David Minister, Manager for Project Development, Santa Clara County Transportation Agency, P.O. Box 4009, Milpitas, California 95035-2009; Telephone: (408) 299-2382.

The SCCTD and MTC will hold new public scoping meetings to describe the revised scope of the study and receive comments on it. The times, dates, and locations of these meetings are:

Wednesday, November 29, 1989 at 7:00 p.m., City of Sunnyvale, Community Auditorium, 550 East Remington Drive, Sunnyvale, California;

Thursday, November 30, 1989 at 7:00 p.m., Piedmont Hills High School, Multi-Purpose Room, 1377 Piedmont Road, San Jose, California.

At the scoping meetings, SCCTD and MTC staff will present the alternatives to be considered in the continuing analysis and identify the known social, economic, and environmental impacts to be evaluated during the study. Methods for continuing citizen involvement and a revised work schedule will also be discussed. Comments are invited regarding the revised alternatives, the impacts to be assessed, and the evaluation criteria to be used in making a decision. During scoping, comments should focus on these topics and not on an individual preference for a particular alternative. Comments may be made either orally at the meeting or in writing not later than December 29, 1989.

Corridor Description

The Tasman corridor is generally located between Interstate Routes 680 and 880 from the Fremont BART Station to downtown San Jose and westerly along the vicinity of State Route 237 from Milpitas to the Sunnyvale and Mountain View areas. The corridor's freeways experience peak-period congestion due to commuting associated with the large number of research, manufacturing, and defense jobs located in the corridor. Major commuter travel into and within the corridor includes: (1) East Bay residents commuting to the downtown San Jose area and the "Golden Triangle" area (bounded by I-880 and State Routes 237 and 101), (2) residents of Milpitas and northeast San Jose commuting to the Golden Triangle and Mountain View-Sunnyvale areas, (3) residents of San Francisco and San Mateo County commuting to Lockheed/NASA Ames, GTE, and elsewhere in the Golden Triangle, and (4) residents of central and south San Jose commuting to northern San Jose and the Milpitas and Mountain View-Sunnyvale areas.

Alternatives

The proposed alternatives to be studied originally included extensions of BART service south of the existing Fremont Station and extensions of the Guadalupe Corridor LRT to connect with the BART extension in the east and with the CalTrain commuter rail service in the west at Mountain View or Sunnyvale. The rescoped study will focus on a lower-cost set of express bus and LRT alternatives excluding the BART extensions. The MTC and BART are still evaluating alternative extensions of BART service south of the Fremont Station, but UMTA funding assistance is not programmed for the BART project. The MTC and BART will evaluate the BART extensions in a separate environmental document prepared in compliance with the California Environmental Quality Act. UMTA has determined that the BART project and the project which is the subject of the UMTA EIS are separate projects, each having utility independently of the other project.

The new alternatives proposed for consideration in the UMTA EIS differ from the original set primarily in their cost and the level of service provided to transit users. The alternatives proposed for continuing analysis are: No Action, Transportation System Management (TSM) alternatives, Express Bus/High Occupancy Vehicle (HOV) alternatives, and various extensions of the Guadalupe Corridor LRT. The TSM and Express Bus/HOV alternatives include additional express bus service and the construction of additional ramps and bypass lanes are also included in the Express Bus/HOV alternative. The proposed extensions of the LRT include an extension east from the existing Guadalupe LRT line along Tasman Drive and Capitol Avenue to I-680 or Milpitas, and an extension west from the existing Guadalupe LRT terminal to Lockheed, Mountain View, or Sunnyvale. The Mountain View or Sunnyvale terminals will provide a direct connection to the CalTrain commuter rail system. All LRT alternatives will include consideration of improved express bus service from the BART terminal in Fremont into Santa Clara County.

Probable Effects

The UMTA, SCCTD, and MTC propose to evaluate in the EIS all significant social, economic, and environmental impacts of the alternatives under consideration. The impacts analyzed will include the increased noise and vibration, residential and business displacements, changes in development patterns and land use, community disruption resulting from the cumulative effect of the other impacts, traffic and parking changes, effects on historic sites, degradation of local air quality and water quality especially near stations and yards, and the disruption of parklands, recreation areas, wetlands, floodplains, ecologically sensitive areas, natural and man-made hazardous materials sites, and the aesthetic quality of the area. These impacts will be evaluated both for the construction period and for the long-term operation of each alternative. Measures to mitigate harm will be explored for any adverse impact identified.

Construction of any alternative other than the No-Build will require increased capital outlays for several years and are expected to increase transit service and patronage with associated increases in transit operating and maintenance costs. The alternatives are expected to have no significant impact on navigable waterways, coastal zones, energy use, or regional air quality.

During scoping, comments on the probable effects should focus on the completeness of the proposed set of impacts to be evaluated. Other impacts or criteria judged relevant to decision-making should be identified.

Dated: November 3, 1989.

Louis F. Mraz, Jr.,

Acting Western Area Director.

VOL 54 ISS 217 NO 13 1989 UMI

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review.

Date: November 6, 1989.

The Department of Treasury has made revisions and resubmitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, P.L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0047.
Form Number: IRS Form 990 and Schedule A (Form 990).
Type of Review: Resubmission.
Title: Return of Organization Exempt from Income Tax Under section 501(c) (except black lung benefit trust or private foundation) of the Internal Revenue Code or section 4947(a)(1) Trust.

Description: Form 990 is needed to determine that Internal Revenue Code section 501(a) tax-exempt organizations fulfill the operating conditions of their tax exemption. Schedule A (Form 990) is used to elicit special information from section 501(c)(3) organizations. IRS uses the information from these forms to determine if the filers are operating within the rules of their exemption.

Respondents: Non-profit institutions.
Estimated Number of Respondents/Recordkeepers: 327,953.
Estimated Burden Hours Per Response/Recordkeeping:

	Form 990	Schedule A
Recordkeeping	83 hrs., 25 min.	39 hrs., 56 min.
Learning about the law or the form.	14 hrs. 31 min.	8 hrs., 2 min.
Preparing the form.	19 hrs., 18 min.	9 hrs., 6 min.
Copying, assembling, and sending the form to IRS.	48 min.	0

Frequency of Response: Annually.
Estimated Total Recordkeeping/Reporting Burden: 45,956,094 hours.
OMB Number: 1545-0052.
Form Number: IRS Form 990-PF.
Type of Review: Resubmission.
Title: Return of Private Foundation or Section 4947(a)(1) Trust Treated as a Private Foundation; Return of Certain Excise Taxes on Charities and Other Persons Under chapters 41 and 42 of the Internal Revenue Code.

Description: Internal Revenue Code section 6033 requires all private foundations, including section 4947(a)(1) trusts treated as private foundations, to file an annual information return. Section 53.4940-1(a) of the Income Tax Regulations requires that the tax on net investment income be reported on the return filed under section 6033. Section 6011 requires a report of taxes under chapter 42 of the Code for prohibited acts by private foundations and certain related parties. Section 4947(a) trusts may file Form 990-PF in lieu of Form 1041 under the provisions of sections 6033 and 6012.

Respondents: Businesses or other for-profit, Non-profit institutions.
Estimated Number of Respondents/Recordkeepers: 43,067.
Estimated Burden Hours Per Response/Recordkeeping:

Recordkeeping	130 hours, 6 minutes.
Learning about the law or the form.	21 hours, 25 minutes.
Preparing the form	25 hours, 25 minutes.
Copying, assembling, and sending the form to IRS.	16 minutes.

Frequency of Response: Annually.
Estimated Total Recordkeeping/Reporting Burden: 1,779,375 hours.
Clearance Officer: Garrick Shear (202) 535-4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

BILLING CODE 4820-02-M

UNITED STATES INFORMATION AGENCY

Bureau of Educational and Cultural Affairs University Affiliations Program: Application Notice for Fiscal Year 1990

Applications for grants from U.S. institutions of higher education are invited under the University Affiliations Program.

Authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87-256 (Fulbright-Hays Act). The purpose of the Fulbright program is "to enable the government of the United States to increase mutual understanding between the people of the United States and people of other countries."

Public reporting burden for this collection of information is estimated to average 15 hours per response, including the time for reviewing instructions, searching existing data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to USIA Clearance Officer, M/ASP, U.S. Information Agency, 301 4th Street, SW., Washington, DC 20547; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

(Information collection involved in this program has been approved by OMB Action Number 3116-0179, expiration date 11/30/89.)

Summary

The Bureau of Educational and Cultural Affairs of the United States Information Agency (USIA or the Agency) invites applications from institutions of higher education under the University Affiliations Program. Through the University Affiliations Program, USIA provides grants for the development and strengthening of linkages between U.S. and foreign institutions of higher education for a period of two to three years. The duration varies by geographic area.

The goal of the program is to facilitate bilateral institutional relations through faculty and staff exchanges. Participating institutions exchange faculty and staff for teaching, lecturing, and research assignments of one month or longer (with exceptions as noted for North Africa, Middle East, South Asia, and the American Republics); maintain their faculty/staff on full salary and benefits; and use grant funds to defray economy-class costs for international travel, per diem expenses, planning trips, and purchase of educational materials (up to 5% of the total grant amount) to be used at and donated to the foreign institution in countries or regions indicated. Educational materials must be purchased in the U.S. Planning trips for Project Directors (one in each direction) are allowable to complete plans before exchanges between the partners begin. Feasibility studies needed for the preparation of the proposal will not be funded. Proposals for research only will not be considered unless combined with substantial participation in graduate-level seminars and with the substantial collaboration of foreign nationals. The 1990 competition is limited to specific countries and specific fields of study as indicated in each geographic area program description. The program design for each region describes variations in allowable activities (see below).

In the U.S., program participation is open to accredited U.S. institutions of higher education, including graduate schools, four-year colleges and universities; and consortia of universities (proposals may be submitted by a member institution or an organization with authority to represent the consortium). Community and two-year colleges are eligible only for the "Geographic Area Program Competition" in the American Republics. For consortia of institutions, specific responsibilities of each institution and aspects of proposed program participation should be defined.

Overseas participation is open to recognized degree-granting institutions of higher education and independent research institutes.

Eligible research institutes are defined as reputable, non-partisan, non-profit, private or public research institutions that have produced significant long-term scholarly research published in nationally recognized journals or other publications; and have national (and preferably international) professional recognition. Exchange projects including research institutes will be considered only if the institute works in a field of high scholarly value to the U.S. university, if proposed exchanges cannot otherwise take place without USIA assistance, and if they include a group of highly trained specialists not otherwise reached.

Participants traveling under USIA grant support must be U.S. citizens, if representing the U.S. partner institution, and nationals of the country of the foreign partner.

Subject to the availability of funds in Fiscal Year 1990, approximately 20 grants will be available on a competitive basis for specific geographic locations and themes. Awards will reflect Agency priorities and academic considerations. Complete program criteria and application guidelines appear below.

All proposals recommended for funding will be subject to Agency review for conformity to relevant OMB and legal guidelines. Funding of any proposal is subject to the regular procedures, regulations and requirements for Bureau of Educational and Cultural Affairs grants, including review by USIA's Office of General Counsel and submission for approval to the Board of Foreign Scholarships.

U.S. institutions should collaborate with their foreign partners on planning and preparing proposals. U.S. institutions are also responsible for the submission of proposals which must reach USIA no later than 5:00 p.m. EST, Thursday, February 15, 1990.

Geographic Area Program Competition—Africa

Description of Program: Grants for the exchange of faculty and staff. Grant will cover international travel, per diem, educational materials, and two planning trips for Project Directors (one in each direction).

Eligible Countries: All sub-Saharan African countries are eligible for participation in the program. The Agency is especially interested in receiving proposals for South Africa, Nigeria, Uganda, and Congo.

Eligible Fields: Proposals will be considered for any discipline in the Humanities and Fine Arts, Social Sciences, Law, Library Science, American Studies, Education, and Communications. The Agency is especially interested in receiving proposals in the following fields for this year and the following year:

—Business Administration
—University Administration
—Student Counseling and Support Services
—Ecology and Environmental Studies

Duration of Projects: Three years.

Grant Amount: Grant requests of up to $75,000 will be considered, although universities are encouraged to ask for only as much money as they can effectively use within the constraints of their linkage plan and three-year time frame.

American Republics

Description of Program: Grants for the exchange of faculty and staff. Grant will cover international travel, per diem, and educational materials for faculty and staff exchanges of one month or more. Grants can also support one-week conferences, internships (structured, substantive professional affiliations related to the field of specialization), and up to two planning trips for Project Directors (one in each direction). See section on grant amounts for additional details. One or more universities in the U.S. to link up with a group of institutions in Central America and the Caribbean. Single country projects for South America.

Eligible Countries and Fields: Central America—Only regional proposals in Ecology and Environmental Studies will be considered and should include two or more of the following countries: Belize, Costa Rica, El Salvador, Honduras, Guatemala, Nicaragua, and Panama. The regional scope of the proposal will be an important selection factor.

Caribbean—only regional proposals in the field of Teacher Education will be considered and should include two or more of the following countries: Bahamas, Barbados, Guyana, Jamaica, and Trinidad and Tobago. The regional scope of the proposal will be an important selection factor.

South America (single-country projects): Argentina—Business Administration; Brazil—Ecology and Environmental Science; Chile—Humanities and the Social Sciences; and Ecuador—History, Economics, and other Social Sciences.

Duration of Projects: Three years.

Grant Amount: For *Central America and the Caribbean* the maximum grant for each regional project funded will be $100,000. In addition to travel and per diem for faculty and staff exchanges of one month or more, the grant can cover a one-week conference, internships from one-three months, educational materials, and up to two planning trips of Project Directors. Single country grants for *South America* will be a maximum of $75,000 and may include the same components as the regional grants.

Europe

Description of Program: Grants for the exchange of faculty and staff. Grant will cover international travel, per diem, educational materials, and two planning

trips for Project Directors (one in each direction).

Eligible Countries: Czechoslovakia (limited to universities outside Prague), Pakistan*, Qatar, Saudi Arabia, Sri Lanka, Sudan, Syrian Arab Republic*, Tunisia, United Arab Emirates, and Yemen.

three year-projects. Proposals from a U.S. institution may also be for an affiliation with two foreign institutions from different geographic areas. For

institutions, name of foreign country, U.S. and foreign project directors and their deputies, addresses and telephone numbers of project directors, academic field(s) of proposed project; (b) proposal

5. Academic quality of credentials and experience of participants in relation to the goals of the proposed exchange plan (including linguistic proficiency, where

3. *Narrative*, total text not to exceed twenty typed, double-spaced pages, including:

a. A brief (two-page) description of the

VOL 54 ISS 217 NO 13 1989 UMI

trips for Project Directors (one in each direction).

Eligible Countries: Czechoslovakia (limited to universities outside Prague), German Democratic Republic, Hungary, USSR (limited to universities in the Baltic States, Byelorussia and the Ukraine), and Yugoslavia.

Eligible Fields: Proposals will be considered for any discipline(s) in the Social Sciences or Humanities. Preference, however, will be given to the following fields: American Studies, Business Administration, Industrial Relations, Sociology, Communications, Economics, Education, Environmental Issues, Fine Arts, Law, Political Science, and TEFL. For Yugoslavia, preference will be given to American Studies and Business Administration.

Duration of Projects: Two to three years.

Grant Amount: Two-year projects: $60,000; Three-year projects: $75,000.

East Asia and the Pacific

Description of Program: Grants for the exchange of faculty and staff. Grant will cover international travel, per diem, educational materials, and two planning trips for Project Directors (one in each direction).

Eligible Countries with Priority Fields: Australia—Projects focusing on Australian-American relations or that involve comparative studies in fields such as international trade, higher education policy, or urban studies:
New Zealand—Political Science with special emphasis on government policy studies;
Thailand—American and Thai Studies;
Malaysia—Islamic Studies;
Indonesia—American and Islamic Studies;
Hong Kong—Social Sciences; and
Peoples Republic of China—American and Chinese Studies or Social Sciences.

Eligible Fields: See country priorities.

Duration of Projects: Three years.

Grant Amount: Maximum amount for each three-year project is $75,000.

North Africa, Middle East and South Asia

Description of Program: Grants for the exchange of faculty and staff. Grant will cover international travel, per diem, educational materials, and two planning trips for Project Directors (one in each direction). Preference will be given to proposals which emphasize exchange periods of two months or longer.

Eligible countries: Algeria, Bahrain, Bangladesh, Bhutan, Egypt*, India, Israel, Iraq*, Jordan, Kuwait, Mauritania, Morocco, Nepal, Oman, Pakistan*, Qatar, Saudi Arabia, Sri Lanka, Sudan, Syrian Arab Republic*, Tunisia, United Arab Emirates, and Yemen.

Provided they meet academic review criteria, special consideration will be given to proposals received for affiliations with institutions in the locations marked by an asterisk (*).

N.B.—All proposals for India must be accompanied by proof of approval of the proposed program by the Government of India in order to comply with USIA technical review requirements. U.S. institutions are advised to contact Indian partner institutions about this requirement as early as possible, since review processes of Indian government ministries do not coincide with USIA program deadline. Indian government approval must be sought through the Executive Director, U.S. Educational Foundation in India, 12 Hailey Road, New Delhi, India 110001. Tel. 388944 through 388948. Cable USEFI.

Eligible Fields: Social Sciences, Humanities, Education, Communications, Business Administration, Library Science, Fine Arts, American Studies.

Duration of Projects: Three years.

Grant Amount: Maximum amount for each three-year project is $75,000.

Special Competition for Exchanges to Commemorate the Quincentennial of the Discovery of the Americas

USIA also invites applications for a special competition with any country for faculty teaching and/or research projects which commemorate the Quincentennial of the European discovery of the Americas. Proposals should conform to the general guidelines published in this announcement with the following qualifications:

1. Only graduate schools and four-year colleges and universities are eligible to apply.
2. Proposals may be offered in any eligible discipline (Social Sciences, Humanities, and Fine Arts).
3. The proposal must focus on the discovery of the Americas in 1492, the subsequent colonization of Hispano-America, Brazil, or the European voyages of exploration through 1521.
4. The proposed project must demonstrate a scholarly contribution to the generation of new knowledge and insights, and should begin no later than fall 1990 and extend through 1993.
5. Eligible foreign partners include appropriate institutions worldwide.
6. Proposals may be for an affiliation between a U.S. institution and one foreign institution as in the regular program. The maximum grant amount for two-way exchanges is $75,000 for three year-projects. Proposals from a U.S. institution may also be for an affiliation with two foreign institutions from different geographic areas. For three-way exchanges, a U.S. institution might choose a partner in Latin America or the Caribbean, and a partner in the Iberian Peninsula. In such cases, the maximum grant amount would be $90,000.

Requirements for Application—University Affiliations Program:

I. *Eligibility:* Applications on behalf of the collaborating institutions must be submitted by the U.S. partner. Eligible partner institutions are:

1. U.S.—Accredited institutions of higher education, including graduate schools, four-year colleges and universities; and consortia of universities (proposals may be submitted by a member institution or an organization with authority to represent the consortium). Community and two-year colleges are eligible only for the "Geographic Area Program Competition" in the American Republics.

2. Overseas—Recognized degree-granting institutions of higher education and independent research institutes.

II. *Review Process:* Proposals will be reviewed for technical, academic, and Agency considerations (defined below). Proposals which are technically ineligible (eligibility criteria stated below) will not be forwarded for further review by the academic and Agency review committees, so for this reason it is imperative that proposals be complete, accompanied by all necessary documentation, and with budgetary and other information in the required form.

Upon completion of the technical review, applicants will be notified in writing of the status of their proposals. There will be a grace period to submit any missing documentation. Technically eligible proposals will be forwarded for academic review. Proposals recommended by independent academic review panels will be further considered by USIA grant review panels. Agency panels will evaluate proposals based on specific criteria addressing factors of institutional and personnel quality, quality of the program design, cost-effectiveness, and overall geographical and program balance.

Technical Review Criteria

To meet technical requirements, proposals must be submitted within deadline; the proposal package must consist of the original proposal and fifteen (15) complete copies, including: (a) A cover sheet with names of both

institutions, name of foreign country, U.S. and foreign project directors and their deputies, addresses and telephone numbers of project directors, academic field(s) of proposed project; (b) proposal abstract [approximately two double-spaced pages]; (c) a narrative [no more than twenty double-spaced pages]; [d] three-column budget (covering international travel, maintenance, educational materials, and planning trips; see sample below); (e) academic resumes of program participants (no more than two double-spaced pages each); (f) required letters of agreement; (g) summary of international linkages (individual consortium members and research institutes must also meet this requirement); (h) for research institutes—publications issued in the past five years, resumes for personnel giving full academic qualifications of researchers, evidence of institutional standing, sources and amounts of funding, and uses of funds for most recent five years.

Proposed projects must be for a period of two to three years according to the program design for each geographic area, and be in eligible geographic and academic areas. See detailed requirements above.

N.B.: U.S. institutions are responsible for assuring complete understanding of and compliance with financial requirements by the foreign partner; and for obtaining the letter of commitment so stating in the specific format described below. No exceptions will be made.

Academic Review Criteria

Proposals are reviewed by independent academic panels (with geographic and discipline expertise) which make recommendations to the Agency based on the following criteria:

1. Soundness of proposal indicating academic quality, as reflected by focused goals and selection of relevant topics and activities, a clear statement of program goals and means to accomplish the goals, detailed description of project with statement of how the proposed project will be implemented and evaluated, a justification of the intellectual or institutional importance of the proposed program;
2. Evidence that theme(s) of proposed project fit priority field(s) stated in the announcement;
3. Evidence of strong mutual benefits to the institutions involved in the exchanges and a description of how each institution would benefit;
4. Feasibility of the program plan as it relates to the stated goals and selected topics and activities;
5. Academic quality of credentials and experience of participants in relation to the goals of the proposed exchange plan (including linguistic proficiency, where required);
6. Appropriateness of length of exchange visits given project goals.
7. Evidence of input from foreign institution;
8. Evidence that the proposed exchanges are likely to achieve the program's overall goal of mutual institutional development and production of new knowledge or skills;
9. Demonstration that the partership is likely to continue after the expiration of the USIA grant; and
10. If the proposal requests support for an established, active linkage, evidence that the University Affiliations funding would allow for strengthening or innovation in the exchange relationship.

Note: Proposals for research only will not be considered unless the research involves collaboration among researchers from both institutions and is linked to graduate training in seminars.

Agency Review Criteria

USIA reviews only those proposals recommended for further consideration by academic review panels. Agency considerations are based on:

1. Academic quality, reflected in academic review panels' assessment of academic standing of participating institutions and individuals and the likely contributions to knowledge and education the project will make;
2. Advancement of mutual cultural and political understanding between the countries or geographic areas represented in the partnership;
3. Feasibility of program plan;
4. USIA overseas post assessments of feasibility and contribution to local academic development;
5. Evidence of strong institutional commitment by participating institutions;
6. Promise of long-term impact; and
7. Cost-effectiveness.

III. *Application Procedures:* Applicants must submit one original and fifteen (15) complete copies of their proposals no later than 5:00 p.m. EST, Thursday, February 15, 1990, to: University Affiliations Program 1990, United States Information Agency, 301 4th Street, SW., Room 349, Washington, DC 20547.

In order to be eligible for review, the proposal (which constitutes the program application) *must* include:

1. *Cover Sheet,* described under Technical Review Criteria.
2. *Summary document,* a typed project abstract, approximately two double-spaced pages.
3. *Narrative,* total text not to exceed twenty typed, double-spaced pages, including:

a. A brief (two-page) description of the participating institutions and participating departments;

b. A detailed description of the proposed affiliation program including but not limited to: names and qualifications of designated Project Directors; roster of program participants for both institutions (for the duration of the proposed project), and their qualifications, including language skills; a statement of need for the proposed project (reflecting international, national and institutional considerations); a detailed, specific description of proposed activities, including when, where, and how they will occur, individuals who will carry out activities, departments involved; and the anticipated benefits of the program to participating institutions. A plan for institutional evaluation of the program must also be included.

4. A detailed, *three-column budget* (see sample below) outlining specific expenditures and source(s) from which funds are anticipated. *The only budget items eligible for USIA grant funds are:*

a. International economy-class airfare travel costs for participants (travel must be on U.S. air carriers where available);

b. Compensation (supplements to salary and/or benefits) or modest per diem may be requested for such specific items as housing, food and other maintenance items while in exchange status. Participating universities will be expected to continue full salary and benefits for their own faculty. The maximum amount that may be requested for compensation supplements/per diem may not exceed the rates authorized in the "Standard Government Travel Regulations" for travel in foreign countries and U.S. localities. The USIA officers listed in this announcement will supply these rates upon request.

The maximum rates described above are legal limitations only. Institutions are encouraged, in planning their budgets, to set temporary living allowances at a lower level which can be more easily maintained after the period of USIA funding. U.S. institutions are reminded that, in certain cases, restrictions may be placed on the export of salary in other currencies.

c. Cost of educational materials (for overseas use), not to exceed up to 5% of grant amount.

d. Cost of planning trips prior to project implementation. The program allows a maximum of two planning trips per grant for Project Directors.

VOL 54 ISS 217 NO 13 1989 UMI

Required format for budget:

All proposed expenditures should be individually listed (for the duration of the proposed project), using the format below. Each request for travel should specify round trip cost and destination for each participant per fiscal year. Each maintenance request should specify locality (city), daily rate, and duration of stay for each participant (not to exceed published Federal government rates). Costs for educational materials should not exceed the allowable amounts for the duration of the grant (up to 5% of grant). Direct and indirect costs, in-kind or cash contributions, absorbed by each institution should be included, along with regular salary and benefits, under the column of contributions for each partner:

	USIA	U.S. inst.	Foreign inst.
Year 1			
International travel.	X	X	X
Maintenance costs.	X	X	X
Salary & benefits.	n/a	X	X
Planning Trips (only 2).	X	X	X
Educational materials.	X	X	X
Other direct or indirect costs (waived).	n/a	X	X
Total	X	X	X
Year 2			
International travel.	X	X	X
Maintenance costs.	X	X	X
Salary & benefits.	n/a	X	X
Educational materials.	X	X	X
Other direct or indirect costs (waived).	n/a	X	X
Total	X	X	X
Year 3			
International travel.	X	X	X
Maintenance costs.	X	X	X
Salary & benefits.	n/a	X	X
Educational materials.	X	X	X
Other direct or indirect costs (waived).	n/a	X	X
Total	X	X	X

Ineligible Budget Items for University Affiliations Program Grant Support:

a. Administrative expenses (both direct and indirect) incurred in connection with the affiliation;

b. Expenses for student exchanges;

c. Domestic travel, except for projects involving multi-campus universities and consortia of universities/colleges;

d. Costs for dependents;

e. Insurance coverage;

f. Any costs for non-U.S. citizens or nationals from the U.S. institutions, or non-citizens or non-nationals representing the overseas universities.

5. *Appendices,* which should be kept to a minimum, must include:

a. *Academic résumés of professional accomplishments of potential U.S. and foreign participants, not to exceed two pages in length each,* clearly indicating relevant academic training, academic positions held, overseas seminars taught in the past four years, publications, and other professional accomplishments in the field of specialization, citizenship, the level of language skills, overseas experience, knowledge of the prospective partner country or area as demonstrated through courses taught, relevant scholarly travel. *Lengthy academic vitae should not be submitted.*

b. *Documentation of institutional support* for the proposed affiliation, including a signed letter of endorsement from the U.S. institution's (or consortium members') *president, vice-president, chancellor* or *provost, director* (for research institute), as well as a signed letter of endorsement from the *president (or equivalent)* of the non-U.S. institution. All participating institutions must provide the letter of support, which must specifically refer to the 1990 University Affiliations Program and commit participating institutions to maintaining their exchange participants on full salary and benefits during the exchange.

N.B: A general letter or agreement between participating U.S. and foreign institutions without reference to maintaining faculty and staff on salary and benefits will not be acceptable.

c. A brief *summary of past and present linkages* at both partner institutions.

(U.S. institutions are reminded that in certain areas, host government clearance/approval must be obtained before any exchange program of this type may be carried out. It is the responsibility of the foreign institution to seek such approval.)

6. *Deadline:* Complete proposal packages must be received by USIA *no later than* Thursday, February 15, 1990, 5:00 p.m. EST.

Applicants are responsible for the submission of complete applications. *All* required items should be received by the deadline.

7. *Notification:* Successful applicants will be notified on or about the end of June 1990. Funded proposals will be subject to periodic reporting and evaluation requirements.

Inquiries: For questions concerning programming and budget, please contact the following USIA officials:

Africa: Dr. Ellen Berelson (E/AEA), Academic Exchanges Division, Africa Branch, (202) 485–7355.

American Republics: Ms. Paula Durbin (E/AEL), Academic Exchanges Division, American Republics Branch, (202) 485–7365.

East Asia and the Pacific: Dr. Mikel Edwards (E/AEF), Academic Exchanges Division, East Asia/Pacific Branch, (202) 485–7402.

Europe: Dr. William James (E/AEE), Academic Exchanges Division, Europe Branch, (202) 485–7420.

Near East/South Asia: Mr. Michael Graham (E/AEN), Academic Exchanges Division, Near East/South Asia Branch, (202) 485–7368.

SECURITIES AND EXCHANGE COMMISSION

Agency Meetings

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of November 13, 1989.

An open meeting will be held on Wednesday, November 15, 1989, at 10:00 a.m. A closed meeting will be held on Thursday, November 16, 1989, at 10:00 a.m.

The Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Schapiro, as duty officer, voted to consider the items listed for the closed meeting in closed session.

VOL 54 ISS 217 NO 13 1989 UMI

DEPARTMENT OF AGRICULTURE

Cooperative State Research Service

7 CFR Part 3402

Food and Agricultural Sciences, National Needs Graduate Fellowships, Grants Program; Administrative Provisions

AGENCY: Cooperative State Research Service, USDA.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Cooperative State Research Service (CSRS) proposes to amend its regulations relating to the administration of the Food and Agricultural Sciences National Needs Graduate Fellowships Grants Program conducted under the authority of section 1417(a)(3)(B) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3152(a)(3)(B)). This action is being taken to clarify certain rules and goals of the program, provide additional guidance to applicants so that the material submitted facilitates evaluation of proposals, modify the weight factors associated with two of the evaluation criteria, and add newly applicable Federal statutes and regulations.

DATE: Comments concerning this proposed amendment are invited from interested individuals and organizations. Comments must be received on or before December 13, 1989.

ADDRESS: Comments should be sent to Dr. K. Jane Coulter, Director, Higher Education Programs, Cooperative State Research Service, U.S. Department of Agriculture, Washington, DC 20250–2200.

FOR FURTHER INFORMATION CONTACT: Dr. K. Jane Coulter, 202–447–7854.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction.

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the collection of information requirements contained in this proposed rule have been approved under OMB Document No. 0524–0024.

Classification

This proposed rule has been reviewed under Executive Order No. 12291 and it has been determined that it is not a major rule because it does not involve a substantial or major impact on the Nation's individual industries, Federal, State, or local governmental agencies, or on geographical regions. It will not have a significant economic impact on competitive employment, investment, productivity, innovation, or on the ability of U.S. enterprises to compete with foreign-based enterprises in domestic or export markets. In addition, it will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Public Law No. 96–534 (5 U.S.C. 601).

Regulatory Analysis

Not required for this proposed rulemaking.

Environmental Impact Statement

This proposed regulation does not significantly affect the environment. Therefore, an environmental impact statement is not required under the National Environmental Policy Act of 1969, as amended.

Catalog of Federal Domestic Assistance

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.210, Food and Agricultural Sciences National Needs Graduate Fellowships Grants. For the reasons set forth in the Final Rule-related Notice to 7 CFR part 3105, subpart V, 48 FR 29115, June 24, 1983, at which time the authority to administer this program resided in the Agricultural Research Service, this program is excluded from the scope of Executive Order No. 12372 which requires intergovernmental consultation with State and local officials.

Background and Purpose

Under the authority of section 1417(a)(3)(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3152(a)(3)(B)), the Secretary of Agriculture is authorized to conduct a competitive graduate fellowships grants program. The administrative regulations governing the Food and Agricultural Sciences National Needs Graduate Fellowship Grants Program are proposed to be changed as follows:

Section 3402.6(a). Additional language is proposed for this section to specify the requirement that if a fellow completes the program of study early (less than 24 months for master's degree or 36 months for doctoral degree), remaining funds will revert to the granting agency.

Section 3402.6(b). Additional language is proposed for this section to urge grantee institutions to take maximum advantage of opportunities for awarding fellowships to population groups underrepresented in the food and agricultural sciences, particularly minorities and women.

Section 3402.12. Additional language is proposed throughout this section to guide applicants in the content and format of the information they submit in order to facilitate the evaluation of proposals.

Section 3402.14. The use of a faculty summary vita form is proposed so that faculty credentials are presented in a concise and uniform format to facilitate the evaluation of proposals. Currently, the majority of proposals do not summarize this information as requested in the regulation and the peer review panel must use valuable time to sort through voluminous materials to obtain the relevant data.

Section 3402.15. It is proposed that any additional supporting information included in the Appendix of the proposal be referenced in the national need narrative so that peer reviewers can readily recognize the relevance of documents attached to the proposal.

Section 3402.19. Based on discussions with several peer panel members who have evaluated grant proposals under this program, it is proposed that the weight factors associated with evaluation criteria a. and b. be modified. We believe this modification will attach greater importance to an institution's basic program of graduate training, yet allow additional credit for the institution which incorporates special features in an effort to enhance the quality of its program. In addition, it is proposed that evaluation criteria b. and e. be revised to provide further guidance to applicants and to facilitate the peer review process.

Section 3402.22. It is proposed that this section be amended to add Federal regulations made applicable to this grant program subsequent to the issuance of 7 CFR part 3402.

Section 3401.25. It is proposed that this section be amended to require the grantee institution to submit a *Graduate Fellow Exit Report* form for each student supported by a grant as soon as the fellow is (a) graduated, or (b) officially terminated from the program. A compilation of the exit reports for the fellows supported by a grant shall constitute the final performance report for that grant.

List of Subjects in 7 CFR Part 3402

Grant programs—agriculture, Agriculture Higher Education Programs (HEP) Food and Agricultural Sciences National Needs Graduate Fellowships Grants Program.

For the reasons set forth in the preamble, title 7, chapter XXXIV, part 3402 of the Code of Federal Regulations is proposed to be amended as follows:

PART 3402—[AMENDED]

1. The authority citation for part 3402 continues to read as follows:

Authority: Section 1470, National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3316).

2. Section 3402.6 is amended by:

a. Adding a new last sentence in paragraph (a); and

b. Adding a new second sentence in paragraph (b); as follows:

§ 3402.6 Fellowship appointments.

(a) * * * For fellows who complete the program of study early (less than 24 months for master's degree or 36 months for doctoral degree), the institution must refund any unexpended monies to the granting agency.

(b) * * * However, institutions are urged to take maximum advantage of opportunities for awarding fellowships to population groups underrepresented in the food and agricultural sciences, particularly minorities and women.

* * *

3. Section 3402.12 is amended by:

a. Revising the introductory text;

b. Revising Section 1;

c. Revising the first sentence of Section 2; and

d. Revising the last sentence of Section 4; as follows:

§ 3402.12 National need narrative.

A narrative for the national need area should be written in four sections. It should be typed, double-spaced, on one side of the page only, and limited to no more than 20 pages. The four sections to be included are as follows:

Sec. 1. This section must clearly establish that the proposed program of study and research will result in the development of outstanding expertise in the national need area for which funding is requested and will do so in a reasonable period of time. Present a detailed description of the proposed graduate program of study and research. If both master's and doctoral fellowships are requested, a separate plan of study should be included for each degree level. This section of the narrative should contain, but need not be limited to, the following components:

(a) The plan should specifically address the coursework which fellows will be required to take rather than the overall spectrum of departmental offerings. Identify courses, summarize content, and discuss sequencing. Explain how coursework will relate to fellows' research.

(b) Identify and describe areas of research that fellows will be encouraged to engage in via a thesis or dissertation.

(c) Discuss any special features of the graduate program such as the extent to which it will involve a combination-disciplinary approach (inter-disciplinary, multi-disciplinary, or cross-disciplinary) and thus result in development of expertise transcending a single discipline. Also discuss any other special features such as development of an unusual collateral specialization in a related discipline, experiential learning opportunities such as a practicum or internship, a unique mentoring program, seminars, or a multi-university collaborative approach.

(d) Discuss graduate program examination requirements, such as a proficiency or qualifying examination, a comprehensive examination, and an oral examination.

(e) Include a projected timetable for completing the proposed graduate program of study and research.

(f) If admission to the proposed doctoral program does not require a master's degree, discuss how institutional procedures allow for the bypass of a master's degree.

Sec. 2. Justify the institution's position that it presently provides a major, productive, recognized program of graduate study and research at the level(s) of study in the area of national need in which selected fellows would be engaged.

* * *

* * * * *

Sec. 4. * * * Examples of appropriate data are indices of student quality, enrollments and degrees awarded for recent years, placement of graduates, facilities, faculty research support, and publications of previous doctoral trainees.

4. Section 3402.14. The first sentence is revised as follows:

§ 3402.14 Faculty vitae.

This section should include a Summary Vita, Form CSRS–708, for each faculty member contributing significantly to institutional competence at the level(s) of graduate study in the national need area addressed in the proposal. * * *

5. Section 3402.15 is revised as follows:

§ 3402.15 Appendix.

Any additional supporting information deemed important for clarifying and/or strengthening the proposal should be included in an Appendix and referenced in the national need narrative.

6. Section 3402.19 is amended by:

a. Revising the weight factor associated with evaluation criterion a.;

b. Revising evaluation criterion b. and revising the weight factor associated with it; and

c. Revising evaluation criterion e.; as follows:

§ 3402.19 Evaluation criteria.

* * * * *

Evaluation Criteria	Weight
a. * * *	30
b. The degree to which the proposed program of study reflects special features such as a combination-disciplinary approach (inter-disciplinary, multi-disciplinary, or cross-disciplinary), an unusual collateral specialization in a related discipline, experimental learning opportunities, a unique mentoring program, seminars, or a multi-university collaborative approach.	10
* * * * *	
e. The degree to which supporting summary data substantiate program quality in the targeted national need area.	* * *
* * * * *	

7. Section 3402.22 is amended by adding newly applicable Federal regulations in numerical order as follows:

§ 3402.22 Other Federal statutes and regulations that apply.

7 CFR part 3017—Governmentwide Debarment and Suspension (Nonprocurement); Governmentwide Requirements for Drug-Free Workplace (Grants), implementing Executive Order No. 12549 on debarment and suspension and the Drug-Free Workplace Act of 1988 (41 U.S.C. 701).

8. Section 302.25 is amended by redesignating the existing text as paragraph (a); and adding a paragraph (b); as follows:

§ 3402.25 Documentation of progress on funded projects.

* * * * *

(b) A *Graduate Fellow Exit Report* form is included in the program brochure. This form should be completed and submitted to CSRS–HEP by the project director for each fellow supported by a grant as soon as a fellow is (1) graduated, or (2) officially terminated from the program. When an exit report for each fellow supported by a grant has been accepted by USDA, the grantee institution will have satisfied the requirement of a final performance report for the grant.

Done at Washington, DC, this 6th day of November 1989.

RIN 2120-AB35

Airworthiness Standards; Occupant Restraint in Normal and Transport Category Rotorcraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments to the airworthiness standards for normal and transport category rotorcraft add two dynamic crash impact design conditions for seat and occupant restraint systems and increase the static design load factors for seating devices and items of mass in the cabin or adjacent to the cabin as prescribed. These amendments also prescribe a shoulder harness for each occupant and adopt human impact injury criteria as a measure for occupant protection for dynamic crash impact conditions. These amendments, consistent with the present state of the art, significantly improve occupant protection for normal and transport category rotorcraft in a survivable emergency landing impact mode.

EFFECTIVE DATE: December 13, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. J. H. Major, FAA, Regulations Group, ASW-111, Rotorcraft Directorate, Aircraft Certification Service, Fort Worth, Texas 76193-0111, telephone (817) 624-5117 or FTS 734-5117.

SUPPLEMENTARY INFORMATION:

Background

These amendments are based on Notice of Proposed Rulemaking (NPRM) No. 87-4 (52 FR 20838; June 3, 1987) which proposed to amend the rotorcraft airworthiness standards to improve occupant protection in normal and transport category rotorcraft for a survivable emergency landing impact. Notice No. 87-4 proposed to increase occupant protection and to assess the capability of the occupant restraint system and rotorcraft seats for a combined vertical and longitudinal dynamic test and for a primarily longitudinal dynamic test which are representative of emergency landing impact scenarios and to improve occupant protection from certain items of mass in an emergency landing impact. Occupant injury criteria were also proposed as unique pass/fail criteria for the seat and restraint system dynamic test conditions. The restraint system encompasses the seating device, cushions, and torso restraint system, also known as a safety belt and a shoulder harness. This rulemaking activity is one part of the FAA Aircraft Crash Dynamics program outlined in the Federal Register on September 21, 1984 (49 FR 37111).

In light of comments, the FAA reopened the comment period until May 6, 1988, and also announced in the Federal Register (53 FR 7579; March 8, 1988) that a public meeting would be held in Fort Worth, Texas, on April 20, 1988. The viewpoints presented by participants at the public meeting helped the FAA clarify the issues and counterproposals presented in response to the notice. A copy of the meeting transcript is contained in the docket for this rulemaking. All interested persons have been given an opportunity to participate in the making of these amendments and due consideration has been given to all matters presented. A number of nonsubstantive changes and minor changes of an editorial and clarifying nature have been made to the proposals based upon comments received and upon further FAA review. No comments were received relating to the preliminary regulatory evaluation economic impact summary contained in the notice or to the associated economic evaluation report filed in the docket. Except as indicated herein, the proposals contained in the notice have been adopted without change.

The proposals were based on the data, references, and conclusions contained in Report. No. DOT/FAA/CT-85/11, "Analysis of Rotorcraft Crash Dynamics for Development of Improved Crashworthiness Design Criteria," June 1985, and other data sources such as full-scale rotorcraft and small aircraft impact test reports some of which were contained in SP622, "Crash Dynamics of General Aviation Aircraft," April 1985, published by the Society of Automotive Engineers (SAE). A copy of each report is contained in the regulatory docket.

Since these two reports were published in 1985, additional reports and information have been published about dynamic tests of aircraft seats. Much of the information, data, and conclusions from these tests provides: (1) Basic aircraft impact response data; (2) seat and anthropomorphic test dummy (ATD) interface loads and motion; (3) human injury assessments and the relationships associated with the proposed impact conditions; and (4) assessments of aircraft seat design technology required to comply with the proposed criteria. This body of aircraft information, data, and test results is also applicable, in part, to rotorcraft designs and supports this rulemaking activity.

Two dynamic test conditions were proposed in Notice No. 87-4. One test is primarily a vertical impact condition with vertical and longitudinal loads to simulate ground impact following a high rate of vertical descent with the Rotorcraft level. This condition emphasizes occupant vertical loading and determines the effectiveness of design features provided to restrain and support the occupant and to attenuate or control the loads imposed on the occupant. This reduces the potential for spinal compressive injury in an impact of this type.

The second test, a longitudinal impact with yaw angle, simulates a horizontal impact with a ground level obstruction such as a sloped ground surface or rise. This test condition provides an assessment of the occupant restraint system, potential secondary head impact with structure, etc., and seat structural performance in this mode.

Any direct correlation or relationship between the two dynamic test conditions was not envisioned or intended. These two dynamic test conditions were derived from the civil rotorcraft accident study of Report No. DOT/FAA/CT-85/11 and other aforementioned data. These two test conditions represent the expected aircraft response to an emergency landing impact, measured at the cabin floor/seat attachment, which is transmitted to the occupant through the seat and torso restraint system. Accordingly, it was not intended to include a fuselage, landing gear, or a major part of the fuselage to demonstrate compliance with the proposed seat test standards.

Of course, for a seat that is an integral part of the rotorcraft structure, the test setup must include a sufficient part of the fuselage to duplicate the seat and the occupant restraint system for a proper test. These seat dynamic test conditions are consistent with the structural characteristics of present rotorcraft designs and with the general or typical operational emergency landing impact found. The tests also provide for measured and meaningful protection of occupants in normal and transport category rotorcraft. The occupant injury pass/fail criteria adopted in these amendments are the same as those proposed for small airplanes in Notice No. 86-19 (51 FR 44878; December 12, 1986) and adopted in Amendment 23-36 (53 FR 30802; August 15, 1988) and are compatible with those proposed in Notice No. 86-11 (51 FR 25982; July 17, 1986) and adopted in Amendment 25-64 (53 FR 17640; May 17, 1988) for transport airplanes. The injury criteria are also found in Advisory Circular AC 21-22, "Injury Criteria for Human Exposure to Impact," June 20, 1985.

A major concern addressed by the proposal for occupant injury and seat and torso restraint system pass/fail criteria is the secondary head impact which may inflict a debilitating injury and result in concussion and possible unconsciousness. The measurement proposed in Notice No. 87-4 is the head injury criteria (HIC) used in Federal Motor Vehicle Safety Standard No. 208 (49 CFR 571.208). The HIC must be applied when the results of the seat dynamic tests show that structure or other hard objects are within the anthropomorphic test dummy's (ATD) head strike envelope. This proposal uses a practical alternative dynamic seat test procedure rather than requiring tests with seats installed in the particular aircraft fuselage design. The head acceleration time history must be measured and recorded during the seat dynamic tests and then evaluated according to the HIC criteria whenever secondary head impact may occur. This allows testing of a seat and approval whenever installed for unique interior and cockpit arrangements.

Spinal injuries occurring during rotorcraft accidents are another concern. The frequency of serious spinal injuries versus the total frequency of serious injuries in survivable helicopter accidents is approximately 30 percent as shown in Figure 30 of Report No. DOT/FAA/CT-85/11.

The Dynamic Response Index (DRI) which is based on a single lumped-mass, damped-spring model of the spine and respective support mass has traditionally been used to predict probability of spinal injury in the performance evaluation of military airplane ejection seats. The DRI has been correlated with ejection seat testing and service experience to provide a level of confidence for this ejection seat application. However, there are inherent differences in function, geometry, dynamic pulse exposure, and occupant restraint between civil aircraft seats and military ejection seats. The difficulty of selecting the most representative acceleration measurement point in the occupant/seat systems makes direct application of the DRI questionable and difficult as a performance criterion for civil aircraft seats.

As reported in SAE Paper No. 850851, "Data for the Development of Criteria for General Aviation Seat and Restraint System Performance," April 1985, and as discussed in paragraph 6(c)(5) of AC 21-22, the pelvic and spinal lumbar compression load limitation of 1,500 pounds (6.7 kilo newtons) proposed in the notice is an appropriate limit to assure a low probability of spinal injury for rotorcraft as well as airplane occupants. The pelvic compressive load measured in the ATD is direct, easily measured, and requires no additional analysis or interpretation to determine compliance with the proposed standard. In addition, seat pan acceleration and an ATD spinal compression load measured in a test of military helicopter seats indicate an inordinate variation between the spinal load and seat pan acceleration. Therefore, seat pan accelerations are not a reliable prediction of spinal compression loads.

Localized cabin floor deformation can occur as a result of fuselage deformation in a survivable emergency landing impact. The simulated floor or seat rail displacement of 10° pitch and 10° roll will prove the ability of the seat and its floor or sidewall attachments to tolerate such structural deformation or displacement resulting from an impact. Seats integral with the fuselage or bulkhead-mounted (without tracks) rather than floor-mounted need not be deformed prior to conducting the dynamic tests. The simulated floor deformation specified for the dynamic tests is not intended to be a measure of the floor strength or deformation capability but is intended to demonstrate the tolerance of the seat and its attachments to accept floor deformation common to actual crashes.

The new static strength requirements of §§ 27.561 (b)(3) and (c) and 29.561 (b)(3) and (c) contain increased static design inertial load factors to provide an improved level of safety for seats and occupant restraint systems and for items of mass installed both inside the cabin and adjacent to the cabin, as prescribed. These new seat static design inertial load factors will supplement the seat and restraint system dynamic test standards in new §§ 27.562 and 29.562. Those items of mass outside of and adjacent to the cabin must be designed to an increased forward inertial load factor. This increased factor reduces the likelihood of attachment failure and subsequent penetration of the item of mass into the cabin.

The current static design inertial load factors for transport rotorcraft underfloor fuel tanks are retained in revised § 29.561(d). Revised fuel tank standards are deferred for further study and development of possible alternate means of rotorcraft fuel tank protection.

Discussion of Comments

General

Sixteen commenters from small and large U.S. helicopter manufacturers, foreign airworthiness authorities, foreign helicopter manufacturers, and other groups and individuals responded to the notice. All commenters agree with the FAA objective to improve occupant safety in an emergency landing impact, one recommends adoption of standards without lengthy delay, and several offer counterproposals and recommendations.

A commenter emphasizes that the proposal should not apply to rotorcraft designs presently in production or undergoing type certification. The new standards do not apply to rotorcraft for which application for type certification is made prior to the effective date or to derivatives of such rotorcraft for which an application for an amended type certificate is made after the effective date of these amendments.

Several commenters support the proposal for installation and mandatory use of a shoulder harness, also called an upper torso restraint. Three commenters also recommend installation and mandatory use of an upper torso restraint for all newly manufactured rotorcraft after a certain date. National Transportation Safety Board (NTSB) Recommendation No. A-85-70 recommends installation of a shoulder harness for each seat in rotorcraft manufactured after December 31, 1987. The FAA has initiated a separate rulemaking project which will respond to recommendations of the NTSB as well as the commenters relative to mandating shoulder harnesses in production rotorcraft. Therefore, no change is necessary for this amendment which applies only to wholly new rotorcraft designs for which a type certificate application is received after the effective date of this amendment. A commenter also recommends installation of new design seats with harnesses that meet the dynamic test standards, whenever the rotorcraft interior is refurbished for older rotorcraft. This recommendation is beyond the scope of this rulemaking activity.

A commenter objects to equal dynamic test standards for normal and transport category rotorcraft and refers to a public policy of higher or more stringent standards for transport category rotorcraft than those of normal category rotorcraft. The standards, which are equivalent for both categories, have been derived from the rotorcraft emergency landing impact and fuselage deformation characteristics of

VOL 54 ISS 217 NO 13 1989 UMI

small and large rotorcraft which are based on accident and incident information of both categories.

The standards do, therefore, consider both categories in relation to size, weight, and other factors and rightfully afford the necessary protection for passengers in both cases.

The seat design standards reflect the crash impact pulse derived from the accident information and fuselage impact deformation data. These values do not differ markedly between small and large helicopters. The objective, to significantly improve occupant protection for small and large helicopters, is achieved by adoption of the proposed standards to simulate known impact conditions and to avoid exceeding human injury criteria.

It should be noted that the human impact injury criteria set out in AC 21-22 does not vary with respect to the category of aircraft.

Several commenters contend that the dynamic test standards are too severe and they object to the use of an ATD. They suggest the use of a simplified dynamic vertical drop test using a mass to simulate the occupant. In addition, they consider static strength substantiation for the longitudinal impact condition to be sufficient. Other commenters also object to the dynamic test standards because they believe that proving compliance is beyond the technical and financial capability of small companies. These and other commenters object to the proposed static design inertial factors for occupants and items of mass in the cabin, as well as those items external to the cabin, and recommend alternate factors. These concerns are addressed in the specific comments.

Specific Comments on the Proposals

The following comments are keyed to like-numbered proposals in Notice No. 87-4 and are presented in the same order as the corresponding amendments found in the rules portion of this document.

Proposal 2. Notice No. 87-4 proposed a revision to the introductory text of paragraph (b) of § 27.561 to remove the word "minor" before the words "crash landing." No comments were received on the introductory text, and it is adopted as proposed.

After further FAA review of proposed paragraph (b)(3), the subjects were reordered for emphasis and clarity. This editorial change places "each occupant" as the first subject and "each item of mass" as the second subject in this standard. As proposed, paragraph (b)(3) is also changed for clarity to refer to static load "factors" rather than "forces."

A commenter requests that the phrase "inside the cabin" be added after the phrase "items of mass" in proposed paragraph (b)(3) to define the scope of the standard for these items of mass. The FAA agrees, and the change has been incorporated to prevent confusion between the scope of paragraphs (b)(3) and (c). The FAA notes paragraph (c) refers to external items of mass or items outside of the crew and passenger compartments.

Comments on Static Load Factors of Proposal No. 2, Paragraph (b). Comments were received concerning the magnitude of the proposed increased static load factors, and a discussion of the comments follows.

A commenter recommends, in conjunction with an alternate guideline to the proposed seat dynamic tests, a static design guideline and an objective standard that contain lower inertial load factors than those proposed in Notice No. 87-4. The commenter acknowledges that this static design guideline is without supporting data but is based on his knowledge and intuitive conclusions. The same commenter also suggests more appropriate inertial load factors could be derived from a study of comparative static and dynamic tests of several seat designs.

Two other comments recommend adoption of lower inertial load factors. One referred to those proposed during the Rotorcraft Regulatory Review Program public meeting in December 1979. Another commenter forwarded a matrix or table of the inertia factors proposed in the recent rulemaking activity for rotorcraft and small and transport airplane seats, and states that the variation found in the factors for the different aircraft is not justified. The commenter suggests that the rotorcraft inertial factors are too high and should be lower.

One commenter proposes requiring structural capability to support and restrain a 170-pound pilot (or passenger) with a shoulder harness and safety belt for an 8g forward inertial load factor, combined with a 4g sideward inertial load factor, to approximate a 9g (combined) factor. The commenter proposes to omit the longitudinal/horizontal deceleration dynamic test proposed in the notice and rely on the noted static test or structural analysis results. The commenter, however, proposes a simplified dynamic vertical drop test and the longitudinal static load condition to dramatically improve crash survivability but permit small manufacturers to conduct meaningful tests and develop new model normal category helicopters. Three other commenters did not comment on the proposed static inertial load factors (or static strength factors), but they did propose an identical, simplified dynamic test for the vertical and longitudinal velocity change or impact condition and only static strength substantiation for the longitudinal impact condition. See Proposal 3 for further discussion.

Two commenters propose no reduction in the load factors proposed in the notice. One commenter agrees with the inertial factors proposed but suggests an 18g downward factor when compared to a 12g limit contained in Table 38 of Report No. DOT/FAA/CT-85/11. The FAA notes the 12g±1g limit is recommended in the report for the design "stroking factor" on new design rotorcraft seats to limit the occupant spinal loads. However, a 25g downward inertia factor is recommended in the report as a design load factor after the seat "strokes." One commenter specifically recommends no reduction in the proposed static and dynamic standards in the notice, contrary to the recommendations from other commenters.

FAA Response to Comments of Static Load Factors of Paragraph (b)

Many commenters note the expense of compliance but do not propose alternative standards. The FAA is also concerned about the cost of compliance with the new standards. A preliminary cost benefit analysis was prepared for the notice, and a final cost benefit analysis has been prepared for these amendments. A copy is filed in the docket. See the economic summary in this preamble for further information.

These comments were reviewed in conjunction with available data such as that contained in Report No. DOT/FAA/CT-85/11. The static inertial factors are needed to supplement the two seat and occupant ATD dynamic test conditions in §§ 27.562(b) and 29.562(b). The inertial factors in § 27.562(b)(3) are compatible with the dynamic load factors of §§ 27.562(b) and 29.562(b) and are supported by a review of rotorcraft accidents reported in Report No. DOT/FAA/CT-85/11.

Although the static load factors proposed in Notice 87-4 are greater than those recently adopted for transport airplanes, the rotorcraft factors should be greater because of the differences in size, configuration, and typical impact attitudes and conditions between these types of aircraft. These differences result in rotorcraft experiencing greater load factors during impact than typical transport airplanes. A recent study

reported by Mr. C. Wittlin highlights the differences as discussed later. Accordingly, higher load factors were proposed in Notice 87-4 for rotorcraft for both dynamic tests and static tests. Static loading substantiation, by test or analysis, assures that necessary static structural strength of the seat and its attachments to the rotorcraft are provided to support dynamic tsting of the occupant restraint system. The static substantiation is a necessary supplement to dynamic testing which proves the performance of the seat and occupant restraint system, including secondary impact of the occupant's head, under rapid loading and load magnification due to dynamics of the system during the test. The static factors (i.e., structural strength requirements) are intended to provide sufficient strength for the seat and its attachments during dynamic testing and provide sufficient strength for the fuselage structure without dynamic testing. The FAA determined it is proper to not only impose the dynamic test standards but to impose static design standards to supplement the dynamic standards.

A technical paper entitled, "The Influence of Airplane Size and Crash Data Criteria," by Mr. G. Wittlin, was presented at the Flight Safety Foundation, Inc., Conference and Workshop on Occupant Safety, October 31 to November 3, 1988, at Arlington, Virginia. A copy of this paper is included in the docket. Table 8 in that paper contains a range of floor dynamic pulses as a function of four groups of airplane sizes ranging from general aviation to wide-body airplanes for both the vertical and longitudinal direction pulse determined from tests or parametric studies. Most present rotorcraft designs are comparable in size to the general aviation and commuter size airplanes for fuselage design and structural deformation characteristics and are further related to typical rotorcraft impacts that were included in Report No. DOT/FAA/CT-85/11. The pertinent information from the technical paper is summarized in Table 1.

TABLE 1.—PEAK LOAD FACTORS FOR FLOOR DYNAMIC PULSES FOR SMALL AIRPLANES

	Vertical direction	Longitudinal direction
General Aviation	33g peak	33g peak
Commuter	23g peak	17g peak

Narrow and wide body transport airplanes have significantly less deceleration forces in the vertical and horizontal directions and are not comparable to rotorcraft designs. For comparison, the rotorcraft standards in the amendments to §§ 27.562 and 29.562 require a peak of 30g for the downward case (vertical with horizontal component) and 18.4g for the horizontal case (longitudinal with yaw component). These dynamic condition values for rotorcraft standards compare favorably to the floor pulses in the table above for comparable-sized airplanes.

In summary, the static inertial design factors supplement the two dynamic test conditions. The 16g forward static design factor is needed to supplement the 18.4g dynamic standard and the 20g downward (vertical) static design factor relates to the 26g vertical component of the dynamic standard for seat strength and for backup or fuselage structural strength. Therefore, the static inertia factors of paragraph (b) are adopted as proposed.

Comments on Proposal 2, Paragraph (c). Three commenters recommend increasing the inertial load factors proposed in § 29.561(c) for items of mass outside the cabin as follows. One commenter states the inertial load factors proposed in paragraph (c) are too low and not consistent with those higher factors in paragraph (b) for interior items. Another commenter recommends an inertial load factor of 10g for both forward and downward directions as a proper design condition, while yet another commenter recommends 12g forward, 6 sideward, 12g downward, and retaining 1.5g upward.

The FAA agrees that higher factors will increase safety over those proposed by Notice No. 87-4 and are more compatible with the factors of amended § 27.561(b). Nevertheless, additional public notice and comment would be appropriate and necessary for the significant increase in the inertial factors recommended for attachment of external items of mass. Adopting higher inertial factor is beyond the scope of the notice; therefore, the inertial factors are adopted as proposed. However, the FAA will consider incorporating this suggestion into a future rule.

Proposal 3. New §§ 27.562 and 29.562 were proposed to add two dynamic test conditions and pass/fail criteria and to provide for acceptance of an alternate approach in place of the two physical tests. In Notice 87-4 the explanation for Proposal 3 contained justification for new §§ 27.562 and 29.562 being identical.

One commenter states public policy dictates a higher standard for transport category rotorcraft when compared to the normal category standards and proposes simplified tests for normal category rotorcraft. The FAA notes transport rotorcraft in certain cases comply with higher standards than normal category rotorcraft, yet many of the standards are identical and applied in the same manner, such as the current seat structural strength and design standards in §§ 27.561 and 29.561 and §§ 27.785 and 29.785. The impact conditions for normal and transport rotorcraft are also considered the same. Since §§ 27.562 and 29.562 concern strength or performance of the seats and occupant restraint systems during an emergency landing impact derived from rotorcraft characteristics and accident information, these objective performance standards recognize and consider implicitly practical differences in the types of rotorcraft and seats. Additionally, the size, construction, use, and performance of many normal and transport category rotorcraft are very similar since the division between the two categories is 6,000 pounds gross weight. The information from the technical paper, "The Influence of Airplane Size on Crash Data Criteria," by G. Wittlin, presented in Table 1 earlier, also supports the dynamic impact conditions. Since the human impact injury criteria are not dependent on the type of rotorcraft, the injury criteria of §§ 27.562 and 29.562 are identical. Further, the rotorcraft accident study contained in Report No. DOT/FAA/CT-85/11, Table 8, reveals that occupants in accidents involving small-size helicopters could benefit more than occupants of larger helicopters from improved occupant standards. Normal category rotorcraft also constituted about 86 percent of the total U.S. rotorcraft fleet in 1984 according to the Helicopter Association International. This percentage has not changed appreciably.

One commenter states that the dynamic tests are impractical and too costly, and several others contend the increase in certification expense and the technical expertise required to meet the proposed standards, if adopted, would be an insurmountable obstacle. However, no quantitative economic data or information was submitted to the docket to support these arguments. The final economic evaluation shows benefits exceed the costs of compliance and also in-service operation for normal category rotorcraft designs. The FAA notes that technical expertise is available, and seats with stroking capability are in service in civil rotorcraft.

Several other commenters state the added expense will curtail certification of new part 27 rotorcraft designs. Since estimated benefits exceed the costs, new designs should not be deterred.

dynamic tests proposed in paragraph (b) are proper for rotorcraft fuselage characteristics and for the impact attitudes and speeds for a significant percentage of the accidents. According

integral with the basic structure of the fuselage. Two of the small rotorcraft designs in use today have features on the flightcrew seats which allow stroking or seat displacement to limit

the costs as noted in the economic summary of this preamble. Two dynamic impact test conditions are necessary to properly assess the restraint and support of occupants as

rotorcraft and are based on a review of rotorcraft accident data as stated before. The standards in paragraphs (b)(1) and (2) are adopted with the additional description of velocity and

new paragraph (k) to define a litter and its design and installation standards. Dynamic test standards were not proposed for litters and berths. Identical

VOL 54 ISS 217 NO 13 1989 UMI

Several other commenters state the added expense will curtail certification of new part 27 rotorcraft designs. Since estimated benefits exceed the costs, new designs should not be deterred. One commenter agrees with the proposed standard for transport rotorcraft but not for normal category rotorcraft. The benefits expected from the part 27 standards are more significant than those of the part 29 standards according to the economic evaluation.

Editorial changes have been made to paragraphs (a)(1) and (a)(2) for clarity and also to agree with Amendment 25–64 for transport airplanes. The amendment, as adopted, states the occupant "is exposed to the loads" rather than "experience ultimate dynamic loads."

A commenter states that only seats occupied for takeoff and landing should be subject to the dynamic tests. The FAA agrees, and paragraph (b) is revised to apply to "each seat type design or other seating device approved for occupancy during takeoff and landing." This is similar to recently adopted § 25.562(b) in Amdt. 25–64 and includes an editorial change to add "type design" to seats. Those seats not complying with these standards or the standards in §§ 27.561, 27.785, 29.561 and 29.785 must nevertheless comply with the flight load factors of the aircraft and must be placarded to prevent use of the seat during takeoff and landing. It is anticipated such "unique" seats will seldom be installed in rotorcraft.

Two commenters recommend the ATD should represent a nominal rather than a minimum weight of 170 pounds. The FAA agrees since the specification cited currently specifies the correct weight; therefore, the words "total minimum" to describe weight are removed from paragraph (b). In addition, the standard has been divided into two sentences to be parallel with § 25.562(b). The first sentence addresses the seats and an acceptable analysis rather than test alone. The second sentence addresses the previous comments on the ATD and includes the phrase "sitting in the normal upright position" to properly describe the ATD test position.

A commenter agrees with two dynamic seat tests but recommends adopting the two test conditions for transport airplanes contained in Notice 86–11 and adopted by Amdt. 25–64. These tests for airplanes have increased energy (higher velocity) but significantly decreased deceleration factors. The transport airplane standards represent a larger airplane fuselage having about 30 inches of structure that could crush and absorb the energy on impact. The two dynamic tests proposed in paragraph (b) are proper for rotorcraft fuselage characteristics and for the impact attitudes and speeds for a significant percentage of the accidents. According to the information in Report No. DOT/FAA/CT–85/11, the proposed velocities represent about 92 to 95 percent of the survivable accidents, the range of attitude encompassed in the proposal represents about 77 percent, and the pulse duration represents a fuselage crushing or deformation capability of approximately 9.7 inches. For smaller rotorcraft which do not have 9.7 inches of available fuselage structure to absorb the impact energy, energy absorption by any fixed landing gear failure is tacitly included in the standard. Therefore, the dynamic tests in paragraphs (b) (1) and (2) are adopted with the changes discussed. "Downward" velocity has been added to paragraph (b)(1) and "forward" velocity to paragraph (b)(2). The last sentence in each includes the word "floor" as the correct description for measuring deceleration.

Two commenters request a change to paragraph (b) to explicitly provide for the use of analysis supported by test. The FAA agrees since paragraph (d) was intended to allow use of a rational analysis supported by test as an option to the use of test alone. Paragraph (b), as adopted, includes a clause identical to that contained in § 25.562(b) stating dynamic tests or rational analysis based on dynamic tests of a similar type seat may be used. As a result of two comments, paragraph (d) is revised to apply to the entire section rather than to only paragraph (c).

A commenter suggests in place of proposed paragraph (b) for dynamic tests to require either: (1) A static design standard which would include mandatory upper torso restraint, consideration of floor flexibility or distortion, and energy absorbing features as equal to dynamic tests; or (2) simplified dynamic tests without an ATD. The test would call for measuring the acceleration factors on the seat pan using a mass simulating a 170-pound occupant for the test conditions contained in the notice. Specific proposed standards to accomplish the objectives cited by the commenter were not included. The FAA does not agree that a static test is sufficient to duplicate the occupant loads and motion occurring during a dynamic impact condition; therefore, the dynamic test standard is retained.

Three commenters offer a counterproposal to paragraphs (b) (1) and (2) for normal category rotorcraft. These commenters are concerned with small rotorcraft equipped with seats integral with the basic structure of the fuselage. Two of the small rotorcraft designs in use today have features on the flightcrew seats which allow stroking or seat displacement to limit the vertical loads during an impact. The effectiveness of these features for a specific impact condition is not known. The commenters propose static strength substantiation for the longitudinal impact case rather than dynamic test since static strength substantiation is considered sufficient. They propose one dynamic test—vertical with horizontal impact velocity for a resultant of 30 fps. An ATD would be replaced with a mass to simulate the occupant. The deceleration forces or inertial load factor measured on the mass would not be allowed to exceed 23g for more than 0.025 seconds total. In addition, their proposal would allow use of the landing gear and fuselage support structure and/or seat to absorb the energy and reduce the impact forces to 23g or less on the mass. A commenter states this dynamic test concentrates on spinal compression loads and further contends the error likely to occur in their counterproposal is less than the error from the tests contained in Notice 87–4 when using the ATD because in reality, rotorcraft occupant weight and size vary significantly from that of the ATD.

The FAA notes that the ATD represents a 50-percentile male. One of the three commenters refers to Report AD–A093784, December 1980, and AMCP 706–210 as the basis for the counterproposal. These commenters advocate the counterproposal as a practical means for small manufacturers to develop (and certify) new part 27 designs while improving occupant protection. One commenter also advocates static test alone rather than a dynamic test for the longitudinal impact case. Reduced static design inertial load factors are recommended rather than those contained in Notice 87–4. However, the commenter agrees with an increase from 9g to 16g forward factor for static strength substantiation if the proposed longitudinal dynamic test is not adopted. This commenter proposes a vertical impact test using an ATD and, in addition, a reduced severity test which equals that proposed for transport airplanes in Notice 86–11 and later adopted. One commenter states adopting dynamic tests and using an ATD, as proposed, would cause a total redesign and may result in abandoning current certification activity on a small, four-place helicopter.

The FAA notes that the cost benefit analysis shows the benefits derived, especially for smaller rotorcraft, exceed

the costs as noted in the economic summary of this preamble. Two dynamic impact test conditions are necessary to properly assess the restraint and support of occupants so that the human injury impact criteria will not be exceeded. The criteria include the assessment of any secondary head impact with structure. The first part of this preamble contains a further description of the objectives and reasons for adopting the two dynamic impact test conditions.

One commenter supports the FAA analysis and agrees that the study in Report No. DOT/FAA/CT–85/11 indicates a need for vertical energy absorption to limit occupant spinal compression injuries. The third highest hazard reported was related to "vertebral" compression injuries resulting from high vertical forces commonly found in rotorcraft accidents. Tolerance to compressive injuries of the spine decreases as age increases, and civil aircraft occupants are typically (15 to 20 years) older than military aircraft occupants. The commenter further states most of the present energy absorbing seat and restraint system technology is based on military personnel and military aircraft designs or applications. The FAA notes the military rotorcraft criteria are too stringent for civil rotorcraft, and the FAA has previously published civil aircraft human impact injury criteria in AC 21–22. The commenter states that the dynamic tests proposed in Notice No. 87–4 should help in assuring the seat and occupant restraint system will function properly under dynamic (impact) conditions. The commenter further states the two dynamic test conditions proposed are similar to those recommended in Report No. DOT/FAA/CT–85/11, Table 39 and Figure 37, except less severe. The commenter recommends no further reduction from the proposals in Notice No. 87–4 and disagrees with other commenters who recommend that the FAA reduce the severity of the tests or delete the dynamic tests. The commenter further states that the FAA proposals address many of the major hazards that cause serious and fatal injuries in survivable accidents. The commenter supports the two proposed dynamic seat and occupant test standards as proper, well defined, and cost effective, while acknowledging that rotorcraft with integal seats may require expanded advisory material. The discussion for paragraph (b)(3) addresses "integral seat designs."

In summary, the two conditions in paragraphs (b) (1) and (2) are justified for normal and transport category rotorcraft and are based on a review of rotorcraft accident data as stated before. The standards in paragraphs (b) (1) and (2) are adopted with the additional description of velocity and floor deceleration noted previously.

Some commenters state the proposed standard does not recognize or allow the use of seats integral with the fuselage structure, which is typical of many small two or four-seat rotorcraft. The FAA agrees, and paragraph (b)(3) is revised to apply to nonintegral seats or to those seats "where floor rails or floor or sidewall attachment devices are used" to attach the seat to the airframe structure. Integral seats and bulkhead-mounted seats without floor or sidewall attachment devices and with continuous attachments such as rows of rivets or screws, etc., are excluded from the specific misalignment or preload in the test. A commenter recommends clear and specific guidance or advisory material to address integral seats and their dynamic tests. Advisory material for §§ 27.562 and 29.562 was previously drafted and comments invited (52 FR 20947; June 3, 1987). No comments were received. The recommended guidance information will be included in this advisory material which will be subject to further public review.

In addition, the explanation for the head impact criteria (HIC) equation stated in paragraph (c)(5) is adopted with a change that adds the word "form" to clarify that an ATD head form is used for the HIC.

Proposal 4. The notice proposed to revise § 27.785 by adding the static inertial load factors of § 27.561 and the dynamic conditions of § 27.562 to paragraph (a) as requirements to protect occupants from serious injury; to revise paragraph (b) to require each occupant seat, not just crew seats, to be equipped with a shoulder harness in conjunction with a safety belt (or torso restraint system per TSO C114); to revise paragraph (c) to require that the safety belt and shoulder harness have a single-point release; to revise paragraph (f) to use an occupant weight of at least 170 lbs; and to revise paragraph (g) to require a 60–40 percent safety belt-shoulder harness load distribution instead of the previous 60–60 distribution. The notice further proposed to add a new paragraph (i) defining the seating device system; a new paragraph (j) to allow controlled structural deformation or crushing of the seating device system to reduce occupant loads from the proposed emergency landing dynamic test conditions (the deformation or crushing must not interfere with rapid evacuation); and a new paragraph (k) to define a litter and its design and installation standards. Dynamic test standards were not proposed for litters and berths. Identical revisions were proposed for § 29.785.

Several commenters favor the FAA proposal to require a shoulder harness for each seat. Accordingly, paragraph (a) is adopted as proposed.

A commenter proposes using either the term "shoulder harnesses" or the term "torso restraint" exclusively, but not both. "Shoulder harnesses" is retained because the existing airworthiness and operating standards use that term generically; however, for clarification, a sentence is added to paragraph (b) describing torso restraint and upper torso restraint.

One commenter proposes to apply the requirements of paragraph (b) to front seat or row occupants only and to require other occupants to have only lap or safety belts. The commenter's proposal is based on the following: (1) Rotorcraft crashes involve high vertical acceleration forces and relatively low horizontal acceleration forces; (2) passengers in flight do not like the discomfort and movement restrictions of a shoulder harness; (3) passengers become nervous when required to wear a shoulder harness; (4) passengers may become entangled in a shoulder harness during emergency egress; (5) passengers in normal category commercial operations are unduly restricted by a shoulder harness; and (6) mandatory retrofit of shoulder harnesses in the existing rotorcraft fleet creates an undue economic burden.

Report No. DOT/FAA/CT–86/11 indicates that emergency landing horizontal or longitudinal accelerations, while less than the vertical accelerations, are still significant and require restraint and support of the occupant. The horizontal forces cause the upper body to rotate forward increasing the potential for secondary impact with structure. This phenomenon was reported to be a major cause of severe injuries or fatalities which would be significantly reduced with use of a harness. A shoulder harness or upper torso restraint also maintains proper spinal alignment or support and, thus, greatly reduces the potential for spinal injury during an impact with significant vertical forces. The docket contains a figure entitled, "Use of Upper Torso Restraint Expands the Onset of the Serious and Fatal Injury Envelopes," which shows graphically that a shoulder harness and safety belt significantly improve occupant protection. One commenter also submitted information showing whenever shoulder harnesses

are installed, rotorcraft passengers surveyed use them 100 percent of the time. In addition, a single-point release is required for the safety belt and harness in paragraph (c). The proposal to use a 60/40 distribution is based on SAE Aerospace standards and also accounts between the safety belt and harness in paragraph (g). The proposal to use a 60/40 distribution is based on SAE Aerospace standards and also accounts

In addition to the general comments, a comment was received specifically for § 29.561(b) and (c). The commenter recommends adoption of lower inertial

proposed paragraph (e) unnecessary and, therefore, it is not adopted.

Two commenters recommend that static design factors for exterior items of

One commenter contends that doors and exits should be subject to the same design load factors as the occupant restraint system. The FAA does not

much higher. The commenter recommends use of the emergency landing impact load factors in paragraph (e). Service history has shown that the

VOL 54 ISS 217 NO 13 1989 UMI

are installed, rotorcraft passengers surveyed use them 100 percent of the time. In addition, a single-point release is required for the safety belt and harness; the FAA is not aware of any signficant impediment to evacuation caused by a harness; and the FAA did not propose a "retrofit" standard in the notice. For these reasons, the shoulder harness requirement in paragraph (b) with the exception of an editorial change for clarification is adopted as proposed.

Another commenter proposes to remove all references in § 27.785 to the dynamic test of § 27.562. The FAA does not agree since removing the § 27.562 reference in paragraph (b) would create a more restrictive rule by eliminating use of the HIC to accept minor head impact. Another commenter proposes to remove the reference § 27.562(c)(5) in paragraph (b). The HIC in § 27.562(c)(5) allow head impact and are acceptable and essential quantitative standards or limitations that can be applied uniformly wherever the head impacts the interior structure associated with a particular installation. AC 21-22 contains further information on the HIC. The reference must be retained; therefore, paragraph (b) is adopted as proposed.

Another commenter proposes removal of the portion of paragraph (c) which requires a single-point release for both the lap belt and the shoulder harness. The commenter's concern is that the proposal would require designs that prevent uncoupling of the shoulder harness from the lap belt and further prevent passengers from assuming the "brace" position during an emergency landing. The FAA has determined that upper body movement and/or a secondary impact during an emergency landing impact is a primary cause of serious injury. The docket contains information previously referenced which shows significant improvement in occupant protection when a shoulder harness is used. A properly restrained occupant is, therefore, much less likely to experience injury than one in the "brace" position. The amendment, however, does not preclude safety belt and harness designs that feature uncoupling of the shoulder harness from the lap safety belt provided a single-point release is employed in the belt-harness design. A shoulder harness provides a significant improvement in occupant protection, as previously stated, and should be used during takeoff and landing. Therefore, proposed paragraph (c) is adopted without change.

A commenter recommends retaining the present 60/60 load distribution between the safety belt and harness in paragraph (g). The proposal to use a 60/40 distribution is based on SAE Aerospace standards and also accounts for 100 percent of the load. The application of 120 percent of the load is unnecessary and unrealistic in the light of this amendment. Therefore, the 60/40 distribution in paragraph (g) is adopted as proposed.

One commenter proposes that § 27.785 should be changed to specifically refer to paragraph (b) instead of the entire section. The FAA concurs, and § 27.561(b) is cited in paragraphs (a), (f), (f)(2), (g), and (k) for proper application of the standard.

Three other commenters propose to remove paragraph (f)(1) which refers to the pilot effort forces, since design conditions or loads applied by virtue of amended § 27.561(b) and new § 27.562 are considered sufficient seat design standards. The FAA does not agree because paragraph (f)(1) provides the minimum aft load design standard for the crew seat; therefore, paragraph (f)(1) is adopted as proposed.

A commenter wants to remove proposed paragraphs (i), (j), and (k) based on a recommended change to § 27.785(b) to remove reference to HIC. Since paragraph (b) is not changed, paragraphs (i) and (j) are necessary to complement the dynamic test standards and are, therefore, retained.

In addition to a recommendation to remove paragraph (k), two commenters state that proposed paragraph (k) is unclear regarding whether or not berths and litters making an angle greater than 15° with the rotorcraft longitudinal axis may be approved. The FAA chose 15° or less as the angle for which a padded headboard, etc., is required. Safety belts or straps without a padded headboard, etc., are acceptable for the remaining design conditions. That is, beyond a 15° angle the litter or berth must have the proper number and distribution of safety belts or straps to carry the specified static design loads for all directions. Berths and letters oriented at any angle with the rotorcraft longitudinal axis may be approved in accordance with the standards adopted. Paragraph (k) is clarified by dividing one sentence into three sentences that address litter orientation and the appropriate design requirements.

Proposal 6. The notice proposed a revision to § 29.561 that is equivalent to that proposed for § 27.561 except for the underfloor fuel tank standard in paragraph (d) which is unique to the part 29 standards. For general comments and editorial changes related to § 29.561, see Proposal 2.

In addition to the general comments, a comment was received specifically for § 29.561(b) and (c). The commenter recommends adoption of lower inertial load factors in paragraph (b) such as the factors adopted in Amdt. 25-64 for transport airplanes. These airplane inertial factors are 9.0g forward, 6.5g downward, 1.5g rearward, and so forth. The commenter also proposes to combine (vectorially) these inertial load factors but would limit the resultant to 9.0g in any direction. The commenter proposes an additional 1.33 factor for the forces that are imposed on the attachments of certain interior items of mass. If these comments are not adopted by the FAA, the commenter recommends combining (vectorially) whatever design inertial load factors are adopted rather than applying each factor separately.

The FAA notes that § 29.561 currently requires application of the load factor separately but the designer may choose to combine these factors vectorially into a resultant factor for structural substantiation. The static design inertial factors for transport airplanes proposed in Notice No. 86-11 consider the emergency landing impact characteristics for transport airplanes and are not appropriate for typical normal and transport category rotorcraft impact characteristics. The additional factor, 1.33, used in conjunction with the lower load factors for the attachments of certain interior items of mass is not necessary with adoption of the higher inertial factors proposed in the notice; i.e., the adopted criteria exceed that of the proposed change. In addition, the suggestion to combine (vectorially) the inertial factors but not to exceed 9.0g is, therefore, not adopted.

This same commenter also recommends a new paragraph (e) specifically to address an alternate approach in achieving an equivalent or greater level of occupant protection in relation to that contained in the commenter's proposed paragraph (b) change. The commenter proposes the following changes to paragraph (b): (1) to use the transport airplane inertial factors in Notice No. 86-11; (2) to combine vectorially two inertial factors not to exceed 9g when combined; and (3) to refer to the dynamic tests prescribed in § 29.562. That is, these three factors would replace the dynamic tests as a primary means of compliance. Section 21.21(b)(1) already provides a means to accept any alternative to a specific standard provided an equivalent level of safety is maintained. The FAA considers the commenter's proposed paragraph (e) unnecessary and, therefore, it is not adopted.

Two commenters recommend that static design factors for exterior items of mass in paragraph (c) be the same as those in paragraph (b) for interior items. Collapse of a partition or significant collapse of or penetration into the occupied cabin space has not been identified as a significant problem in survivable rotorcraft accidents according to the information in Table 26, Report No. DOT/FAA/CT-85/11. Thus, items of mass external to the crew or passenger cabin may be designed to factors less than those for internal items. This recommendation is not adopted. Another commenter states a partition (or bulkhead, etc.) separating the exterior items of mass from the transport rotorcraft cabin should be substantiated for the loads imposed by the items of mass attached to the partition. The FAA agrees that items of mass such as those described in the standard directly attached to a partition should not become detached. The standards provide for this substantiation.

One commenter recommends specific higher inertial factors for paragraph (c), that is, 12g forward, 6g sideward, 12g downward, while retaining 1.5g upward to reduce hazardous movement of high mass items that are described in their proposals. Adopting higher inertial load factors than those proposed is beyond the scope of the notice; therefore, the inertial factors are adopted as proposed.

Proposal 7. The notice proposed to add to § 29.562 a new dynamic test standard for occupant seats in transport rotorcraft that is identical § 27.562. The emergency landing impact conditions for transport rotorcraft are equivalent to normal category rotorcraft conditions. See the comments and FAA response in Proposal 3. Section 29.562 is adopted with the same changes as noted in Proposal 3.

Proposal 8. The notice proposed to amend §§ 29.783 (d) and (g) by removing the general reference to § 29.561(b)(3). The design factors in that section have been significantly increased but those factors are not necessary for door designs. Therefore, the specific factors in present § 29.561(b)(3) are added to paragraph (d), and paragraph (g) refers to paragraph (d) for the design factors. The factors in the standards are used to evaluate surrounding fuselage structural deformations and impose design features, where necessary, to minimize the probability of jamming external doors and integral stair doors as a result of a minor crash landing and thereby facilitate passenger egress.

One commenter contends that doors and exits should be subject to the same design load factors as the occupant restraint system. The FAA does not agree because experience has shown the design standards presently in use have been satisfactory and should be retained for door designs.

Two other commenters question why cargo doors, other than those used as emergency exits, must meet the requirements of § 29.783(d). Typical rotorcraft doors, whether cargo or exit, are usually qualified as passenger exits and, therefore, must comply. However, the FAA agrees that "cargo or service doors not suitable for use as an exit in an emergency" may be excluded from compliance with the standard. Section 29.783(d), as adopted, adds a clause excluding certain cargo and service doors. This clause for cargo and service doors was extracted, in part, from the transport airplane door standard of § 25.783(g).

Another commenter proposes a 9g static load factor, in any direction, for §§ 29.783 (d) and (g). As noted before, the present design load factors, such as 4g forward, etc., have provided an adequate level of safety since a significant adverse service history on doors does not exist. Therefore, the amendment is adopted with changes as discussed.

Proposal 9. The proposals for §§ 27.785 and 29.785 are identical. For comments and the FAA response related to proposed § 29.785, see Proposal 4. The occupant seat, safety belt, shoulder harness, berth or litter standards for transport and normal rotorcraft are standards not affected by the size of the rotorcraft. No one objected to the application of common standards. Therefore, § 29.785 is adopted with the same changes as discussed in Proposal 4.

Proposal 10. The notice proposed to amend § 29.809 by revising paragraph (e) to add reference to § 29.783(d) for the appropriate ultimate inertial load factors for exits as well as doors of transport rotorcraft. The current design factors for exits are maintained by the amendment. See the comments on Proposal 8 for further information.

One commenter recommends that paragraph (e) remain unchanged. The FAA disagrees because without the reference to § 29.783(d), "minor crash landing" factors would not be defined, thus creating the potential for nonstandard application.

A commenter states that the load factors proposed in paragraph (e) are inconsistent with those proposed for occupants in § 29.561(b)(3) which are much higher. The commenter recommends use of the emergency landing impact load factors in paragraph (e). Service history has shown that the load factors proposed in paragraph (e), such as 4g forward, provide an adequate level of safety to minimize the probability of jamming the emergency exits as a result of fuselage deformation. Therefore, the standard is adopted as proposed.

Economic Evaluation Summary

The FAA proposed to amend parts 27 and 29 of the FAR to require the installation of shoulder harnesses and seats incorporating energy attenuation features on all newly certificated rotorcraft. The amendments to improve occupant protection standards are the result of several specific proposals presented at the Rotorcraft Regulatory Review Conference in 1979, the recommendations of the NTSB, and the FAA aircraft crash dynamics program.

The FAA finds the amendments to §§ 27.561(c), 27.785(k), 29.561(c), 29.783, 29.785(k), and 29.809 will cause manufacturers to incur negligible testing costs in demonstrating compliance with these new standards. The FAA finds the remaining amendments will have a cost impact on manufacturers as well as operators.

For the purpose of the evaluation, those elements of amended §§ 27.561, 27.785, and new 27.562 having a cost impact have been examined as if they were a single amendment. The close interrelation of these amendments precludes clear separation. The amendments to §§ 29.561, 29.785 and new 29.562 having a cost impact have been evaluated in the same manner.

This evaluation indicates that adoption of the standards is expected to be cost beneficial. The final rule regarding shoulder harness and energy attenuating seats—the occupant restraint system—is expected to reduce fatalities and injuries sustained in otherwise survivable crashes from between 30 to 65 percent. The average annual monetary benefits of this final rule are estimated to be $770,600 while the average annual costs are estimated to be $411,900. The average annual net benefits of the final rule are expected to be $358,700 and the present value of these net benefits over 10 years is estimated to be $2.20 million.

International Trade Impact Analysis

The FAA has determined that this rule is not likely to result in a competitive trade advantage or disadvantage for U.S. manufacturers in domestic or foreign markets. Foreign manufacturers

are expected to comply with the certification standards of their largest export customer, the United States. The FAA believes that to remain competitive in overseas markets, foreign vendors will export a similarly equipped rotorcraft to both the United States and third world countries. Foreign and U.S. manufacturers are expected to pass the new certification costs on to consumers in their domestic and foreign markets.

Regulatory Flexibility Determination

The FAA has determined that these amendments will not have a significant impact, positive or negative, on a substantial number of small entities. According to FAA criteria, a small helicopter manufacturer is one that is independently owned and operated and has fewer than 75 employees. Using these criteria, only one U.S. manufacturer is considered small. Therefore, it is not possible for this rule to impact a substanital number of small entities.

Federalism Implications

The regulations adopted herein do not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this amendment does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Conclusion

For the reasons discussed in the preamble, and based on the findings in the Regulatory Flexibility Determination and the International Trade Impact Analysis, the FAA has determined that these amendments are not major under Executive Order 12291. In addition, the FAA certifies that these amendments do not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. These amendments are considered significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A regulatory evaluation of the amendments, including a Regulatory Flexibility Determination and Trade Impact Analysis, has been placed in the docket. A copy may be obtained by contacting the person identified under "FOR FURTHER INFORMATION CONTACT."

List of Subjects 14 CFR Parts 27 and 29:

Air transportation, Aircraft, Aviation Safety, Safety, Rotorcraft.

Adoption of the Amendment

Accordingly, parts 27 and 29 of the Federal Aviation Regulations (14 CFR parts 27 and 29) are amended as follows:

PART 27—AIRWORTHINESS STANDARDS: NORMAL CATEGORY ROTORCRAFT

1. The authority citation for part 27 continues to read as follows:

Authority: 49 U.S.C. 1344, 1354(a), 1355, 1421, 1423, 1425, 1428, 1429, and 1430; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

2. By amending § 27.561 by revising paragraphs (b) (introductory text), (b)(3), and (c) to read as follows:

§ 27.561 General.

* * * * *

(b) The structure must be designed to give each occupant every reasonable chance of escaping serious injury in a crash landing when—

* * * * *

(3) Each occupant and each item of mass inside the cabin that could injure an occupant is restrained when subjected to the following ultimate inertial load factors relative to the surrounding structure:

(i) Upward—4g.
(ii) Forward—16g.
(iii) Sideward—8g.
(iv) Downward—20g, after intended displacement of the seat device.

(c) The supporting structure must be designed to restrain, under any ultimate inertial load up to those specified in this paragraph, any item of mass above and/or behind the crew and passenger compartment that could injure an occupant if it came loose in an emergency landing. Items of mass to be considered include, but are not limited to, rotors, transmissions, and engines. The items of mass must be restrained for the following ultimate inertial load factors:

(1) Upward—1.5g.
(2) Forward—8g.
(3) Sideward—2g.
(4) Downward—4g.

3. By adding a new § 27.562 to read as follows:

§ 27.562 Emergency landing dynamic conditions.

(a) The rotorcraft, although it may be damaged in an emergency crash landing, must be designed to reasonably protect each occupant when—

(1) The occupant properly uses the seats, safety belts, and shoulder harnesses provided in the design; and

(2) The occupant is exposed to the loads resulting from the conditions prescribed in this section.

(b) Each seat type design or other seating device approved for crew or passenger occupancy during takeoff and landing must successfully complete dynamic tests or be demonstrated by rational analysis based on dynamic tests of a similar type seat in accordance with the following criteria. The tests must be conducted with an occupant, simulated by a 170-pound anthropomorphic test dummy (ATD), as defined by 49 CFR 572, subpart B, or its equivalent, sitting in the normal upright position.

(1) A change in downward velocity of not less than 30 feet per second when the seat or other seating device is oriented in its nominal position with respect to the rotorcraft's reference system, the rotorcraft's longitudinal axis is canted upward 60° with respect to the impact velocity vector, and the rotorcraft's lateral axis is perpendicular to a vertical plane containing the impact velocity vector and the rotorcraft's longitudinal axis. Peak floor deceleration must occur in not more than 0.031 seconds after impact and must reach a minimum of 30g's.

(2) A change in forward velocity of not less than 42 feet per second when the seat or other seating device is oriented in its nominal position with respect to the rotorcraft's reference system, the rotorcraft's longitudinal axis is yawed 10° either right or left of the impact velocity vector (whichever would cause the greatest load on the shoulder harness), the rotorcraft's lateral axis is contained in a horizontal plane containing the impact velocity vector, and the rotorcraft's vertical axis is perpendicular to a horizontal plane containing the impact velocity vector. Peak floor deceleration must occur in not more than 0.071 seconds after impact and must reach a minimum of 18.4g's.

(3) Where floor rails or floor or sidewall attachment devices are used to attach the seating devices to the airframe structure for the conditions of this section, the rails or devices must be misaligned with respect to each other by at least 10° vertically (i.e., pitch out of parallel) and by at least a 10° lateral roll, with the directions optional, to account for possible floor warp.

(c) Compliance with the following must be shown:

(1) The seating device system must remain intact although it may experience separation intended as part of its design.

(2) The attachment between the seating device and the airframe structure must remain intact, although the structure may have exceeded its limit load.

(3) The ATD's shoulder harness strap or straps must remain on or in the immediate vicinity of the ATD's shoulder during the impact.

(4) The safety belt must remain on the ATD's pelvis during the impact.

(5) The ATD's head either does not contact any portion of the crew or passenger compartment, or if contact is made, the head impact does not exceed a head injury criteria (HIC) of 1,000 as determined by this equation.

$$HIC = (t_2 - t_1)\left[\frac{1}{(t_2 - t_1)}\int_{t_1}^{t_2} a(t)dt\right]^{2.5}$$

Where: a(t) is the resultant acceleration at the center of gravity of the head form expressed as a multiple of g (the acceleration of gravity) and $t_2 - t_1$ is the time duration, in seconds, of major head impact, not to exceed 0.05 seconds.

(6) Loads in individual upper torso harness straps must not exceed 1,750 pounds. If dual straps are used for retaining the upper torso, the total harness strap loads must not exceed 2,000 pounds.

(7) The maximum compressive load measured between the pelvis and the lumbar column of the ATD must not exceed 1,500 pounds.

(d) An alternate approach that achieves an equivalent or greater level of occupant protection, as required by this section, must be substantiated on a rational basis.

4. By amending § 27.785 by revising paragraphs (a), (b), (c), (f), and (g) and by adding new paragraphs (i), (j), and (k) to read as follows:

§ 27.785 Seats, berths, safety belts, and harnesses.

(a) Each seat, safety belt, harness, and adjacent part of the rotorcraft at each station designated for occupancy during takeoff and landing must be free of potentially injurious objects, sharp edges, protuberances, and hard surfaces and must be designed so that a person making proper use of these facilities will not suffer serious injury in an emergency landing as a result of the static inertial load factors specified in § 27.561(b) and dynamic conditions specified in § 27.562.

(b) Each occupant must be protected from serious head injury by a safety belt plus a shoulder harness that will prevent the head from contacting any injurious object except as provided for in § 27.562(c)(5). A shoulder harness (upper torso restraint), in combination with the safety belt, constitutes a torso restraint system as described in TSO-C114.

(c) Each occupant's seat must have a combined safety belt and shoulder harness with a single-point release. Each pilot's combined safety belt and shoulder harness must allow each pilot when seated with safety belt and shoulder harness fastened to perform all functions necessary for flight operations. There must be a means to secure belts and harnesses, when not in use, to prevent interference with the operation of the rotorcraft and with rapid egress in an emergency.

* * * * *

(f) Each seat and its supporting structure must be designed for an occupant weight of at least 170 pounds considering the maximum load factors, inertial forces, and reactions between occupant, seat, and safety belt or harness corresponding with the applicable flight and ground load conditions, including the emergency landing conditions of § 27.561(b). In addition—

(1) Each pilot seat must be designed for the reactions resulting from the application of the pilot forces prescribed in § 27.397; and

(2) The inertial forces prescribed in § 27.561(b) must be multiplied by a factor of 1.33 in determining the strength of the attachment of—

(i) Each seat to the structure; and

(ii) Each safety belt or harness to the seat or structure.

(g) When the safety belt and shoulder harness are combined, the rated strength of the safety belt and shoulder harness may not be less than that corresponding to the inertial forces specified in § 27.561(b), considering the occupant weight of at least 170 pounds, considering the dimensional characteristics of the restraint system installation, and using a distribution of at least a 60-percent load to the safety belt and at least a 40-percent load to the shoulder harness. If the safety belt is capable of being used without the shoulder harness, the inertial forces specified must be met by the safety belt alone.

* * * * *

(i) Each seating device system includes the device such as the seat, the cushions, the occupant restraint system, and attachment devices.

(j) Each seating device system may use design features such as crushing or separation of certain parts of the seats to reduce occupant loads for the emergency landing dynamic conditions of § 27.562; otherwise, the system must remain intact and must not interfere with rapid evacuation of the rotorcraft.

(k) For the purposes of this section, a litter is defined as a device designed to carry a nonambulatory person, primarily in a recumbent position, into and on the rotorcraft. Each berth or litter must be designed to withstand the load reaction of an occupant weight of at least 170 pounds when the occupant is subjected to the forward inertial factors specified in § 27.561(b). A berth or litter installed within 15° or less of the longitudinal axis of the rotorcraft must be provided with a padded end-board, cloth diaphram, or equivalent means that can withstand the forward load reaction. A berth or litter oriented greater than 15° with the longitudinal axis of the rotorcraft must be equipped with appropriate restraints, such as straps or safety belts, to withstand the forward load reaction. In addition—

(1) The berth or litter must have a restraint system and must not have corners or other protuberances likely to cause serious injury to a person occupying it during emergency landing conditions; and

(2) The berth or litter attachment and the occupant restraint system attachments to the structure must be designed to withstand the critical loads resulting from flight and ground load conditions and from the conditions prescribed in § 27.561(b).

PART 29—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY ROTORCRAFT

5. The authority citation for part 29 continues to read as follows:

Authority: 49 U.S.C. 1344, 1354(a), 1355, 1421, 1423, 1424, 1425, 1428, 1429, and 1430; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

6. By amending § 29.561 by revising paragraphs (b) (introductory text), (b)(3), (c), and (d) to read as follows:

§ 29.561 General.

* * * * *

(b) The structure must be designed to give each occupant every reasonable chance of escaping serious injury in a crash landing when—

* * * * *

(3) Each occupant and each item of mass inside the cabin that could injure an occupant is restrained when subjected to the following ultimate inertial load factors relative to the surrounding structure:

(i) Upward—4g.
(ii) Forward—16g.
(iii) Sideward—8g.

(iv) Downward—20g, after the intended displacement of the seat device.

(c) The supporting structure must be designed to restrain under any ultimate

§ 29.562(c)(5). A shoulder harness (upper torso restraint), in combination with the safety belt, constitutes a torso restraint system as described in TSO-C114.

(c) Each occupant's seat must have a combined safety belt and shoulder harness with a single-point release. Each pilot's combined safety belt and shoulder harness must allow each pilot when seated with safety belt and shoulder harness fastened to perform all functions necessary for flight operations. There must be a means to secure belts and harnesses, when not in use, to prevent interference with the operation of the rotorcraft and with rapid egress in an emergency.

* * * * *

(f) Each seat and its supporting structure must be designed for an occupant weight of at least 170 pounds considering the maximum load factors, inertial forces, and reactions between occupant, seat, and safety belt or harness corresponding with the applicable flight and ground load conditions, including the emergency landing conditions of § 29.561(b). In addition—

(1) Each pilot seat must be designed for the reactions resulting from the application of the pilot forces prescribed in § 29.397; and

(2) The inertial forces prescribed in § 29.561(b) must be multiplied by a factor of 1.33 in determining the strength of the attachment of—

(i) Each seat to the structure; and

(ii) Each safety belt or harness to the seat or structure.

(g) When the safety belt and shoulder harness are combined, the rated strength of the safety belt and shoulder harness may not be less than that corresponding to the inertial forces specified in § 29.561(b), considering the occupant weight of at least 170 pounds, considering the dimensional characteristics of the restraint system installation, and using a distribution of at least a 60-percent load to the safety belt and at least a 40-percent load to the shoulder harness. If the safety belt is capable of being used without the shoulder harness, the inertial forces specified must be met by the safety belt alone.

* * * * *

(i) Each seating device system includes the device such as the seat, the cushions, the occupant restraint system, and attachment devices.

(j) Each seating device system may use design features such as crushing or separation of certain parts of the seats to reduce occupant loads for the emergency landing dynamic conditions of § 29.562; otherwise, the system must remain intact and must not interfere with rapid evacuation of the rotorcraft.

(k) For the purposes of this section, a litter is defined as a device designed to carry a nonambulatory person, primarily in a recumbent position, into and on the rotorcraft. Each berth or litter must be designed to withstand the load reaction of an occupant weight of at least 170 pounds when the occupant is subjected to the forward inertial factors specified in § 29.561(b). A berth or litter installed within 15° or less of the longitudinal axis of the rotorcraft must be provided with a padded end-board, cloth diaphram, or equivalent means that can withstand the forward load reaction. A berth or litter oriented greater than 15° with the longitudinal axis of the rotorcraft must be equipped with appropriate restraints, such as straps or safety belts, to withstand the forward load reaction. In addition—

(1) The berth or litter must have a restraint system and must not have corners or other protuberances likely to cause serious injury to a person occupying it during emergency landing conditions; and

(2) The berth or litter attachment and the occupant restraint system attachments to the structure must be designed to withstand the critical loads resulting from flight and ground load conditions and from the conditions prescribed in § 29.561(b).

VOL 54 ISS 217 NO 13 1989 UMI

VOL 54 ISS 217 NO 13 1989 UMI

(iv) Downward—20g, after the intended displacement of the seat device.

(c) The supporting structure must be designed to restrain under any ultimate inertial load factor up to those specified in this paragraph, any item of mass above and/or behind the crew and passenger compartment that could injure an occupant if it came loose in an emergency landing. Items of mass to be considered include, but are not limited to, rotors, transmission, and engines. The items of mass must be restrained for the following ultimate inertial load factors:

(1) Upward—1.5g.
(2) Forward—8g.
(3) Sideward—2g.
(4) Downward—4g.

(d) Any fuselage structure in the area of internal fuel tanks below the passenger floor level must be designed to resist the following ultimate inertial factors and loads, and to protect the fuel tanks from rupture, if rupture is likely when those loads are applied to that area:

(1) Upward—1.5g.
(2) Forward—4.0g.
(3) Sideward—2.0g.
(4) Downward—4.0g.

7. By adding a new § 29.562 to read as follows:

§ 29.562 Emergency landing dynamic conditions.

(a) The rotorcraft, although it may be damaged in a crash landing, must be designed to reasonably protect each occupant when—

(1) The occupant properly uses the seats, safety belts, and shoulder harnesses provided in the design; and

(2) The occupant is exposed to loads equivalent to those resulting from the conditions prescribed in this section.

(b) Each seat type design or other seating device approved for crew or passenger occupancy during takeoff and landing must successfully complete dynamic tests or be demonstrated by rational analysis based on dynamic tests of a similar type seat in accordance with the following criteria. The tests must be conducted with an occupant simulated by a 170-pound anthropomorphic test dummy (ATD), as defined by 49 CFR 572, Subpart B, or its equivalent, sitting in the normal upright position.

(i) A change in downward velocity of not less than 30 feet per second when the seat or other seating device is oriented in its nominal position with respect to the rotorcraft's reference system, the rotorcraft's longitudinal axis is canted upward 60° with respect to the impact velocity vector, and the rotorcraft's lateral axis is perpendicular to a vertical plane containing the impact velocity vector and the rotorcraft's longitudinal axis. Peak floor deceleration must occur in not more than 0.031 seconds after impact and must reach a minimum of 30g's.

(2) A change in forward velocity of not less than 42 feet per second when the seat or other seating device is oriented in its nominal position with respect to the rotorcraft's reference system, the rotorcraft's longitudinal axis is yawed 10° either right or left of the impact velocity vector (whichever would cause the greatest load on the shoulder harness), the rotorcraft's lateral axis is contained in a horizontal plane containing the impact velocity vector, and the rotorcraft's vertical axis is perpendicular to a horizontal plane containing the impact velocity vector. Peak floor deceleration must occur in not more than 0.071 seconds after impact and must reach a minimum of 18.4g's.

(3) Where floor rails or floor or sidewall floor attachment devices are used to attach the seating devices to the airframe structure for the conditions of this section, the rails or devices must be misaligned with respect to each other by at least 10° vertically (i.e., pitch out of parallel) and by at least a 10° lateral roll, with the directions optional, to account for possible floor warp.

(c) Compliance with the following must be shown:

(1) The seating device system must remain intact although it may experience separation intended as part of its design.

(2) The attachment between the seating device and the airframe structure must remain intact although the structure may have exceeded its limit load.

(3) The ATD's shoulder harness strap or straps must remain on or in the immediate vicinity of the ATD's shoulder during the impact.

(4) The safety belt must remain on the ATD's pelvis during the impact.

(5) The ATD's head either does not contact any portion of the crew or passenger compartment or, if contact is made, the head impact does not exceed a head injury criteria (HIC) of 1,000 as determined by this equation.

$$HIC = (t_2-t_1)\left[\frac{1}{(t_2-t_1)}\int_{t_1}^{t_2} a(t)dt\right]^{2.5}$$

Where: a(t) is the resultant acceleration at the center of gravity of the head form expressed as a multiple of g (the acceleration of gravity) and $t_2 - t_1$ is the time duration, in seconds, of major head impact, not to exceed 0.05 seconds.

(6) Loads in individual shoulder harness straps must not exceed 1,750 pounds. If dual straps are used for retaining the upper torso, the total harness strap loads must not exceed 2,000 pounds.

(7) The maximum compressive load measured between the pelvis and the lumbar column of the ATD must not exceed 1,500 pounds.

(d) An alternate approach that achieves an equivalent or greater level of occupant protection, as required by this section, must be substantiated on a rational basis.

8. By amending § 29.783 by revising paragraphs (d) and (g)(1) to read as follows:

§ 29.783 Doors.

* * * * *

(d) There must be reasonable provisions to prevent the jamming of any external doors in a minor crash as a result of fuselage deformation under the following ultimate inertial forces except for cargo or service doors not suitable for use as an exit in an emergency:

(1) Upward—1.5g.
(2) Forward—4.0g.
(3) Sideward—2.0g.
(4) Downward—4.0g.

* * * * *

(g) * * *

(1) The door, integral stair, and operating mechanism have been subjected to the inertial forces specified in paragraph (d) of this section, acting separately relative to the surrounding structure.

* * * * *

9. By amending § 29.785 by revising paragraphs (a), (b), (c), (f), and (g) and by adding new paragraphs (i), (j), and (k) to read as follows:

§ 29.785 Seats, berths, safety belts, and harnesses.

(a) Each seat, safety belt, harness, and adjacent part of the rotorcraft at each station designated for occupancy during takeoff and landing must be free of potentially injurious objects, sharp edges, protuberances, and hard surfaces and must be designed so that a person making proper use of these facilities will not suffer serious injury in an emergency landing as a result of the inertial factors specified in § 29.561(b) and dynamic conditions specified in § 29.562.

(b) Each occupant must be protected from serious head injury by a safety belt plus a shoulder harness that will prevent the head from contacting any injurious object, except as provided for in

§ 29.562(c)(5). A shoulder harness (upper torso restraint), in combination with the safety belt, constitutes a torso restraint system as described in TSO–C114.

(c) Each occupant's seat must have a combined safety belt and shoulder harness with a single-point release. Each pilot's combined safety belt and shoulder harness must allow each pilot when seated with safety belt and shoulder harness fastened to perform all functions necessary for flight operations. There must be a means to secure belt and harness when not in use to prevent interference with the operation of the rotorcraft and with rapid egress in an emergency.

* * * * *

(f) Each seat and its supporting structure must be designed for an occupant weight of at least 170 pounds, considering the maximum load factors, inertial forces, and reactions between the occupant, seat, and safety belt or harness corresponding with the applicable flight and ground-load conditions, including the emergency landing conditions of § 29.561(b). In addition—

(1) Each pilot seat must be designed for the reactions resulting from the application of the pilot forces prescribed in § 29.397; and

(2) The inertial forces prescribed in § 29.561(b) must be multiplied by a factor of 1.33 in determining the strength of the attachment of—

(i) Each seat to the structure; and

(ii) Each safety belt or harness to the seat or structure.

(g) When the safety belt and shoulder harness are combined, the rated strength of the safety belt and shoulder harness may not be less than that corresponding to the inertial forces specified in § 29.561(b), considering the occupant weight of at least 170 pounds, considering the dimensional characteristics of the restraint system installation, and using a distribution of at least a 60-percent load to the safety belt and at least a 40-percent load to the shoulder harness. If the safety belt is capable of being used without the shoulder harness, the inertial forces specified must be met by the safety belt alone.

* * * * *

(i) Each seating device system includes the device such as the seat, the cushions, the occupant restraint system and attachment devices.

(j) Each seating device system may use design features such as crushing or separation of certain parts of the seat in the design to reduce occupant loads for the emergency landing dynamic conditions of § 29.562; otherwise, the system must remain intact and must not interfere with rapid evacuation of the rotorcraft.

(k) For purposes of this section, a litter is defined as a device designed to carry a nonambulatory person, primarily in a recumbent position, into and on the rotorcraft. Each berth or litter must be designed to withstand the load reaction of an occupant weight of at least 170 pounds when the occupant is subjected to the forward inertial factors specified in § 29.561(b). A berth or litter installed within 15° or less of the longitudinal axis of the rotorcraft must be provided with a padded end-board, cloth diaphragm, or equivalent means that can withstand the forward load reaction. A berth or litter oriented greater than 15° with the longitudinal axis of the rotorcraft must be equipped with appropriate restraints, such as straps or safety belts, to withstand the forward reaction. In addition—

(1) The berth or litter must have a restraint system and must not have corners or other protuberances likely to cause serious injury to a person occupying it during emergency landing conditions; and

(2) The berth or litter attachment and the occupant restraint system attachments to the structure must be designed to withstand the critical loads resulting from flight and ground load conditions and from the conditions prescribed in § 29.561(b).

10. By amending § 29.809 by revising paragraph (e) to read as follows:

§ 29.809 Emergency exit arrangement.

* * * * *

(e) There must be means to minimize the probability of the jamming of any emergency exit in a minor crash landing as a result of fuselage deformation under the ultimate inertial forces in § 29.783(d).

* * * * *

Issued in Washington, DC, on November 3, 1989.

OFFICE OF PERSONNEL MANAGEMENT

Federal Personnel Manual Letter 792-19, Establishing a Drug-Free Federal Workplace

AGENCY: Office of Personnel Management.

ACTION: Response to comments; final publication; notice.

SUMMARY: The Office of Personnel Management publishes notice of the final version of Federal Personnel Manual Letter 792-19, Establishing a Drug-Free Federal Workplace prior to its issuance.

EFFECTIVE DATE: December 13, 1989.

FOR FURTHER INFORMATION CONTACT: Carrol Kinsey, (202) 632-5087.

SUPPLEMENTARY INFORMATION: This final Federal Personnel Manual Letter was developed in accordance with section 6(a)(1) of Executive Order 12564, A Drug-Free Federal Workplace, issued on September 15, 1986. On November 28, 1986, OPM issued Federal Personnel Manual (FPM) Letter 792-16, Establishing a Drug-Free Federal Workplace, to Executive branch agencies covered under the jurisdiction of Executive Order 12564. On March 9, 1987, OPM issued FPM Letter 792-17, amending three provisions of FPM Letter 792-16. On December 30, 1988, OPM issued FPM Letter 792-18, notifying agencies of actions they should take to bring their Drug-Free Workplace plans into compliance with section 628 of the Treasury, Postal, and General Government Appropriations Act of 1989, Public Law No. 100-440.

FPM Letters generally are advisory guidance for supervisors and personnel specialists to use as management tools and ordinarily would not be published under formal rulemaking procedures. In this FPM Letter, policies for Federal agencies and employees required by law or Government-wide regulation are stated in terms of "must," "shall," or "will." Policies which are not required by law or Government-wide regulation, but which are highly recommended, are stated in terms of "should." Policy guidance which is set forth for the agency's consideration is stated in terms of "may," "can," or "could."

The publication of the draft FPM Letter 792-19 in the Federal Register on April 6, 1989, did not mean that OPM was embarking upon a formal rulemaking. It afforded interested parties the opportunity to comment on the draft FPM Letter before its issuance in final form.

In response to that notice and opportunity for comment, OPM received the 10 written comments discussed below. In recognition of the important role that may be played by interested members of the public even in providing their comments on advisory personnel guidance, OPM has considered the comments as indicated below and has made corresponding changes to the draft FPM Letter.

In preparing draft FPM Letter 792-19, OPM consolidated all of the existing FPM Letters on the subject of a Drug-Free Federal Workplace in one issuance. FPM Letter 792-19 is a compilation and update of FPM Letters 792-16, 792-17, and 792-18. It incorporates the text of the preceding FPM Letters and any amendments made necessary by subsequent legislation. This compilation is deemed necessary as a service to Federal agency officials and other interested parties and as an opportunity to update the original FPM Letter issued on November 28, 1986.

FPM Letter 792-16 followed both the language of Executive Order 12564 and pre-existing law and regulation. The first section of the Letter discussed its purpose and stated that the use of illegal drugs by Federal employees, whether on or off duty, cannot be tolerated and that the Federal government, as the nation's largest employer, must be in the forefront of the national effort to eliminate illegal drugs from the American workplace.

That FPM Letter went on to set forth agency responsibilities in drafting and implementing drug-free Federal workplace plans. Each agency head was required, pursuant to the Executive Order, to develop a plan for achieving the objective of a drug-free workplace, which contains a policy statement, an Employee Assistance Program, supervisory training, provision for employee self-referral, and provisions for identifying illegal drug users (including drug testing). The head of each agency was also required, pursuant to the Executive Order, to test employees in sensitive positions for the use of illegal drugs. The FPM Letter set forth recommendations regarding how agencies may carry out their drug testing programs and drug testing procedures in general. In addition, the Letter addressed the Executive Order mandate that agencies are to maintain statistical records on the number of employees and applicants tested and the number of confirmed positive test results, while removing personally identifying information from such records. The Letter also described the role of the Employee Assistance Program in a drug-free workplace program.

A sample employee acknowledgement of notice of an agency's drug-free workplace program and a model Employee Assistance Program was attached to FPM Letter 792-16.

FPM Letter 792-17 was issued on March 9, 1987, as a brief supplement to FPM Letter 792-16. The language contained in FPM Letter 792-17 that amended FPM Letter 792-16 has been incorporated into the basic text of the portion of FPM Letter 792-19 that was taken from FPM Letter 792-16.

FPM Letter 792-18 was issued on December 30, 1988, as a notice to Federal agencies of the need to take action to bring their Drug-Free Workplace plans into compliance with a soon-to-be-effective provision of the Treasury, Postal, and General Government Appropriations Act or 1989, Public Law No. 100-440. The guidance contained therein has been incorporated into the FPM Letter for use by agencies that may be established in the future.

FPM Letter 792-19 also corrects typographical errors contained in FPM Letters 792-16, 792-17, and 792-18.

Provisions that have been rendered obsolete, inappropriate, or ineffective, by either the passage of time, subsequent legislative enactments, or revised OPM policy, have also been amended or deleted, as appropriate.

Finally, provisions of the National Drug Control Strategy issued by the President and the National Drug Control Policy Office on September 5, 1989, that set new requirements for Federal agencies in implementing the Drug-Free Federal Workplace program are incorporated in the final version of FPM Letter 792-19.

FPM Letter 792-19 supersedes and replaces FPM Letters 792-16, 792-17, and 792-18. Publication of the draft FPM Letter, receipt and consideration of comments, and publication of the final version of the FPM Letter complies with a court order entered in *NTEU* v. *Reagan*, Civ. No. 86-4058 (E.D. La.).

Response to Comments

Written comments in response to the Opportunity for Comment published April 6, 1989, were received from 10 individuals, organizations and Federal agencies. All written comments were reviewed and taken into consideration in the preparation of the final FPM Letter. This section summarizes major comments and the response of the Office of Personnel Management to them. Similar comments are considered together. Typographical, grammatical, and technical corrections have also been made to the publication. In addition, several telephone inquiries were made concerning the application of the FPM Letter to employees of Federal contractors. The FPM system sets forth guidance for the management and supervision of Federal employees, not employees of Federal contractors.

A. General Concerns

1. Several commenters, including two employee unions, expressed their general disagreement with the policy underlying the drug-testing portion of the Drug-Free Federal Workplace program. One described it as a "witch hunt." Another opined that the drug testing program contained too much room for abuse and that it will be used to ruin outspoken employees. Another urged the re-examination of the motives behind drug testing. These commenters challenge the basic policy underlying the inclusion of drug testing as one of the elements of the Drug-Free Federal Workplace program set out in Executive Order 12564. The FPM Letter simply provides guidance to the agencies on the implementation of that policy. Section 6(a)(1) of the Executive Order required Director of OPM to issue the government-wide guidance embodied in the FPM Letter. This FPM Letter will be issued in conformity with that mandate.

2. One commenter stated that the FPM Letter goes beyond the scope of the Executive Order. OPM disagrees and believes that the FPM Letter does not exceed the limits of the Executive Order, except to the extent necessary to provide agencies with sufficiently detailed guidance to take appropriate personnel management actions consistent with Executive Order policies and to meet the requirements of intervening statutory enactments and Presidential directives.

3. One commenter, a Federal employee union, asked whether or not the publication of the FPM Letter in the Federal Register was a rulemaking under the terms of 5 U.S.C. 553. As noted in the supplementary information accompanying this publication, an FPM Letter is not a formal rule. It is interpretative guidance prepared by OPM to assist agency managers and personnelists in implementation of a program. While this, then, is not a formal rulemaking, it was published in draft form for comment, and those comments have been considered before publishing the final version of the FPM Letter, in accordance with the court's order in *NTEU* v. Reagan, Civ. No. 86-4058 (E.D. La.).

B. Random Testing

1. Several commenters objected to the random testing component of the program on constitutional grounds and asserted that it violates the 4th Amendment to the Constitution. One commenter opposed it on the broader ground that it invades employee privacy. Another commenter stated that it was premature for the government to consider random drug testing of employees given the uncertain constitutionality of the practice and requested reconsideration or delay of the issuance of the FPM Letter until the question of the constitutionality of random drug testing was resolved. There have been numerous constitutional challenges to the random drug testing portion of the program in Federal courts across the country. Several of those courts have held that random drug testing of certain employees in specific types of sensitive positions is not a violation of the 4th Amendment to the Constitution (*e.g., National Federation of Federal Employees* v. *Cheney*, No. 88-5060 (D.C. Cir., August 29, 1989; *American Federation of Government Employees* v. *Skinner*, No. 87-5417 (D.C. Cir., September 8, 1989) and others have held the converse (*e.g., Connelly* v. *Newman*, No. 88-5085 DLJ (N.D. Cal., June 15, 1989); *National Treasury Employees Union* v. *Watkins*, No. 88-1006 JRP (D.D.C., June 16, 1989). Given the fact that the courts have decided the question of the constitutionality of particular agency programs established under the Executive Order in individual legal challenges, it cannot be said that those agencies with plans that pass constitutional muster should not go forward. The guidance afforded by the FPM Letter provides important assistance to those agencies whose plans are held to be constitutional. For those plans that have not been challenged, three is a presumption of constitutionality, and OPM's guidance will assist them as well.

2. Several commenters challenged the definition of employees in sensitive positions and the testing designated position (TDP) selection process.

One commenter suggested that the definition of an "employee in a sensitive position" and the criteria for selecting TDPs are grossly overbroad and vague. The definition of "employee in a sensitive position" that appears in the FPM Letter at section 3a(1) is exactly the same as the definition of that term set out in section 7(d) of Executive Order 12564. OPM believes that using that definition to determine the group of positions that might be subject to random testing and then using the TDP selection process outlined in section 3a(2)(ii) guides agencies to craft a narrow group of TDPs that comprise both those positions falling within the Executive Order definition of employees in sensitive positions *and*, from that group of positions, identify the positions that have the *most direct* impact on public health, safety, or national security.

Another said that it was ridiculous to target law enforcement positions for random testing and that heavy equipment and motor vehicle operators were more likely to present safety hazards. The definition of employees in sensitive positions is not limited to law enforcement positions nor does it target those positions. Those positions are simply one group of positions that may be randomly tested if the agency head determines, through the TDP selection process, that they have a direct relation to public health, safety, or national security. In addition, under both the definition of employees in sensitive positions and the TDP selection process, heavy equipment and motor vehicle operators may well be included in an agency's TDPs.

Another opined that agency heads must consider the necessity for the random testing of employees holding sensitive positions in the agency given the level of drug use, the utility of other detection means, and then publish the basis for their decision to use random testing. In the cases in which random testing has been upheld as constitutional, it has been argued that both the level of drug use in the agency and the utility of other detection means should be considered before an agency may properly embark on random urinalysis. In those cases, the courts have held that establishing a baseline of drug use or examining the utility of alternative detection means were not prerequisites for drug testing. *See, e.g., National Federation of Federal Employees v. Cheney*, No. 88-5060 (D.C. Cir. August 29, 1989). Similarly, OPM does not believe that agency heads must consider the level of drug use or the utility of alternative detection means before instituting a drug testing program. While these are important factors that agency heads will certainly need to consider as they attempt to meet create a Drug-Free Workplace in their agencies, those considerations should not govern whether or not drug testing is begun. On the other hand, agency heads who have established Drug-Free Federal Workplace plans under Executive Order 12564 have included a discussion of the necessity for random testing their TDPs and the basis for their selection of those positions for random testing in their plans.

Another urged deletion of section 3a(1)(ii) of the FPM Letter because mere access to classified information is not sufficient to justify drug testing. This commenter urged that the type of

BEST COPY AVAILABLE

VOL 54 ISS 217 NO 13 1989 UMI

information and the degree of access should be examined before designating the position as a TDP. Those factors are certainly appropriate in determining whether or not to include particular positions as TDPs. Sufficient latitude is afforded in the definition of "employee in a sensitive position" set out at section 3a(1)(ii) of the FPM Letter (and section 7(d)(2) of Executive Order 12564) and the TDP selection process outlined at section 3a(2)(ii) of the FPM Letter to allow agency heads to consider those factors. In addition, as section 3a(1)(ii) of the FPM Letter simply restates, *verbatim*, the definition set out at section 7(d)(2) of the Executive Order, OPM sees no need to delete it. The same commenter urged the rewriting of section 3a(4) of the FPM Letter to standardize the TDP selection process to ensure non-discriminatory selection. Section 3a(3) of the FPM Letter already requires the neutral application of the TDP selection process and expressly urges agencies to ensure that "the selection process does not result in arbitrary, capricious, or discriminatory selections." Thus, OPM believes that the concerns of this commenter have already been addressed.

3. One commenter urged that section 3a, 3a(4), & 3a(5) of the FPM Letter be amended to return to the characterization of testing contemplated thereunder as "random" rather than "comprehensive." The term "comprehensive" was used in the proposed version of the FPM Letter to accommodate those few agencies that decide, due to the nature of their agency mission and the extremely sensitive nature of the positions held by their TDPs, to test *all* of the employees holding those positions rather than a randomly selected portion of those TDPs. Comprehensive testing includes random testing.

C. Reasonable Suspicion Testing

1. One commenter stated that a reasonable suspicion of illegal drug use should exist before any testing is undertaken by a Federal agency of its employees. While OPM believes that a strong reasonable suspicion testing program is an important part of any effective Drug-Free Workplace program, the public safety, health, or national security risk present for employees holding TDPs is strong enough to warrant suspicionless, random testing of employees holding those positions. Thus, reasonable suspicion will not be required for all testing.

2. One commenter stated that there should be no testing based upon a reasonable suspicion of illegal drug use. Testing should be based on probable cause that an employee is impaired while on duty. The commenter stated that even if reasonable suspicion testing is upheld, the definition in the FPM Letter invites abuse. This commenter believed that it provides that a reasonably articulable belief or a pattern of misconduct can be used to punish employees without cause. To the contrary, OPM asserts that testing based upon a reasonable suspicion of illegal drug use is an accepted practice among many municipal governments for testing public employees holding sensitive positions. Probable cause, the standard at criminal law for instituting a search, is not required before the institution of an administrative search, such as a drug test. The definition used in the FPM Letter was developed through an examination of the definition of reasonable suspicion for administrative searches approved by the Federal courts over the years. It has withstood judicial scrutiny in several cases and should not be subject to the strict limitations of probable cause because the search at issue is undertaken for administrative, rather than criminal prosecution, purposes.

Another commenter urged OPM to amend section 3c of the FPM Letter to limit testing based upon a reasonable suspicion of illegal drug use either to reasonable suspicion of illegal drug use while on duty or reasonable suspicion that an employee's performance is affected by illegal drug use while on duty. This commenter stated that off duty drug use that doesn't affect job performance should not be the basis for government action. To the contrary, OPM believes that off duty drug use can be a proper basis for reasonable suspicion testing. Indeed, there are some positions within the Federal service, as noted by the Supreme Court in *National Treasury Employees Union v. Von Raab*, 109 S. Ct. 1384, 1393 (1989), which are incompatible with illegal drug use—on- or off-duty.

3. One commenter sought the deletion of section 3c(2)(iv) of the FPM Letter and asserted that agency management should not be required to make a decision on whether to direct a reasonable suspicion test based on information provided by credible and reliable sources. The commenter questioned that ability of the management official to make an objective determination of the reliability and credibility of a source. Management officials are frequently called upon to make determinations about the credibility and reliability of the sources of information they receive. They will be required to do no more than that in determining whether reasonable suspicion of illegal drug use exists. In addition, under the plans developed by the agencies, a written record will be made of the circumstances leading to a reasonable suspicion determination and higher level concurrence will be required before an employee is directed to take a reasonable suspicion drug test.

D. Accident/Unsafe Practice Testing

1. One commenter suggested that section 3d of the FPM Letter on specific condition testing should be limited to those persons whose actions may have contributed to the accident or unsafe practice that is the basis for the test. The same commenter also suggested that some proof of improper conduct be required before an employee could be subject to testing. By the very terms of section 3d of the FPM Letter, specific condition (now accident or unsafe practice) testing is triggered by "an examination authorized by the agency regarding an accident or unsafe practice." OPM believes that testing directed under those conditions will ensure that only those persons involved in the accident or unsafe practice will be tested for illegal drug use.

2. One commenter registered a strong objection to safety reasons for accident and unsafe practice testing. This commenter noted that shipyards are inherently unsafe which would lead to more unwarranted tests because of the more dangerous work environment. Dangerous work environments are one of the most persuasive reasons for accident and unsafe practice testing. In order to protect Federal workers, their co-workers, and members of the public from injury and to help determine the cause of on-the-job mishaps, OPM believes that accident and unsafe practice testing is necessary.

3. The same commenter opined that employees who do not use illegal drugs will be more liable for accident or unsafe practice testing because users would be more likely not to report accidents in order to avoid testing. Reporting accidents is a responsibility that all Federal employees must meet. Co-workers and the public suffer if accidents are not reported. There are long-standing safety and accident reporting procedures in place to ensure timely reporting of accidents in the workplace. The drug testing program is unlikely to impede the proper reporting of workplace mishaps.

4. One commenter urged the amendment of section 4c of the FPM Letter to provide that the notice to employees that they are being directed to a drug test based upon an accident or unsafe practice should also include the circumstances leading to the decision to test. OPM has added a final sentence to that section of the FPM Letter that adds that provision. The same commenter asked that we change the title of section 3d to "Accident/Unsafe Practice" to avoid confusion with section 4c. OPM has done so.

E. Follow-Up Testing During Rehabilitation

1. One commenter suggested that section 3e of the FPM Letter be amended to add, before the last sentence of that section: "Positive results obtained during counseling or rehabilitation can only be used to support discipline or an adverse action if the employee, at the time of the test, has been provided with a reasonable opportunity to have been rehabilitated." Rather than make the suggested change in this FPM Letter, OPM will discuss these issues in a later FPM issuance discussed below in the discussion of comments entitled L. Rehabilitation Act/Reasonable Accommodation.

F. Applicant Testing

1. One commenter stated that there is no justification for testing applicants for any positions. This commenter asserted that Background Investigations are required only for sensitive positions and that non-sensitive positions should not be subject to applicant testing. Section 3(d) of Executive Order 12564 authorizes agency heads to conduct applicant testing. Section 3f of the FPM Letter restates that authority and provides guidance to agency heads on how to implement an applicant testing program. As noted in that section, agency mission is a factor that agency heads should consider in determining the scope of applicant testing.

2. Another commenter urged that the third sentence of section 3f(2) as it appeared in FPM Letter 792–16 concerning applicants providing medical information be restored. OPM has restored the provision.

3. The same commenter stated that section 3f(4) of the FPM Letter should require agencies to deny Federal employment to those applicants who test positive for illegal drugs. That commenter also urged the inclusion of additional standards and guidance if discretion is left to the agencies. Section 1(c) of the Executive Order states that "[p]ersons who use illegal drugs are not suitable for Federal employment." Given that strongly stated standard, no additional standards that OPM might devise for inclusion in the FPM Letter are necessary. As noted previously, this FPM Letter provides guidance to the agencies on how to implement Executive Order 12564 but does not state any additional requirements that do not already appear in that Order or in existing statute or regulation. Thus, no new requirement that agencies must deny employment to applicants who test positive for illegal drugs will be included in the FPM Letter.

G. Testing Procedures

1. Two commenters urged that additional protection should be included in the FPM Letter against false positives. One of them noted the example of employees that work with chemicals that they may inhale and cause their drug tests to turn up positive. The HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs provide the scientific and technical procedures that must be followed. Those guidelines require a Medical Review Officer (MRO) to determine the validity of alternative explanations for positive test results. Those procedures provide the necessary protection for Federal employees against positive test results that are not due to illegal drug use.

2. One commenter stated that the HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs does not allow the employee to provide a new sample as a defense against erroneous test results. This commenter stated that the HHS Guidelines only allow a retest of a portion of the original sample that could be flawed. This commenter stated that this demonstrated an outrageous indifference to logic, merit principles, and due process. (Another commenter also noted that the procedure denied employee rights to due process.) The commenter stated that allowing the testing of a different sample would guarantee the protection of employee rights. The FPM Letter notes that agencies are required to follow the HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs when conducting drug testing programs. OPM did not promulgate those guidelines. HHS is responsible for their issuance and their amendment, if appropriate. OPM supports the position taken in the HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs that later testing of new samples would undermine the accuracy and validity of the testing process.

3. Another commenter stated that the procedure set out in section 4g(2) of the FPM Letter for providing a specimen under observation is embarrassing and degrading and it should only be done when there is reasonable evidence that an employee will alter or tamper with the test sample. The HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs and the FPM Letter make it clear that direct observation will occur only if there is reason to believe that an employee or applicant may alter or substitute the specimen. The FPM Letter also includes a list of examples of circumstances that may lead to that reason to believe that the employee or applicant may alter or substitute the specimen. OPM believes that the HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs require a reasonable basis for direct observation and that the FPM Letter has incorporated those requirements.

4. Another commenter urged the use of the term "verified positive test result" rather than "confirmed positive test result" throughout the FPM Letter in order to avoid confusion with the HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs. OPM has made the necessary changes.

H. Notices to Employees

1. One commenter urged that the FPM Letter include a requirement that, as a part of the process whereby notice of drug testing is given to employees, each agency must turn over the names of all bargaining unit employees holding TDPs to the union that represents them. Although this is a procedural issue that could arise, the interpretation and application of 5 U.S.C. 7114(b)(4), which addresses an agency's obligation to provide information to an exclusive representative, are outside the purview of this guidance. Consequently, this issue will not be addressed here.

I. Compliance With HHS Mandatory Guidelines

1. Two commenters noted that section 4c of the FPM Letter should be amended to note that adoption and compliance with the HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs is mandatory, not permissive. OPM has made the necessary change to note that agency compliance with those guidelines is mandatory.

J. Confidentiality/Recordkeeping/ Patient Records and Test Results

1. One commenter urged that section 4f(1) of the FPM Letter be amended to reflect the requirement of 42 U.S.C. 290ee–3, to-wit: "(1) Records of the identity * * * drug abuse prevention program conducted, regulated, or directly or indirectly assisted by a Federal agency must be kept confidential * * *." OPM has made the necessary amendments to that section.

2. The same commenter urged that section 4f of the FPM Letter be amended to clarify the restrictions on the release

VOL 54 ISS 217 NOV 13 1989 UMI

of drug test results to third party adjudicators. OPM believes that there is no need to do anything further than restate the limitations on release of drug test results as they appeared in section 503 of the Supplemental Appropriations Act of 1987. That has been done.

3. The same commenter urged the amendment of the third line of section 4f(2)(ii) of the FPM Letter to add "patient" before "identifying." OPM has made the suggested change.

4. The same commenter suggested the amendment of the second sentence of section 4f(6) of the FPM Letter to add "prior written" before "employee consent" and replace "empowered to recommend or take action" with "having authority to take adverse personnel action against such employee." The second change should also be made in section 4f(7). OPM has made the suggested changes.

5. The same commenter suggested the deletion of section 4g of the FPM Letter to diminish any confusion that might be caused by paraphrasing the HHS Mandatory Guidelines on Federal Workplace Drug Testing Progams. OPM believes that no confusion exists between section 4g of the FPM Letter and the HHS Mandatory Guidelines on Federal Workplace Drug Testing Programs and believes that it is important to reiterate the protections included in them in the FPM Letter.

6. The same commenter noted that 42 CFR 2.32 requires written consent be obtained with a prescribed written statement and that the sample set out in Attachment 3 to the FPM Letter does not follow it. The commenter also suggested that the following be added to the sample consent form: "The Federal rules restrict any use of the information to criminally investigate or prosecute any alcohol or drug abuse patient." That provision has been added to the sample consent form.

7. The same commenter suggested that section 11 of Attachment 6 to the FPM Letter be changed from "Confidentiality of Client Records" to "Confidentiality of Alcohol and Drug Abuse Patient Records." Section 11 has been changed as suggested.

K. Discipline

1. One commenter objected to using a voluntary admission of a drug problem as a finding of illegal drug use and removal for the second offense as they violate nexus and reasonable accommodation requirements. OPM does not believe that either of the challenged provisions violate those requirements. Neither of the provisions eliminates the need for a nexus between adverse actions taken against employees for misconduct and the efficiency of the service. That requirement is statutory in nature and is not affected by this FPM Letter. A voluntary admission of illegal drug use is simply one type of evidence that an employee uses illegal drugs. Executive Order 12564 requires the *initiation* of removal action for a second verified positive test result. Nexus must still be established in order for an adverse action based on misconduct to be sustained on appeal. Similarly, neither provision restricts the requirement that agencies must, in appropriate cases, provide reasonable accommodation of an employee's handicap.

2. Another commenter stated section 4d of the FPM Letter should state a strong policy in favor of agencies at least initiating action against employees who refuse testing. The provision has been changed to urge agencies to at least initiate action under those circumstances.

3. The same commenter suggested that section 5b of the FPM Letter be changed to "Mandatory Initiation of Removal Action." This change has been made.

4. The same commenter stated that section 5d of the FPM Letter should be deleted as it is not useful to list the available disciplinary actions. OPM believes that it is helpful to list the types of actions that may be taken based upon illegal drug use by an employee.

L. Rehabilitation Act/Reasonable Accommodation

1. Two commenters recommended that OPM take this opportunity to revise and clarify procedural guidance with regard to the agency obligation to accommodate employees identified as drug addicts and alcoholics. They urged institution of a flexible reasonable accommodation policy based on risk assessment. OPM is in the process of developing new guidance on the issue of reasonable accommodation. That new guidance will address the concerns expressed by these commenters.

M. Employee Assistance Programs

1. One commenter stated that some of the EAP consortia listed by city in the appendix to the FPM Letter are region-wide and that it would be more helpful to list them by region. OPM has prepared an updated listing of EAP consortia and has substituted it for the list set out in the proposed version of this FPM Letter.

2. The same commenter urged OPM not to use the names of the treatment providers, but to use titles and phone numbers and provide an updated list. The new list has been substituted for the one that appeared previously.

Provisions From The National Drug Control Strategy

On September 5, 1989, President Bush transmitted the 1989 National Drug Control Strategy to Congress. That strategy was prepared by the Office of National Drug Control Policy and transmitted to the Congress in accordance with section 1005 of the Anti-Drug Abuse Act of 1988 (21 U.S.C. 1504). The National Strategy contained two provisions directing that Federal agencies take certain action toward implementation of Executive Order 12564. On page 104 in Appendix B of the National Strategy, the agencies are given a schedule for implementation and guidance on reviewing their testing designated positions as the courts rule on legal challenges to the program. Those directives have been incorporated into new sections of the FPM Letter at section 2d and section 3a(6), respectively.

U.S. Office of Personnel Management.

FPM Letter 792-19

Office of Personnel Management

Federal Personnel Manual System

FPM Letter 792-19

[Published in advance of incorporation in FPM Supplement 792-2; RETAIN UNTIL SUPERSEDED]

SUBJECT: Establishing a Drug-Free Federal Workplace

Washington, DC 20415.

Heads of Departments and Independent Establishments:

1. PURPOSE

a. The use of illegal drugs by a significant proportion of the national workforce has major adverse effects on the welfare of all Americans, and results in billions of dollars of lost productivity each year. There is no reason to believe that there is a greater incidence of illegal drug use in the Federal workforce than in the private workforce. However, as the Nation's largest employer, the Federal government and its two million civilian employees must be in the forefront of our national effort to eliminate illegal drugs from the American workplace.

b. The use of illegal drugs by Federal employees, whether on or off the job, cannot be tolerated. Employees who use illegal drugs have three to four times more accidents while at work. Federal workers have a right to a safe and secure workplace, and all American citizens, who daily depend on the work of the Federal government for their health, safety, and security, have a right to a reliable and productive civil service. Federal agencies must take action for the protection of individual drug users, their co=workers, and the society at large. In recognition of this, President Reagan, in Executive Order 12564, set forth the policy of the United States Government to eliminate drug use from the Federal workplace.

c. Agencies will establish a comprehensive drug prevention program which is humane, responsible, and effective. In recognition that employees who use drugs are, themselves, primarily responsible for changing their behavior, the program will include drug education and training, employee counseling and assistance, and voluntary drug testing. However, where appropriate, there will be mandatory drug testing and disciplinary action.

d. This will be a balanced program which emphasizes offering a helping hand to employees who are using illegal drugs. At the same time, it must be clear to all that continued illegal drug use by employees will not be tolerated and may result in disciplinary action up to and including removal.

e. Under the Executive Order, OPM is directed to issue government-wide guidance to agencies on the implementation of the terms of the Order.

2. AGENCY RESPONSIBILITIES

a. The head of each Executive agency shall develop a plan for achieving the objective of a drug-free workplace with due consideration of the rights of the government, and the employee. Agencies should make every reasonable effort to ensure workforce understanding of, and employee organization cooperation with, their drug prevention programs. Communications should emphasize the importance of the drug prevention program for agency mission and the community at large. Further, agencies should ensure that their drug prevention programs complement agency programs to deal with alcohol abuse and related employee problems.

b. Each agency plan shall include:

(1) A statement of policy setting forth the agency's expectations regarding drug use and the action to be anticipated in response to identified drug use;

(2) Employee Assistance Programs (EAP's) with high level direction, emphasizing education, counseling, referral to rehabilitation, and coordination with available community resources;

(3) Supervisory training to assist in identifying and addressing illegal drug use by agency employees (agencies may wish to include material on alcohol abuse in this training);

(4) Provision for self-referral as well as supervisory referrals to counseling or rehabilitation with maximum respect for individual confidentiality consistent with safety and security requirements; and

(5) Provision for identifying illegal drug users, including testing on a controlled and carefully monitored basis in accordance with E.O. 12564 and the guidance contained below.

c. Agencies should consult with the Attorney General regarding their drug testing programs, as provided by Section 6(b) of the Order.

d. Each Federal agency will expedite the implementation of a Drug-Free Workplace plan. Those agencies with certified plans will fully implement them, consistent with the holdings in recent court decisions, by January 5, 1990, as required in the National Drug Control Strategy. This implementation is to include Employee Assistance Programs or other appropriate mechanisms, training for supervisors, rehabilitation for drug users, and drug testing. Agencies without currently certified plans will complete certification by January 5, 1990, and fully implement the plans by April 5, 1990.

3. AGENCY DRUG TESTING PROGRAMS

a. Comprehensive Testing for Employees in Sensitive Positions. In accordance with section 3(a) of Executive Order 12564, the head of each Executive agency shall establish a program to test for the use of illegal drugs by employees in sensitive positions.

(1) For purposes of this program, the term "employee(s) in a sensitive position" refers to:

i. An employee in a position that an agency head designates Special Sensitive, Critical-Sensitive, or Noncritical-Sensitive under Chapter 731 of the Federal Personnel Manual or an employee in a position that an agency head designates as sensitive in accordance with Executive Order No. 10450, as amended;

ii. An employee who has been granted access to classified information or may be granted access to classified information pursuant to a determination of trustworthiness by an agency head under Section 4 of Executive Order No. 12356;

iii. Individuals serving under Presidential appointments;

iv. Law enforcement officers as defined in 5 U.S.C. § 8321(20); and

v. Other positions that the agency head determines involve law enforcement, national security, the protection of life and property, public health or safety, or other functions requiring a high degree of trust and confidence.

(2) The head of each agency has discretion to determine which sensitive positions for which comprehensive testing is authorized ought to be subject to such testing. This determination should be based on the nature of the agency's mission, its employees' duties, the efficient use of agency resources, and the danger that could result from the failure of an employee to discharge his or her duties adequately. Thus, who will actually be tested is a function of a two step analysis by the agency head.

i. First, the criteria set forth in Section 7(d) of Executive Order 12564 must be applied to all employees in the agency to determine which employees fall into the "pool" of employees potentially subject to drug testing; this is the pool of "employees in sensitive positions" as defined in the Executive Order. While the definition of the pool of "employees in sensitive positions" is the same from agency to agency, the testing of all employees in that pool may be appropriate for some agencies and not for others depending upon the duties of the positions and the missions of the agencies. If an agency head decides not to test all employees in the pool, then a further determination must be made as outlined below.

ii. Second, a determination must then be made from this pool as to which positions will actually be tested. For the sake of clarity within this guidance, this second group of positions is referred to as Testing Designated Positions (TDPs). Thus, an agency head may determine not to designate all sensitive positions as TDPs, but may limit testing to certain positions. For instance, this may include positions where national security considerations are present, as well as positions where there is a clear impact on public health or safety (e.g., air traffic controllers; operators of motor vehicles; medical, nursing, and related health care personnel) or positions relating to illegal drug control (e.g., law enforcement officers such as customs agents and drug enforcement agents). Other positions should be reviewed with particular care when one or more of the following are present as regular, recurring duties: operation or maintenance of any transportation, motor vehicle, aircraft, or heavy or other large mechanical or electrical equipment; work with explosive, toxic, radioactive, or other dangerous

VOL 54 ISS 217 NO 13 1989 UMI

materials; work with fluids or gases under heat or pressure; work by employees uniquely positioned to exploit highly sensitive computer or financial data for financial gain.

(3) When selecting TDPs, agencies should ensure that the selection process does not result in arbitrary, capricious, or discriminatory selections. Agencies must be able to justify their selection of TDPs as a neutral application of the selection criteria set forth in section 3(a)(2)(ii), above. Agencies are absolutely prohibited from selecting positions for drug testing on the basis of a desire to test particular individual employees.

(4) Individuals in TDPs may be selected for comprehensive testing in a variety of ways. For example, their names or social security numbers may be selected randomly by computer, they may be selected according to their birth dates, or they may be selected by the first letter in their surnames.

(5) Comprehensive testing may include unscheduled testing and random sampling of the employees within the group of TDPs. As an alternative to this method of selection, the head of an agency may, at his or her discretion, designate that all employees in TDPs shall be tested.

(6) In carrying out their responsibilities under Section 3 of Executive Order 12564, agency heads should review their testing designated positions periodically as significant new decisions on drug testing are issued by the courts.

b. Voluntary Testing. The head of each Executive agency shall establish a program for voluntary employee drug testing that allows employees to volunteer to participate in the drug testing program. An agency should afford an opportunity for any employee to step forward and be tested at a time determined appropriate by the agency.

c. Reasonable Suspicion Testing. In addition to the testing outlined in subsections (a) and (b) of this section, the head of each Executive agency is authorized to test an employee when there is a reasonable suspicion that any employee uses illegal drugs. For the purposes of this program "reasonable suspicion" is an articulable belief that an employee uses illegal drugs drawn from specific and particularized facts and reasonable inferences from those facts.

(1) Prompt supervisory training to assist in identifying and addressing illegal drug use by agency employees should be provided to supervisors as each agency develops and implements its agency program. Such training will make supervisors more sensitive to employee behavior and help supervisors recognize those facts that give rise to a reasonable suspicion.

(2) "Reasonable suspicion" that an employee uses illegal drugs may be based upon, among other things:

i. observable phenomena, such as direct observation of drug use and/or the physical symptoms of being under the influences of a drug;

ii. a pattern of abnormal conduct or erratic behavior;

iii. arrest or conviction for a drug related offense; or the identification of an employee as the focus of a criminal investigation into illegal drug possession, use, or trafficking;

iv. information provided either by reliable and credible sources or independently corroborated; or

v. newly discovered evidence that the employee has tampered with a previous drug test.

(3) Where testing is conducted based on reasonable suspicion, each agency should promptly detail in writing the circumstances which formed the basis of its determination that reasonable suspicion exists to warrant the testing. Such documentation should be retained in the adverse action file compiled by the agency.

d. Accident/Unsafe Practice Testing. The head of each agency is also authorized to test an employee for illegal drug use in an examination authorized by the agency regarding an accident or unsafe practice.

e. Follow-up Testing. The head of each agency may also require agency-administered follow-up drug testing during or after counseling or rehabilitation for illegal drug use through an Employee Assistance Program. While follow up testing may be undertaken as a part of counseling or rehabilitation under the Employee Assistance Program, only the results of agency-administered follow-up testing may be used, if verified positive results are obtained, to support an adverse action taken under section 5(d)(2) of the Executive Order. To insure its integrity, such agency-administered follow-up testing ought to be unannounced.

f. Applicant Testing. The head of each Executive agency is authorized, but not required, to test any applicant for illegal drug use. Agency heads who choose to test applicants for illegal drug use have a variety of options. For example, depending on the mission of the agency, an agency may wish to test all applicants for employment. On the other hand, an agency may determine that it will limit applicant testing to applicants for TDPs. Where an applicant must submit to a physical examination as a condition of employment, an agency may wish to require a drug test as part of the physical examination procedures.

(1) Agencies should include notice of drug testing on vacancy announcements for those positions where drug testing is required. A sample notice provision for vacancy announcements or other information about the position would read as follows: "All applicants for this position will be required to submit to a urinalysis for illegal drug use prior to appointment in the Federal service."

(2) Where applicants are given preemployment physical examinations, drug testing may be performed as part of the physical examination procedures. Where no physical examinations are required, applicants should be contacted and directed to report to a designated contractor or agency facility for their drug test. Before a drug test is conducted, all applicants may be advised of the opportunity to submit medical documentation that may support a legitimate use of a specific drug. Aside from the general notice of the drug-testing requirement in vacancy announcements, applicants should receive as little notice as possible of the actual date and time of their drug test. A urine specimen should be taken no more than forty-eight hours after the applicant is contacted to set up the drug testing.

(3) In remote locations, applicants should be directed to report to the nearest contractor or agency facility. Agencies ought to provide for reimbursement to applicants for reasonable expenses incurred in travel to the drug testing facility. In extremely remote areas, the contractor may be required to travel periodically to the region to perform drug-testing of applicants.

(4) All applicants with verified positive test results should be refused employment.

g. Hardship Exemption. Agencies may choose to exempt certain positions from the drug testing program on the basis of hardship due to the remote location of the duty station of the positions, the unavailability of on-site testing personnel, or the lack of an appropriate site for test administration. Agencies should, however, use reasonable means to overcome such hardships.

4. DRUG TESTING PROCEDURES

a. 60 Day General Notice to All Employees.

(1) Agencies which have not yet implemented a drug testing program shall ensure that at least sixty days elapse between a general one-time notice to all employees that a drug testing program is being implemented and the beginning of actual drug testing.

Such notice should indicate the purpose of the drug testing program, the availability of counseling and rehabilitation assistance through the agency's Employee Assistance Program, when testing will commence, the general categories of employees to be tested, and the general parameters of testing. Agencies may decide to include with their notice a description of their drug program or a copy of the internal personnel rules establishing their program.

(2) Any agency may take action as described in parts 3c and 3d. of this letter without reference to the 60 day notice requirement.

b. Special Notice to Covered Employees. Agencies should ensure a specific notice is given, in writing, to each employee in a TDP no later than thirty days before testing commences. We recommend that agencies obtain a written acknowledgment of receipt of the notice. A sample acknowledgment for agency consideration is provided as attachment 1 to this letter. The notice should contain the following information:

(1) The reasons for the urinalysis test, consistent with agency policy formulated in accordance with sections 1 and 3a. of this letter.

(2) Notice of the oppportunity for an employee to identify himself voluntarily as a user of illegal drugs willing to undertake counseling and, as necessary, rehabilitation, in which case disciplinary action is not required.

(3) Assurance that the quality of testing procedures is tightly controlled, that the test used to confirm use of illegal drugs is highly reliable, and that test results will be handled with maximum respect for individual confidentiality, consistent with safety and security.

(4) Notice of the opportunity and procedures for submitting supplemental medical documentation that may support a legitimate use for a specific drug.

(5) The circumstances under which testing may occur, consistent with the policy set forth in section 3 of this letter.

(6) The consequences of a verified positive result or refusal to be tested, including disciplinary action.

(7) The availability of drug abuse counseling and referral services, including the name and telephone number of the local Employee Assistance Program counselor.

c. Notice to Employees Tested Under Specific Conditions. Employees being tested under conditions outlined in section 3c, 3d, and 3e will receive notice that includes information contained in section 4b., paragraphs (1), (3), (4), (6), and (7). Employees being tested under conditions outlined in section 3c will also receive notice of the circumstances leading to the decision to test them for illegal drug use.

d. Agency Response to Persons—Refusing to Participate in a Required Drug Test.

(1) To maintain the integrity of the testing and enforcement program, agencies should initiate disciplinary action for employees who refuse to be tested. Such action may include, but is not necessarily limited to, removal of such employees as failing to meet a condition of employment and/or refusing to comply with the requirements of the agency's drug-free workplace program.

(2) Applicants who are not current employees and who refuse to be tested must be refused that employment.

e. Technical Guidelines for Drug Testing. The Secretary of Health and Human Services, as directed by Executive Order No. 12564, issued Mandatory Scientific and Technical Guidelines for Federal Employee Drug Testing Programs. 53 FR 11970, April 11, 1988. Agencies must conduct their drug testing programs in accordance with those scientific and technical guidelines.

f. Confidentiality of EAP Treatment Records and Drug Test Results. Agency drug testing programs under E.O. 12564 shall contain procedures to protect the confidentiality of 1) medical and rehabilitation records and 2) drug test results. These two classes of information are contained in different systems of records and are subject to different confidentiality requirements. However, both EAP treatment records and drug test results may be utilized in the program. Thus, both are discussed below.

(1) Records of the identity, diagnosis, prognosis, or treatment of any patient which are maintained in connection with performance of a drug abuse prevention program conducted, regulated, or indirectly assisted by a Federal agency must be kept confidential and may be disclosed only under limited circumstances and for specific purposes. Agencies may wish to refer to regulations issued by the Department of Health and Human Services (42 C.F.R. 2. 1, et seq. (1987)) on maintaining the confidentiality of treatment records.

(2) Drug abuse treatment records may be disclosed without the consent of the patient only:

i. to medical personnel to the extent necessary to meet a genuine medical emergency;

ii. to qualified personnel for conducting scientific research, management audits, financial audits, or program evaluation, with all patient identifying information removed from the data; or

iii. if authorized by an appropriate court order granted after application showing good cause.

(3) Any other disclosure may be made only with the written consent of the patient, and only under circumstances set out below. Such consensual disclosure may be made to the patient's employer for verification of treatment or a general evaluation of treatment progress.

(4) Agency drug testing programs should include confidentiality protections consistent with the above requirements. These protections should extend to drug testing results made a part of treatment and rehabilitation records.

(5) Accordingly, drug abuse treatment or rehabilitation records may not be otherwise disclosed by agencies without the consent of the employee involved. A sample consent for release of patient information during and after treatment or rehabilitation and a sample release memorandum are included in attachments 2 and 3, respectively. Any disclosure without such consent is strictly prohibited.

(6) As noted above, agencies will also obtain confirmed positive drug test results that are not part of treatment and rehabilitation records. As part of the drug testing procedure and in conformity with section 503 of the Supplemental Appropriations Act of 1987, Pub. L. 100-71, confirmed positive test results may only be released without prior written employee consent to the agency's medical review official (as defined in the HHS Mandatory Scientific and Technical Guidelines for Federal Employee Drug Testing Programs), the administrator of the agency Employee Assistance Program (EAP), to the management official(s) having authority to take adverse personnel action against such employee and pursuant to the order of a court of component jurisdiction where required by the United States Government to defend against any challenge against any adverse personnel action.

(7) Under the HHS Mandatory Scientific and Technical Guidelines for Federal Employee Drug Testing, after examination and verification by the medical review official, confirmed positive test results will be forwarded to the EAP program administrator and to the management official(s) having authority to take adverse personnel action against such employee. Drug test results should be protected under the

VOL 54 ISS 217 NO 13 1989 UMI

provisions of the Privacy Act, 5 U.S.C. 552a, et seq., and should not be released in violation of that Act.

g. Privacy in Drug Testing. Agency drug testing procedures under E.O. 12564 must allow individual privacy unless the agency has reason to believe that a particular individual may alter or substitute the specimen to be provided. Agencies should refer to the HHS Mandatory Scientific and Technical Guidelines for Federal Employee Drug Testing Programs for the specific procedures to be followed in conducting drug tests.

(1) The sample shall be provided in a rest room stall or similar enclosure so that the employee is not being viewed while providing the sample. However, this requirement does not restrict the ability of the employer to control the test area and to take other actions to ensure that the employee does not substitute or tamper with the sample. For example, the employer may: (a) control the test area to ensure that samples have not been hidden for substitution; (b) prohibit the carrying of bags, luggage, briefcases, or other containers into the test area; (c) prohibit the wearing of coats and/or jackets in the test area; (d) station a testing official in the rest room outside the stall where visual observation is not possible, but where the official can monitor the setting for tampering; (e) examine the sample after it is provided for abnormalities in color, temperature, or other evidence that tampering may have occurred. Agencies should refer to the HHS Mandatory Scientific and Technical Guidelines for Federal Employee Drug Testing Programs for more specific information on sample collection.

(2) Generally, an employee or applicant may be required to provide a sample under observation only if there is reason to believe that the employee or applicant may alter or substitute the urine specimen. For example, employers may wish to require observation when facts and circumstances suggest that the person to be tested: (a) is an illegal drug user; (b) is under the influence of drugs at the time of the test; (c) has previously been confirmed by the agency to be an illegal drug user; (d) is seen to have equipment or implements used to tamper with urine samples; (e) has recently been determined to have tampered with a sample.

5. AGENCY ACTION UPON FINDING THAT AN EMPLOYEE USES ILLEGAL DRUGS

a. Drug Use Determination. The determination that an employee has used illegal drugs may be made on the basis of direct observation, a criminal conviction, verified positive results of the agency's drug testing program, the employee's own admission, or other appropriate determinations.

b. Mandatory Initiation of Removal from Sensitive Positions. While removal of an employee confirmed to have used illegal drugs is authorized under the Executive Order, initiation of an action to remove the employee from the Federal service is required after a second determination that the employee uses illegal drugs. Sections 5(b) and 5(d), respectively, of Executive Order 12564. If occupying a sensitive position, the employee must not be allowed to remain on duty status in that position. Section 5(c) of Executive Order 12564. Removal of an employee occupying a sensitive position who is determined to use illegal drugs may be necessary if there are no non-sensitive positions to which the employee may be transferred in the agency, unless the agency head determines that maintaining the employee in the sensitive position would not pose a danger to public health or safety or the national security.

c. Mandatory EAP Referral. Upon reaching a finding that an employee uses illegal drugs, agencies will refer the employee to an Employee Assistance Program and give the employee an opportunity to undertake counseling and rehabilitation activities. Section 5(a) of Executive Order 12564. While agencies should provide reasonable support and assistance to employees who demonstrate a desire to become drug-free, the ultimate responsibility to be drug-free rests with the individual employee.

d. Discretionary Disciplinary Actions. Upon the first confirmed determination that an employee uses illegal drugs, there is a range of disciplinary actions available to an agency, from a written reprimand to removal. Except for employees who voluntarily identify themselves as users of illegal drugs, obtain appropriate counseling and rehabilitation, and thereafter refrain from illegal drug use, agencies are required to initiate some form of disciplinary action against employees who are found to use illegal drugs. Section 5(b) of Executive Order 12564. Agencies have discretion in deciding what disciplinary measures to initiate, consistent with the requirements of the Civil Service Reform Act and other appropriate factors. Among the disciplinary measures available to agencies are the following:

(1) Reprimanding the employee in writing.

(2) Placing the employee in an enforced leave status, consistent with the procedural requirements of 5 C.F.R. §§ 752.203 or 752.404 as appropriate.

(3) Suspending the employee for fourteen days or less consistent with the procedural requirements in 5 C.F.R. § 752.203.

(4) Suspending the employee for 15 days or more consistent with the procedural requirements in 5 C.F.R. § 752.404.

(5) Suspending the employee, consistent with the procedural requirements in 5 C.F.R. § 752.404, until such time as he or she successfully completes counseling or rehabilitation or until the agency determines that action other than suspension is more appropriate to the individual situation.

(6) Reducing the employee in grade consistent with the procedural requirements in 5 C.F.R. § 752.404.

(7) Removing the employee from Federal service, consistent with the procedural requirements of 5 C.F.R. § 752.404, for: verified illicit use of an illegal drug; refusal to take a drug test authorized by E.O. 12564; refusal to obtain or successfully complete counseling or rehabilitation as required by the Executive Order; or once having completed counseling or rehabilitation, failing to refrain from illegal drug use.

(8) Initiating action to remove the employee from Federal service is mandatory upon a second verified finding of illegal drug use. Section 5(c) of Executive Order 12564.

e. Preponderance of Evidence Requirement. Agencies are reminded that any action, including removal, taken against an employee under title 5 United States Code, Chapter 75, must be supported by a preponderance of the evidence. Care should be taken in the conduct of tests and the handling of testing samples to ensure that requirements of evidentiary proof may be met.

6. STATISTICAL REPORTING

Agencies shall keep statistical records on: (1) the number of employees tested and the number of employees with verified positive tests; and (2) the number of applicants tested and the number of applicants with verified positive tests. Personally identifying information in these statistical records is strictly prohibited. The HHS Mandatory Scientific and Technical Guidelines for Federal Employee Drug Testing Programs contain additional requirements for statistical reporting.

7. EMPLOYEE COUNSELING AND ASSISTANCE

a. Program Requirement. Federal agencies are required by Public Law 92-255, as amended; Public Law 99-570; and by 5 C.F.R. Part 792 to establish programs for appropriate prevention, treatment and rehabilitation of Federal civilian employees with drug abuse problems. Agencies are authorized to establish Employee Assistance Programs to meet this mandate.

b. EAP Requirement. Executive Order 12564 identifies Employee Assistance Programs as an essential element to an agency's plan to achieve a drug-free workforce, and explicitly states that agencies shall refer all employees found to be using illegal drugs to their Employee Assistance Program for assessment counseling, and referral for treatment or rehabilitation as appropriate.

c. EAP Role. Employee Assistance Programs play an important role in identifying and resolving employee substance abuse by: demonstrating the agency's commitment to eliminating illegal drug use; providing employees an opportunity, with appropriate assistance, to discontinue their drug use; providing educational materials to managers, supervisors and employees on drug abuse issues; assisting supervisors in confronting employees who have performance and/or conduct problems which may be based, in whole or in part, on substance abuse; assessing employee-client problems and making referrals to appropriate treatment and rehabilitation facilities; and following up with individuals during the rehabilitation period to track their progress and encourage successful completion of the program.

d. EAP Elements. In keeping with Executive Order 12564, agencies should ensure that:

(1) EAP's are available to all employees, including those located outside of the Washington metropolitan area and major regional cities. Agencies are encouraged to explore a variety of means for meeting this requirement, including private contractors and cooperative arrangements with other Federal agencies, State and local governments, and non-profit organizations.

(2) At sites where it is not feasible to establish a continuing EAP, agencies should arrange for employee access on a "needs" basis to comparable local resources or, through travel or private telephone calls, to services of established EAP's in other locations.

(3) EAP's, whether in-house or operated through contract, are adequately staffed with fully qualified individuals who can:

i. Provide counseling and assistance to employees who self-refer for treatment or whose drug tests have been verified positive, and monitor the employees' progress through treatment and rehabilitation;

ii. Provide needed education and training to all levels of the organization on types and effects of drugs, symptoms of drug use and its impact on performance and conduct, relationship of the employee assistance program with the drug testing program, and related treatment, rehabilitation, and confidentiality issues;

iii. Ensure that the confidentiality of test results and related medical and rehabilitation records are maintained in accordance with the specific requirements contained in Public Laws 92-255 and 93-282, with regulations published in 42 C.F.R., part 2, and with guidance contained in section 4 of this letter.

(4) Adequate treatment resources have been identified in the community in order to facilitate referral of drug abuse clients.

(5) All employees in the agency are informed about the EAP and its services.

(6) The Employee Assistance Program plays an appropriate role in the development and implementation of the agency's Drug-Free Workplace program. EAP's should not be involved in the collection of urine samples or the initial reporting of the results of drug tests, but rather be a critical component in the agency's efforts to counsel and rehabilitate drug-abusing employees, as well as in educating the workforce on drug abuse and its symptoms.

e. Further EAP Assistance.

(1) Attachment 4 provides a list of consortia throughout the United States. Agencies wishing to join an existing consortium should contact the individual listed regarding that possibility.

(2) Attachment 5 provides the names and addresses of agencies and organizations which can be contacted regarding treatment facilities and education materials throughout the U.S.

(3) The Model Employee Assistance Program provided as attachment 6 addresses those functions OPM considers essential for an EAP to provide in support of the President's drug-free workplace initiative. The model is intended to be of use to agencies in developing new EAP's and in assessing the adequacy of existing programs. OPM's Employee Health Services Branch (Tel. (FTS/202) 632-5558) is available for technical assistance on these provisions.

8. COMPLIANCE WITH SECTION 628 OF THE TREASURY, POSTAL, AND GENERAL GOVERNMENT APPROPRIATIONS ACT OF 1989

a. Background Information. On September 22, 1988, President Reagan signed into law the Treasury, Postal, and General Government Appropriations Act of 1989, Public Law No. 100-440. Section 628 sets forth drug-free workplace requirements for Federal departments, agencies, and instrumentalities. Section 8131(c) of the Defense Appropriations Act (Pub. L. No. 100-463), which was signed into law on October 1, 1988, extended the effective date of section 628 until January 16, 1989.

b. Basic provision. Section 628 provides that:

No department, agency, or instrumentality of the United States receiving appropriated funds under this Act for fiscal year 1989, or under any other Act appropriating funds for fiscal year 1989, shall obligate or expend such funds unless such department, agency, or instrumentality has in place, and will continue to administer in good faith, a written policy designed to ensure that all of its workplaces are free from the illegal use, possession, or distribution of controlled substances (as defined in the Controlled Substances Act), by the officers and employees of such department, agency, or instrumentality.

c. Relationship to Executive Order 12564. Executive Order (E.O.) 12564, dated September 15, 1986, required agencies to adopt drug-free workplace plans prohibiting the "use" of controlled substances contained in Schedules I and II, as defined in 21 U.S.C. 802(6) and listed in part B, subchapter 13 of that title. In order to comply with section 628, agencies may modify their drug-free workplace plans to cover (i) "possession, or distribution," in addition to "use," and (ii) controlled substances contained in Schedules III through V, in addition to Schedules I and II.

d. Limitation. The inclusion of all controlled substances among the scope of drugs covered under a drug-free workplace plan does not license agencies to test for drugs other than Schedules I and II controlled substances now authorized (such as marijuana, opiates, cocaine, phencyclidine, and amphetamines).

e. Agency Responsibilities:

(1) Agencies which were covered by section 628 are required to comply with its provisions by January 16, 1989. All agencies which are covered by E.O. 12564 are included within the scope of section 628; however, the scope of

VOL 54 ISS 217 NO 13 1989 UMI

section 628 is broader than E.O. 12564. If agency personnel are not sure whether or not an agency is covered by section 628, they should consult with their agency General Counsel.

(2) If an agency or instrumentality is in the Executive Branch, and is not covered by E.O. 12564, but it is now required to produce and administer a written policy to satisfy the provisions of section 628, the agency or instrumentality may wish to develop its policy in conformity with E.O. 12564, the Department of Health and Human Services (HHS) Mandatory Scientific and Technical Guidelines for Federal Employee Drug Testing Programs, and this FPM Letter. Although an agency is not required by section 628 to follow the above mentioned guidelines and the Executive Order, it is recommended that agencies do so in order to help their written policies be legally sustained.

(3) Agencies which wish to implement section 628 by amending their existing drug-free workplace plans may do so by adopting the appendix to this FPM Letter as an appendix to their plan. Agencies are not required to submit this amendment to HHS for certification or approval.

(4) Agencies which have already submitted their drug-free workplace plans to HHS for certification are not required to re-submit plans to HHS which have been amended to incorporate the provisions of section 628.

f. Agency Compliance. Agencies or instrumentalities failing to comply with section 628 by January 16, 1989, may be in violation of the Anti-deficiency Act. Agencies or instrumentalities which anticipate problems with compliance should immediately consult with their General Counsel.

Constance Berry Newman,
Director.

Appendix

1. The (agency name) hereby adopts the following amendments to the Drug-Free Workplace plan referenced and attached.

a. The following language is adopted as a free standing paragraph at the end of the section in the plan entitled "policy" or "statement of policy":

It is (agency name) policy that its workplace be free from the illegal use, possession, or distribution of controlled substances, (as specified in Schedules I through V, as defined in 21 U.S.C. 802(6) and listed in Part B, Subchapter 13 of that Title) by the officers and employees of (agency name). The possession and distribution of controlled substances will be dealt with promptly in accordance with legal and administrative disciplinary procedures. However, the policy's primary goal is to ensure that illegal drug use is eliminated and that the (agency name) workplace be safe, healthful, productive, and secure.

b. In any references to grounds for "reasonable suspicion testing", the term "trafficking" shall also mean "distribution".

c. In addition to all grounds contained in this plan, there shall be grounds for reasonable testing of an employee if the employee is the focus of a criminal investigation into the illegal use, possession, or distribution of controlled substances.

d. Where authorities and guidance are cited in the plan as references, the following authority and guidance are added:

(i). Authority: Section 628 of the Treasury, Postal Service, and General Government Appropriations Act of 1989, Pub. L. 100-440, as amended.

(ii). Guidance: Office of Personnel Management (OPM) Federal Personnel Manual (FPM) Letter 792-18, December 30, 1988, setting forth guidelines to agencies, departments, and instrumentalities in establishing a drug-free workplace pursuant to Pub. L. 100-440.

2. This amendment is effective upon the signature of the agency head or the senior management official authorized to sign for the agency head.

[Agency Name]

Acknowledgement of Notice to Employees Whose Position is Designated Sensitive for Drug Testing Purposes

I acknowledge receiving notice of the establishment of [agency name]'s employee drug testing program. I understand that I may be selected for screening by urinalysis testing for the presence of controlled substances. I understand that a verified positive result of that testing or refusal to submit to testing may result in disciplinary action up to and including dismissal from the Federal service.

I have read the notice announcing the establishment of an employee drug testing program.

Release Memorandum

Subject: Release of Patient Information
From: [Program making the disclosure.]
To: [Name or title of the person or organization to which the disclosure is to be made.]

In accordance with the attached "Consent for Release of Patient Information," we have released information to you on [Patient's name].

This information has been disclosed to you from records whose confidentiality is protected by Federal law. *See* 42 U.S.C. § 290ee-3. Federal regulations, at 42 CFR part 2, prohibit you from making any further disclosure of it without the specific written consent of the person to whom it pertains, or as otherwise permitted by those regulations. A general authorization for the release of medical or other information is NOT sufficient for this purpose.

The Federal rules restrict any use of the information to criminally investigate or prosecute any alcohol or drug abuse patient.

(Note: This memorandum is substantially the same as the one appearing in Appendix D of FPM Supplement 792-2.)

Attachment 6 to FPM Letter 792-19

Model Employee Assistance Program in Support of a Drug-Free Workplace

1. *Purpose.* To implement fully an effective Employee Assistance Program (EAP) within (agency) which provides short term counseling and referral services to employees with drug problems. This is in keeping with the President's policy, set forth in Executive Order 12564, to eliminate drug use from the Federal workplace and to offer an opportunity for rehabilitation to users of illegal drugs. This model is intended to supplement ongoing employee assistance programs which, in addition to drug abuse, address alcohol abuse and other employee problems.

2. *Background.* Public Law 92-255, as amended, requires Federal agencies to develop and maintain appropriate prevention, treatment and rehabilitation programs and services for drug abuse among Federal employees. Regulations implementing this requirement are contained in Title 5, Code of Federal Regulations (CFR) Part 792. Guidance is further provided in Subchapters 5 and 6 of Federal Personnel Manual (FPM) Chapter 792, and FPM Supplement 792-2. Executive Order 12564 of September 15, 1986, established further requirements for agencies and employees in order to obtain a drug-free Federal Workplace. On October 27, 1986, the President signed into law the Omnibus Drug Enforcement, Education, and Control Act of 1986, P.L. 99-570. That law reiterates Congressional concern about the prevention of illegal drug use and the treatment of Federal employees who use drugs.

3. *Objective.* The objective of the EAP is to assist employees with drug problems to find treatment, to follow up with them during recovery and rehabilitation, and to help them remain drug free.

4. *Policy.*

A. As an employer, the (agency) is concerned with the wellbeing of its employees, the maintenance of the workforce productivity, and the preservation of a safe and secure workplace. The use of illegal drugs by (agency) employees, whether on or off the job, is inconsistent with these goals and will not be tolerated.

B. The (agency) stands ready to assist employees in becoming drug free.

C. Employees who are users of illegal drugs are encouraged to seek counseling and other appropriate assistance voluntarily, including that available through the (agency's) Employee Assistance Program.

D. The confidential nature of client records will be safeguarded and only disclosed in accordance with the confidentiality provisions of Title 42 CFR, Part 2.

E. To the extent feasible, program services will be provided to family members dealing with the drug problem of an employee, or to an employee dealing with the drug problem of a family member.

5. *Program Responsibilities.*

A. *Agency Employee Assistance Program Administrator.* The Employee Assistance Program Administrator has the lead role in ensuring that the (agency's) EAP program meets the requirements of E.O. 12564, and is responsible for the development, implementation and review of the agency EAP. In addition to supervising the headquarters EAP Coordinator and counselor(s), the Administrator will provide advice and assistance in establishing field office EAP's. The EAP Administrator will advise agency components on the submission of annual statistical reports and will prepare consolidated reports on the agency's EAP activity for submission to the Office of Personnel Management on a fiscal year basis.

B. *Employee Assistance Program Coordinators.*

(1) The Employee Assistance Program Coordinator has responsibility for implementing and operating the EAP within an agency component, such as the Headquarters office or a field installation. More than one coordinator may be deemed necessary, depending on the size of the assigned component. Where the EAP services are contracted out, the coordinator has responsibility for monitoring the contractor performance and verifying services rendered within (agency). The person(s) selected for such assignments will be allocated sufficient official time to:

(a) Implement effectively the agency employee assistance policy and program as well as to assist in the development and implementation of the agency drug testing program as it relates to the counseling and rehabilitation of drug-abusing employees;

(b) Determine appropriate supervisory training and other activities needed to educate and inform the workforce about drugs and symptoms of drug abuse;

(c) Develop and maintain counseling capability (through personnel, medical, or other counseling resource, including contracting out);

(d) Establish liaison with community education, treatment and rehabilitation facilities; and,

(e) evaluate the program and report to management on results and effectiveness.

C. *Employee Assistance Counselors.* (1) In some instances, the EAP Coordinator may have the necessary skills, time and motivation to function as the Employee Assistance Counselor. The Employee Assistance Counselor serves as the initial point of contact for employees who ask or are

VOL 54 ISS 217 NO 13 1989 UMI

referred for counseling, and will be allotted sufficient official time to implement the program effectively. At a minimum, persons designated as Employee Assistance Counselors should be, or provisions should be made for them to be:

(a) Familiar with the provisions of Executive Order 12564, "Drug-Free Federal Workplace" and Federal Personnel Manual Letter 792–19, "Establishing a Drug-Free Federal Workplace".

(b) Trained in:

—counseling employees in the occupational setting,

—identification of drug abuse, and,

—administering the Employee Assistance Program.

(c) Able to communicate effectively with employees, supervisors and managers concerning drug use and its symptoms and consequences.

(d) Knowledgeable about community resources for treatment and rehabilitation of drug users, including information on fees and payment schedules.

(e) Able to discuss drug treatment and rehabilitation insurance coverage available to employees through the Federal Employee Health Benefits Program.

(f) Able to distinguish the occasional user from the addicted user and to suggest the appropriate treatment based on that information (e.g., after hours attendance at Narcotics Anonymous meetings to significant medical assistance).

(g) Able to provide training and education on drug abuse to employees, supervisors, union representatives, etc.

(2) In offices where counseling staff is not available within the agency, reasonable efforts should be made to provide employees with access to a qualified counselor outside of the agency. This may include authorizing official time for the employee to visit or be visited by a counselor personally, or other steps which may be appropriate.

(3) For employees referred as a result of drug-testing, counselors should document the treatment plan prescribed. Signature on this document by both the counselor and client will ensure mutual understanding of the treatment plan and the consequences of failure to remain drug free.

(4) In order for the counselor to be viewed as the source of assistance and understanding for employees, the person(s) performing these functions should not be involved in the actual drug testing of employees.

D. *Employee's Role.* All employees are encouraged to enhance their drug awareness through educational opportunities afforded by the EAP or the community at large. Employees who are illegal drug users are encouraged to seek counseling assistance voluntarily. Employees found to be users of illegal drugs are required to accept referral to the EAP and are urged to cooperate with medical treatment and/or rehabilitation programs that are indicated.

E. *Medical Personnel.*

(1) Employee health units provide emergency diagnoses and first treatment of injury or illness of employees during duty hours. Where indicated, the employee should be further referred to a private physician or community health service. If such cases ultimately are determined to have stemmed from abuse of drugs, medical personnel should discuss the facts of the situation with the supervisor and the employee and refer the employee for counseling. A close working relationship with the EAP Counselor(s) is essential for program success. The Health Unit staff is available for consultation with and assistance to personnel assigned EAP responsibilities.

(2) Where such facilities do not exist, these services are provided whenever possible through existing occupational health facilities and/or community physicians or clinics.

6. *Training and Education.*

A. *Supervisory training.* Employee counselors will conduct or otherwise provide training sessions for agency supervisors on the handling of problems of substance abuse. Appropriate topics include:

(1) Drug awareness and symptoms of drug use.

(2) Recommended methods for dealing with the suspected or identified drug user.

(3) Supervisory responsibilities under E.O. 12564.

(4) Confrontation and referral techniques.

(5) Explanation of the (agency) employee assistance program and its relationship with the (agency) drug testing program.

(6) General principles of rehabilitation including techniques for supervisors to assist employees in returning to the worksite, given specific (agency) needs and requirements.

(7) Personnel management issues (e.g., relationship of this program to performance appraisal and disciplinary programs; leave usage; and, supervisory notes and documentation).

B. *Employee education.* The Employee Assistance Coordinator will ensure that employee seminars on topics dealing with drug use are provided periodically. Managers and supervisors shall encourage employee attendance at these seminars and provide other appropriate support. On a continuing basis, educational materials and information on drug abuse will be available to individual employees.

7. *Publicity of EAP to employees.*

A. This policy and program will be made known to all (agency) employees. All new employees will be informed of the services available under this program as they enter on duty.

B. The names and locations of Employee Assistance Counselor(s) should be listed in telephone directories and displayed on employee bulletin boards.

C. Periodic employee memoranda and other appropriate publications should be used to keep employees informed of EAP services.

8. *Short-term Counseling and Referral.*

A. Referrals to the Employee Assistance Program are for the purposes of identifying the problem, referring the employee to the appropriate treatment resource in the community and following up with the employee during recovery and rehabilitation.

B. *Voluntary referrals,* or self referrals, are to be encouraged throughout EAP materials.

C. In the case of a *management referral* as a result of a verified positive drug screen, the employee assistance staff will interview and/or consult with supervisors and management officials, as requested, and provide them with guidance to how to refer the drug abusing employee to the assistance program. Once the referral is made, and the employee agrees to the appointment with the counselor, the counselor will require the employee to sign a consent for release of information to the supervisor before assistance will be provided. This consent will cover the release of information pertaining to the employee's compliance with the agreed upon treatment plan and the employee's progress during and at the end of treatment. Upon obtaining the signed consent, the counselor will assess the problem(s), review the employee's health insurance coverage and refer the individual to an appropriate treatment resource in the Community. The counselor will monitor the employee's treatment and keep the supervisor advised as to the progress being made. The counselor will periodically follow-up with the employee and his or her supervisor after any treatment which occurs and offer support and assistance as needed.

9. *Community Resources.* The EAP will develop a working relationship with community assistance resources. Program coordinators and counselors will determine which community agencies or individuals best meet employee and management needs. Contact should be established with specialized resources such as the following:

A. State drug authorities for help in identifying treatment resources for drug abusing employees;

B. Narcotics Anonymous for information on where and when meetings are held;

C. Hospital and clinic treatment facilities in order to establish a working relationship between the counselor and the receiving treatment source; and,

D. Drug abuse councils to keep abreast of the latest development regarding drug abuse.

10. *Program Interrelationships.*

A. *Relationship With Drug Testing Program.* As called upon, the EAP staff will work with the drug testing program staff in the development and implementation of the drug testing program. However, EAP staff are not to be involved in the collection of urine samples or the initial reporting of drug test results. EAP efforts are to focus on counseling and rehabilitating drug-abusing employees, as well as on educating the workforce regarding drug abuse and its symptoms.

B. *Relationship of the Supervisor.* Supervisors have explicit expectations of their employees in terms of job performance and behavior. When supervisors are advised of verified employee drug use, they are required to refer the employee to an Employee Assistance Program and to initiate an appropriate personnel action. In those situations involving illegal drugs, except as provided in section 5(b) of Executive Order 12564, disciplinary action is required to be initiated against employees who are found to use illegal drugs. Supervisors should work with the Employee Assistance Counselor to monitor the employee's progress during treatment and rehabilitation and take appropriate personnel action should the employee fail to remain drug free.

C. *Relationship With Labor Organizations.* The support and active participation of labor organizations is a key element in the success of an employee assistance program. Therefore, where there are units of exclusive recognition, management should:

(1) Communicate to labor organizations a strong commitment to providing assistance to employees.

(2) Consult or negotiate, as appropriate, concerning the implementation of the EAP.

(3) Include union representatives in appropriate training and orientation programs to ensure a mutual understanding of program policy, referral procedures, and other program elements.

11. *Recordkeeping and Reporting.*

A. *Counseling Records.* Records on employees who have been referred for counseling will be maintained in a secure and confidential manner. Information on any drug abuse client will be released only to the management official empowered to recommend or take action, in accordance with the employee's consent to release, and for the reasons identified in section 8C above. Any information obtained by a supervisor from the counselor must be maintained, as with all employee records, in a strictly confidential manner. In addition, to the extent that counseling records include employee treatment records, they shall be maintained in accordance with Public Law 93–579 (Privacy Act), Public Law 93–282 and 42 CFR Part 2 (Confidentiality of Alcohol and Drug Abuse Patient Records). Consequently, access to these records will be strictly limited. All appropriate steps, including necessary physical safeguards, will be taken to ensure against unauthorized disclosure.

B. *Reports to OPM.* The EAP Administrator will compile sufficient statistical and programmatic data to provide the basis for evaluating the extent of drug abuse problems and effectiveness of the assistance program. The EAP Administrator will also submit agency-wide reports to the Office of Personnel Management that contain data required by OPM to meet the statutory reporting requirements contained in Public Law 99–570.

12. *Program Evaluation.* The EAP Administrator and Coordinators will regularly evaluate their program to determine the effectiveness and efficiency of services. These evaluations will include: services to employees with drug abuse problems, referral procedures and effectiveness, supervisory training, employee orientation, reporting systems, availability and accessibility of EAP, records systems, outreach activities, staffing and qualifications procedures. Written evidence of program evaluations, identified deficiencies and correction plans will be available for review by the EAP Administrator. Documented modifications in the program's assessment and intervention services should be made based upon the findings of such evaluations.

LIST OF PUBLIC LAWS

Last List November 7, 1989
This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

H.J. Res. 280 / Public Law 101–140 Increasing the statutory limit on the public debt (Nov. 8, 1989; 103 Stat. 830; 6 pages) Price: $1.00

VOL 54 ISS 217 NO 13 1989 UMI

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Jan.1, 1988 to Dec.31, 1988. The CFR volume issued January 1, 1988, should be retained.

[3] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1988. The CFR volume issued January 1, 1987, should be retained.

[4] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[5] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

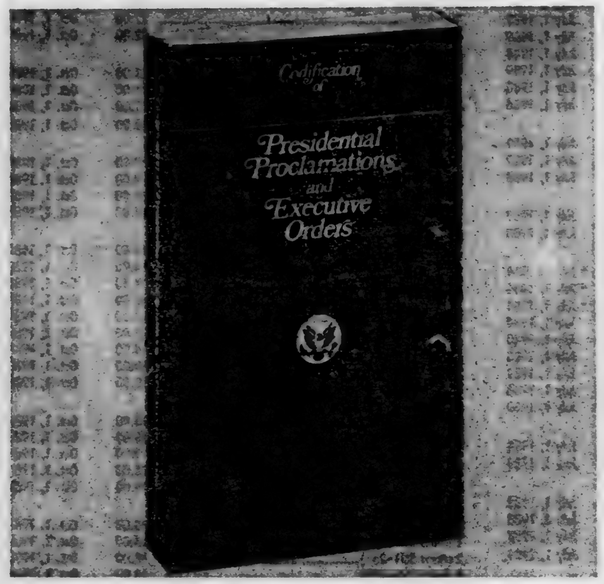
New edition .... Order now !



For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

Briefings on How To Use the Federal Register
For information on briefings in San Francisco, CA, Seattle, WA, and Washington, DC, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SAN FRANCISCO, CA

WHEN: November 29; at 9:00 a.m.
WHERE: Room 15138,
450 Golden Gate Avenue,
San Francisco, CA.
RESERVATIONS: Call Mary Walters at the San Francisco Federal Information Center,
415-556-6600.

SEATTLE, WA

WHEN: November 30; at 1:00 p.m.
WHERE: South Auditorium, 4th Floor,
915 2nd Avenue,
Seattle, WA.
RESERVATIONS: Call Carmen Meier or Peggy Groff at the Portland Federal Information Center on the following numbers:
Seattle: 206-442-0570,
Tacoma: 206-383-7970,
Portland: 503-326-2222.

WASHINGTON, DC

WHEN: December 7, at 9:00 a.m.
WHERE: Office of the Federal Register,
First Floor Conference Room,
1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.

Title 3—

The President

Proclamation 6064 of November 9, 1989

National Women Veterans Recognition Week, 1989

By the President of the United States of America

A Proclamation

For more than 50 years, our Nation has benefitted from the service of women in every branch of our Armed Forces. Women have served with distinction in every overseas combat theater of every conflict since World War I. Some have been wounded in the line of duty, and others have given their lives for our country, but all have been a vital element in the success of America's Armed Forces. Bringing their talent, skill, and vision to a variety of occupations, they have made a lasting mark upon the military history of the United States.

The contributions and the sacrifices of the women who have served in our Armed Forces merit the respect and admiration of the people of the United States. Thus, it is most fitting that we set aside a special time to honor our women veterans.

In grateful recognition of the women who have served in the Armed Forces of the United States, the Congress, by House Joint Resolution 35, has designated the week beginning November 5, 1989, as "National Women Veterans Recognition Week" and has authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week beginning November 5, 1989, as National Women Veterans Recognition Week. I call upon the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this ninth day of November, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

George Bush

Rules and Regulations

Federal Register
Vol. 54, No. 218
Tuesday, November 14, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF SPECIAL COUNSEL

5 CFR Chs. II and VIII

Implementation of the Whistleblower Protection Act

AGENCY: Office of Special Counsel.

ACTION: Interim regulations; request for comments.

SUMMARY: The Whistleblower Protection Act of 1989, Pub. L. No. 101–12, 103 Stat. 16, effective July 9, 1989, establishes the Office of Special Counsel (formerly the Office of the Special Counsel of the U.S. Merit Systems Protection Board) as an independent agency. Accordingly, the Office of Special Counsel (OSC) publishes these regulations to implement provisions of the new law. The OSC is also republishing certain regulations.

EFFECTIVE DATE: Interim regulations effective November 14, 1989, except for §§ 1800.1, 1800.2, 1830.1, and 1830.3. These sections will be made effective only after review and approval by the Office of Management and Budget in accordance with the Paperwork Reduction Act. Upon approval by the Office of Management and Budget a document will be published in the Federal Register announcing the effective date of these sections.

COMMENT DATE: Comments received on or before December 14, 1989, will be considered.

ADDRESSES: Comments should be directed to Henry Darnell Lewis, Office of Special Counsel, 1120 Vermont Avenue, NW., Suite 1100, Washington, DC 20005. Comments received will be available for public inspection at the above address between the hours of 9 a.m. and 4 p.m., Monday through Friday, except federal holidays. Any comments on sections 1800.1, 1800.2, 1830.1, and 1830.3 should additionally be filed with the Office of Management and Budget (See "Paperwork Reduction Act" below).

FOR FURTHER INFORMATION CONTACT: Henry Darnell Lewis, (202) or FTS 653–8982.

SUPPLEMENTARY INFORMATION:

Executive Order 12291, Federal Regulation

The Special Counsel has determined that these are not major rules as defined in section 1(b) of Executive Order 12291, Federal Regulation.

Determination to Issue an Interim Regulation

A determination has been made under the authority of the Special Counsel to issue these regulations as an interim rule. This action is necessary to implement the Whistleblower Protection Act of 1989, Pub. L. No. 101–12. However, public comments received in response to this interim rule will be considered in formulating a final rule. Written comments on these interim regulations may be submitted by any person.

Paperwork Reduction Act

Sections 1800.1, 1800.2, 1830.1, and 1830.3 of this regulation contain information collection requirements subject to review and approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act. The public reporting burden per response is estimated to be one hour. This average estimated time per response includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

As required by the Paperwork Reduction Act, the Office of Special Counsel is submitting to the Office of Management and Budget a request that it approve these information collection requirements. Organizations or individuals desiring to submit comments for consideration by OMB on these information collection requirements should address them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: Joseph Lackey.

Regulatory Flexibility Act

I certify under 5 U.S.C. 605(b) that the Office of Special Counsel is not required to prepare an initial or final regulatory analysis of these regulations pursuant to the Regulatory Flexibility Act, 5 U.S.C. 603–604, because these regulations will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units, and small governmental jurisdictions.

Dated: November 7, 1989.

Mary F. Wieseman,
Special Counsel.

1. For the reasons set out in the preamble, chapter II of title 5 of the Code of Federal Regulations is amended as set forth below, and chapter VIII of title 5, Code of Federal Regulations, is hereby established and parts 1800, 1810, 1820, 1830, and 1840 are added to the newly established chapter VIII to read as follows:

CHAPTER VIII—OFFICE OF SPECIAL COUNSEL

PART 1800—FILING OF COMPLAINTS AND ALLEGATIONS

Sec.
1800.1 Filing complaints of prohibited personnel practices or other prohibited activities.
1800.2 Filing disclosures of information.
1800.3 Advisory opinions.

Authority: 5 U.S.C. 1212(e).

§ 1800.1 Filing complaints of prohibited personnel practices or other prohibited activities.

(a) Complaints of prohibited personnel practices or other prohibited activities within the investigative authority of the Special Counsel (including complaints of political activities prohibited by 5 U.S.C. 7321–7324) should be submitted to the Office of Special Counsel, Complaints Examining Unit, 1120 Vermont Avenue, NW., Suite 1100, Washington, DC 20005.

(b) Complaints, allegations, and information may be submitted in any written form, but should include:

(1) The name and mailing address of the complainant, unless the matter is submitted anonymously;

(2) The department or agency, location, and organizational unit complained of;

(3) A concise description of the actions complained about, names and positions of employees who took these actions, if known to the complainant, and dates, preferably in chronological

VOL 54 ISS 218 NO 14 1989 UMI

order, together with any documentary evidence the complainant may have;

(4) In the case of any allegation of a prohibited personnel practice, the personnel action that has been taken or is proposed or threatened to be taken, and the date of the action, proposal, or threat;

(5) In the case of action taken because of an individual's disclosure of information, the information believed to evidence violation of law, rule, or regulation, gross mismanagement, gross waste of funds, abuse of authority, or substantial and specific danger to public health or safety and when, to whom, and how or in what form it was disclosed; and

(6) A statement as to whether the complainant consents to the disclosure of his or her identify to the agency by the Special Counsel for the purpose of further investigation.

§ 1800.2 Filing disclosures of information.

(a) Employees, former employees, or applicants for employment having information evidencing violations of law, rule, or regulation or gross mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety should be submitted to the Office of Special Counsel, Disclosure Unit, 1120 Vermont Avenue, NW., Suite 1100, Washington, DC 20005.

(b) Information may be submitted in any written form, but should include:

(1) The name and mailing address of the individual making the disclosure, unless the matter is submitted anonymously;

(2) The department or agency, location and organizational unit complained of;

(3) A statement as to whether the complainant consents to the disclosure of his or her identify to the agency by the Special Counsel in connection with referral to the appropriate agency.

§ 1800.3 Advisory opinions.

The Special Counsel is authorized to issue advisory opinions only concerning Chapter 15 of Title 5, United States Code (dealing with political activity of State or local officers and employees) and Subchapter III of Chapter 73 of Title 5, United States Code (dealing with political activity of Federal officers and employees). Requesters may telephone the Office of Special Counsel toll free at 1–800–872–9855, or (202)/FTS 653–7143 in the Washington, DC, area, or make such requests in writing to the Office of Special Counsel, 1120 Vermont Avenue, NW., Suite 1100, Washington, DC 20005.

PART 1810—INVESTIGATIVE AUTHORITY OF THE SPECIAL COUNSEL

§ 1810.1 Investigative policy in discrimination complaints.

The Special Counsel is authorized to investigate allegations of discrimination prohibited by law, as defined in 5 U.S.C. 2302(b)(1). Since procedures for investigating discrimination complaints have already been established in the agencies and the Equal Employment Opportunity Commission, the Special Counsel will normally avoid duplicating those procedures and will defer to those procedures rather than initiating an independent investigation.

PART 1820—PUBLIC INFORMATION

Sec.

1820.1 Public list.
1820.2 Procedures for obtaining records under the Freedom of Information Act.
1820.3 Categories of requesters under the Freedom of Information Act.
1820.4 Free or partially free search time and partially free copying.
1820.5 Waiver or reduction of fees.
1820.6 Fees to be charged.
1820.7 Payments and collections.
1820.8 Appeals.
1820.9 Disclosures by authorized officials.

Authority: 5 U.S.C. 552(a)(3), 552(a)(4), 1212(g), 1219.

§ 1820.1 Public list.

(a) Pursuant to 5 U.S.C. 1219, the Special Counsel maintains and makes available to the public a list of:

(1) Noncriminal allegations under 5 U.S.C. 1213; and

(2) Special Counsel findings of violations of law, rule, or regulation, together with reports and certifications by heads of agencies.

(b) The list is available to the public between 8:30 a.m. and 5 p.m. weekdays (except legal holidays) in the Office of Special Counsel, 1120 Vermont Avenue NW., Washington, DC 20005.

§ 1820.2 Procedures for obtaining records under the Freedom of Information Act.

Requests for records shall be made in writing. Requests should be addressed to the Office of Special Counsel, 1120 Vermont Avenue NW., Suite 1100, Washington, DC 20005. Requests must be clearly and prominently marked "Freedom of Information Act Request" on both the envelope and the letter.

§ 1820.3 Categories of requesters under the Freedom of Information Act.

There are four categories of requesters:

(a) *Commercial use requesters.* These requesters seek information for themselves or on behalf of someone else for a use or purpose that furthers commercial, trade, or profit interests of the requester or the person on whose behalf the request is made. A requester will not be presumed to be a "commercial use requester" merely by submitting a request on corporate letterhead without further explanation of the use to which he plans to put the requested information. Similarly, a request submitted on the letterhead of a nonprofit organization without further explanation will not be presumed to be for a noncommercial purpose. The Office of Special Counsel will seek clarification from the requester where there is a reasonable doubt as to the intended use of the information.

(b) *Educational and noncommercial scientific institution requesters.* (1) An "educational institution" requester is associated with a preschool, a public or private elementary or secondary school, an institution of undergraduate or graduate higher education, or an institution of vocational or professional education, that operates a program or programs of scholarly research, and seeks the information for a scholarly or scientific research goal of the institution, rather than for an individual goal.

(2) A "noncommercial scientific institution" requester is associated with an institution that is not operated on a "commercial" basis (as that term is defined by paragraph (a) of this section), and which is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry.

(c) *News media requesters.* These requesters actively gather news for entities that are organized and operated to publish or broadcast news to the public. Freelance journalists may be news media requesters if they can demonstrate a solid basis for expecting publication through a news organization (such as by producing a publication contract or citing their past publication records), even though not actually employed by it. "News" means information about current events or information that would be of current interest to the public. News media "entities" include, but are not limited to, television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of "news") who make their products available for purchase or subscription by the general public.

(d) All other requesters.

§ 1820.4 Free or partially free search time and partially free copying.

(a) *Free search time and partially free copying.* Educational and noncommercial scientific institution requesters and news media requesters who are requesting records for noncommercial use are entitled to free copying for the first 100 pages and free search time.

(b) *Partially free search time and partially free copying.* Requesters who are not commercial use requesters, educational or noncommercial scientific institution requesters, or news media requesters are "all other requesters", and are entitled to two hours of free search time and free copying for the first 100 pages. Requests from record subjects for records about themselves filed in a system of records will continue to be treated under the fee provisions of the Privacy Act, which permits the assessment of fees only for copying.

§ 1820.5 Waiver or reduction of fees.

(a) The Associate Special Counsel for Investigation, the Deputy Associate Special Counsel for Prosecution, the Associate Special Counsel for Prosecution, the Deputy Special Counsel, and the Special Counsel may authorize waiver or reduction of fees that could otherwise be assessed if disclosure of the information requested:

(1) Is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the Government, and

(2) Is not primarily in the commercial interest of the requester.

(b) Satisfaction of paragraph (a)(1) of this section will be determined by all of the following:

(1) Whether the subject of the requested records concerns "the operations or activities of the Government." The requested records concern identifiable operations of activities of the Government, and the connection between the records and the operations or activities is direct and clear, not remote or attenuated;

(2) Whether disclosure is "likely to contribute" to an understanding of Government operations or activities. An analysis of the substantive content of the releasable portions of the requested records reveals meaningfully informative information on the operations or activities of the Government that is not already in the public domain in duplicative or substantially identical form;

(3) Whether disclosure will contribute to "public understanding." Considering the identity of the requester and his qualifications to make use of the information, disclosure will contribute to the understanding of the public at large, and not to the individual understanding of the requester or a narrow segment of interested persons; and

(4) Whether the disclosure is likely to contribute "significantly" to public understanding of Government operations or activities. By an objective standard, the disclosure is likely to enhance the general public's understanding of the subject matter in question more than minimally.

(c) Satisfaction of paragraph (a)(2) of this section will be determined by both of the following:

(1) Whether the requester has a commercial interest to be furthered by the disclosure. The requester does not seek to further a commercial, trade, or profit interest, as those terms are commonly understood; and

(2) Whether the magnitude of the identified commercial interest of the requester is sufficiently large, compared to the public interest in disclosure, that disclosure is "primarily in the commercial interest of the requester." If the requester has a commercial interest, that interest is not greater than the public interest to be served by disclosure of the requested records.

§ 1820.6 Fees to be charged.

(a) Requests for records are subject to the following fees:

(1) *Commercial use requesters.* For search, review, and copying: Photocopies per page, $0.25. Manual record search, $2.50 per quarter hour if conducted by a clerical employee; $5.00 per quarter hour if conducted by a professional or managerial employee. Search fees may be assessed even if the records in question are not located or if the records located are determined to be exempt from disclosure.

(2) *Educational and noncommercial scientific institution requesters, news media requesters.* For copying only: Photocopies per page, $0.25, excluding the first 100 pages.

(3) *All other requesters.* For search and copying only: Photocopies per page (excluding the first 100 pages), $0.25. Manual record search (excluding the first two hours), $2.50 per quarter hour if conducted by a clerical employee; $5.00 per quarter hour if conducted by a professional or managerial employee.

(b) *Method of search.* (1) Any "search", which includes all time spent looking for material that is responsive to a request, will be done in the most efficient and least expensive manner in order to minimize costs for both the agency and the requester.

(2) For researches made by computer, costs will be assessed when the hourly cost of operating the central processing unit and the operator's hourly salary plus 16 percent equals the equivalent dollar amount of two hours of salary of the person performing the search.

(c) *Review charges.* Only commercial use requesters will be charged for time spent reviewing records to determine whether they are exempt from mandatory disclosure. These charges will be assessed only for initial review (i.e., the review undertaken when first analyzing the applicability of a specific exemption to a particular record or portion of record), and not for review at the administrative appeal level of an exemption already applied. However, charges will be assessed for a second review of records of portions of records withheld in full under an exemption which is subsequently determined not to apply in order to determine the applicability of other exemptions not previously considered. Review charges shall not include costs incurred in resolving issues of law or policy that may be raised in the course of processing a request.

(d) *Copying.* A "page" of copying refers to a paper copy of standard size, normally 8½'x11' or 11x14'. However, copies may also take the form of microform, audio-visual materials, or machine readable documentation (e.g., magnetic tape or disk), among others.

(e) *Nonassessment of fees.* No fees will be assessed to any requester, including commercial use requesters, if the cost of routine collection and processing of the fee would be equal to or greater than the fee itself. To make this determination, the OSC will consider the administrative costs of receiving and recording a requester's remittance and processing the fee for deposit.

(f) *Other charges.* Complying with requests for special services, such as certification of records as true copies and sending records by special methods (e.g., express mail) is entirely at the discretion of the Office. Since neither the Freedom of Information Act nor its fee structure covers these kinds of services, the OSC will assess fees to recover the full costs of providing these services should the Office elect to provide them.

(g) *Aggregating requests.* If the Office of Special Counsel reasonably believes that a requester or a group of requesters acting in concert is filing a series of requests for the purpose of evading the assessment of fees, the OSC may aggregate the requests and assess fees accordingly. One element to be considered in determining reasonable belief is the time period within which

VOL 54 ISS 218 NO 14 1989 UMI

the requests are filed. Multiple requests of this type filed within a 30-day period may be presumed to have been made to avoid fees. In no case will the Office aggregate requests on unrelated subjects from one requester.

(h) *Advance notice of fees.* If it is likely that fees will exceed $25, the requester will first be notified of the estimated amount, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. The notice will offer the requester the opportunity to confer with personnel of the Office of the Special Counsel with the object of reformulating the request to meet his or her needs at a lower cost.

§ 1820.7 Payments and collections.

(a) *Payments.* Payment of fees shall be made by check or money order payable to the United States Treasury.

(b) *Advance payments.* A requester is not required to make an advance payment unless:

(1) The OSC estimates or determines that the requester may be required to pay fees in excess of $250, in which case the requester will be notified of the estimated cost. The requester must then furnish satisfactory assurance of full payment if the requester has a history of prompt payment of Freedom of Information Act fees. If the requester has no history of payment, then the requester may be required to furnish an advance payment up to the full estimated cost; or

(2) The requester has previously failed to pay a fee assessed in a timely fashion (i.e. within 30 days of the date of billing), in which case the requester may be required to—

(i) Pay the full amount owed plus any applicable interest as provided in paragraph (d) of this section, or prove payment of the alleged amount in arrears, and

(ii) Make an advance payment of the full amount of the estimated cost before a new or pending request will be processed.

(c) *Effect of nonpayment.* When the OSC acts under either paragraph (b)(2)(i) or (b)(2)(ii) of this section, the administrative time limits prescribed in 5 U.S.C. 552(a)(6) of the Freedom of Information Act will begin only after the fee payments described above have been received.

(d) *Interest charges.* Interest may be charged to any requester who fails to pay fees assessed within 30 days of the date of billing. Interest will be assessed on the 31st day following the day on which the bill for fees was sent, and will be calculated at the rate prescribed in 31 U.S.C. 3717. Receipt of fees, even if not processed, will stay the accrual of interest.

(e) *Collections.* If the OSC deems it appropriate in order to encourage repayment of fees assessed in accordance with these regulations, the OSC will use the procedures authorized by the Debt Collection Act of 1982 (Public Law No. 97–365), including disclosure to consumer reporting agencies and use of collection agencies.

§ 1820.8 Appeals.

Any denial, in whole or in part, of a request for records of the Office of Special Counsel shall advise the requester of his right to appeal the denial to the Special Counsel or the Special Counsel's designee. The requester shall submit his appeal in writing within 30 days of the denial. The appeal shall be addressed to the Special Counsel at 1120 Vermont Avenue NW., Suite 1100, Washington, DC 20005. When a request is denied on appeal, the requester shall be advised of his right to seek judicial review.

§ 1820.9 Disclosure by authorized officials.

No employee or former employee of the Office of Special Counsel shall, in response to a demand of a court or other authority, produce or disclose any information or records acquired as part of the performance of his official duties or because of his official status without the prior approval of the Special Counsel or the Special Counsel's duly authorized designee.

PART 1830—PRIVACY

Sec.

1830.1 Access to records and identification.
1830.2 Medical records.
1830.3 Requests for amendment of records.
1830.4 Appeals.
1830.5 Exemptions.

Authority: 5 U.S.C. 552a(f), 1212(g).

§ 1830.1 Access to records and identification.

(a) Individuals may request access to records pertaining to them that are maintained as described in the Privacy Act, 5 U.S.C. 552a, by addressing an inquiry to the Office of Special Counsel either by mail or by appearing in person at the Office of Special Counsel at 1120 Vermont Avenue, NW., Suite 1100, Washington, DC 20005, during business hours on a regular business day. Requests in writing should be clearly and prominently marked "Privacy Act Request." Requests for copies of records shall be subject to duplication fees set forth in § 1820.6 of this chapter.

(b) Individuals making a request in person shall be required to present satisfactory proof of identity, preferably a document bearing the individual's photograph. Requests by mail or submitted other than in person should contain sufficient information to enable the Office of Special Counsel to determine that the requester and the subject of the record are one and the same. To assist in this process, individuals should submit their names and addresses, dates and places of birth, social security number, and any other known identifying information such as an agency file number or identification number and a description of the circumstances under which the records were compiled.

§ 1830.2 Medical records.

When a request for access involves medical records that are not otherwise exempt from disclosure, the requesting individual may be advised, if it is deemed necessary, that the records will be provided only to a physician designated in writing by the individual. Upon receipt of the designation, the physician will be permitted to review the records or to receive copies by mail upon proper verification of identity.

§ 1830.3 Requests for amendment of records.

Individuals may request amendment of records pertaining to them that are subject to this part. Requests should be addressed, in writing, to the Special Counsel at 1120 Vermont Avenue, NW., Suite 1100, Washington, DC 20005, and be clearly and prominently marked "Privacy Act Request." Requests for amendment should include identification of records together with a statement of the basis for the requested amendment and all available supporting documents and materials. Requests for amendment shall be acknowledged not later than 10 days (excluding Saturdays, Sundays, and legal holidays) after receipt and a determination on the request shall be made promptly.

§ 1830.4 Appeals.

When a request for access or amendment has been denied, in whole or in part, the requester shall be advised of his right to appeal to the Special Counsel or the Special Counsel's designee. The requester shall submit his appeal in writing within 30 days of the denial. A final determination on the appeal shall be issued within 30 days (excluding Saturdays, Sundays, and legal holidays) after receipt. Where unusual circumstances prevent a determination within that time period, the time for a determination may be extended an additional 30 working days.

§ 1830.5 Exemptions.

The Office of Special Counsel will claim exemptions from the provisions of the Privacy Act at subsections (c)(3) and (d) as permitted by subsection (k) for records subject to the Act that fall within the category of investigatory material described in paragraphs (2) and (5) and testing or examination material described in paragraph (6) of that subsection. The exemptions for investigatory material are necessary to prevent frustration of inquiries into allegations of prohibited personnel practices or political activity and to protect identities of confidential sources of information. The exemption for testing or examination material is necessary to prevent the disclosure of information which would potentially give an individual an unfair competitive advantage or diminish the utility of established examination procedures. The Office of Special Counsel also reserves the right to assert exemptions for records received from another agency that could be properly claimed by that agency in responding to a request and the Office of Special Counsel may refuse access to information compiled in reasonable anticipation of a civil action or proceeding.

PART 1840—SUBPOENAS

Sec.

1840.1 Service of subpoenas by mail.

Authority: 5 U.S.C. 1212(e).

§ 1840.1 Service of Subpoenas by mail.

In addition to all other methods of authorized service, an Office of Special Counsel subpoena may be served by mailing a copy to the person at his or her residence or place of business by certified or registered mail.

PART 1262—[REDESIGNATED AS PART 1850]

2. Part 1262 of subchapter B, chapter II of Title 5, Code of Federal Regulations, is redesignated as Part 1850 and added to chapter VIII of title 5, Code of Federal Regulations.

4. The title of the newly designated Part 1850 is amended to change the words "OFFICE OF THE SPECIAL COUNSEL." to "OFFICE OF SPECIAL COUNSEL."

§ 1850.170 [Amended]

5. Section 1850.170(c) of the newly designated Part 1850 is amended to change "Managing Director for Operations" to "Director for Management," and to add "N.W." after "Avenue."

SUBCHAPTER B—[REMOVED]

6. Subchapter B (consisting of parts 1250, 1251, 1252, 1253, 1254, 1255, 1260 and 1261) of chapter II of title 5, Code of Federal Regulations, is hereby removed.

[FR Doc. 89–26707 Filed 11–13–89; 8:45 am]
BILLING CODE 7400–02–M

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1980

Form FmHA 1980–27 "Contract of Guarantee" (Line of Credit)

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends Form FmHA 1980–27, "Contract of Guarantee (Line of Credit)," for clarification. A change was made in section (1)(b) of the form to add the word "delinquent" preceding the word "taxes" so that the form would agree with present regulations. The change of significance is made under "When Guarantee Terminates". The intended effect of this action is to clarify that the loan outstanding balance may float between $0 and the loan ceiling amount during the advance period (up to 3 years) rather than the present method which requires the lender to maintain a balance at all times in order to keep the guarantee in effect. The other changes are made to eliminate confusion between a Line of Credit Agreement and a Promissory note. The use of either of these two debt instruments are acceptable for a line of credit, provided they meet all requirements of the regulations.

EFFECTIVE DATE: November 14, 1989.

FOR FURTHER INFORMATION CONTACT: Paul D. Hardin, Loan Officer, USDA FmHA, Farmer Programs Loan Making Division, Guaranteed Branch, Room 5439–S, 14th Street and Independence Avenue SW, Washington, DC 20250, Telephone: (202) 382–1657.

SUPPLEMENTARY INFORMATION: The agency published a proposed rule on June 6, 1989, 54 FR 24177, with a comment period of 30 days from the date of publication. The comment period ended on July 6, 1989, with no comments being received regarding the proposed changes. Therefore, the agency adopts the proposed rule.

This action has been reviewed under USDA procedures established in Department of Regulation 1512–1 which implements Executive Order 12291, and has been determined to be non-major. The annual effect on the economy is less than $100 million and there will be no significant adverse increase in costs or prices for consumers, individual industries, organizations, governmental agencies or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign based enterprises in domestic or export markets.

Program Affected

The program which this form affects is listed in the Catalog of Federal Domestic Assistance under No. 10.406, Farm Operating Loans. For the reasons set forth in the Final Rule related Notice to 7 CFR part 3015, subpart V, 48 FR 29115, June 24, 1983, this program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with state and local officials.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, Subpart G, "Environmental Program". It is the determination of FmHA that the action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Public Law 19–190, an Environmental Impact Statement is not required.

List of Subjects in 7 CFR Part 1980

Loan programs—Agriculture, Loan progams—Business and industry—Rural development assistance, Loan programs—Housing and community development.

Therefore, chapter XVIII, part 1980, title 7, of the Code of Federal Regulations is amended as follows:

PART 1980—GENERAL

1. The authority citation for part 1980 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart A—General

2. Appendix D of subpart A of part 1980 is revised to read as follows:

BILLING CODE 3410–07–M

VOL 54 ISS 218 NO 14 1989 UMI

Appendix A

USDA-FmHA
Form FmHA 1980-27
(Rev. 10-89)

Type of Loan ☐OL ☐EL or ☐EE
Case No.
State
County
Date of Line of Credit Agreement/Note
Line of Credit Ceiling $

CONTRACT OF GUARANTEE
(Line of Credit)

Lender	Lender's IRS Tax No.
Lender's Address	
Borrower's Name and Address	

The guaranteed portion of this line of credit is _____% of the principal balance owed at any one time on advances made within an approved line of credit by the above-named Lender to the above-named Borrower.

In consideration of making advance(s) by the Lender within the line of credit ceiling pursuant to the Line of Credit Agreement, the United States of America acting through the Farmers Home Administration of the United States Department of Agriculture (herein called "FmHA"), pursuant to the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et. seq.), the Emergency Livestock Credit Act of 1974 (P.L. 93-357), as amended, or the Emergency Agricultural Credit Adjustment Act of 1978 (P.L. 95-334) agrees that in accordance with and subject to the conditions and requirements in this agreement, it will pay to the Lender who holds the line of agreement(s) (and note(s), if any exist) for said advance(s) (or assumption agreement) covered by this contract the lesser of 1. or 2. below:

1. Any loss sustained by such Lender on the guaranteed portion including:
   a. Principal and interest indebtedness as evidenced by said line of credit agreement(s) (and note(s), if any exist) or by assumption agreement(s), and
   b. Principal and interest indebtedness on secured protective advances for protection and preservation of collateral made with FmHA's authorization, including but not limited to, advances for delinquent taxes, annual assessments, any ground rents, and hazard or flood insurance premiums affecting the collateral; or
2. The guaranteed principal advances to or assumed by the Borrower under said line of credit agreement(s) (and note(s), if any exist) or assumption agreement(s) and any interest due thereon.

If an Operating Loan Line of Credit is involved, advances under that line of credit must be made within three years from the date of this Contract. Advances made after that date will not be covered by this Contract. If FmHA conducts the liquidation of the line of credit, loss occasioned to a Lender by accruing interest after the date FmHA accepts responsibility for liquidation will not be covered by this Contract of Guarantee. If Lender conducts the liquidation of the line of credit, accruing interest shall be covered by this Contract of Guarantee to date of final settlement when the Lender conducts the liquidation expeditiously in accordance with the liquidation plan approved by FmHA.

CONDITIONS OF GUARANTEE

1. Line of Credit Servicing

   Lender will be responsible for servicing the entire line of credit, and Lender will remain mortgagee and/or secured party of record. The Lender agrees that, if liquidation of the account becomes imminent, the Lender will consider the Borrower of an Operating Loan Line of Credit for an Interest Rate Buydown under Exhibit C of Subpart B of 7 CFR, Part 1980, and request a determination of the Borrower's eligibility by FmHA. The Lender may not initiate foreclosure action on the line of credit until 60 days after a determination has been made with respect to the eligibility of the Borrower to participate in the Interest Rate Buydown Program.
2. Priorities

   The entire line of credit will be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the line of credit. The unguaranteed portion of the line of credit will not be paid first nor given any preference or priority over the guaranteed portion.
3. Full Faith and Credit

   The Contract of Guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which Lender has actual knowledge at the time it became such Lender or which Lender participates in or condones. If the line of credit agreement or note to which this Contract of Guarantee is attached provides for the payment of interest on interest, this Contract of Guarantee is void. In addition, the Contract of Guarantee will be unenforceable by the Leader to the extent any loss is occasioned by the violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which FmHA acquires knowledge of the foregoing. Any losses occasioned will be unenforceable to the extent that loan funds are used for purposes other than those specifically approved by FmHA in its Conditional Commitment for Guarantee. Negligent servicing is defined as the failure to perform those services which a reasonably prudent lender would perform in servicing its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act but also not acting in a timely manner or acting in a manner contrary to the manner in which a reasonably prudent lender would act up to the time of loan maturity or until a final loss is paid.

4. Protective Advances

   Protective advances made by Lender pursuant to the regulations will be guaranteed against a percentage of loss to the same extent as provided in this Contract of Guarantee.
5. Custody of Unguaranteed Portion

   The Lender may retain or sell the unguaranteed portion of the line of credit only through participation. Participation, as used in this instrument, means the sale of an interest in the line of credit in which the Lender retains the line of credit agreement (and note, if one exists), collateral securing the line of credit, and all responsibility for servicing and liquidation of the line of credit.
6. When Guarantee terminates

   This Contract of Guarantee will terminate automatically (a) upon full payment of the guaranteed line of credit occurring after the advance period has expired; or (b) upon full payment of any loss obligation under this Contract; or (c) upon written notice from the Lender to FmHA that the guarantee will terminate 30 days after the date of notice, provided the Contract is returned to FmHA to be cancelled.
7. Settlement

   The amount due under this instrument will be determined and paid as provided in the applicable Subpart of Part 1980 of Title 7 CFR in effect on the date of this instrument.
8. Notices

   All notices and actions will be initiated through the FmHA County Supervisor for _____(County) _____ (State) with mailing address at the date of this instrument:

BILLING CODE 3410-07-C

VOL 54 ISS 218 NO 14 1989 UMI

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Parts 103 and 245

[Atty. Gen. Order No. 1375–89]

Immigration and Naturalization Service and the Executive Office for Immigration Review; Fee Review

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This final rule amends the fee schedule of the Immigration and Naturalizaiton Service (INS) and the Executive Office for Immigration Review (EOIR). These changes are necessary to place the financial burden of providing special services and benefits, which do not accrue to the public at large, on the recipients of these special services and benefits. Charges have been adjusted to more nearly reflect the current cost of providing the services and benefits, taking into account public policy and other pertinent facts.

EFFECTIVE DATE: December 14, 1989.

FOR FURTHER INFORMATION CONTACT: Charles S. Thomason, Systems Accountant, Finance Branch, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633–4705.

Gerald S. Hurwitz, Counsel to the Director, Executive Office for Immigration Review, 5203 Leesburg Pike, Falls Church, VA. 22041, Telephone: (703) 756–6470.

SUPPLEMENTARY INFORMATION: The INS and EOIR published a proposed rule on June 13, 1989, at 54 FR 25125, to amend the schedule of fees charged by the INS and EOIR for processing and adjudication of applications, petitions, motions, and requests submitted by the public by charging a fee for certain special services and benefits which are currently adjudicated free of charge. These changes are necessary to place the financial burden of providing these special services and benefits, which do not accrue to the general public at large, on the recipients of those special services and benefits. Charges reflect the current recovery cost of providing these special services and benefits, taking into account public policy and other pertinent facts.

No comments were received. Accordingly, fee changes are adopted as proposed. In accordance with 5 U.S.C. 605(b), the Attorney General certifies that the rule would not have a significant economic impact on a substantial number of small entities.

This rule would not be a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have federalism implications warranting the preparation of a Federal Assessment in accordance with E.O. 12612.

This rule contains information collection requirements which have been submitted and approved by the Office of Management and Budget, under the provisions of the Paperwork Reduction Act. OMB control numbers are listed in 8 CFR 299.5.

List of Subjects in 8 CFR Parts 103 and 245

Administrative practice and procedures, Archives and records, Authority delegation, Fees, Forms.

Accordingly, chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

1. The authority citation for part 103 is revised to read as follows:

Authority: 5 U.S.C. 522(a); 8 U.S.C. 1101, 1103, 1201, 1301–1305, 1351, 1443, 1454, 1455; 28 U.S.C. 1746; 7 U.S.C. 2243; 31 U.S.C 9701; E.O. 12356, 3 CFR 1982 Comp., p. 166, 8 CFR part 2.

2. In § 103.7, paragraph (b)(1) is amended by adding the following in numerical order:

§ 103.7 [Amended]

* * * * *

Form I–485A. For filing application by Cuban refugee for permanent residence—$60.00.

* * * * *

Form N–400. For filing application to file petition for naturalization—$60.00.

Form N–402. For filing application to file naturalization petition on behalf of child—$50.00.

* * * * *

PART 245—[AMENDED]

3. The authority citation for part 245 of title 8 is revised to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1151, 1153, 1154, 1182, 1186a, 1255 and 1257.

§ 245.2 [Amended]

4. In § 245.2, paragraph (a)(3)(iv) is amended by removing the second sentence, which reads "There is no fee required in the application for the benefits of this Act."

Dated: November 3, 1989.

Dick Thornburgh,

Attorney General.

[FR Doc. 89–26609 Filed 11–13–89; 8:45 am]

BILLING CODE 4410–21–M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Ch. I

RIN 1515–AA61

Customs Regulations Amendments To Conform With Harmonized System of Tariff Classification; Extension of Time for Comments; Notice of Public Meetings

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Extension of time for comments; Notice of public meetings.

SUMMARY: In a document published in the **Federal Register** on December 21, 1988 (53 FR 51244), Customs issued interim regulations effective on January 1, 1989, that amended the Customs Regulations to correspond to the use of the Harmonized Tariff Schedule of the United States (HTSUS). The interim regulations changed all Tariff Schedules of the U.S. (TSUS) references as needed throughout the Customs Regulations to HTSUS references and modified other sections as needed to accommodate the new tariff schedule's adoption. One of the amended sections of the Customs Regulations was § 141.89(a), which concerns invoice requirements. The interim regulations solicited public comments on the correctness of the changes. The comment period expired on March 21, 1989. After the interim regulations went into effect, guidelines were drafted by the National Import Specialist Division of Customs to assist the trade and Customs field personnel to apply uniformly criteria for accurate and complete invoices for various specific HTSUS item numbers. After reviewing the comments received in response to the interim regulations and the draft guidelines, Customs believes it would be beneficial to obtain further information from the importing community relating to the invoice requirements under 19 CFR 141.89(a) and the draft guidelines. This document reopens the comment period of the interim regulations solely regarding the invoice requirements and announces open meetings that will be held in New York on the invoice requirements.

DATES: Open meetings relating to invoice requirements will be held November 27 (for paper), December 1 (for chemicals), December 4 (for footwear), December 5 (for wearing apparel), December 6 (for business machines and parts), December 7 (for toys), and December 8, 1989 (for all other commodities). All meetings will start at 9:30 a.m. Comments will be accepted regarding the invoice requirements on or before February 7, 1990.

ADDRESSES: All meetings will be held at U.S. Customs, 6 World Trade Center, New York, Room 770 on the specified day. Written comments should be brought to the meetings or submitted to the Regulations and Disclosure Law Branch, U.S. Customs Service, Room 2119, 1301 Constitution Avenue, NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Richard Dunkel, Quality Assurance Branch, (202–377–0239).

SUPPLEMENTARY INFORMATION:

Background

Classification of imported merchandise for rates of duty and statistical purposes is determined by reference to the Harmonized Tariff Schedule of the United States (HTSUS) which went into effect on January 1, 1989. In a document published in the **Federal Register** (53 FR 51244) on December 21, 1988, Customs issued interim regulations that were effective on January 1, 1989, that amended the Customs Regulations to correspond to the HTSUS. The interim regulations changed all Tariff Schedules of the United States (TSUS) references to HTSUS throughout the Customs Regulations and modified other sections as needed to accommodate the new tariff schedule's adoption. One of the amended sections of the Customs Regulations is § 141.89(a), which concerns invoice requirements. The interim regulations solicited public comments on the correctness of the changes. Another document related to the interim regulations was published in the **Federal Register** (54 FR 6881) on February 15, 1989; this document set forth technical corrections to the authority citations provided in the interim regulations. Comments were originally to have been received on the interim regulations on or before February 21, 1989. However, a request was received from the public to extend the comment period; and Customs, in view of the complexity of the issues involved with the interim regulations, extended the comment period until March 21, 1989, by a notice published in the **Federal Register** (54 FR 9429) on March 7, 1989.

After the interim regulations went into effect, the National Import Specialist Division drafted guidelines intended to assist the trade and Customs field personnel to uniformly apply criteria for accurate and complete invoices for various specific HTSUS item numbers. After reviewing the comments received in response to the interim regulations and the draft guidelines on invoice requirements, Customs believes it would be beneficial to obtain further information from the importing community relating to the invoice requirements.

Announcement of Open Meetings

To this end, Customs will be holding open meetings at U.S. Customs, 6 World Trade Center, New York in Room 770 to discuss invoice requirements with the importing community. As the invoice requirements in interim § 141.89(a), Customs Regulations, and the draft guidelines require different information to be submitted on invoices, depending on the specific HTSUS item number under which the merchandise for which the invoice is being submitted is classified, different open meetings will be held for different commodities. The schedule of meetings is as follows:

Meeting on invoice requirements for paper: November 27

Meeting on invoice requirements for chemicals: December 1

Meeting on invoice requirements for footwear: December 4

Meeting on invoice requirements for wearing apparel: December 5

Meeting on invoice requirements for business machines and parts: December 6

Meeting on invoice requirements for toys: December 7

Meeting on invoice requirements for all other commodities: December 8

All meetings will be held at 9:30 a.m. on the scheduled day. Representatives from the National Import Specialists Divisions will be present at these meetings.

Comments

From these open meetings, Customs hopes to develop ideas on how to refine the invoice requirements in § 141.89(a) and/or the guidelines. At the meetings, questions will be accepted and written comments may be submitted. Customs will consider any written comments submitted at the meetings on the subject of invoice requirements as well as comments submitted on the subject to the address listed in the "ADDRESS" section at the beginning of this document. The comment period has been extended 60 days from the last scheduled meeting to allow sufficient time for attendees who develop new ideas at the meetings to submit their comments.

If comments have already been submitted, there is no need to resubmit comments. Previously submitted comments will be reconsidered with any new comments received in response to this notice. It is emphasized that the comment period is only being reopened regarding the subject of invoice requirements.

All comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)) between 9:00 a.m. and 4:30 p.m. on normal business days at the Regulations and Disclosure Law Branch, Room 2119, 1301 Constitution Avenue, NW., Washington, DC.

Interim Regulations

Until such time as Customs publishes another document in the **Federal Register** stating otherwise, the interim regulations published in the **Federal Register** are still in effect.

Dated: November 8, 1989.

Carol B. Hallett,

Commissioner of Customs.

[Docket No. 89N–0129]

Antibiotic Drugs; Updatings and Technical Changes

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the antibiotic drug regulations by updating and making noncontroversial technical changes in accepted standards of antibiotic and antibiotic-containing drugs for human use. These amendments will result in more accurate and usable regulations.

DATES: Effective December 14, 1989; comments, notice of participation, and requests for a hearing by December 14, 1989; data, information, and analyses to justify a hearing by January 16, 1990.

ADDRESS: Written comments to the Dockets Management Branch (HFA–

combination antibiotic/antifungal products on the basis that the products lack substantial evidence of effectiveness.

copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be

21 CFR Part 452

Antibiotics.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under

$$n = 5.545 \left[\frac{t_s}{W_h} \right]$$

where:

(4) *Identity.* Proceed as directed in § 436.311 of this chapter, preparing the sample solution as follows: From an aliquot of suspension prepared in

VOL 54 ISS 218 NO 14 1989 UMI

1989; data, information, and analyses to justify a hearing by January 16, 1990.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Peter A. Dionne, Center for Drug Evaluation and Research (HFD–520), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4290.

SUPPLEMENTARY INFORMATION: FDA is amending the antibiotic drug regulations by updating and making noncontroversial technical changes in certain antibiotic drug regulations that provide for accepted standards of antibiotic and antibiotic-containing drugs intended for human use.

1. In 21 CFR 436.216, the system suitability test procedures in paragraphs (c) (1) and (2) are revised and paragraph (c)(5) is added to provide testing procedures most often required on high-performance liquid chromatographic assays.

2. In 21 CFR 440.103b(b)(4), the preparation of the sample solution for the identity test of amoxicillin trihydrate is revised to reflect the same concentration as that of the standard preparation.

3. In 21 CFR 442.19(b)(1)(iv), the formulas for calculating micrograms of cefuroxine per milligram and the ratio of isomer A to total isomer content of cefuroxime are revised to state the correct formulas.

4. In 21 CFR 442.106b(a)(1), the description of cefadroxil monohydrate tablets is revised to provide for a film-coated tablet. The sole manufacturer has submitted adequate data to support this revision.

5. In 21 CFR 442.119(b)(1)(iii), the formula for calculating the milligrams of cefuroxime per tablet is revised to state the correct formula.

6. In 21 CFR 442.212b(a)(1), the description of cefoperazone sodium injection is revised to provide for a 20-milligram-per-milliliter dosage strength. The sole manufacturer has submitted adequate data to support this revision.

7. 21 CFR 446.115c, 446.116b, 446.116d, 446.165c, 446.165e, 446.180a, 446.180b, 446.181a, and 446.181b are removed, including the editorial notes following each of these sections.

In Drug Efficacy Study Implementation (DESI) notices published in the **Federal Register** of August 8, 1985 (50 FR 32112) and February 19, 1988 (53 FR 5044), FDA withdrew approval of the new drug applications for certain fixed-combination antibiotic/antifungal products on the basis that the products lack substantial evidence of effectiveness.

Therefore, the monographs (regulations) providing accepted standards are removed for the following products: Declostatin Oral Suspension containing demeclocycline and nystatin; Declostatin Tablets containing demeclocycline hydrochloride and nystatin; Declostatin Capsules containing demeclocycline hydrochloride and nystatin; Terrastatin Capsules containing oxytetracycline and nystatin; Terrastatin for oral suspension containing oxytetracycline and nystatin; Tetrex–F Oral Suspension containing tetracycline phosphate complex and nystatin; Mysteclin "F" syrup containing tetracycline and nystatin; Tetrex-F for Oral Suspension, Achrostatin V for Oral Suspension, and Tetrastatin for Oral Suspension containing tetracycline and nystatin; Comycin Half-Strength Capsules, Comycin Capsules, and Tetrex-F Capsules containing tetracycline phosphate complex and nystatin; and Achrostatin V Capsules, Tetrastatin Capsules, Mysteclin-V Capsules, Mysteclin "F" Capsules, and Mysteclin "F" 125 Capsules containing tetracyline hydrochloride and nystatin.

8. In 21 CFR 452.510b(a)(2), the packaging standard for erythromycin topical solution pledgets is revised to provide for a 60-pledget containing jar. The sole manufacturer has submitted adequate data to support this revision.

Environmental Impact

The agency has determined under 21 CFR 25.24(c)(6) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Submitting Comments and Filing Objectives

These amendments institute changes that are corrective, editorial, or of a minor substantive nature. Because the amendments are not controversial and because when effective they provide notice of accepted standards, FDA finds that notice, public procedure, and delayed effective date are unnecessary and not in the public interest. This final rule, therefore, becomes effective December 14, 1989. However, interested persons may, on or before December 14, 1989, submit written comments on this regulation to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this final rule may file objections to it and request a hearing. Reasonable grounds for the hearing must be shown. Any person who decides to seek a hearing must file (1) on or before December 14, 1989, a written notice of participation and request for hearing, and (2) on or before January 16, 1990, the data, information, and analyses on which the person relies to justify a hearing, as specified in 21 CFR 314.300. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that no genuine and substantial issue of fact precludes the action taken by this order, or if a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) who request(s) the hearing, making findings and conclusions and denying a hearing. All submissions must be filed in three copies, identified with the docket number appearing in the heading of this order and filed with the Dockets Management Branch.

The procedures and requirements governing this order, a notice of participation and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and grant or denial of a hearing are contained in 21 CFR 314.300.

All submissions under this order, except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects

21 CFR Part 436

Antibiotics.

21 CFR Part 440

Antibiotics.

21 CFR Part 442

Antibiotics.

21 CFR Part 446

Antibiotics.

21 CFR Part 452

Antibiotics.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 436, 440, 442, 446, and 452 are amended as follows:

PART 436—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

1. The authority citation for 21 CFR Part 436 continues to read as follows:

Authority: Sec. 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

2. Section 436.216 is amended by revising paragraphs (c) (1) and (2) and by adding paragraph (c)(5) to read as follows:

§ 436.216 High-performance liquid chromatographic assay.

* * * * *

(c) * * *

(1) *Trailing factor or asymmetry factor.* Calculate either the trailing factor (*T*), from distances measured along the horizontal line at 5 percent of the peak height above the baseline or the asymmetry factor (A_s) measured at a point 10 percent of the peak height from the baseline; whichever is required in the appropriate monograph, as follows:

$$T = \frac{W_{0.05}}{2f}$$

where:
$W_{0.05}$ = Width of peak at 5 percent height; and
f = Horizontal distance from point of ascent to a point coincident with maximum peak height.

$$A_s = \frac{a+b}{2a}$$

where:
a = Horizontal distance from point of ascent to point of maximum peak height; and
b = Horizontal distance from the point of maximum peak height to point of descent.

(2) *Efficiency of the column.* Calculate the number of theoretical plates (n) of the column as follows:

$$n = 5.545 \left[\frac{t_R}{W_h} \right]^2$$

where:
n = Efficiency, as number of theoretical plates for column;
t_R = Retention time of solute; and
W_h = Peak width at half-height.
Calculate the absolute efficiency of the column, (reduced plate height) (h_r) if required in the monograph, as follows:

$$h_r = \frac{(L)\ (10{,}000)}{(n)\ (d_p)}$$

where:
L = Length of column in centimeters;
n = Number of theoretical plates; and
d_p = Average diameter of the particles in column packing in micrometers.

* * * * *

(5) *Capacity factor.* Calculate the capacity factor (k), if required in the monograph as follows:

$$k = \frac{t_r - t_m}{t_m}$$

where:
t_r = Retention time of solute; and
t_m = Retention time of solvent or unretained substance, calculated as follows:

$$t_m = \frac{(3.1416)(D^2)(L)\ (0.75)}{4F}$$

where:
D = Column diameter in centimeters;
L = Column length in centimeters;
0.75 = Average total column porosity; and
F = Flow rate in milliliters per minute.

PART 440—PENICILLIN ANTIBIOTIC DRUGS

3. The authority citation for 21 CFR Part 440 continues to read as follows:

Authority: Sec. 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

4. Section 440.103b is amended by revising paragraph (b)(4) to read as follows:

§ 440.103b Amoxicillin trihydrate for oral suspension.

* * * * *

(b) * * *

(4) *Identity.* Proceed as directed in § 436.311 of this chapter, preparing the sample solution as follows: From an aliquot of suspension prepared in accordance with the label, make either a 6.25:1 dilution for the 25-milligrams-per-milliliter dosage; or a 12.5:1 dilution for the 50-milligrams-per-milliliter dosage, with 0.1*N* hydrochloric acid. The slight dilution of the acid does not have a significant effect on the test.

PART 442—CEPHA ANTIBIOTIC DRUGS

5. The authority citation for 21 CFR Part 442 continues to read as follows:

Authority: Sec. 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

6. Section 442.19 is amended by revising paragraph (b)(1)(iv) to read as follows:

§ 442.19 Cefuroxime axetil.

* * * * *

(b) * * *

(1) * * *

(iv) *Calculations*—(A) Calculate the micrograms of cefuroxime per milligram of sample as follows:

Micrograms of cefuroxime per milligram =

$$\frac{R_u \times P_s \times 100}{R_s \times C_u \times (100-m)}$$

where:
R_u = Sum of the peak height of the cefuroxime axetil sample isomer A and isomer B peaks/Peak height of the internal standard;
R_s = Sum of the peak heights of the cefuroxime axetil working standard isomer A and isomer B peaks/Peak height of the internal standard;
P_s = Cefuroxime activity in the cefuroxime axetil working standard solution in micrograms per milliliter;
C_u = Milligrams of sample per milliliter of sample solution; and
m = Percent moisture content of the sample.

(B) Calculate the ratio of isomer A to total isomer content as follows:

BEST COPY AVAILABLE

$$\text{Ratio of isomer A to isomer content} = \frac{\text{Peak height of isomer A peak}}{\text{Peak height of isomer A peak + Peak height of isomer B peak}}$$

Marshals Service to reflect the new substantive law governing the Witness Protection Program, section 1210 of the Comprehensive Crime Control Act of 1984 (Pub. L. 98–473), 18 U.S.C. 3521 *et seq.*, and issuance of

and their families, including the psychological well-being and social adjustment of such persons, pursuant to 18 U.S.C. 3521, *et seq.*, and issuance of

identified at 30 CFR 904.12, 904.15, and 904.16.

II. Submission of Proposed Amendment

VOL 54 ISS 218 NOV 14 1989 UMI

$$\text{Ratio of isomer A to isomer content} = \frac{\text{Peak height of isomer A peak}}{\text{Peak height of isomer A peak} + \text{Peak height of isomer B peak}}$$

* * * * *

7. Section 442.106b is amended by revising the first sentence in paragraph (a)(1) to read as follows:

§ 442.106b Cefadroxil monohydrate tablets.

(a) * * *

(1) * * * Cefadroxil monohydrate tablets are composed of cefadroxil monohydrate and one or more suitable and harmless binders and lubricants, and with or without coloring and film-coating substances. * * *

* * * * *

8. Section 442.119 is amended by revising paragraph (b)(1)(iii) to read as follows:

§ 442.119 Cefuroxime axetil tablets.

* * * * *

(b) * * *

(1) * * *

(iii) *Calculations.* Calculate the cefuroxime content as follows:

$$\text{Milligrams of cefuroxime per tablet} = \frac{R_u \times P_s \times d}{R_s \times n}$$

where:

R_u = Sum of the peak heights of the cefuroxime axetil sample isomer A and isomer B peaks/Peak height of the internal standard;

R_s = Sum of the peak heights of the cefuroxime axetil working standard isomer A and isomer B peaks/Peak height of the internal standard;

P_s = Potency of the cefuroxime axetil working standard in milligrams of cefuroxime activity milliliter;

d = Dilution factor of the sample; and

n = Number of tablets in the sample assayed.

* * * * *

9. Section 442.212b is amended by revising the second sentence in paragraph (a)(1) to read as follows:

§ 442.212b Cefoperazone sodium injection.

(a) * * *

(1) * * * Each milliliter contains cefoperazone sodium equivalent to either 20 milligrams or 40 milligrams of cefoperazone per milliliter. * * *

* * * * *

PART 446—TETRACYCLINE ANTIBIOTIC DRUGS

10. The authority citation for 21 CFR part 446 continues to read as follows:

Authority: Sec. 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

§ 446.115c [Removed]

11. Section 446.115c *Demeclocycline-nystatin for oral suspension* is removed.

§ 446.116b [Removed]

12. Section 446.116b *Demeclocycline hydrochloride-nystatin tablets* is removed.

§ 446.116d [Removed]

13. Section 446.116d *Demeclocycline hydrochloride-nystatin capsules* is removed.

§ 446.165c [Removed]

14. Section 446.165c *Oxytetracycline-nystatin capsules* is removed.

§ 446.165e [Removed]

15. Section 446.165e *Oxytetracycline-nystatin for oral suspension* is removed.

§ 446.180a [Removed]

16. Section 446.180a *Tetracycline-nystatin oral suspension; tetracycline phosphate complex-nystatin oral suspension (tetracycline phosphate complex-nystatin oral drops)* is removed.

§ 446.180b [Removed]

17. Section 446.180b *Tetracycline-nystatin for oral suspension* is removed.

§ 446.181a [Removed]

18. Section 446.181a *Tetracycline hydrochloride-nystatin tablets* is removed.

§ 446.181b [Removed]

19. Section 446.181b *Tetracycline hydrochloride-nystatin capsules; tetracycline phosphate complex-nystatin capsules* is removed.

PART 452—MACROLIDE ANTIBIOTIC DRUGS

20. The authority citation for 21 CFR part 452 continues to read as follows:

Authority: Sec. 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357).

21. Section 452.510b is amended by revising paragraph (a)(2) to read as follows:

§ 452.510b Erythromycin topical solution.

(a) * * *

(2) *Packaging.* In addition to the requirements of § 432.1 of this chapter, it may either be dispensed on individually packaged pledgets, each individual pledget containing 0.8 milliliter or erythromycin topical solution, or in a jar containing 60 pledgets. The jar contains 0.8 milliliter of erythromycin topical solution per pledget. Although the pledgets in the jar are not individually packaged, the drug is uniformly distributed throughout the pledgets. The erythromycin topical solution used on the pledgets contains 20 milligrams of erythromycin per milliliter.

BILLING CODE 4160-01-M

DEPARTMENT OF JUSTICE

United States Marshals Service

[Order No. 1376-89]

28 CFR Part 0

Witness Protection Program

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This Order amends the existing delegation of authority to the Director of the United States Marshals Service regarding the administration of the Federal Witness Protection Program. The Order technically corrects the existing delegation to the Director of the Marshals Service to reflect the new substantive law governing the Witness Protection Program, section 1210 of the Comprehensive Crime Control Act of 1984, Public Law 98-473, the Witness Security Act of 1984, 18 U.S.C. 3521, *et seq.*

EFFECTIVE DATE: November 7, 1989.

FOR FURTHER INFORMATION CONTACT: Gerald M. Auerbach, General Counsel, United States Marshals Service, Arlington, Virginia; telephone No. (202) 307-9054.

SUPPLEMENTARY INFORMATION: The Attorney General has previously delegated his authority regarding administration and operation of the Federal Witness Protection Program to the Director of the United States Marshals Service. 28 CFR 0.111(c). This amendment will technically correct 28 CFR 0.111(c) to reflect the new substantive law governing the Witness Protection Program, section 1210 of the Comprehensive Crime Control Act of 1984, Public Law 98-473, 18 U.S.C. 3521, *et seq.*, and explicitly delegates to the Director of the U.S. Marshals Service the Attorney General's authority under the statute to issue regulations governing the administration of the Program, including but not limited to regulations regarding the sums of subsistence payments and basic living expenses for protected witnesses and their families.

This Order is not a rule within the meaning of Executive Order 12291, section 1(a) or the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*

List of Subjects in 28 CFR Part 0

Authority delegations (Government agencies).

By virtue of the authority vested in me, including 28 U.S.C. 509, 510, 5 U.S.C. 301, and 18 U.S.C. 3521 *et seq.*, part 0, of title 28 of the Code of Federal Regulations is hereby amended as follows:

1. The authority citation for Part 0 is revised to read as follows:

Authority: 5 U.S.C. 301, 2303, 3101; 6 U.S.C. 1103, 1324A, 1427(g); 15 U.S.C. 644(k); 18 U.S.C. 2254, 3521, 3621, 3622, 4001, 4041, 4042, 4044, 4082, 4201 *et seq.*, 6003(b); 21 U.S.C. 871, 881(d), 904; 22 U.S.C. 263a, 1621-1645o, 1622 note; 28 U.S.C. 509, 510, 515, 516, 519, 524, 543, 552, 552a, 569; 31 U.S.C. 1108, 3801 *et seq.*; 50 U.S.C. App. 1989b, 2001-2017p; Pub. L. No. 91-513, sec. 501; EO 11919; EO 11287; EO 11300.

2. Section 0.111 is amended by revising paragraph (c) to read as follows:

§ 0.111 General functions.

* * * * *

(c) Provisions for the health, safety, and welfare of Government witnesses and their families, including the psychological well-being and social adjustment of such persons, pursuant to 18 U.S.C. 3521, *et seq.*, and issuance of necessary regulations for this purpose on behalf of the Attorney General.

BILLING CODE 4410-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 904

Arkansas Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; Approval of amendment.

SUMMARY: OSM is announcing the approval under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), of an amendment to the Arkansas permanent regulatory program (hereinafter, the Arkansas program). The amendment consists of revisions to Arkansas' regulations pertaining to restrictions on financial interests of State employees, fish and wildlife information, individual civil penalties, and the measurement of revegetation success on prime farmland. Arkansas is modifying its approved program to maintain consistency with SMCRA and the Federal regulations.

EFFECTIVE DATE: November 14, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. James H. Moncrief, Director, Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135, Telephone: (918) 581-6430.

SUPPLEMENTARY INFORMATION:

I. Background

On November 21, 1980, the Secretary of the Interior approved the Arkansas program. The November 21, 1980, **Federal Register** (45 FR 77003) gives general background information regarding the Arkansas program, including information on the Secretary's findings and the disposition of comments on the program, as well as a detailed explanation of the conditions of its approval. Subsequent actions concerning the Arkansas program are identified at 30 CFR 904.12, 904.15, and 904.16.

II. Submission of Proposed Amendment

By letter dated December 22, 1988 (Administrative Record No. AR-346), Arkansas submitted to OSM proposed revisions to the following provisions of Arkansas' regulations: Arkansas Surface Coal Mining and Reclamation Code (ASCMRC) 705.11(a), 705.13(a), and 705.15, restrictions on financial interests of State employees; ASCMRC 780.16(b)(3)(i), and (b)(3)(ii), and (c), 784.21, 816.97(b), and 817.97, fish and wildlife information; ASCMRC 846.1, .5, .12, .14, and .18, individual civil penalties; and ASCMRC 1000(50), measurement of revegetation success on prime farmland.

Arkansas submitted its proposed amendment in response to (1) a letter dated October 21, 1988, that OSM sent to Arkansas in accordance with 30 CFR 732.17(c) (Administrative Record No. AR-344), and (2) required program amendments at 30 CFR 904.16 (a) and (b).

On January 13, 1989, OSM published a notice in the **Federal Register** announcing its receipt of the proposed amendment to the Arkansas program and inviting public comment on the adequacy of the amendment (54 FR 1398). The comment period closed on February 13, 1989.

After reviewing the proposed amendment and all comments it had received during the comment period, OSM notified Arkansas by letter dated March 15, 1989 (Administrative Record No. AR-354) of provisions (ASCMRC 816.116(b)(3)(ii)) in the amendment that appeared to be inconsistent with the Federal regulations. Arkansas took two actions in response to this notification. First, by letter dated April 12, 1989 (Administrative Record No. AR-355), Arkansas informed OSM that it was withdrawing the proposed revision at ASCMRC 816.116(b)(3)(ii) that pertained to revegetation success criteria for bond release as these criteria related to the replacement of trees and shrubs as a normal husbandry practice. Second, by letter dated April 24, 1989 (Administrative Record No. AR-356), Arkansas submitted to OSM a revision to the proposed amendment which would delete ASCMRC 1000(50) so as to remove the suspension of ASCMRC 823.11(c). (ASCMRC 823.11(c) establishes actual crop production on reclaimed prime farmlands as the measure for determining whether or not revegetation has been successful.)

To allow the public an opportunity to comment on this twofold response, on May 24, 1989, OSM published a notice in

VOL 54 ISS 218 NO 14 1989 UMI

the Federal Register (54 FR 22452) that reopened and extended the comment period. The extended comment period closed on June 8, 1989. In this same Federal Register notice, OSM announced Arkansas' withdrawal of the proposed revision at ASCMRC 816.116(b)(3)(ii).

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17, are the Director's findings concerning the amendment submitted by Arkansas on December 22, 1988, and subsequently revised on April 12 and 24, 1989. The Director may require further changes in the future as a result of Federal regulatory revisions, court decisions, and continuing OSM oversight of the Arkansas program.

1. Substantive Revisions to Arkansas' Regulations that Are Substantially Identical to the Counterpart Federal Regulations

Arkansas proposes revisions to the following regulations that are substantive in nature and contain language substantially identical to the corresponding Federal regulations: ASCMRC 705.11(a), 705.13(a), and 705.15 (respectively, counterpart Federal regulations 30 CFR 705.11(a), 705.13(a), and 705.15), restrictions on financial interests of State employees; ASCMRC 780.16(b)(3)(i), (b)(3)(ii), and (c), 784.21, 816.97(b), and 817.97 (30 CFR 780.16(b)(3)(i), (b)(3)(ii) and (c); 784.21; 816.97(b); and 817.97), fish and wildlife information; and ASCMRC 846.1, .5, .12, .14, and .16 (30 CFR 846.1, .5, .12, .14, and .16), individual civil penalties. The Director, therefore, finds that these proposed revisions to Arkansas' regulations are no less effective than the corresponding Federal regulations.

2. ASCMRC 1000(50), Prime Farmland Restoration

In approving Arkansas' program amendment dated May 1, 1987 (finding No. 5, 53 FR 9685), the Director at 30 CFR 904.16(b) required that Arkansas revise its regulations at ASCMRC 1000(50) to remove the suspension of ASCMRC 823.11(c). Arkansas has complied with this requirement in this amendment. The Director now finds that ASCMRC 823.11(c) is no less effective than the corresponding Federal rule at 30 CFR 823.15(b). Therefore, the Director is removing the required program amendment at 30 CFR 904.16(b).

IV. Summary and Disposition of Comments.

Public Comments

The Director both solicited public comment and provided opportunity for a public hearing on the proposed amendment. No comments were received. Because no one requested an opportunity to testify at a public hearing, no hearing was held.

Agency Comments

Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(11)(i), the Director also solicited comments from various State and Federal agencies with an actual or a potential interest in the Arkansas program. The University of Arkansas Cooperative Extension Service (ACES) and the U.S. Fish and Wildlife Service (USFWS) responded with comments.

ACES commented on proposed Arkansas regulation ASCMRC 816.97(h) which requires that, "where cropland is to be the postmining land use, and where appropriate for wildlife—and crop-management practices, the operator shall intersperse the fields with trees, hedges, or fence rows throughout the harvested area to break up large blocks of monoculture and diversify habitat types for birds and other animals." ACES was concerned that the regulation is vague and subjective and could be interpreted and implemented by Arkansas in such a manner as to place unrealistic and uneconomical constraints on commercial and private agricultural operations. It further commented that trees, shrubs, grasses, and other wildlife habitat should be located around field edges and in non cropland areas but should not be located in otherwise economically operable fields. In response, the Director notes that the phrase in the proposed regulation "where appropriate for wildlife—*and* crop-management" (emphasis added) requires operators to reclaim cropland to uses appropriate for *both* wildlife *and* crop management. If, as ACES suspects could happen, Arkansas were to implement its program inconsistent with this regulation, and not take account of the wildlife and crop-management phrase, Arkansas's implementation would become a matter for OSM review in its oversight of the Arkansas program. In addition the Director notes that the language of the Arkansas proposed rule is identical to the language of the counterpart Federal regulation at 30 CFR 816.97(h). On these bases, the Director is not requiring Arkansas to revise its proposed regulation.

USFWS commented on proposed Arkansas regulation ASCMRC 816.97(e)(i) which requires that power lines and transmission facilities be designed and constructed so as to minimize electrocution hazards to raptors. USFWS suggested that Arkansas include in the regulation a reference to the publication entitled "Suggested Practices for Raptor Protection on Powerlines—the State of the Art in 1981" or to some other current state-of-the-art guidelines. OSM did not require Arkansas to revise the language of its proposed regulation because Arkansas' language is identical to the language of the Federal counterpart regulation at 30 CFR 816.97(e)(i). However, OSM acknowledges that the document recommended by USFWS is a state-of-the-art guideline for protection of raptors from electrocution. OSM also recommends this document for use.

V. Director's Decision

Based on the above findings, the Director is approving the proposed amendment submitted to OSM by Arkansas on December 22, 1988. Arkansas must promulgate the regulations the amendment addresses in a form identical, with the exception of typographical errors, to the form in which they were submitted December 22, 1988, and revised April 12 and 24, 1989. However, the Director reserves the right to require further changes to these regulations in the future as a result of Federal regulatory revisions, court decisions, and OSM's continuing oversight of the Arkansas program. This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to bring their programs into conformity with the Federal standards without undue delay. Consistency between State and Federal standards is required by SMCRA.

The Director is, as explained in finding No. 2, removing the requirement at 30 CFR 904.16(b) that this amendment satisfies. To implement this decision, the Director is amending the Federal regulations at 30 CFR 904 which codify all decisions concerning the Arkansas program.

In addition to making this decision on the proposed amendment, the Director is also taking this opportunity to remove 30 CFR 904.12(b) and 904.16(a). Both relate to ASCMRC 816.116(b)(3)(ii), a provision which Arkansas originally submitted in this amendment but subsequently withdrew. The reasons for the Director taking these actions are discussed below.

OSM's regulations at 30 CFR 816.116(b)(3)(ii) and 817.116(b)(3)(ii) were subject to a District Court's ruling (*In Re: Permanent Surface Mining Regulation Litigation II*, No. 79–1144 D.D.C. 1985, (PSMRL II)) that the administrative record of OSM did not show that the replacing of trees and shrubs was a normal husbandry practice. On November 20, 1986, in response to the PSMRL II, OSM suspended its regulations at 30 CFR 816.116(b)(3)(ii) and 817.116(b)(3)(ii) insofar as they authorized the counting of trees and shrubs that have been in place less than the full period of responsibility in determining the success of revegetation (51 FR 40952). And on March 28, 1988, the Director at 30 CFR 904.12(b) OSM disapproved the counterpart Arkansas regulation, ASCMRC 816.116(b)(3)(ii), and required at 30 CFR 904.16(a) that Arkansas amend its regulation to be consistent with the court's decision (53 FR 9982).

Then, in the September 7, 1988, Federal Register (53 FR 34636), OSM issued revised Federal regulations on revegetation in response to PSMRL II and lifted the suspension on 30 CFR 816.116(b)(3)(ii). The revised Federal regulations at 30 CFR 816.116(b)(3)(ii) and 817.116(b)(3)(ii) require that, at the time of final bond release, at least 80 percent of all trees and shrubs used to determine revegetation success be in place for at least 60 percent of the applicable minimum period of responsibility (53 FR 34636). This action rendered moot the prior disapproval of the Arkansas program at 30 CFR 904.12(b) and the required program amendment at 30 CFR 904.16(a). Therefore, the Director is revising the Federal regulations to remove the disapproval and requirement.

In taking this action, the Director notes that he has, by letter dated July 25, 1988, already notified Arkansas in accordance with 30 CFR 732.17(d) that Arkansas must amend its regulation at ASCMRC 816.116(b)(3)(ii) to be consistent with OSM's revised regulation at 30 CFR 816.116(b)(3)(ii), which requires that at least 80 percent of the trees and shrubs counted to determine revegetation success be in place for at least 60 percent of the 5-year period of revegetation responsibility.

VI. Procedural Determinations

1. Compliance With the National Environmental Policy Act

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order 12291 and the Regulatory Flexibility Act

On July 12, 1984, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, the action this notice describes is exempt both from regulatory review by OMB and from the requirement to prepare a regulatory impact analysis.

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities, nor will it impose any new requirements; rather, the rule will ensure that existing requirements established by SMCRA and its implementing Federal regulations will be met by the State of Arkansas.

3. Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the OMB under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 904

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: November 2, 1989.

Raymond L. Lowrie,

Assistant Director, Western Field Operations.

For the reasons set out in the preamble, title 30, chapter VII, subchapter T, of the Code of Federal Regulations, is amended as set forth below:

PART 904—ARKANSAS

1. The authority citation for part 904 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

§ 904.12 [Amended]

2. Section 904.12 is amended by removing and reserving paragraph (b).

3. Section 904.15 is amended by adding a new paragraph (f) as follows:

§ 904.15 Approval of amendments to State regulatory program.

* * * * *

(f) The amendment to the following sections of the Arkansas Surface Mining and Reclamation Code, as submitted to OSM on December 22, 1988 and revised on April 12 and 24, 1989, is approved effective November 14, 1989: 705.11(a); 705.13(a); 705.15; 780.16(b)(3)(i), and (b)(3)(ii), and (c); 784.21; 816.97(b); 817.97; 846.1, .5, .12, .14, and .16; and 1000(50).

The revisions affect the program areas regarding restriction on financial interests of employees, required fish and wildlife resource information for surface and underground mining applications, performance standards for protection of endangered and threatened species, individual civil penalties, and revegetation success standards for reclaimed prime farmlands.

§ 904.16 [Removed]

4. Section 904.16 is removed.

[FR Doc. 89–25423 Filed 11–13–89; 8:45 am]

BILLING CODE 4310–05–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-3680-2]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Final Denial

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is announcing its decision to deny the petition submitted by Fisher Guide, formerly Fisher Body Division of General Motors Corporation, Flint, Michigan, to exclude certain solid wastes generated at its facility from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to a delisting petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of parts 260 through 268, 124, 270, and 271 of title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists. This rulemaking finalizes the proposed denial for Fisher Guide's petitioned wastes published on December 16, 1988 (see 53 FR 50560). The effect of this action is that these wastes must continue to be handled as hazardous in accordance with 40 CFR parts 260 through 268, and the permitting standards of 40 CFR part 270.

EFFECTIVE DATE: November 15, 1989.

ADDRESSES: The public docket for this final rule is located at the U.S. Environmental Protection Agency, 401 M Street SW., (Room M2427), Washington, DC 20460, and is available for viewing

from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. Call (202) 475–9327 for appointments. The reference number for this docket is "F–89–FGDF–FFFFF." The public may copy

constituents of concern are not present at significant levels or, if present at significant levels, are in an essentially immobile form. Additionally, Fisher Guide claims that these wastes are not

and 6 were calculated properly using the 9,000 cubic yard waste volume. (The compliance-point concentrations for the lagoon sludges presented in Table 4 were calculated properly using the 900

worst-case to expect that, should the waste be delisted, the entire contents of the drying beds (9,000 cubic yards) might be disposed of at one time. Therefore, the Agency believes that the use of a

area (see 50 FR 7886, February 26, 1985). The Agency supports the use of these generic assumptions because the waste, if delisted, would no longer be regulated

drying beds in 1981 and 1982. Specifically, as described in the proposed rule, Fisher Guide did not provide descriptions of procedures

from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. Call (202) 475–9327 for appointments. The reference number for this docket is "F–89–FGDF–FFFFF." The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline, toll free at (800) 424–9346, or at (202) 382–3000. For technical information concerning this notice, contact Robert Kayser, Office of Solid Waste (OS–343), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382–4206.

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

Under 40 CFR 260.20 and 260.22, facilities may petition the Agency to remove their wastes from hazardous waste control by excluding them from the lists of hazardous wastes contained at 40 CFR 261.31 and 261.32. Petitioners must provide sufficient information to EPA to allow the Agency to determine (1) that the waste to be excluded is not hazardous based upon the criteria for which it was listed, and (2) that no other hazardous constituents are present in the wastes at levels of regulatory concern.

B. History of This Rulemaking

Fisher Guide, formerly Fisher Body Division of General Motors Corporation (Fisher Guide), located in Flint, Michigan, petitioned the Agency to exclude from hazardous waste control electroplating sludges contained in its settling lagoon system and drying beds. After evaluating the petition, EPA proposed, on December 16, 1988, to deny Fisher Guide's petition to exclude its wastes from the lists of hazardous waste under 40 CFR 261.31 and 261.32 (see FR 50550).

This rulemaking addresses public comments received on the proposal and finalizes the proposed decision to deny Fisher Guide's petition.

II. Disposition of Delisting Petition

A. General Motors/Fisher Guide, Flint, Michigan

1. Proposed Exclusion

Fisher Guide petitioned the Agency for an exclusion of its wastewater treatment sludges in its settling lagoon system and drying beds, presently listed as EPA Hazardous Waste No. F006. Fisher Guide based its petition for these wastes (900 and 9,000 cubic yards of sludge in the lagoons and drying beds, respectively) on the claim that the metal constituents of concern are not present at significant levels or, if present at significant levels, are in an essentially immobile form. Additionally, Fisher Guide claims that these wastes are not hazardous on any other basis (*i.e.*, there are no additional constituents or factors that could cause the wastes to be hazardous). The Agency evaluated the information and analytical data provided by Fisher Guide in support of its petition and determined that the hazardous constituents found in the petitioned wastes could pose a threat to human health and the environment. Specifically, the Agency used its vertical and horizontal spread (VHS) model to predict the potential mobility of the hazardous constituents found in the petitioned wastes. Based on these evaluations, the Agency determined that Fisher Guide failed to substantiate its claim that the hazardous constituents of concern will not leach and migrate at concentrations above the health-based levels used in delisting decision-making. See 53 FR 50550, December 16, 1988, for a more detailed explanation of why EPA proposed to deny Fisher Guide's petition.

2. Agency Response to Public Comments

The Agency received comments on the proposed rule from two interested parties. One commenter supported the Agency's proposed decision to deny the petition, both on the grounds articulated by EPA and for a number of other reasons. The second commenter opposed the Agency's proposed denial decision. The comments submitted related to the following areas: (1) Use of the VHS model to evaluate the petitioned wastes, (2) evaluation of samples that were not representative of the petitioned wastes, and (3) use of standard Extraction Procedure (EP) data rather than Oily Waste Extraction Procedure (OWEP) data. The specific comments made by the two interested parties regarding the Agency's proposed decision to deny the petition, and the Agency's responses to them, are discussed below.

Agency's Use of the VHS Model. The Agency wishes to note, at this time, that the proposed rule published on December 16, 1988 contained a typographical error in the discussion of the Agency's use of the VHS model to evaluate the drying bed sludges. Specifically, on 53 FR 50555 (middle column, first full paragraph), the estimated waste volume for the drying bed sludges should have read 9,000 cubic yards (as stated twice previously in 53 FR 50554), not 900 cubic yards. The compliance-point concentrations for the drying bed sludges presented in Tables 5 and 6 were calculated properly using the 9,000 cubic yard waste volume. (The compliance-point concentrations for the lagoon sludges presented in Table 4 were calculated properly using the 900 cubic yard waste volume.)

The first commenter supported the Agency's proposed decision to deny Fisher Guide's petitioned wastes; however, the commenter expressed general concerns over EPA's use of the VHS model to evaluate delisting petitions, including: (1) Failure on the part of the Agency to evaluate total constituent levels of metals in the waste, (2) failure on the part of the Agency to consider all disposal scenarios, (3) criticism of the VHS model in understating the risks of large-quantity waste generators, (4) criticism of the VHS model in not considering other contaminant sources, and (5) unjustified use of the VHS model to evaluate delisting petitions for wastes stored in surface impoundments. Because the Agency already had sufficient bases to deny Fisher Guide's petition for these wastes, as detailed in the proposed rule, and the concerns raised by the commenter do not change the proposed decision, the Agency did not assess whether the additional bases for denial, suggested by the commenter, should be included as part of the rationale for denying the petition. Furthermore, the issues raised by the commenter regarding the effectiveness of the VHS model do not affect EPA's decision to deny this petition. Therefore, the Agency did not address these comments in today's rule.

The second commenter also presented concerns regarding the use of the VHS model, including (1) the model's assumption that wastes are disposed of on an annual basis, (2) that the dimensions of the VHS model disposal unit are biased against the disposal of large waste volumes, and (3) the model does not consider site-specific factors.

Annual Disposal of Wastes—The commenter suggested that many of the assumptions used in the VHS model are not "reasonable", but absolute worst-case. Specifically, with regard to Fisher Guide's petition, the commenter argued that the petitioned wastes were disposed of every other week, not annually as assumed in the VHS model. The commenter suggested that the model should account for on-going disposal practices, even though, in Fisher Guide's case, the lagoons and drying beds no longer receive hazardous waste.

With regard to the evaluation of Fisher Guide's drying bed sludges, the Agency believes that it is a reasonable

worst-case to expect that, should the waste be delisted, the entire contents of the drying beds (9,000 cubic yards) might be disposed of at one time. Therefore, the Agency believes that the use of a disposal volume of 9,000 cubic yards for the drying bed sludges in the VHS model evaluation presented in the proposed rule is justified. Likewise, because Fisher Guide stated in its petition that sludges are removed from the lagoons at a rate of 900 cubic yards once a year, the Agency believes that the use of a disposal volume of 900 cubic yards for waste contained in the lagoons is also justified.

Bias Against Large Waste Volumes—The commenter further claimed that the VHS model presents a bias against large-volume hazardous waste generators because the VHS model does not provide credit for trench-widening in the y-direction.[1] The commenter believes this factor gives "less realistic dilution".

As discussed in the **Federal Register** on November 27, 1985 (50 FR 48896), the VHS model incorporates a sliding-scale that allows the Agency to take into account the decreased impact that smaller waste volumes would have on ground water quality. The VHS model predicts a maximum dilution factor of about 32 for waste volumes equal to (or less than) 475 cubic yards. As waste volume increases, the dilution factor decreases, until a minimum value of approximately 0.3 is predicted for waste volumes above 8,000 cubic yards. This variation in the dilution factor (corresponding to waste volume) is a function of the assumptions made in the disposal unit dimensions for the VHS model (see 50 FR 48896, November 27, 1985). The Agency continues to believe that it is reasonable to assume that a large amount of waste has a greater potential to impact an underlying aquifer than a smaller volume, as predicted by the VHS model.

The Agency disagrees with the commenter that credit should be given for trench-widening. The dimensions of the VHS model disposal unit (the trench which the commenter refers to) represent the dimensions of a "generic" disposal unit based on information obtained regarding typical disposal unit area (see 50 FR 7886, February 26, 1985). The Agency supports the use of these generic assumptions because the waste, if delisted, would no longer be regulated under subtitle C and thus could be disposed of in a management setting with any trench arrangement.

Site-specific Considerations—The commenter also argued for the consideration of site-specific conditions and their impact on an on-site disposal alternative. The commenter stated that, because Fisher Guide proposes to construct an on-site monofill to contain the sludges, an on-site monofill would be a more appropriate disposal alternative. The commenter stated that favorable, on-site soil conditions, combined with the proposed design of the monofill, suggest that water extract data, in addition to "other model modifications," would likely be more representative in the proposed disposal alternative. The commenter claims that the acidic conditions simulated by the EP leachate test would not be representative of a monofill.

As discussed in the proposed rule (see 53 FR 50550), the Agency believes that the use of site-specific conditions (such as soil conditions and unit design) would be inappropriate and inconsistent with the intent of delisting evaluations. Delisting decisions are waste-specific, not disposal-site specific. They are formulated by evaluating the hazard of a petitioned waste in a non-subtitle C management setting. Delisting evaluations which considered the specific conditions at the site of disposal, for example, could not predict future storage or disposal conditions that may be pertinent when the waste is removed from the present disposal site, a situation which could occur once the waste is excluded from Subtitle C regulation. If delisted, the sludge may, in a reasonable worst-case scenario, be placed in a municipal landfill and exposed to acidic leachate. Therefore, the Agency believes that the use of the acidic EP leachate test is appropriate to simulate this disposal scenario. Use of a non-acidic extraction medium (*i.e.*, distilled water as suggested by Fisher Guide) would not properly account for this potential disposal option.

Evaluation of "Unrepresentative" Samples. The first commenter noted that the Agency did not point out that samples collected in 1981 and 1982, although used by Fisher Guide in their petition and evaluated by the Agency, were not collected using standard delisting guidance.

The Agency recognizes that Fisher Guide did not follow standard delisting guidance in collecting samples from its drying beds in 1981 and 1982. Specifically, as described in the proposed rule, Fisher Guide did not provide descriptions of procedures followed during the collection of drying bed sludge samples in 1981. Without such descriptions, the Agency was unable to assess whether the 1981 samples are representative of the waste contained throughout the drying beds. As also described in the proposed rule, Fisher Guide provided, in 1982, only six composites (one composite for each half of the three drying beds) to characterize the composition of its drying bed sludges. For a waste contained in an on-site waste management unit, the Agency normally requires petitioner's to submit at least four composite samples, one sample representing the waste contained in each quadrant, not one sample representing the waste contained in half of the unit. Nevertheless, even though the 1981 and 1982 samples were collected using procedures different than those recommended for delisting purposes, the Agency chose to use the 1981 and 1982 data to support the denial of Fisher Guide's petition because these samples, to some extent, are representative of a portion of each lagoon or drying bed. For these reasons, the Agency believes that its evaluation of the 1981/1982 samples to support the conclusion that the petitioned wastes contain significant levels of leachable lead and nickel was appropriate. The Agency also wishes to stress that the 1984 drying bed sludge samples (as well as the 1981/1982 samples) failed the VHS model evaluation due to high leachable levels of nickel and lead.

Agency's Use of Standard EP Data. The first commenter also stated that it does not consider standard EP data to be "valid", in lieu of OWEP data, in predicting reasonable worst-case leaching of contaminants. The Agency interprets this comment to mean that the commenter is concerned about the Agency's suggestion that EP data are sufficient to estimate the mobility of constituents from an oily waste.

The Agency wishes to clarify the statement to which the commenter refers. The statement in the preamble to the proposed rule (see 53 FR 50550) reads "* * * the Agency believes that the modeling evaluation for Fisher Guide's petitioned wastes using EP data is valid, because OWEP concentrations are typically higher than EP leachate concentrations". The Agency did not mean to suggest that data obtained using standard EP procedures were sufficient or would form a valid basis for delisting Fisher Guide's waste. Rather,

[1] The VHS model is based upon the premise that the petitioned waste is disposed of in a 40-foot wide, 8-foot deep trench. The orientation of the trench is such that the x-direction is perpendicular to the direction of ground-water flow; the y-direction is parallel to the direction of ground-water flow; and the z-direction is into the underlying aquifer. The VHS model assumes a "fixed" reasonable worst-case value for the dimension of the trench in the y-direction (*i.e.*, 40 feet) and, as the commenter notes, "does not provide credit for trench-widening".

VOL 54 ISS 218 NOV 14 1989 UMI

the Agency recognized in the proposed rule that Fisher Guide should have analyzed its petitioned wastes using the OWEP (because the oil and grease content of its wastes exceeded one percent), but believed that the use of EP data was sufficient to indicate that leachable levels of certain metals were of concern and that, therefore, delisting was inappropriate.

3. Final Agency Decision

For the reasons stated in the proposal, the Agency believes that Fisher Guide's petitioned wastes should not be excluded from hazardous waste control. The Agency, therefore, is denying a final exclusion to Fisher Guide, formerly Fisher Body Division of General Motors Corporation, located in Flint, Michigan, for its electroplating wastewater treatment sludges, classified as F006 wastes, which are contained in the petitioner's lagoons and drying beds. The effect of this rule is that these petitioned wastes must continue to be handled as hazardous wastes in accordance with 40 CFR parts 260 through 268, and parts 270, 271, and 124.

III. Effective Date

This rule is effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended Section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here because this rule does not change the existing requirements for persons generating hazardous wastes. This facility has been obligated to manage these wastes as hazardous during the Agency's review of its petition. This rule, therefore, should be effective immediately for this petitioner. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedure Act, pursuant to 5 U.S.C. § 553(d).

IV. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. The denial of this petition does not impose an economic burden on this facility because prior to submitting and during the review of the petition, this facility should have continued to handle its wastes as hazardous. The denial of this petition means that Fisher Guide must continue managing these wastes as hazardous in a manner in which it has been doing, economically and otherwise. There is no additional economic impact, therefore, due to today's rule. This rule is not a major regulation, therefore no Regulatory Impact Analysis is required.

V. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. §§ 601–612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator or delegated representative may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment does not have a significant adverse economic impact on small entities because its effect will not change the overall costs of EPA's hazardous waste regulations and is limited to one facility. Accordingly, I hereby certify that this regulation will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

VI. Paperwork Reduction Act

Information collection and recordkeeping requirements associated with this final rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Public Law 96–511, 44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2050–0053.

VII. List of Subjects in 40 CFR Part 261

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket No. FEMA–6972]

Changes in Flood Elevation Determinations; Indiana et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Interim rule.

SUMMARY: This rule lists those communities where modification of the base (100-year) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base (100-year) elevations for new buildings and their contents and for second layer insurance on existing buildings and their contents.

DATES: These modified elevations are currently in effect and amend the Flood Insurance Rate Map (FIRM) in effect prior to this determination.

From the date of the second publication of notice of these changes in a prominent local newspaper, any person has ninety (90) days in which he can request through the community that the Adminstrator, reconsider the changes. These modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base (100-year) flood elevation determinations are available for inspection at the office of the Chief Executive Officer of the community, listed in the fifth column of the table. Send comments to that address also.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472 (202) 646–2767.

SUPPLEMENTARY INFORMATION: The numerous changes made in the base (100-year) flood elevations on the FIRM(s) make it administratively infeasible to publish in thisnotice all of the modified base (100-year) flood elevations contained on the map. However, this rule includes the address of the Chief Executive Officer of the community where the modified base (100-year) flood elevation determinations are available for inspection.

Any request for reconsideration must be based on knowledge of changed conditions, or new scientific or technical data.

These modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR part 65.4.

For rating purposes, the revised community number is listed and must be used for all new policies and renewals.

These base (100-year) flood elevations are the basis for the floodplain management measures that the

community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

These elevations, together with the floodplain management measures required by § 60.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time, enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities.

The changes in the base (100-year) flood elevations listed below are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

BILLING CODE 6718-03-M

44 CFR Part 65

Changes in Flood Elevation Determinations; Georgia et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below.

These modified elevations will be used in calculating flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

DATES: The effective dates for these modified base flood elevations are indicated on the following table and amend the Flood Insurance Rate Map(s) (FIRM) in effect for each listed community prior to this date.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the Office of the Chief Executive Officer of each community. The respective addresses are listed on the following table.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of modified flood elevations for each community listed. These modified elevations have been published in newspaper(s) of local circulation and ninety (90) days have elapsed since that publication. The Administrator has resolved any appeals resulting from this notification.

Numerous changes made in the base (100-year) flood elevations on the FIRMs for each community make it administratively infeasible to publish in this notice all of the changes contained on the maps. However, this rule includes the address of the Chief Executive Officer of the community, where the modified base flood elevation determinations are available for inspection.

The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Public Law 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968, (Public Law 90–448), 42 U.S.C. 4001–4128, and 44 CFR part 65.

For rating purposes, the revised community number is shown and must be used for all new policies and renewals.

The modified base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or to remain

qualified for participating in the National Flood Insurance Program.

These modified elevations, together with the floodplain management measures required by § 60.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time, enact stricter requirements on its own, or pursuant to policies

contents and for second layer coverage on existing buildings and their contents.

The changes in the base flood elevations are in accordance with 44 CFR 65.4.

imposes no new requirements or regulations on participating communities.

44 CFR Part 67

Final Flood Elevation Determinations; Arkansas et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below.

These modified elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map [FIRM] showing modified base flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below:

ADDRESSES: See table below:

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472; (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the Federal Register for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR part 67. An opportunity for the community or individuals to appeal the proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for floodplain management in flood-prone areas in accordance with 44 CFR part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been proposed. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Floodplains.

The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and FIRM available at the address cited below for each community.

The modified base flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. Any appeals of the proposed base flood elevations which were received have been resolved by the Agency.

BILLING CODE 6718-03-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 88-330; RM-6210, RM-6304, RM-6472]

Radio Broadcasting Services; Gadsden, Holly Pond, and Attalla, AL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document allots Channel 238A to Holly Pond, Alabama, and Channel 275A to Attalla, Alabama, at the request of American Communications and Marketing, Inc. ("ACMI") and Steven L. Graddick, respectively. The communities of Holly Pond and Attalla receive a first local broadcast service. Coordinates are, for Channel 238A at Holly Pond, 34-09-03 and 86-36-39, and for Channel 275A at Attalla, 34-01-06 and 86-05-30. In addition, this document dismisses the petition for rulemaking filed by Ron Hale for the allotment of Channel 238A to Gadsden, Alabama. See 53 FR 27179, July 19, 1988. With this action, the proceeding is terminated.

DATES: Effective December 21, 1989. The window period for filing applications will open on December 22, 1989, and close on January 22, 1990.

FOR FURTHER INFORMATION CONTACT: Ordee Pearson, (202) 634-6530.

Questions related to the window application filing process should be addressed to the Audio Service Division, FM Branch, Mass Media Bureau, (202) 632-0394.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order in MM Docket No. 88-330, adopted October 12, 1989, and released November 6, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

[MM Docket No. 88-65, RM-6198, 6342, 6343, 6344]

Radio Broadcasting Services; East Hemet, Indio, Rancho California, Sun City, and Temecula, CA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document deletes Channel 225A at East Hemet, California, in response to a petition filed by Claridge Broadcasting Corp., allots Channel 225A to Sun City, California, at the request of G. Dale Cowle, and allots Channel 233A to Temecula, California, at the request of Jim Jarsen. Coordinates used for Channel 225A at Sun City are 33-37-29 and 117-13-48, with a site restriction of 9.6 kilometers (5.8 miles) south of the community to avoid short-spacings to Station KWDJ, Channel 224A, Riverside, California, and Station KODJ, Channel 226B, Los Angeles, California. Coordinates used for Channel 233A at Temecula are 33-29-36 and 117-08-54. In addition, this document denies a petition requesting the substitution of Channel 225B for Channel 224A at Indio, California, and the modification of the license for Station KCMJ-FM accordingly, as requested by Claridge Broadcasting Corp., and denies a petition to allot Channel 225A to Rancho California, California, at the request of Jones and Associates. See 53 FR 5597, February 25, 1988. With this action, the proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Michael Ruger, Mass Media Bureau, (202) 632-6302.

EFFECTIVE DATES: December 21, 1989 the window period for filing applications for Channel 225A at Sun City, California, will open on December 22, 1989 and close on January 22, 1990. The window period for filing applications for Channel 233A at Temecula, California, will open on December 22, 1989, and close on January 22, 1990.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 88-65, adopted October 12, 1989, and released November 6, 1989. 47 CFR Part 73

[MM Docket No. 89-21; RM-6568; RM-6731]

Radio Broadcasting Services; Grove City, Pennsylvania, Hubbard, OH

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Stephen M. Kramer, allots Channel 270A to Hubbard, Ohio, as the community's first local FM service. Channel 270A can be allotted to Hubbard in compliance with the Commission's minimum distance separation requirements with a site restriction of 8.2 kilometers (5.1 miles) southeast to avoid a short-spacing to Station WVCC, Channel 269A, Linesville, Pennsylvania. The coordinates for this allotment are North Latitude 41-06-17 and West Longitude 80-29-58. Canadian concurrence has been received since Hubbard is located within 320 kilometers (200 miles) of the U.S.-Canadian border. This action also denies the request of Gary P. Hummel, Robert A. Hogue and Michael Trofimo to allot Channel 270A to Grove City, Pennsylvania, as the community's second local FM service. With this action, this proceeding is terminated.

DATES: Effective December 21, 1989. The window period for filing applications will open on December 22, 1989, and close on January 22, 1990.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

[MM Docket No. 88-34; RM-6086, RM-6335]

Radio Broadcasting Services; Llano and Kerrville, TX

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 284C2 for Channel 285A at Llano, Texas, and modifies the license of Station KLKM(FM) to specify operation on the higher class adjacent channel, at the request of Maxagrid Broadcasting Corporation, as that community's first wide coverage area FM station. See 53 FR 5286, February 23, 1988. In addition, this action substitutes Channel 232C2 for Channel 232A at Kerrville, Texas, and modifies the license of Station KRVL(FM) to specify operation on the higher class co-channel, at the request of Griffin Broadcasting Corporation, as that community's first wide coverage area FM service. A site restriction of 9.3 kilometers (5.8 miles) north of Llano is required for Channel 284C2. The coordinates are 30-50-01 and 98-41-16. Channel 232C2 can be allotted to Kerrville with a site restriction of 23.2 kilometers (14.4 miles) northwest of the city, at coordinates 30-11-55 and 99-18-19. Concurrence of the Mexican government has been received for the allotments. With this action, this proceeding is terminated.

EFFECTIVE DATE: December 21, 1989.

Radio Broadcasting Services; Refugio, TX

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 291C2 for Channel 292A at Refugio, Texas, and modifies the license of Station KZTX(FM) at Refugio to specify operation on the higher powered frequency, as that community's first wide coverage area FM service, at the request of Sound Leasing, Inc. See 54 FR 8221, February 27, 1989. The channel substitution can be accomplished in compliance with the Commission's minimum separation requirements, at the city reference coordinates, which are 28-18-18 and 97-16-30. The Mexican government has concurred in the channel substitution. With this action, this proceeding is terminated.

BILLING CODE 7035-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

Atlantic Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: NOAA issues this notice to close the fishery for Atlantic bluefin tuna conducted by longline vessels permitted in the Incidental Catch category. Closure of this segment of the fishery is necessary because the annual quota allocated to vessels fishing in the area north of 36°N. latitude has been attained. The intent of this action is to prevent overharvest of the overall U.S. quota established for this fishery.

EFFECTIVE DATE: The closure is effective 0001 hours local time November 15, 1989, through December 31, 1989.

FOR FURTHER INFORMATION CONTACT: Kathi L. Rodrigues, 508-281-9324.

SUPPLEMENTARY INFORMATION: Regulations promulgated under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971-971h) regulating the harvest of Atlantic bluefin tuna by persons and vessels subject to U.S. jurisdiction were published in the **Federal Register** on October 25, 1985 (50 FR 43396).

Section 285.22(f)(1) of 50 CFR part 285 provides for an annual quota of 145 short tons (st) of Atlantic bluefin tuna to be harvested from the Regulatory Area by longline vessels permitted in the Incidental Catch category. The Assistant Administrator for Fisheries, NOAA (Assistant Administrator) is authorized under § 285.20(b)(1) to monitor the catch and landing statistics and, on the basis of these statistics, to project a date when the total catch of Atlantic bluefin tuna will equal any quota under § 285.22. The Assistant Administrator is further authorized under § 285.20(b)(1) to prohibit the fishing for, or retention of, Atlantic bluefin tuna by the category of gear subject to the quotas. On February 19, 1989, the portion of the Incidental Catch category alloted to longline vessels fishing south of 36°N. latitude was closed. The Assistant Administrator has determined, based on the reported catch, that the annual quota of Atlantic bluefin tuna for catch vessels fishing in the area north of 36°00' N. latitude will be attained by the effective date. Fishing for, and retention of, any Atlantic bluefin tuna harvested under § 285.22(f)(1) must cease at 0001 local time on November 15, 1989.

Other Matters

Notice of this action will be mailed to all Atlantic bluefin tuna dealers and owners of vessels permitted in this category. This action is taken under the authority of 50 CFR 285.20, and is taken in compliance with E.O. 12291.

List of Subjects in 50 CFR Part 285

BILLING CODE 3510-22-M

50 CFR Part 652

[Docket No. 90890-9190]

Atlantic Surf Clam and Ocean Quahog Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule, extension of effective date.

SUMMARY: An emergency rule amending regulations implementing the Fishery Management Plan for the Atlantic Surf Clam and Ocean Quahog Fishery is in effect through November 9, 1989. The Secretary of Commerce (Secretary) extends this rule through February 7, 1989. This extension is necessary to continue the closure of a portion of the New England Area known as Georges Bank, defined as the fishing grounds east of 69° W. longitude, to fishing for surf clams. This area is closed for an additional 90 days because of adverse environmental conditions that have resulted in the continued high concentrations of paralytic shellfish poison (PSP) found to be present in surf clams from this area. These adverse environmental conditions preclude the harvest of healthful food products from this affected environment.

EFFECTIVE DATES: The effectiveness of § 652.23(a)(4) is extended through February 7, 1990.

FOR FURTHER INFORMATION CONTACT: John G. Terrill, NMFS, Northeast Region One Blackburn Drive, Gloucester, MA 01930-2298, telephone 508-281-0252.

SUPPLEMENTARY INFORMATION: Under the emergency action authority of section 305(e) of the Magnuson Fishery Conservation and Management Act (Magnuson Act), the Secretary issued an emergency interim rule effective from August 11 through November 9, 1989 (54 FR 33700, August 16, 1989) closing that portion of the New England Area located east of 69° W. longitude to fishing for surf clams. The emergency interim rule stated that an extension of the closure, if warranted, was possible for an additional 90 days. The Mid-Atlantic Fishery Management Council, at its October 1989 meeting, reviewed the conditions warranting, and the effect of, the emergency interim rule and recommended that it be extended for an additional period of time. Therefore, the Secretary extends for 90 days the effective dates of this emergency interim rule under section 305(e)(3)(B) of the Magnuson Act. The reasons for this action, which were discussed in the preamble to the original promulgation of the emergency interim rule, are still valid as determined by recent sampling of surf clams harvested from the affected area. Testing of these samples detected PSP levels of 190 micrograms/100 grams (μg/100g), which exceed the maximum safe level of 80 μg/100g. Ingestion of PSP toxin is known to cause severe illness or death in humans. For this reason, the PSP levels reported indicate a severe adverse environmental condition that warrants the continued closure of the Georges Bank Area. During the extension of this closure, NMFS will continue to monitor PSP levels in surf clams; should safe levels be attained, the closed area will be reopened prior to February 7, 1990, by notice in the **Federal Register**.

The emergency interim rule is exempt from the normal review procedures of Executive Order 12291 as provided in section 8(a)(1) of that Order. This rule was reported to the Office of Management and Budget with an explanation of why following the

procedures of that Order was not possible.

7 CFR Part 985

[FV-89-107 PR]

Spearmint Oil Produced in the Far West; Salable Quantities and Allotment Percentages for the 1990-91 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would establish the quantity of spearmint oil produced in the Far West, by class, that may be purchased from or handled for producers by handlers during the 1990-91 marketing year, which begins on June 1, 1990. This action is taken under the marketing order for spearmint oil produced in the Far West in order to avoid extreme fluctuations in supplies and prices and thus help to maintain stability in the spearmint oil market. This action was unanimously recommended by the Spearmint Oil Administrative Committee (Committee), which is responsible for local administration of the order.

DATES: Comments must be received by December 14, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, room 2525, South Building, P.O. Box 96456, Washington, DC 20090-6456. Comments should reference the docket number and the date and page number of this issue of the Federal Register and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Jacquelyn R. Schlatter, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, room 2525-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5120.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Agreement and Order No. 985, as amended (7 CFR part 985), regulating the handling of spearmint oil produced in the Far West. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

The Far West spearmint oil industry is characterized by primarily small producers whose farming operations generally involve more than one commodity and whose income from farming operations is not exclusively dependent on the production of spearmint oil. The production of spearmint oil is concentrated in the Far West, primarily Washington, Idaho, and Oregon (part of the area covered under the marketing order). Spearmint oil is also produced in the Midwest. The production area covered by the marketing order normally accounts for more than 75 percent of U.S. production of spearmint oil annually.

The Committee reports that there are approximately 9 handlers and 253 producers of spearmint oil under the marketing order for spearmint oil produced in the Far West. Of the 253 producers, 180 producers hold "Class 1" (Scotch) oil allotment base, and 136 producers hold "Class 3" (Native) oil allotment base. As of June 1, 1989, producers' allotment bases ranged from 667 to 181,902 pounds for Scotch oil and from 290 to 124,346 pounds for Native oil. The average total allotment base held is 10,413 pounds and 13,539 pounds for Scotch and Native oils, respectively.

Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.1) as those having average gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose average gross annual receipts are less than $3,500,000. The majority of Far West spearmint oil producers and handlers may be classified as small entities.

This proposed rule would establish salable quantities of 678,800 pounds and 806,498 pounds, respectively, for Scotch and Native spearmint oils produced in the Far West and allotment percentages of 40 percent and 43 percent, respectively, for Scotch and Native spearmint oils produced in the Far West. This action would limit the amount of spearmint oil that may be purchased from or handled for producers by handlers, during the 1990-91 marketing year, which begins on June 1, 1990. Such salable quantities and allotment percentages have been placed into effect each season since the order's inception in 1980. The amounts recommended for sale are based on average sales levels over the past nine years and are not expected to cause a shortage of spearmint oil supplies. Any unanticipated or additional market needs which may develop for Native spearmint oil can be more than satisfied by an increase in the salable quantities which producers can fill with current reserve stocks. For Scotch oil, current reserve stocks are depleted. However, both Scotch and Native spearmint oil producers who produce more than their annual allotments during the 1990-91 season may transfer such excess spearmint oil to a producer with a deficiency in spearmint oil production, or such excess spearmint oil may be placed into reserve stocks.

This proposed regulation, if adopted, would be similar to those which have been issued in prior seasons. Costs to producers and handlers resulting from this proposed action are expected to be offset by the benefits derived from improved returns.

The salable quantities and allotment percentages were unanimously recommended by the Committee at its September 20, 1989, meeting.

The proposed salable quantity and allotment percentage for each class of spearmint oil for the 1990-91 marketing year, which begins on June 1, 1990, is based upon recommendations of the Committee and the following data and estimates:

(1) "Class 1" (Scotch) Spearmint Oil.

(A) Estimated carryin on June 1, 1990—94,745 pounds.

(B) Estimated trade demand (domestic and export) for the 1990-91 marketing year, based on an average of producer sales for the past nine marketing years, beginning with the 1979-80 marketing year through the 1987-88 marketing year—769,708 pounds.

(C) Recommended desirable carryout on May 31, 1991—0 pounds.

(D) Salable quantity required from 1990 regulated production—674,963 pounds.

(E) Total allotment bases for Scotch oil—1,697,000 pounds.

(F) Computed allotment percentage—39.8 percent.

(G) Recommended allotment percentage—40 percent.

(H) The Committee's recommended salable quantity—678,800 pounds.

(2) "Class 3" (Native) Spearmint Oil.

(A) Estimated carryin on June 1, 1990—0 pounds.

(B) Estimated trade demand (domestic and export) for the 1990-91 marketing year, based on an average of producer sales for the past nine marketing years, beginning with the 1979-80 marketing year through the 1987-88 marketing year—867,882 pounds.

(C) Recommended desirable carryout on May 31, 1991—0 pounds.

(D) Salable quantity required from 1990 regulated production—867,882 pounds.

(E) Total allotment bases for Native oil—1,875,577 pounds.

(F) Computed allotment percentage—46.3 percent.

(G) Recommended allotment percentage—43 percent.*

*Over the past nine years, there have been five years during which annual sales have been below average and available data indicates that decreased sales for Far West Native spearmint oil would be likely for the 1990-91 marketing year. The amount below average has ranged from 10,974 pounds in 1984 to 150,630 pounds in 1982. The average is 84,451 pounds. Therefore the Committee reduced the computed percentage of 46.3 percent by 3.3 percent (which represents 61,894 pounds of oil) to allow for the possibility of a below average year in 1990-91. This results in a recommended allotment percentage of 43 percent and a salable quantity of 806,498 for Native spearmint oil.

(H) The Committee's recommended salable quantity—806,498 pounds.

The salable quantity is the total quantity of each class of oil which handlers may purchase from or handle on behalf of producers during a marketing year. Each producer is allotted a share of the salable quantity by applying the allotment percentage to the producer's allotment base for the applicable class of spearmint oil.

The establishment of these salable quantities and allotment percentages would allow for anticipated market needs based on historical sales and provides spearmint oil producers with information on the amount of oil which should be produced for next season.

Based on available information, the Administrator of the AMS has determined that the issuance of this proposed rule would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 7 CFR Part 985

Far West, Marketing agreements and orders, and Spearmint oil.

For the reasons set forth in the preamble, 7 CFR part 985 is proposed to be amended as follows:

PART 985—SPEARMINT OIL PRODUCED IN THE FAR WEST

1. The authority citation for 7 CFR part 985 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. A new § 985.210 under subpart—Salable Quantities and Allotment Percentages is added to read as follows:

Subpart—Salable Quantities and Allotment Percentages

§ 985.210 Salable quantities and allotment percentages—1990-91 marketing year.

The salable quantity and allotment percent for each class of spearmint oil during the marketing year which begins on June 1, 1990, shall be as follows:

(a) "Class 1" (Scotch) oil—a salable quantity of 678,800 pounds and an allotment percentage of 40 percent.

(b) "Class 3" (Native) oil—a salable quantity of 806,498 pounds and an allotment percentage of 43 percent.

Dated: November 7, 1989.

William J. Doyle,
Acting Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

7 CFR Part 989

[Docket No. FV-89-097PR]

Raisins Produced From Grapes Grown in CA; Defining "Unstemmed" and "Stemmed" Raisins for the Purpose of Determining Whether Off-Grade Raisins May Be Returned to Producers

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule invites comments on revising the administrative rules and regulations established under the federal marketing order regulating raisins produced in California. This action would define the terms "unstemmed" and "stemmed" raisins for the purpose of determining whether or not individual lots of off-grade raisins received by raisin handlers may be returned to producers. This action was unanimously recommended by the Raisin Administrative Committee (Committee), which is responsible for local administration of the marketing order.

DATE: Comments must be received by December 14, 1989.

ADDRESS: Interested persons are invited to submit written comments concerning this proposed rule. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, room 2525-S, P.O. Box 96456, Washington, DC 20090-6456. Comments should reference the docket number and the date and page number of this issue of the Federal Register and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Maureen T. Pello, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, room 2525-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 382-1754.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under marketing agreement and Order No. 989 (7 CFR part 989), both as amended, regulating the handling of raisins produced from grapes grown in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation No. 1512-1 and

VOL 54 ISS 218 NO 14 1989 UMI

has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 23 handlers of raisins who are subject to regulation under the raisin marketing order and approximately 5,000 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having average gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose average gross annual receipts are less than $3,500,000. A majority of producers and a minority of handlers of California raisins may be classified as small entities.

Section 989.24(b) of the order defines off-grade raisins to mean raisins which do not meet the incoming minimum grade and condition standards for natural condition raisins. Pursuant to § 989.58(e)(1) of the order, when incoming natural condition raisins are certified as off-grade, they may be: (1) Received by the raisin handler for disposal in eligible non-normal outlets; (2) received by the handler for reconditioning; or (3) returned unstemmed to the raisin producer.

Off-grade raisins which are disposed of in eligible non-normal outlets may be used in livestock feed or distillation. Producers receive a lower price for such raisins since the raisins may not be sold in normal market channels.

Off-grade raisins which are reconditioned by raisin handlers to meet incoming standards have the added cost of the reconditioning process. Thus, producers receive a lower price for such raisins than if the raisins had initially passed the incoming standards.

Finally, off-grade raisins which are received by the handler may also be returned unstemmed to the raisin producer and the return of such raisins must comply with the requirements specified in § 989.158(c)(7) of the regulations. Unstemmed raisins may not be sold in normal market outlets since they have not had their stems removed. If off-grade raisins were returned to producers stemmed, the raisins would resemble processed raisins and such raisins migh be sold in normal market channels. This would be very undesirable since these raisins would still fail to meet the minimum standards. Therefore, only unstemmed off-grade raisins may be returned to producers. Producers may then recondition the raisins on their own premises or take the raisins to a packer or dehydrator for reconditioning. If the raisins were successfully reconditioned to meet the minimum standards, producers would then be able to receive a more competitive price for such reconditioned raisins.

In past season, the term "unstemmed" has described raisins which have not had their large stems removed in the reconditioning process. Large stems are the branch or main stem of a grape bunch. Thus, only off-grade raisins with large stems intact may currently be returned to producers. Over the years, however, the process of stemming raisins has changed and now refers to running the raisins through equipment which removes not only the raisins' large stems but smaller capstems as well. Capstems are the small woody stems exceeding one-eighth inch in length which attach the raisins to the branches of the bunch. Therefore, the Committee has recommended that "unstemmed" and "stemmed" be clearly defined in the rules and regulations of the order for the purpose of determining which lots of off-grade raisins received by raisin handlers may be returned to producers. Accordingly, the Committee has recommended that "unstemmed" raisins should mean lots of raisins which contain more than 150 capstems per pound. "Stemmed" raisins should mean lots of raisins that contain less than 150 capstems per pound.

The Committee considers it necessary to establish this tolerance level for the number of capstem remaining on stemmed raisins to help distinguished stemmed raisins that may still be off-grade from raisins that have been fully processed. This action would help ensure that off-grade stemmed raisins do not enter normal market channels. Raisins that have been stemmed may still not meet the minimum standards for natural condition raisins. These off-grade stemmed raisins are almost indistinguishable from fully processed raisins, which have had even more capstems removed through processing. The tolerance level for the number of capstems per pound for U.S. Department of Agriculture (USDA) Grade C raisins, the lowest USDA grade of processed raisins, is 35 (7 CFR 52.1846). The Committee has determined that a tolerance level of 150 capstems per pound for stemmed raisins would be sufficient to distinguish such stemmed raisins from fully processed raisins. Off-grade raisins with less than 150 capstems may not be returned to producers. Instead, these raisins must be reconditioned by the handler or disposed of in eligible non-normal outlets, pursuant to § 989.58(e)(1).

Based on the above information, the Administrator of the AMS has determined that issuance of this proposed rule would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 7 CFR Part 989

California, Grapes, Marketing agreements and orders, Raisins.

For the reasons set forth in the preamble, 7 CFR part 989 is proposed to be amended as follows:

PART 989—RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR part 989 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended, 7 U.S.C. 601–674.

Subpart—Administrative Rules and Regulations

2. Section 989.158 is amended by adding paragraph (c)(7)(i) to read as follows:

§ 989.158 Natural condition raisins.

* * * * *

(c) * * *

(7) *Return of off-grade raisins to tenderer.*

* * * * *

(i) *Unstemmed and stemmed raisins.* For the purpose of determining whether or not off-grade raisins may be returned to the person tendering such raisins, "unstemmed" raisins shall be defined as lots of raisins which contain more than 150 capstems per pound. "Stemmed" raisins means lots of raisins that contain less than 150 capstems per pound.

Transshipment and Transportation of Tuna Caught Outside the Exclusive Economic Zone

AGENCY: U.S. Customs Service, Treasury.

ACTION: Proposed interpretative rule; extension of time for comments.

SUMMARY: On August 31, 1989, the Customs Service published a proposed interpretative rule in the **Federal Register** (54 FR 36038), wherein certain parties were seeking reconsideration of interpretations relating to the transshipment and transportation of tuna.

Requests have been received for an extension of the comment period in order to allow interested parties additional time in which to review and present their respective comments on the complex issues raised by the proposed interpretative rule dealing with the transshipment and transportation of tuna. In view of the public interest generated, Customs is extending the comment period for 30 days.

DATE: Comments must be received on or before December 14, 1989.

ADDRESS: Written comments (preferably in triplicate) should be submitted to and may be inspected at the Regulations and Disclosure Law Branch, Room 2119, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

BILLING CODE 4820-02-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6973]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed Rule.

SUMMARY: Technical information or comments are solicited on the proposed modified base (100-year) flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

DATES: The period for comment will be ninety (90) days following the second publication of the proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of modified base (100-year) flood elevations for selected locations in the nation, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the floodplain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed modified flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations proscribe how high to build in the floodplain and do not prescribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; or itself it has no economic impact.

BILLING CODE 6718-03-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89-477, RM-6962]

Radio broadcasting Services; Arkansas City, KS

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by John C. McVey, proposing the allotment of FM Channel 300A to Arkansas City, Kansas, as that community's second FM broadcast service. The coordinates for Channel 300A are 37-03-30 and 97-02-12.

DATES: Comments must be filed on or before December 26, 1989, and reply comments on or before January 10, 1990.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comment with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: John C. McVey, Rural Route 5, Box 206, Arkansas City, Kansas 67005.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's notice of proposed rule making, MM Docket No. 89-477, adopted October 11, 1989, and released November 3, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC. 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts. For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

Feed Grain Donations for the Rosebud Sioux Tribe Indian reservation in South Dakota

Pursuant to the authority set forth in section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427) and Executive Order 11336, I have determined that:

1. The chronic economic distress of the needy members of the Rosebud Sioux Tribe Reservation in South Dakota has been materially increased and become acute because of severe and prolonged drought, thereby creating a serious shortage of feed and causing increased economic distress. This reservation is designated for Indian use and is utilized by members of the Rosebud Sioux Tribe for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation (CCC) for livestock feed for such needy members of the Tribe will not displace or interfere with normal maketing of agricultural commodities.

3. Based on the above determinations, I hereby declare the reservation and grazing lands of the Tribe to be acute distress areas and authorize the donation of feed grain owned by the CCC to livestock owners who are determined by the Bureau of Indian Affairs, Department of the Interior, to be needy members of the Tribe utilizing such lands. These donations by the CCC may commence upon November 1, 1989, and shall be made available through May 14, 1990, or such other date as may be stated in a notice issued by the USDA.

Signed at Washington, DC, on November 6, 1989.

John A. Stevenson,

Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc. 89-26676 Filed 11-13-89; 8:45 am]

BILLING CODE 3410-05-M

Commodity Credit Corporation

Quality Adjustments to the 1990 and Subsequent Crop Loan and Purchase Rates

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Request for public comment.

SUMMARY: Public comment is requested regarding adjustments to price support loan and purchase rates for the 1990 and subsequent crops of wheat, rye, barley, corn, oats, sorghum, and soybeans. Section 3 of the United States Grain Standards Act Amendments requires the Secretary of Agriculture to conduct a study of the schedules of premiums and discounts applied to loans in order to determine how such adjustments can encourge the production, marketing, and exporting of high quality, clean grain. A finding of that study was that increased public input would be appropriate to full address this issue. Accordingly, this request for public comment is being made in addition to requests contained within individual commodity proposed determinations for the 1990-crop programs.

Section 403 of the Agricultural Act of 1949 provides that loan adjustments, insofar as practicable, shall be made so that the average support rate for such commodity will, on the basis of the anticipated incidence of adjustments, be equal to the determined level of support.

DATES: Comments must be received on or before January 16, 1990 in order to be assured of consideration.

ADDRESS: Bruce R. Weber, Director, Commodity Analysis Division, USDA–ASCS, Room 3741, South Building, P.O. Box 2515, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Gene S. Rosera, Agricultural Economist, Commodity Analysis Division, USDA–ASCS, Room 3740, South Building, P.O. Box 2415, Washington, DC 20013 or call (202) 447-7923.

SUPPLEMENTARY INFORMATION: The titles and numbers of the federal assistance programs, as found in the Catalogue of Federal Domestic Assistance, to which this notice applies are:

Titles	Numbers
Commodity Loans and purchases	10.051
Feed Grains Production Stabilization	10.055
Wheat production Stabilization	10.056
Grain Reserve	10.057

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of these determinations. It has been determined that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This program is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 34, 1983).

General

Public comment is requested regarding the adjustment of price support loan and purchase levels, and CCC policies and procedures which may result in achieving high-quality grain production and the marketing of such production. Currently, price support rate adjustments for various quality factors are established to reflect national average market adjustments for the coming market year. The resulting adjustments may not correspond to actual market adjustments at the time the price support loans are dispensed or settled because (1) adjustments are set in advance of the crop and do not reflect shorter-term market changes, and (2) adjustments are provided on a national average basis and, therefore, may not reflect local market values.

The establishment of annual, national-average adjustments is administratively less burdensome than providing weekly or monthly regional market adjustments and serves the goal of providing uniform benefits to program participants. The disadvantage of this approach is that inconsistencies with actual market adjustments for quality may occur which result in marketing distortions.

Comments are invited regarding all specific price support rate premium and discount adjustments, the need for establishing such adjustments more frequently than annually, and the need for local market rather than national-average adjustments.

Respondents to this request for comments are asked to provide any supporting market information or research data.

Price Support Loan and Purchase Adjustment Policies and Levels

a. *Frequency of Rate Adjustments:* Loan and purchase rate adjustments for grade and other quality factors are currently established prior to a crop marketing year and remain fixed for the entire year. Fixed annual adjustments provide for more equitable program benefits and ease of program administration but they may not reflect changes in market prices.

Comments are requested regarding whether the CCC should establish loan and purchase rate adjustments more frequently than annually and if so, how frequently and for which quality factors.

b. *National/Regional Factor Adjustments:* CCC has traditionally announced loan and purchase rate adjustments on a national-average basis although market values of quality factors may vary regionally. Comments are requested as to whether CCC should establish loan and purchase rate adjustments for separate regional (State or multi-State) market areas or continue with national-level adjustments, and, if so, for which quality factors.

c. *Price Support-Level vs Market-Level Adjustments:* CCC currently adjusts price support rates by the entire amount of a market adjustment. This may not accurately reflect market conditions if the market price level to which adjustements for quality apply vary significantly from the price support rate for the commodity. Comments are requested as to whether quality adjustments to a loan and purchase rate should be applied in a proportional manner or, as currently, whether the absolute value of a market adjustment for quality should be used.

d. *Weed Control Discounts:* CCC currently provides fixed weed control discounts to assure that producers comply with weed control requirements of local jurisdictions. Comments are requested as to whether such discounts should (1) continue to be established at fixed levels, and if so, what levels would be appropriate; (2) be set on a cast-by-case basis; or (3) be discarded since weed content is separately discounted through the application of grade or other factor discounts.

e. *Deduct Foreign Material and Dockager from Loan Quantity:* Comments are invited as to whether loans should be provided on a net-weight basis, that is, on the quantity from which the weight of foreign material and dockage has been subtracted. CCC currently calculates grain price support rates based on the total gross commodity weight which includes the weight to any foreign material and dockage which may be present. Soybean price support proceeds are currently adjusted for foreign material exceeding 1 percent which is the foreign material limit for U.S. Grade 1. Since the foreign material or dockage of some grains may have feed value, comments are specifically requested as to what value, if any, should be assigned to foreign material or dockage which is in the grain pledges as collateral for a price support loan or acquired by CCC pursuant to a price support purchase agreement.

Comments are also invited regarding the current schedules of discounts for foreign material contained in grain.

f. *Moisture Discounts:* Comments, and supporting data, are invited as to whether grain moisture discounts should be assessed based on moisture content as a percentage of weight. Currently, moisture discounts are assessed based on the percentage moisture per unit of volume. For example, 1989-crop hard red spring wheat is discounted 4 cents per bushel for 14.1 percent mosture regardless of test weight. The 4 cent discount could result from 8.2 pounds of moisture in wheat of test weight 58 pounds or 7.1 pounds of moisture in wheat of test weight of 50 pounds. Although moisture discounts based on volume seem somewhat inequitable, their common commercial use may support their continuation.

Comments are further requested regarding the maximum permitted levels of moisture for program crops to be eligible for price support loans. The maximum moisture percentage levels for 1989-crop warehouse price-support loans are 13.5 for wheat, 15.5 for corn, 14.0 percent for sorghum, oats, soybeans, and rye, and 14.5 for barley. These levels are also applied to farm-stored loan settlements.

Comments and supporting data are invited regarding (1) appropriate moisture discounts for moisture levels, and (2) moisture discounts by wheat class for moisture in excess of 13.5 percent.

g. *Special Grade Discounts:* Current grading standards provide that inspected commodities may be designated as blighted, garlicky, ergoty, smutty, light smutty, infested, and treated if minimum tolerances are reached. For these special grades, CCC currently provides fixed discounts. Since the amount of damage may vary within these special grades, a fixed discount does not seem appropriate.

Comments are requested with respect to whether fixed or variable discounts are appropriate for these special grade conditions or whether such special grade designations should be discounted as if sample grade.

h. *Wheat Protein Adustments:* CCC price support rate adjustments for wheat protein can vary considerably with actual market values for protein due to the variable production of protein from crop to crop.

Comments are requested regarding wheat protein premiums for the 1990 and subseqent wheat crops and whether any such premiums should be applied to U.S. grades No. 1 and 2 only. For the 1989 wheat crop, protein premiums apply to only U.S. Grade No. 3 and better. Comments are specifically requested as to whether (1) CCC should eliminate protein premiums entirely due to the variation in value of protein, or (2) CCC should implement premiums based on current, local market protein premiums. The following schedule of premiums was applicable to the 1989 crop of wheat:

	Percent protein	Cents/bu
1. For Hard Red Winter Wheat:	0.0–10.9	0.0
	11.0–11.9	2.0
	12.0 & more	5.0
2. For Hard Red Spring Wheat:	0.0–11.9	0.0
	12.0–13.9	2.0
	14.0 & more	5.0

i. *Class Price Support Rates:* Comments are requested regarding the establishment of price support rates for different classes of wheat, corn, barley, sorghum, and soybeans and whether such class rates would be in addition to, or in place of, any existing adjustments.

With respect to barley, comments are requested as to whether class rates should be based on defined classes or on the class and subclass groupings to which Federal Grain Inspection Service standards apply.

With respect to wheat, comments are requested as to whether protein premiums should be continued if rates were established for separate wheat

VOL 54 ISS 218 NO 14 1989 UMI

classes, and if so, the appropriate levels of such protein premiums.

Also, comments are specifically requested as to appropriate class premiums and discounts for different grades of Hard Amber, Amber, and Durum wheats.

j. *Sample Grade Discounts:* Comments are requested regarding discounting sample grade commodities which have been delivered to CCC under the price-support programs. The 1989 crops are discounted by 30 percent of their respective rates in addition to the discounts for the factors which caused the commodity to be graded as sample grade.

k. *Premiums and Discounts for Loan Eligible Grades:* Comments are requested regarding grade premiums and discounts for all grades of commodities and whether loan discounts should be expanded to more grades or restricted to fewer grades than are currently applicable to program crops. For example, CCC has received comments that lower grades of wheat, which are marketed as feed wheat in some localities, should not be eligible for price support loans or, alternatively, that such wheat should be heavily discounted, perhaps to its value as feed. For the 1989 programs, grade premiums and discounts are applied to the following grades for program crops:

	Wheat	Corn	Sorghum	Barley	Oats	Soybeans	Rye
Grades eligible to receive price support	1-5	1-3	1-4	1-5	1-3	1-4	1-2
Premium applied	1	1			1-2		1
Discount applied	3-5	3-5		3-5			

l. *Test Weight Discounts:* Comments are requested regarding the levels of test weight discounts and the appropriateness of the threshold weight levels used for applying test-weight discounts. For the 1989 price-support programs, the following test weights (pounds per bushel) are the levels at which discount schedules are imposed: Hard Red Spring wheat, 49.9; other wheat classes, 50.9; corn, 53.5; sorghum, 54.5; barley, 35.5; oats, 35.5; soybeans, 53.5; and rye, 53.9.

m. *Other Adjustment Factors:* Comments are requested on the need for establishing loan and purchase rate adjustments for any intrinsic quality factor not specifically mentioned in this request for comment. For example, adjustments for shatterability of corn, or protein in soybeans, are currently not provided. Such adjustments could be adopted if (1) factors can be accurately and consistently measured, (2) consensus market valuations of such factors exist, and (3) market distortions are reduced.

n. *Reserve Quality Adjustments:* Comments are requested regarding appropriate settlement adjustments to farmer-owned reserve loan rates and storage rates to assume the maintenance of quality of such commodities.

Authority: 7 U.S.C. 1421 and 1423 and 15 U.S.C. 714b and 714c.

Signed at Washington, DC, on November 17, 1988.

John A. Stevenson,
Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

Forest Service

Resource Management and Development Plan, Mt. Magazine State Park

AGENCY: Forest Service, USDA, and Arkansas Department of Parks and Tourism.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service and the Arkansas Department of Parks and Tourism will jointly prepare an environmental impact statement for a proposal to permit the development and management of a State Park on Mt. Magazine, Magazine Ranger District, Ozark-St. Francis National Forests, Logan County, Arkansas. The purpose of this environmental analysis is to prepare a site specific plan to development and management of the top of Mt. Magazine.

The agencies invite written comments and suggestions on the scope of the analysis. In addition, the agencies give notice of the full environmental analysis and decision-making process that will occur on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATE: Comments concerning the scope of the analysis must be received by December 29, 1989.

ADDRESSES: Submit written comments and suggestions concerning the scope of analysis to Richard W. Davies, Director, Arkansas State Parks, One Capitol Mall, Little Rock, Arkansas 72201.

FOR FURTHER INFORMATION CONTACT: Direct questions about the proposed action and environmental impact statement (EIS) to either Bill Paxton, Resource Management Specialist, Arkansas State Parks, One Capitol Mall, Little Rock, Arkansas 72201, telephone (501) 682-1633, or Rob Kopack, Recreation Officer, Magazine Ranger District, P.O. Box 511, Paris, Arkansas 72855, telephone (501) 963-3076.

SUPPLEMENTARY INFORMATION: The Mt. Magazine Recreation Development Level Final Environmental Statement was completed by the Forest Service in April 1980. The development level direction in this plan included campground facilities, picnic grounds, trails, lodge, visitor information center, restaurant, and other facilities.

The Ozark-St. Francis National Forest Land and Resource Management Plan was completed in July 1986.

The management direction in the plan provided for State Park development on Mt. Magazine. The Forest Service issued a Special Use Permit, in April 1989, to Arkansas Department of Parks and Tourism to authorize the use of 2,200 acres for development of a state park on top of Magazine Mountain. The development of the State Park is subject to the approval of site specific development and management plans by the Forest Service.

In preparing the EIS, the Forest Service and Arkansas Department of Parks and Tourism will identify and consider a range of alternatives including a non-development alternative, other development alternatives, various design capacities, and various design criteria. These alternatives will analyze various management designs and policies on the unique resources and recreational use of the mountain.

Lynn C. Neff, Forest Supervisor, Ozark-St. Francis National Forests, Russellville, Arkansas is the responsible federal official.

Public participation will be important at several points during the analysis.

The first point is the scoping process. (40 CFR 1501.7). The Forest Service and Arkansas Department of Parks and Tourism will be seeking information, comments, and assistance from Federal, State, and local agencies and individuals and organizations who may be interested or affected by the proposed action. This input will be used to prepare the draft environmental impact statement. The scoping process includes:

1. Identifying potential issues.
2. Identifying issues to be analyzed in depth.
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed alternatives (i.e., direct, indirect, cumulative effects).
6. Determining potential cooperating agencies and task assignments.

The Fish and Wildlife Service, Department of Interior, will be invited to participate as a cooperating agency to evaluate impacts on the habitats of Federally listed threatened and endangered species and species which are currently categorized in the Fish and Wildlife Service categories 1 and 2 that may exist within or near the affected area.

The Arkansas Natural Heritage Commission and the Arkansas Game and Fish Commission will be invited to participate as cooperating agencies to provide assessments of impact for species of concern to the state that may exist within or near the affected area.

The Arkansas Historic Preservation Program will also be invited to participate as a cooperating agency in the analysis.

Public comments have been, and will continue to be, solicited in a variety of ways including request for written comments, information mailings, public notices, and public meetings.

The Forest Supervisor and Director of State Parks will hold scoping meetings in Little Rock and Paris, Arkansas. A public meeting will be held in Little Rock, Arkansas at Arkansas Game and Fish Commission auditorium, No. 2 Natural Resources Drive on December 5, 1989 at 6:30 p.m. A meeting will be held at Paris, Arkansas at Paris High School auditorium, 604 N. 10th Street on December 12, 1989 at 6:30 p.m.

The draft environmental impact statement is expected to be filed with the Environmental Protection Agency (EPA) and be available for public review by February 1991. At that time EPA will publish a notice of availability of the draft EIA in the **Federal Register**. The comment period for this draft EIS will be 45 days from the date the EPA's Notice of Availability appears in the **Federal Register**. It is very important that those interested in this proposal participate at this time. To be most helpful, comments on the draft EIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of draft EIS's must structure their participation on the environmental review of this proposal so that it is meaningful and alerts the agency to the reviewer' positions and contentions, *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 533, 1978, and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final EIS, *Wisconsin Heritage, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338, (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service and Arkansas State Parks and Tourism at a time when they can meaningfully consider them and respond to them in the final EIS. After the comment period ends on the draft EIS, the comments will be analyzed and considered in preparing the final EIS, scheduled to be completed by June 1991. In the final EIS, the agencies are required to respond to the comments received (40 CFR 1503.4).

The responsible officials will consider the comments, responses, and environmental consequences discussed in the EIS and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible officials will document the decision and reasons for the decision in the Record of Decision.

The Forest Supervisor's decision will be subject to appeal under 36 CFR part 217.

Dated: November 1, 1989.

Lynn C. Neff,
Forest Supervisor.

[FR Doc. 89-26632 Filed 11-13-89; 8:45 am]
BILLING CODE 3410-11-M

Loon Mountain Ski Area Expansion; White Mountain National Forest, Grafton County, New Hampshire

AGENCY: Forest Service, USDA.

ACTION: Notice of availability of the Supplement to the Draft EIS.

SUMMARY: The Forest Service has prepared a Supplement to the Draft EIS (EPA No. 890025) for Loon Mountain Recreation Corporation's proposed expansion of their special use permit on the Pemigewassett Ranger District, White Mountain National Forest, Grafton County, New Hampshire. This Supplement is in response to comments received on the Draft Environmental Impact Statement (EIS), which was issued February 10, 1989 (54 FR 6448).

DATE: The Supplement is available for public comment. There is a 45-day comment period. Written comments must be received by December 29, 1989.

ADDRESS: Submit written comments to Michael B. Hathaway, Forest Supervisor, White Mountain National Forest, Laconia, New Hampshire 03247.

Review of Comments To Draft EIS: The public may inspect comments received on this proposed ski area expansion in the Forest Supervisor's Office in Laconia, NH, weekdays between the hours of 8:30 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Dain Maddox, EIS Coordinator, White Mountain National Forest, P.O. Box 638, Laconia, NH 03247, phone (414) 291-3305.

SUPPLEMENTARY INFORMATION: The Draft EIS was issued February 10, 1989 (FR 54, page 6448). The Supplement to the Draft EIS was prepared in response to agency end public comments concerning the following: the agreement between Loon Mountain Recreation Corporation and the Town of Lincoln regarding water withdrawals from Loon Pond; the status of Lincoln's sewage treatment facilities; "emergency pumping" from the East Branch of the Pemigewasset River into Loon Pond and Loon Pond Reservoir; potential impacts from increased traffic; and additional mitigation information.

Our objective in issuing this Supplement is to inform the public about these events and give them an opportunity to make additional comments in response to this information. These comments, together with comments previously submitted in response to the Draft EIS, will be assessed and considered in the Final EIS.

The Draft EIS included three alternatives (No Action, Limited Development and Proposed Action) and 17 possible mitigation measures. Other alternatives and mitigation measures may be considered as a result of this Supplement.

Two public meetings are scheduled during the 45-day comment period:

VOL 54 ISS 218 NO 14 1989 UMI

December 6, 1989, 7–10 pm
New Hampshire Fish and Game Building
Hazen Drive
Concord, NH

December 7, 1989, 7–10 pm
Linwood School
Lincoln, NH

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of supplement to the draft environmental impact statement must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage or supplement to the draft, but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the supplement to the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the supplement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.)

The Final EIS is scheduled to be completed by April 1990. The responsible official will consider the comments, responses, environmental consequences discussed in the EIS, and applicable laws, regulations, and policies in making a decision regarding their proposal. The responsible official will document the decisions and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR part 217.

Dated: November 2, 1989.
Michael B. Hatheway,
Forest Supervisor.

The Winding Stair Tourism and Recreation Advisory Council

AGENCY: Forest Service, USDA.
ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of the first meeting of The Winding Stair Tourism and Recreation Advisory Council. The meeting will be open to the public. This notice also describes the functions of the Council. Notice of this meeting is required under the National Advisory Committee Act.

DATE: December 4, 1989, 7 p.m.

ADDRESS: The meeting location is Bob Lee Kidd Civic Center, Highway 271 North, Poteau, Oklahoma. Send written statements to Forest Supervisor, Ouachita National Forest, P.O. Box 1270, Hot Springs, AR 71902.

FOR FURTHER INFORMATION CONTACT: Robert LaVal, (501) 321–5317.

SUPPLEMENTARY INFORMATION: The Winding Stair Tourism and Recreation Advisory Council was created by the Winding Stair Mountain National Recreation and Wilderness Area Act (16 U.S.C. 460vv–13). The Council, comprised of 16 members, appointed by the Secretary of Agriculture, will meet periodically. The purpose of this Council is advisory in nature. The Act designates the Secretary to appoint a special advisory group from the local area in which the Ouachita National Forest is located to assist in the preparation of the tourism and recreation section of the Ouachita National Forest Land and Resource Management Plan amendment as required under subsections 15 (b) and (c). Subsection 15(b) provides for the promotion of tourism and recreation in ways consistent with the purposes for which the wilderness areas, the botanical areas, the National Recreation Area, the National Scenic and Wildlife Area, and the National Scenic Area are designated.

Glen Sullivan, Director of the Oklahoma Tourism and Recreation Department, will chair the meeting. Representatives of the Forest Service will attend from the Department of Agriculture including the designated officer of the Federal Government, District Ranger Ivan S. Cupp. The agenda for this meeting will be to: elect officers, discuss the duties of the Council, plan the future meeting schedule, and carry out the business of the Council.

Dated: November 1, 1989.
John M. Curran,
Forest Supervisor.

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Automated Manufacturing Equipment Technical Advisory Committee; Notice of Partially Closed Meeting

A meeting of the Automated Manufacturing Equipment Technical Advisory Committee will be held December 13, 1989, 9:30 a.m., in the Herbert C. Hoover Building, Room 1617F, 14th Street and Constitution Avenue NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions that affect the level of export controls applicable to automated manufacturing equipment and related technology.

Agenda

General Session

1. Opening remarks by the Chairman.
2. Presentation of papers or comments by the public.
3. Joint Factory Communications and Computer Subcommittee Report.
4. CCL item review and meeting schedule.
5. COCOM progress report.
6. Certification and foreign availability review.
7. Discussion of ECCN 1091A (Numercial control equipment).
8. Discussion of ECCN 1532A (Measuring equipment, precision linear/angular).
9. New business.

Executive Sesson

10. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent that time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. However, to facilitate distribution of public presentation materials to the Committee members, the Committee suggests that presenters forward the public presentation materials two weeks prior to the meeting date to the following address: Lee Ann Carpenter, Technical Support Staff, OTPA/BXA, Room 4069A, U.S. Department of Commerce, 14th and Pennsylvania Avenue NW., Washington, DC 20230.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on January 10, 1988, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C. 552b(c)(1) shall be exempt from the provisions relating to public meetings found in section 10 (a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6020, U.S. Department of Commerce, Washington, DC 20230. For further information or copies of the minutes, contact Lee Ann Carpenter on (202) 377–2583.

Dated: November 7, 1989.
Betty Anne Ferrell,
Director, Technical Advisory Committee Unit, Office of Technology and Policy Analysis.

Low Fuming Brazing Copper Rod and Wire From New Zealand; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On August 14, 1989, the Department of Commerce published the preliminary results of its administrative review of the antidumping order on low fuming brazing copper rod and wire from New Zealand. The review covers on manufacturer/exporter of low fuming brazing copper rod and wire from New Zealand to the United States and the period December 1, 1986 through November 30, 1987.

We gave interested parties an opportunity to comment on our preliminary results of review. We received no comments, and our final results are unchanged from those presented in our preliminary results of review.

EFFECTIVE DATE: November 14, 1989.

FOR FURTHER INFORMATION CONTACT: Michael J. Heaney or Richard Rimlinger, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–4195/2923.

SUPPLEMENTARY INFORMATION:

Background

On August 14, 1989, the Department of Commerce ("the Department") published in the **Federal Register** (54 FR 33258) the preliminary results of its administrative review on low fuming brazing copper rod and wire from New Zealand. We have now completed the administrative review in accordance with section 751 of the Tariff Act of 1930, as amended ("the Tariff Act").

Scope of the Review

The United States had developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the *Harmonized Tariff Schedule* ("HTS") as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Shipments covered by this review are low fuming brazing copper rod and wire principally of copper and zinc alloy ("brass") of varied dimensions in terms of diameter, whether cut-to-length or coiled, whether bare or flux-coated. During the review period such merchandise was classifiable under item numbers 612.6205, 612.7220 and 653.1500 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item numbers 7407.21.50, 7408.11.60, 7408.19.00, 7408.21.00, 7408.22.50, 7408.29.50, 8311.10.00, 8311.20.00, 8311.30.60, and 8311.90.00. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive. The review covers one manufacturer/exporter of this merchandise to the United States, McKechnie Bros. (N.Z.) Ltd. ("McKechnie"), and the period December 1, 1986 through November 30, 1987.

Final Results of Review

We invited interested parties to comment on the preliminary results of review. We received no comments. Based on our analysis, the final results of review are unchanged from those presented in the preliminary results of review. As a result of our review, we determine that the following margin exists for the review period:

Manufacturer/ Exporter	Time period	Margin (percent)
KcKechnie	12/01/86–11/30/87	1.68

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. The Department will issue appraisement instructions directly to the Customs Service.

Further, as provided for by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties shall be required for McKechnie based on the above margin. For any entries from a new exporter not covered in this or prior administrative reviews who is unrelated to any reviewed firm, a cash deposit of 1.68 percent shall be required. These deposit requirements are effective for all shipments of low fuming brazing copper rod and wire entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.22 of the Commerce Department's Regulations published in the **Federal Register** on March 26, 1980 (54 FR 12742) (to be codified at 19 CFR 353.22).

Dated: November 2, 1989.
Eric I. Garfinkel,
Assistant Secretary for Import Administration.

National Oceanic and Atmospheric Administration

[Docket No. 90776–9176]

Marine Recreational Fisheries Action Plan

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of a draft Marine Recreational Fisheries Action Plan and request for comments.

SUMMARY: In recognition of the growing protein food. According to a 1985 Gallup Poll, recreational fishing is the second most popular outdoor recreational activity in America, and as such, contributes nearly $30 billion to the economic, social, and aesthetic benefits indefinitely.

The purpose of this document is to identify ways for NMFS to help improve stewardship of marine fisheries

fishing. Enhancing and maintaining these stocks requires the enhancement and maintenance of water quality and the habitats on which the stocks depend and control of the harvest/catch.

research and related investigations which provide the basis for conservation and management of marine resources.

5. *Marine Fishery Resources are a National Asset, Which, Through Wise*

collection, management, development, and law enforcement efforts. Angling ethics, resource conservation, and aquatic education should be promoted and practiced through effective

VOL 54 ISS 218 NO 14 1989 UMI

ACTION: Notice of a draft Marine Recreational Fisheries Action Plan and request for comments.

SUMMARY: In recognition of the growing importance of marine recreational fisheries (MRF), NMFS adopted an MRF policy and implementation strategy in 1981. NMFS recently prepared a draft MRF Action Plan to focus on current MRF issues. To allow the public a chance to review NMFS' marine recreational fisheries policy and proposed activities, the draft MRF Action Plan is being published to restate NMFS' MRF policy, establish program goals and objectives, and identify specific actions that, depending upon support and availability of funds, may be used to update and improve implementation of the MRF policy. Comments are being requested from the public.

DATE: Comments from the public are invited through December 29, 1989.

ADDRESS: Additional copies of NMFS' draft MRF Action Plan can be obtained from Richard B. Stone, NMFS, Fishery Management Specialist, 1335 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Richard B. Stone or Alan Dean Parsons, 301–427–2347.

SUPPLEMENTARY INFORMATION: In 1981 NMFS adopted a marine recreational fisheries policy. This policy was not implemented consistently throughout the nation as each region, as well as headquarters, proceeded to implement the policy at its own discretion based on the differing perspectives, needs, and priorities of the various geographic areas. NMFS has reformulated its implementation strategy in the form of a draft MRF Action Plan. It is intended to achieve more consistent attention to national priorities while maintaining sufficient flexibility to tailor regional programs to local needs. The purposes of the plan are to restate and update NMFS' MRF policy, establish program goals and objectives, and identify specific actions to be taken to the extent that support and funding are available that could improve the implementation of the policy.

To allow the public an opportunity for review and comment, the draft MRF Action Plan is as follows:.

National Marine Fisheries Service Marine Recreational Fisheries Action Plan

I. Introduction

Marine recreational fishing (MRF) continues to grow in popularity, not only as a highly regarded form of recreation but also as a means of obtaining high protein food. According to a 1985 Gallup Poll, recreational fishing is the second most popular outdoor recreational activity in America, and as such, contributes nearly $30 billion to the Nation's economy. Since 1980, the value of marine recreational fishing has grown from $7.5 billion to $13.5 billion (including multiplier impacts) in 1985. The number of saltwater fishermen has increased from about 5 million in 1955 to 17 million in 1985, but has not increased substantially since then.

In recognition of the growing importance of MRF, National Marine Fisheries Service (NMFS) adopted a marine recreational fisheries policy and implementation strategy in 1981. Each Region, as well as headquarters, proceeded to implement the policy at its own discretion based on the differing perspectives, needs, and priorities of the various geographic areas. Thus, the policy was not implemented consistently or with the same degree of intensity throughout the Nation.

Recently, the NMFS, in partnership with other Federal agencies, state, and tribal governments, and representatives from private constituency groups and industry, participated in the development of a National Recreational Fisheries Policy. Actions to implement the goals and objectives of the NMFS Action Plan are consistent with those set forth by the National Policy.

The MRF industry and constituency have matured over the last several years, becoming better organized nationally, more involved in fishery issues, and increasingly committed to making fisheries conservation their primary concern. As a result, it is timely for NMFS to reformulate its implementation strategy to achieve more consistent attention to national priorties while maintaining sufficient flexibility to tailor regional programs to local needs. This approach is essential for effective interaction with MRF interests and for consistent treatment of priority MRF issues and problems.

Perhaps of greatest concern is the need for healthy fisheries resources. The primary role of Federal and state fishery managers and the Regional Fishery Management Councils is to provide stewardship of the Nation's fisheries resources. NMFS and the constituency have mutually stressed that a stronger conservation ethic, endorsed by the public as well as the government, is necessary to protect fishery resources and the habitats upon which they are dependent. Fisheries and their habitats must be recognized as national assets that, if effectively conserved and managed, can generate enormous economic, social, and aesthetic benefits indefinitely.

The purpose of this document is to identify ways for NMFS to help improve stewardship of marine fisheries resources overall, and to better serve MRF constituencies. However, it is recognized that development of an MRF Action Plan will not by itself necessarily result in progress. A strong commitment to pursue aggressively plan implementation for the long-term as well as the short-term is essential. There must be identifiable and measurable activities to provide accountability and to allow constituent and program partners (states, commissions, councils, etc.) to monitor and participate in program activities. Accordingly, this action plan restates NMFS' MRF policy, provides guiding principles for policy implementation, establishes NMFS' MRF program goals and objectives, and identifies specific actions to update and improve implementation of the MRF policy.

II. Restatement of Policy and Guiding Principles

A. *Policy Statement.* The following policy was adopted by NMFS in 1981 after an extensive review of NMFS MRF activities by a marine recreational fisheries task group.

"NMFS, through its various programs, will protect, conserve, enhance, manage and develop fishery resources of importance to the nation in order to increase the nation's food supply; promote increased opportunities for both commercial and marine recreational fishermen consistent with the concept of optimum yield; and promote activities which will assist the commercial and marine recreational fishing industries to thrive and expand."

B. *Guiding Principles.* The following guiding principles advance fundamental beliefs and strategies that further clarify NMFS' marine recreational fisheries policy and that guide policy implementation efforts.

1. *Marine Recreational Fisheries Program must Address All Three Components of Recreational Fisheries: the Resource, Users, and Industry.* First, with respect to the resources, MRF refers to one or more stocks of fish which can be treated as a unit for purposes of conservation, management, utilization, or development and which can be identified on the basis of geographical, scientific, technical, economic, or method-of-harvest characteristics. The term "fish" includes finfish, molluska, crustaceans, and all forms of living marine animals which form the resource base for recreational fishing. Enhancing and maintaining these stocks requires the enhancement and maintenance of water quality and the habitats on which the stocks depend and control of the harvest/catch.

Second, with respect to the users, MRF refers to individuals engaging in marine recreational fishing activity. Fishing is considered recreational when pleasure, amusement, relaxation or home consumption are the principal motivators. The program must result in an improved understanding of fishermen's needs and the impact of management decisions upon them.

Third, MRF refers to the MRF industry. Interest and participation in marine recreational fishing creates a demand for a wide variety of goods and services that enable fishermen to participate in recreational fishing activities. The private businesses which provide these goods and services are collectively referred to as the MRF industry. These businesses employ thousands of Americans, account for sizeable capital expenditures, and contribute substantially to the Nation's gross national product and overall economic well being. The program should consider how management decisions affect the industry.

2. *Marine Recreational Fisheries Contribute Significant Social and Economic Benefits to the Nation.* Marine recreational fishing is an increasingly popular outdoor recreational activity that contributes substantially to the social and economic well being of the Nation. Millions of individuals and families participate annually in marine recreational fishing as a relaxing, healthful, wholesome source of recreation and as a way of obtaining high quality protein food. Collectively, the MRF industry translates this recreation activity into a multi-billion dollar contribution to the Nation's economy.

3. *Robust Marine Fishery Resources are Requisites for Viable Marine Recreational Fisheries.* Marine fisheries are dependent on the maintenance, restoration, and enhancement of marine fish populations and their habitats. NMFS' principal function is to serve as steward of those resources and habitats. Conservation and enhancement of marine fishery resources shall be accomplished through scientific management intended to achieve optimum yield from each fishery.

4. *Accurate and Timely Information is Crucial to the Conservation, Management, and Development of Marine Recreational Fisheries.* NMFS has an important role in conducting, sponsoring, and otherwise encouraging scientific, statistical, and socioeconomic research and related investigations which provide the basis for conservation and management of marine resources.

5. *Marine Fishery Resources are a National Asset, Which, Through Wise Management, Can be Enhanced and Improved for Future Generations.* NMFS is committed to the mission of rebuilding and conserving marine fishery resources while allowing equitable sharing of those resources among recreational, commercial, and non-consumptive users, such as SCUBA divers, observation boats, etc. NMFS recognizes the biological necessity of regulating total catch within the limits of optimum yield. Accomplishing this management mission requires effective, cooperative partnerships with other Federal agencies, the states, Regional Fishery Management Councils, Interstate Commissions, and public and private sector interests. NMFS also recognizes the need to pursue aggressively international agreements for the conservation of highly migratory oceanic species of fish and to secure access for U.S. fishermen to fishery resources in international waters.

6. *Multiple Uses of Marine Fishery Resources are Recognized and Encouraged.* NMFS recognizes the national benefits resulting from multiple use of marine fishery resources by recreational, commercial, and subsistence fishermen as well as by non-consumptive users. NMFS also supports existing jurisdictional relationships between state and Federal Government resource stewards and the public as appropriate forums for rendering fishery allocation decisions affecting competing resource users.

7. *Authorities, Roles, and Responsibilities of Government and Private Entities in the Conservation and Development of Marine Recreational Fisheries are Recognized.* NMFS will engage in those activities that are the responsibility of Federal Government and will encourage and assist other Federal, state, and local government agencies, the academic community, private interests, and the public to cooperate and participate in its programs. NMFS will encourage other entities to assume responsibility for MRF programs and services more appropriately theirs, recognizing unified and cooperative partnerships as a goal.

8. *Conserving and Developing Marine Recreational Fisheries is a Shared Responsibility.* As major users and beneficiaries of marine fishery resources, fishermen and the industry must accept their stewardship roles and responsibilities and do their part in funding, promoting, and supporting essential marine fisheries research, data collection, management, development, and law enforcement efforts. Angling ethics, resource conservation, and aquatic education should be promoted and practiced through effective government/private partnerships.

III. Action Plan

The action plan consists of five major sections, each with goals, objectives, and action steps. Consistent and aggressive implementation should enhance NMFS' resource stewardship capabilities. The primary thrust of the Action Plan is best expressed by the first goal. NMFS will focus its major effort on the conservation of fisheries and their habitat, in recognition of the significant benefits the marine resources provide to the nation. Only with the resource on a sound footing can the recreational program be fully successful.

A. Conservation of Resources

Goal: Conserve, restore, and enhance fishery resources and the habitat on which they depend, recognizing that, if properly conserved and managed, fishery resources can provide substantial economic, social, and aesthetic benefits to the Nation.

A conservation approach needs to be emphasized in resource management as a means to restore and maintain healthy fisheries. NMFS must assert a leadership role in accomplishing this goal, and must secure participation, cooperation, and support of the MRF constituency.

A.1 OBJECTIVE: Develop a stronger linkage between information on the status and condition of stocks and management decisions affecting recreational fisheries.

A.1a—Each Research Center should review, evaluate, and, if needed, upgrade its stock assessment capabilities to ensure that assessments for species of recreational importance or potential importance are provided.

A.1b—Distribute stock assessments, expressed in layman's terms, for key species of recreational importance, or potential importance, to increase general understanding of the status of various stocks.

A.2 OBJECTIVE: Improve fishery management procedures for MRF.

When management is necessary, encourage the use of fishery management techniques; such as bag limits, size limits, gear limitations, and other measures to control fishing mortality, that are easily monitored, while permitting continued access to the fishery. Improve MRF input and

VOL 54 ISS 218 NO 14 1989 UMI

participation in the fishery management planning process.

A.3 OBJECTIVE: Promote conservation practices among fishermen.

Implement a national angling ethics program, in cooperation with the tackle industry, state fishery management agencies, and the MRF community, emphasizing tag and release, catch and release, expanded use of non-traditional species, regulatory compliance, and other related issues.

A.4 OBJECTIVE: Expand MRF information and education (I&E) programs.

A.4a—Establish and maintain Information and Education programs on NMFS research and management activities.

A.4b—Develop closer working ties with outdoor writer associations and media to improve flow of information to fishermen.

A.4c—Establish working relationships with tournament directors and fishing clubs, to increase their awareness of NMFS resource and management programs, and to promote resource conservation and angling ethics.

A.4d—Develop or distribute primers and educational materials on seafood quality, safety issues, conservation, the proper care and handling of catch, use of non-traditional species, and other topics of interest.

A.5 OBJECTIVE: To achieve more effective public adherence to fishery regulations.

A.5a—Expand I&E efforts, including brochures on regulations, creation of "Fishery Conservation Hotline", and greater interaction with conservation editors.

A.5b—Increase State/Federal cooperative enforcement seeking cross deputization and other appropriate means.

A.5c—Encourage and assist the states and Federal Government to resolve incompatible or conflicting regulations on species of recreational interest.

A.6 OBJECTIVE: Review current conservation engineering efforts, and expand where appropriate.

A.6a—Accelerate commercial gear research, development, and modification efforts to reduce bycatch and habitat destruction.

A.6b—Document applications of artificial reef technology for enhancement of recreational fisheries.

A.6c—Increase involvement in artificial reef research planning, management, and development.

Conservation of Habitat

Goal: Conserve and restore habitats critical to the well-being of recreationally important species and supporting ecosystems.

B.1 OBJECTIVE: Identify critical habitat problems which adversely affect species of importance to MRF.

B.1a—Review actions affecting species of importance to MRF and with EPA, the states, and local governments, work to establish priorities, and recommend corrective actions for habitat protection and resotration in each Region.

B.1b—Work with other government agencies (Federal, state and local) to implement the National Estuarine Program, and other coastal initiatives.

B.2 OBJECTIVE: Increase public awareness of the impacts on fishery resources created by habitat alteration.

B.2a—Prepare regional documentaries describing fishery and habitat relationships, unique aspects on habitat, and status and trends on the protection of critical habitats.

B.2b—Evaluate plans and provide guidance to other agencies, under authority of the Fish and Wildlife Coordination Act and other statutes, on policies significantly affecting fishery habitats of importance to MRF.

C. Research, Data Collection, Data Management, and Information Analysis

Goal: To improve NMFS's research, data acquisition, data management, analysis, and dissemination capabilities needed to provide the scientific and management basis for conservation of marine recreational fishery resources.

Socioeconomic and biological data important to the management of MRF are often missing or sparse, and some existing data do not receive adequate consideration in management decisions. To address this, several steps must be taken.

First, NMFS must work with fishery managers to identify data needs and implement research and statistical programs to fill these needs.

Second, NMFS must make available to fishery managers, all existing biological and socioeconomic data and ensure its appropriate use.

Third, NMFS must educate and inform marine recreational fishermen and the MRF industry about the objectives of data collection efforts and how this information is being used by resource managers.

Current research and data collection programs should be monitored and reviewed as to their ability to support fishery management and development decisions, including stock assessments, user allocations, quota monitoring, fishery evaluation, and regulatory impact analyses. Timeliness, accuracy, precision, and comparability of data must be carefully assessed and improved when possible.

C.1 OBJECTIVE: Improve planning and coordination of NMFS' research, data collection, and analysis components.

C.1a—Establish a National MRF steering committee, composed of fishery managers from the state, Councils, Commissions, Federal, and private sectors, to identify management questions requiring data or information. Work with Federal and state data collectors and recommend actions needed to provide more comprehensive, precise, and timely MRF data for use by state and Federal resource managers.

C.1b—Conduct annual research program reviews within each Fishery Center to evaluate ongoing research and recommend program adjustments (e.g., shifts in research emphasis, enhancements, initiatives).

C.1c—Conduct regular NMFS/Sea Grant retreats at regional/national level to identify and evaluate cooperative research projects.

C.1d—Cooperate with Sea Grant to develop specific strategies for working with Marine Advisory Services in MRF communication/education efforts.

C.1e—Establish program coordination with state Wallop-Breaux (W–B) coordinators providing technical assistance, as outlined int he NMFS/USFWS Memorandum of Understanding.

C.1f—Enhance an ongoing communication effort to advise managers and MRF constituents of research findings.

C.1g—Develop a socioeconomic research plan in each Region to support fishery management programs making sure to address MRF issues.

C.1h—Coordinate inclusion of the Marine Recreational Fisheries Statistics Survey (MRFSS) data base into fishery management plans.

C.1i—Coordinate with other Federal, state, private, and academic institutions involved with MRF research, data collection, and analysis.

C.2 OBJECTIVE: Improve the effectiveness of MRF data collection, data management, analysis, and dissemination.

C.2a—Use state/Federal Cooperative Agreements to integrate, whenever feasible, state and Federal MRF sampling programs under agreed upon standards to create a consistant nationwide data collection program and to eliminate duplication.

C.2b—Determine the appropriate MRFSS sample size nationwide and conduct rare event (e.g., billfish) species surveys as appropriate to improve data used in Federal fishery management decisions.

C.2c—Improve the application of socioeconomic information to support regional research plans developed under *C.1g.*

C.2d—Publish and distribute validations of MRF data collection methodologies and data bases to ensure applicability, accessibility, and familiarity.

C.2e—Conduct regular seminars and use other forums to inform fishery managers, constituents, the general public, industry, and others of the results, proper use, and limitations of economic and statistical data collection and analysis programs.

C.2f—Improve NMFS' analytical capability to interpret and evaluate MRF statistical data and ensure appropriate and timely use of data.

C.2g—Regionally, produce and distribute annual summaries, trends, and forecasts of species important to MRF in a timely fashion.

D. Industry Services

Goal: Expand NMFS' ability to effectively and appropriately interact with and enhance the MRF industry.

The MRF industry is an integral and significant part of the total U.S. fishing industry. It encompasses a broad range of individual businesses that provide a variety of goods and services to marine recreational fishermen both domestic and foreign. NMFS needs to assist the industry within the scope and authority of NMFS' programs.

D.1. OBJECTIVE: Increase understanding of the nature and operation of the MRF industry.

D.1a—Develop industry profiles including information on various business sectors, size, composition, and operation of charter/headboat fleets, cost and return analysis, entry and exit of businesses/vessels, and other aspects.

D.1b—Coordinate with state and other governmental agencies and industries to encourage recreational fisheries tourism.

D.1c—Develop capability to interpret and evaluate MRF industry information, including monitoring industry response to management decisions.

D.2 OBJECTIVE: Assist the industry to undertake appropriate research and development activities.

D.2a—Help the MRF industry gain access to funding sources (e.g., S–K, MARFIN, Sea Grant, etc.) for research and development projects.

D.2b—Identify and reduce trade barriers affecting the MRF's competitive position of U.S. tackle manufacturers.

D.2c—Establish outreach activities to ensure industry access to vital fisheries research and statistical information.

E. Administrative Program Direction.

Goal: Provide positive support for marine recreational fisheries through effective implementation of the MRF action plan.

Previous sections followed program lines, providing goals, objectives, and actions needed to more fully implement the MRF policy. However, achievement of these goals and objectives will require a strong, long-term commitment by NMFS. This commitment must be reflected in planning and budget documents and performance plans. This section provides for these internal actions needed to ensure successful MRF policy and program implementation.

E.1 OBJECTIVE: Establish effective program planning and coordination mechanisms.

E.1a—The Washington Office and each Region will develop a detailed strategy document identifying activities, resources, and time tables needed to implement the Action Plan.

E.1b—Each Region will utilize a MRF Steering Committee to involve MRF interests in program planning.

E.1c—Use forums within regional fisheries commissions, and other state, regional, and national organizations to communicate and coordinate MRF program matters.

E.2 OBJECTIVE: Provide sufficient staffing and support to carry out the Action Plan.

E.2a—Provide staff support commensurate in size with the importance (catch, effort, socioeconomic impact) of MRF in the Regions, growth potential, and the extent of problems.

E.2b—Launch and maintain an aggressive public affairs program that includes frequent field meetings with MRF clubs, charter/headboat associations, state and interstate coordination bodies (e.g., Marine Fisheries Commissions, W–B coordinators, outdoor writers associations, etc.) and attendance at regional and national symposia.

E.3 OBJECTIVE: Establish effective mechanisms to monitor and evaluate MRF program accomplishments.

E.3a—Washington Office and Regions will use tracking or control systems to monitor and report program progress and make program adjustments.

E.3b—The Recreational and Interjurisdictional Fisheries Division will monitor the Action Plan implementation progress and report periodically to an appropriate management level.

E.3c—Conduct a national MRF program review annually in conjunction with MRF Coordinators meeting.

Dated: November 7, 1989.

Richard H. Schaefer,

Director of Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 89-26614 Filed 11-13-89; 8:45 am]

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Taiwan

November 6, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: November 7, 1989.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566–6791. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for swing and special shift.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also

VOL 54 ISS 218 NO 14 1989 UMI

see FR 49345, published on December 17, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 6, 1989.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 2, 1988, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Taiwan and exported during the period which began on January 1, 1989, and extends through December 31, 1989.

Effective on November 7, 1989, the directive of December 2, 1988, is being amended further to adjust the limits for the following categories, as provided under the terms of the bilateral agreement of November 16, 1982, as amended and extended:

Category	Adjusted 12-month limit [1]
Sublevels in Group I	
313	65,303,245 square meters.
670–L [2]	37,420,914 kilograms.
Sublevels in Group II	
237	493,763 dozen.
239	2,898,545 kilograms.
331	511,745 dozen pairs.
336	97,900 dozen.
340	1,172,534 dozen.
342	203,562 dozen.
345	101,753 dozen.
352	952,130 dozen.
359–H [3]	2,162,394 kilograms.
433	13,801 dozen.
443	50,833 numbers.
447/448	19,350 dozen.
631	4,432,636 dozen pairs.
632	4,886,155 dozen pairs.
633/634/635	1,634,779 dozen of which not more than 1,061,425 dozen shall be in Categories 633/634 and not more than 809,879 dozen in Category 635.
636	366,000 dozen.
640	2,926,383 dozen of which not more than 1,693,825 dozen shall be in Category 640–Y.[4]
641	758,257 dozen of which not more than 256,000 dozen shall be in Category 641–Y.[5]
642	761,461 dozen.
645/646	4,116,017 dozen.
649	709,096 dozen.
651	458,010 dozen.
652	1,574,846 dozen.
659–S [6]	750,396 kilograms.
659–C [7]	518,529 kilograms.
659–S [8]	2,109,835 kilograms.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1988.

[2] In Category 670–L, only HTS numbers 4202.12.8030, 4202.12.8070, 4202.92.3020, 4202.92.3030, and 4202.92.9020.

[3] In Category 359–H, only HTS numbers 6505.90.1530 and 6505.90.2060.

[4] In Category 640–Y, only HTS numbers 6205.30.2010, 6205.30.2020, 6505.30.2050 and 6205.30.2060.

[5] In Category 641–Y, only HTS numbers 6204.23.0050, 6205.29.2030, 6206.40.3010 and 6206.40.3025.

[6] In Category 659–S, only HTS numbers 6114.30.2010 and 6114.30.2020.

[7] In Category 659–C, only HTS numbers 6103.23.0055, 6103.43.2020, 6103.49.2000, 6103.49.3038, 6104.63.1920, 6104.69.1000, 6104.69.3014, 6114.30.40, 6114.30.3050, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.4015, 6211.33.0010, 6211.33.0017 and 6211.43.0010.

[8] In Category 659–S, only HTS numbers 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

November 6, 1989.

The USAF Scientific Advisory Board Ad Hoc Committee on Science and Technology (S&T) Broad Program Appraisal (BPA) will meet on 15 Dec 89 from 8:00 a.m. to 5:00 p.m. at the Pentagon, Washington, DC 20330–5430.

The purpose of this meeting is to review the technology area plans for the programs in the Air Force S&T base. This meeting will involve discussions of classified defense matters listed in section 552b(c) of title 5, United States Code, specifically subparagraph (1) thereof, and accordingly will be closed to the public.

For futher information, contact the Scientific Advisory Board Secretariat at (202) 697–8404.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910–01–M

Department of the Army

Notice of Desire to Enter into Cooperative Research & Development Agreements on Fluidic Listening Device

The U.S. Army's Harry Diamond Laboratories (HDL) is seeking potential candidates to enter into Cooperative Research and Development Agreements (CRDA's) under the authority provided in the Federal Technology Transfer Act of 1986 (Pub. L. 99–502). The technical area for collaboration between HDL and outside parties is the following:

Further research and development of a fluidically-based acoustic listening device is desired. This area will build upon a prototype model already in existence that was developed at HDL, and which has applications in the civilian sector for security and surveillance systems. The current system combines acoustic and fluidic technologies to amplify sound waves in the audible range (0–4 kHz). Fluidic technology is a fundamentally different method of signal amplification in that it employs fluid dynamic principals to sense, amplify, and manipulate the incoming acoustic signals into audible pressure signals. The acoustic sensor system achieves a total amplification of generally 60–70 decibels. Because the system is fluidically-based, it does not require signal processing electronics (with associated batteries) and therefore can be highly mobile. The system in its present configuration has a range of about 250 meters for conversational speech depending upon the terrain, humidity, and other environmental operating constraints.

In comparison to an electronically-based system, the fluidic detection system has the advantage of a negligible noise floor. As a result, the sensitivity of the fluidic system is superior to currently available electronic acoustic amplification systems. Moreover, the fluidic detection system could be further developed for civilian purposes by linkage of fluidics with recent advances in signal processing techniques.

To be considered, please respond with 30 days from the date of this announcement.

For more information on this CRDA opportunity, contact Mr. George Gillespie in HDL's Office of Research and Technology Applications on 301–394–1551, or write to:, Harry Diamond Laboratories, 2800 Powder Mill Rd., SLCHD–PO–P (Attn: George Gillespie), Adelphi, MD 20783–1197.

Kenneth L. Denton,

Alternate Army Liaison Officer With the Federal Register.

BILLING CODE 3710–08–M

Intent To Grant an Exclusive Patent License to Univax Corp.

The Department of the Army announces its intention to grant an exclusive license to Univax Corporation, having a place of business at 12111 Parklawn Drive, Rockville, MD 20652, under U.S. Patent No. 4,285,936 entitled "Method for Producing a Vaccine Against Bacterial Infections Caused By Pseudomonas Aeruginosa."

The proposed exclusive license will comply with the terms and conditions of 35 U.S.C. 209 and the Department of Commerce's regulations at 37 CFR 474.7. The proposed license may be granted unless, within 60 days from the date of this notice, the Depatment of the Army receives written evidence and argument which establishes that the grant of the proposed license would not serve the public interest. All comments and materials must be submitted to the Intellectual Property Counsel of the Army, Patents, Copyrights, and Trademarks Division, Office of The Judge Advocate General, Department of the Army, 5611 Columbia Pike, Room 332–A, Falls Church, VA 22041–5013.

For further information concerning this notice, contact: Earl T. Reichert, Patents, Copyrights, and Trademarks Division, Office of The Judge Advocate General, Department of the Army, 5611 Columbia Pike, Room 332–A, Falls Church, VA 22041–5013, Telephone No. (202) 756–2623.

Kenneth L. Denton,

Alternate Army Liaison Officer With the Federal Register.

BILLING CODE 3820–01–M

DEPARTMENT OF DEFENSE

Department of the Navy

Intent To Prepare an Environmental Impact Statement for Proposed Construction and Operation of a Relocatable Over the Horizon Radar System on Amchitka Island, AK

Pursuant to section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969 as implemented by the Council on Environmental Quality regulations (40 CFR parts 1500–1506), the Department of the Navy announces its intent to prepare an Environmental Impact Statement (EIS) for the construction and operation of a Relocatable Over the Horizon Radar (ROTHR) system on Amchitka Island, Alaska. The ROTHR will provide wide area surveillance for early detection and tracking of aircraft and ships in the Northwest Pacific.

The proposed action includes construction of an additional radar transmitter and receiver antenna. The operational work force will increase from 235 to 375 people. The EIS will address potential environmental impacts associated with the project, including the potential for wetlands impacts. The EIS will also address additions to electrical, water and sewage systems; fuel storage and distribution facilities; operation, maintenance and storage structures; hazardous material storage facilities; housing; roads; and waterfront pier facilities.

Alternatives to be considered in the EIS include satellite systems, aircraft surveillance systems, and alternate locations in Alaska for ROTHR facilities. Alternate locations in Alaska to be considered include Adak, Shemya and Attu Islands, and the central coast of Alaska.

The U.S. Army Corps of Engineers has agreed to act as a cooperating agency pursuant to 40 CFR 1501.6. The Corps will review a Navy permit application for the proposed action pursuant to authorization found in section 404 of the Clean Water Act.

An unaffiliated consulting firm has been retained to prepare Draft and Final Environmental Impact Statements. Publication of the DEIS is planned for March 1990.

The Navy will initiate a scoping process for the purpose of determining the scope of issues to be addressed and for identifying the significant issues related to this action. The Navy will hold a public scoping meeting on November 30, 1989, beginning at 7:30 pm, in the Federal Building at 222 West 7th Street, Anchorage, Alaska. This meeting will be advertised in the Anchorage area newspapers.

A formal presentation will precede request for public comment. Navy representatives will be available at this meeting to receive comments from the public regarding issues of concern to the public. It is important that federal, state, and local agencies and interested individuals take this opportunity to identify environmental concerns that should be addressed during the preparation of the EIS. In the interest of available time, each speaker will be asked to limit their oral comments to five (5) minutes.

Agencies and the public are also invited and encouraged to provide written comment in addition to, or in lieu of, oral comments at the public meetings. To be most helpful, scoping comments should clearly describe specific issues or topics which the commentor believes the EIS should address. Written statements and or questions regarding the scoping process should be mailed no later than December 31, 1989 to Commanding Officer (Attn: Code 09EP2, telephone (206) 476–5775), Engineering Field Activity Northwest, Naval Facilities Engineering Command, 3505 NW Anderson Hill Road, Silverdale, Washington 98383–9130.

Dated: November 8, 1989.

Sandra M. Kay,

Department of the Navy, Alternate Federal Register Liaison Officer.

[FR Doc. 89–26626 Filed 11–13–89; 8:45 am]

BILLING CODE 3810–AE–M

VOL 54 ISS 218 NO 14 1989 UMI

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

Appeal Before the Education Appeal Board; Intent To Compromise a Claim, St. Paul Public Schools

AGENCY: Department of Education.

ACTION: Notice of intent to compromise a claim.

SUMMARY: The Department intends to compromise a claim against the St. Paul Public Schools, Independent School District No. 625 (St. Paul), St. Paul, Minnesota, now pending before the Education Appeal Board, Docket No. 37(301)88 (20 U.S.C. 1234a(f) (1982)).

DATE: Interested persons may comment on the proposed action by submitting written data, views, or arguments on or before December 28, 1989.

ADDRESS: Comments should be addressed to Ann Marie Reilly, Office of the General Counsel, U.S. Department of Education, 400 Maryland Avenue, SW., (Room 4091, FOB-6), Washington, DC 20202.

SUPPLEMENTARY INFORMATION: On October 21, 1988, the Assistant Secretary for Elementary and Secondary Education (Assistant Secretary) issued a final audit determination against the St. Paul Public Schools, Independent School District No. 625 (St. Paul), St. Paul, Minnesota. The Assistant Secretary determined, based upon the U.S. Department of Education's (Department) Office of Inspector General's May 5, 1988 audit report (Audit Control Number 05-80300), that St. Paul had received $27,902.55 in overpayment of fiscal year 1987 formula grant funds under the then part A of the Indian Education Act (part A; 20 U.S.C. 241aa-241ff (1982)). The Assistant Secretary determined that the overpayment resulted from St. Paul improperly counting the following children to generate funds under part A for use in school year 1987-1988: 1) Children not enrolled in St. Paul schools on the date St. Paul conducted its part A count; 2) children enrolled in private schools; and 3) one child whose student certification form remained unsigned and undated. In addition, the Assistant Secretary determined St. Paul had improperly included in its count a three percent add-on for children who might enroll after the date St. Paul conducted its count.

On November 21, 1988, St. Paul filed an appeal with the Education Appeal Board (EAB). The EAB accepted that appeal on December 21, 1988, and the appeal is currently pending before the EAB (Docket No. 37(301)88). St. Paul refunded the amount represented by the three percent add-on ($3,434.16) and provided acceptable documentation concerning the one child whose student certification form remained unsigned and undated ($143.09). Therefore, the amount remaining in dispute under this appeal is $24,325.30.

Under section 452(f) of the General Education Provisions Act, (20 U.S.C. 1234a(f) (1982)), the Secretary has the authority to compromise a claim of $50,000 or less if the Secretary determines that collection of all or a part of the claim would not be practical or in the public interest, and that the practices that resulted in the claim have been corrected or will not recur. The Secretary proposes to compromise the remaining $24,325.30 claim for $10,000, in light of the percentage of the claim to be repaid, the existing litigation risks, and the costs that would be incurred by the Department in defending this relatively small claim, the Secretary does not believe it would be practical or in the public interest to continue the appeal. Moreover, the Department is satisfied that the practices that resulted in the claim have been corrected and will not recur.

The public is invited to comment on the Department's intent to compromise this claim. Additional information may be obtained by writing to Ann Marie Reilly at the address given at the beginning of this notice.

(20 U.S.C. 1234a(f) (1982))

(Catalog of Federal Domestic Assistance No. 84.060)

Dated: November 3, 1989.

Gail D. Niederhofer,

Acting Deputy Under Secretary for Management.

BILLING CODE 4000-01-M

[CFDA No: 84.042]

Student Support Services Program

ACTION: Notice to extend the deadline for receipt of applications.

SUMMARY: On September 15, 1989 the Secretary of Education published in the Federal Register (54 FR 38324) a notice inviting applications for new awards for the Student Support Services Program. This document extends the date for receipt of applications from November 17, 1989 until December 12, 1989. The Secretary takes this action to allow the public additional time to prepare the applications.

For Applications or Information Contact: Mrs. May J. Weaver, Chief, Special Services Branch, Division of Student Services, U.S. Department of Education (Room 3060, ROB-3), 400 Maryland Avenue, SW., Washington, DC 20202-5249. Telephone: (202) 732-4804.

Authority: 20 U.S.C. 1070d, 1070d-1b.

Dated: November 1, 1989.

Leonard L. Haynes III,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

Executive Committee of the National Assessment Governing Board

AGENCY: National Assessment Governing Board, Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming teleconference meeting of the Executive Committee of the National Assessment Governing Board. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: Monday, November 20, 1989.

Time: 11:00 a.m. (e.s.t.)

Place: National Assessment Governing Board, Suite 7322, 1100 L Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Roy Truby, Executive Director, National Assessment Governing Board, Suite 7322, 1100 L Street NW., Washington, DC, 20005-4013, Telephone: (202) 357-6938.

SUPPLEMENTARY INFORMATION: The National Assessment Governing Board is established under section 406(i) of the General Education Provisions Act (GEPA) as amended by section 3403 of the National Assessment of Educational Progress Improvement Act (NAEP Improvement Act), title III-C of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100-297), (20 USC 1221e-1).

The Board is established to advise the Commissioner of the National Center for Education Statistics on policies and actions needed to improve the form and use of the National Assessment of Educational Progress, and develop specifications for the design, methodology, analysis and reporting of test results. The Board also is responsible for selecting subject areas to be assessed, identifying the objectives for each age and grade tested, and establishing standards and procedures for interstate and national comparisons.

The Executive Committee of the National Assessment Governing Board will meet via teleconference on November 20, 1989 from 11:00 a.m. (e.s.t.) until the completion of business. Because this is a teleconference meeting, facilities will be provided so the public will have access to the Committee's deliberations. The proposed agenda includes preparation of the agenda for the December meeting of the Board; discussion of staff papers; review of draft NAGB policies; Board nominations for 1990; and other matters pertaining to the Committee's charge.

Records are kept of all Board proceedings and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, Suite 7322, 1100 L Street NW., Washington, DC, from 8:30 a.m. to 5:00 p.m.

Christopher T. Cross,

Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4000-01-M

DEPARTMENT OF EDUCATION

ENVIRONMENTAL PROTECTION AGENCY

DEPARTMENT OF JUSTICE

Nondiscrimination in Federally-Assisted Programs; Enforcement Coordination

ACTION: An agreement between the United States Environmental Protection Agency and the United States Department of Education to delegate certain civil rights compliance responsibilities for educational institutions.

A. Purpose

Section 1-207 of Executive Order 12250 authorizes the Attorney General to initiate cooperative programs among Federal agencies responsible for enforcing title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, as amended, section 504 of the Rehabilitation Act of 1973, as amended, and similar provisions of Federal law prohibiting discrimination on the basis of race, color, national origin, sex, handicap, or religion in programs or activities receiving Federal financial assistance.

This agreement will promote consistent and coordinated enforcement of covered nondiscrimination provisions, as required in the Coordination of Enforcement of Nondiscrimination in Federally Assisted Programs (28 CFR 42.401-42.415), increase the efficiency of compliance activity, and reduce burdens on recipients, beneficiaries, and Federal agencies by consolidating compliance responsibilities, by eliminating duplication in civil rights reviews and data requirements, and by promoting consistent application of enforcement standards.

B. Delegation

By this agreement, the Environmental Protection Agency (EPA) designates the Department of Education (ED) as the agency responsible for specific civil rights compliance duties, as enumerated below, with respect to educational institutions. Responsibility for the following covered nondiscrimination provisions is delegated:

1. Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d to 2000d-4);
2. Title IX of the Education Amendments of 1972, as amended (20 U.S.C. 1681 to 1686); and
3. Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794).

This agreement specifies the duties to be performed by each agency. It does not alter the requirements of the joint Department of Justice/Equal Employment Opportunity Commission (EEOC) regulation concerning procedures for handling complaints of employment discrimination filed against recipients of Federal financial assistance. 28 CFR 42.601-42.613, 29 CFR 1691.1-1697.13, 48 FR 3570 (January 25, 1983). Complaints covered by that regulation filed with a delegating agency against a recipient of Federal financial assistance solely alleging employment discrimination against an individual are to be referred directly to the EEOC by the delegating agency.

C. Duties of the Department of Education

The EPA assigns the following compliance duties to ED with respect to educational institutions. Specifically, ED shall:

1. Maintain current files on all activities undertaken pursuant to this agreement and on the compliance status of applicants and recipients with respect to their programs or activities receiving Federal financial assistance resulting from preapproval and postapproval reviews, complaint investigations, and actions to resolve noncompliance. A summary of these activities and the compliance status of applicants and recipients shall be reported at least at the end of every fiscal year to the EPA.

2. Develop and use information for the routine, periodic monitoring of compliance by educational institutions with respect to their programs or activities receiving Federal financial assistance subject to this agreement.

3. Perform, upon request of the EPA, preapproval reviews for which supplemental information or field reviews are necessary to determine compliance.

4. Conduct an effective program of postapproval reviews of recipients with respect to their programs or activities receiving Federal financial assistance subject to this agreement.

5. Receive complaints alleging that recipients subject to this agreement have discriminated in violation of covered nondiscrimination provisions in their programs or activities receiving Federal financial assistance, attempt to obtain information necessary to make complaints complete, and investigate complete complaints.

6. Issue written letters of findings of compliance or of noncompliance that (a) advise the recipient and, where appropriate, the complainant of the results of the post-approval review or complaint investigation; (b) provide recommendations, where appropriate, for achieving voluntary compliance; and (c) offer, where appropriate, the opportunity to engage in negotiations for achieving voluntary compliance. The governor of the state in which the applicant or recipient is located will be notified, if the letter of findings of noncompliance is made pursuant to a statute requiring that the governor be given an opportunity to secure compliance by voluntary means. ED shall promptly provide copies of its letters of findings to the EPA and to the Assistant Attorney General for Civil Rights.

7. Conduct, after a letter of findings of noncompliance, negotiations seeking voluntary compliance with the requirements of covered nondiscrimination provisions.

8. If compliance cannot be voluntarily achieved and ED does not fund the applicant or recipient, refer the matter to the EPA for its own independent action and notify the Assistant Attorney General for Civil Rights of the referral. If compliance cannot be achieved and both ED and the EPA fund the applicant or recipient, initiate formal enforcement action. When ED initiates formal enforcement action by providing the applicant or recipient with an

opportunity for an administrative hearing, provide the EPA with an opportunity to participate as a party in a joint administrative hearing. When ED initiates formal enforcement action by

compliance determination and:

(a) If the EPA wishes to initiate formal enforcement action by providing the applicant or recipient with an opportunity for a administrative hearing,

National Council on Vocational Education; Public Meeting

AGENCY: National Council on Vocational Education, Education.

Washington, DC 20202-7580, (202) 732-1884.

Records are kept of all Council proceedings, and are available for

anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

[FR Doc. 89-26705 Filed 11-13-89; 8:45 am]

VOL 54 ISS 218 NOV 14 1989 UMI

opportunity for an administrative hearing, provide the EPA with an opportunity to participate as a party in a joint administrative hearing. When ED initiates formal enforcement action by referring the matter to the Department of Justice for appropriate judicial action, notify the EPA of the referral.

9. Notify the EPA and the Assistant Attorney General for Civil Rights of the outcome of the hearing, including the reasons for finding the applicant or recipient in noncompliance, and of any action taken against the applicant or recipient.

D. Duties of the Environmental Protection Agency

The EPA shall:

1. Issue and provide to ED all regulations, guidelines, reports, orders, policies, and other documents that are needed for recipients to comply with covered nondiscrimination provisions and for ED to administer its responsibilities under this program.

2. Provide ED with information, technical assistance and training necessary for it to perform the duties delegated under this agreement. This information shall include, but is not limited to, a list of recipients receiving Federal financial assistance from the EPA, the types of assistance provided, compliance information solely in the EPA's possession or control, and data on program eligibility and/or actual participants in assisted programs or activities.

3. Perform preapproval reviews of applicants for assistance, as required by 28 CFR 42.407(b), that do not require supplemental information or field reviews. The reviews may require information to be supplied by ED. If the EPA requests ED to undertake an on-site review because it has shown it has reason to believe discrimination is occurring in a program or activity that is either receiving Federal financial assistance or that is the subject of an application, the EPA shall supply information necessary for ED to undertake such a review.

4. Refer all complaints alleging discrimination under covered nondiscrimination provisions filed with the EPA against a recipient subject to this delegation and determine, if possible, whether the program involved received Federal financial assistance from the delegating agency.

5. Where ED has notified the applicant or recipient in writing that compliance cannot be achieved by voluntary means and ED has referred the matter to the EPA, make the final compliance determination and:

(a) If the EPA wishes to initiate formal enforcement action by providing the applicant or recipient with an opportunity for a administrative hearing, notify ED if the EPA will either join as a party in the administrative hearing conducted by ED or will conduct its own administrative hearing.

(b) When the EPA initiates formal enforcement action by referring the matter to the Department of Justice for appropriate judicial action, notify ED of the referral.

(c) If the EPA conducts its own hearing, notify ED and the Assistant Attorney General for Civil Rights of the outcome of the hearing, including the reasons for finding the applicant or recipient in noncompliance, and of any action taken against the applicant or recipient. The EPA may request ED to act as counsel in its administrative hearing.

(d) If the EPA neither initiates steps to deny or terminate Federal financial assistance nor refers the matter to the Department of Justice, notify ED and the Assistant Attorney General for Civil Rights in writing, within 15 days after notification from ED, that voluntary compliance cannot be achieved.

E. Redelegation

Duties delegated herein to ED may be redelegated. ED shall notify the EPA of any such redelegation prior to its effective date.

F. Approval

This agreement shall be signed by the Assistant Attorney General for Civil Rights. It shall be signed by both parties and become effective 30 days from publication in the **Federal Register**.

G. Termination

This agreement may be terminated by either agency 60 days after notice to the agency and to the Assistant Attorney General for Civil Rights.

Dated: June 27, 1989.

William K. Reilly,

Administrator

U.S. Environmental Protection Agency.

Dated: August 24, 1989.

BILLING CODE 4000-01-M

National Council on Vocational Education; Public Meeting

AGENCY: National Council on Vocational Education, Education.

ACTION: Notice of public meeting of the Council.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming Subcommittee meeting of the National Council on Vocational Education. It also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act, and is intended to notify the general public of its opportunity to attend.

DATE AND TIME: December 2, 1989, 1:30 p.m. to 4 p.m.

ADDRESS: Hotel Royal Plaza, Walt Disney World Village, Lake Buena Vista, Florida. *Room:* Lake Room.

SUPPLEMENTARY INFORMATION: The National Council on Vocational Education was established under section 104 of the Vocational Education Amendments of 1968, Public Law 90-576.

The Council was established to:

(A) Advise the President, the Congress, and the Secretary of Education concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation of vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to Congress; and

(C) Conduct independent evaluations of programs carried out under this title and publish and distribute the results thereof.

AGENDA: The proposed agenda will include: Discussions with the new Assistant Secretary of Vocational and Adult Education, discussions of the reauthorization of the Carl D. Perkins Act, the National Awareness Campaign, Occupational Competencies and Council Member Reports.

FOR FURTHER INFORMATION CONTACT: Dr. Joyce Winterton, Executive Director, 330 C Street SW., MES—Suite 4060, Washington, DC 20202-7580, (202) 732-1884.

Records are kept of all Council proceedings, and are available for public inspection at the above address from the hours of 9 a.m. to 4:30 p.m.

Signed at Washington, DC, November 7, 1989.

Joyce Winterton,

Executive Director.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of requests submitted for review by the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (Pub. L. 96-511, 44 U.S.C. 3501 *et seq.*).

The listing does not include information collection requirements contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, or extension; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATE: Comments must be filed on or before December 14, 1989. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395-3084. (Also, please notify the EIA contact listed below.)

ADDRESS: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION COPIES OF RELEVANT MATERIALS CONTACT: Jay Casselberry, EIA's Office of Statistical Standards (EI-73), Forrestal Building, U.S. Department of Energy, Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 586-2171.

SUPPLEMENTARY INFORMATION: The energy information collection submitted to OMB for review was:

1. Fossil Energy
2. FE-746R
3. 1901-0294
4. Import and Export of Natural Gas
5. Extension
6. On occasion/Application
7. Required to obtain or retain a benefit
8. Businesses or other for-profit
9. 90 respondents
10. 90 responses annually
11. The estimated average hours per response for each of the respondents is 150 burden hours.
12. The estimated total reporting hours are 13,500.
13. The FE-746R collects data from importers and exporters of natural gas, including contract, market analyses, price and volume information. The data are derived from company internal documents and are used to conduct analyses, support decisions, monitor compliance with authorizations, and ensure that authorizations continue to remain in the public interest.

Authority: Sec. 5(a), 5(b), 13(b) and 52, Public Law No. 93-275, Federal Energy Administration Act of 1974, as amended, 15 U.S.C. 764(a), 764(b), 772(b) and 790a.

Issued in Washington, DC, November 7, 1989.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. RP89-161-010]

ANR Pipeline Co.; Proposed Changes in FERC Gas Tariff Pursuant to Motion to Place Tariff Sheets Into Effect on November 1, 1989

November 7, 1989.

Take notice that on October 31, 1989, ANR Pipeline Company (ANR) tendered for filing certain revised tariff sheets, with its "Motion to Place Substitute Tariff Sheets Into Effect on November 1, 1989".

ANR states that this filing reflects a decrease in cost of service, as compared to that upon which the rates of ANR which were previously filed and suspended to November 1, 1989 were based, and reduced levels of sales contract demand determinants, to reflect Commission orders in the interim, and also reflects continuation of a "saturated" method of heat content measurement.

ANR notes that the subject filing is made at this time in order to comply with the Commission's "three year rule", but that the Commission has not yet acted upon rehearing sought of the suspension order herein. Accordingly, ANR states that it reserves the right to amend the subject filing and any part hereof in light of the Commission's action on rehearing, and to take other action as seems required.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with the Commission's Rules of Practice and Procedure. All such protests should be filed on or before November 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

VOL 54 ISS 218 NO 14 1989 UMI

[Docket No. TM90-3-21-000]

Columbia Gas Transmission Corp., Proposed Changes in FERC Gas Tariff

November 7, 1989.

Take notice that on October 31, 1989, Columbia Gas Transmission Corporation (Columbia Transmission) tendered for filing the following proposed changes to its FERC Gas Tariff, Original Volume No. 1:

One hundred and forty-first Revised Sheet No. 16
Twenty-ninth Revised Sheet No. 16A2

The foregoing revised tariff sheets bear an issue date of October 31, 1989 and a proposed effective date of December 1, 1989.

The revised filing is being made pursuant to the Commission's Order issued July 29, 1989 in these proceedings and section 28.6 of the General Terms and Conditions of Columbia's FERC Gas Tariff Original Volume No. 1. In this regard, One hundred and forty-first Revised Sheet No. 16 and Twenty-ninth Revised Sheet No. 16A2 set forth the volumetric surcharge, adjusted to reflect the Annual Reconciliation of the interest portion of the volumetric surcharge. As reflected on the referenced tariff sheets, the adjusted volumetric surcharge is 4.80¢ per MMBtu. The interest charge adjustment resulting from the Annual Reconciliation is 0.30¢. The upward adjustment reflects the higher FERC published interest rates commencing with the 4th quarter of 1988. Columbia further requests that the Commission permit the tariff sheets to become effective December 1, 1989, and requests all necessary waivers to permit such effective date.

Copies of the filing were served by the company upon each of its wholesale customers, interested state commissions and to each of the parties set forth on the Official Service List in the consolidated proceedings.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of Columbia Transmission's filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ90-1-24-000]

Equitrans, Inc., Proposed Change in FERC Gas Tariff

November 7, 1989.

Take notice that Equitrans, Inc. (Equitrans) on October 31, 1989, tendered for filing with the Federal Energy Regulatory Commission (Commission) the following tariff sheets to its FERC Gas Tariff, Original Volume No. 1, to become effective December 1, 1989.

Thirteenth Revised Sheet No. 10
Twelfth Revised Sheet No. 14
Sixth Revised Sheet No. 34
Alternate Thirteenth Revised Sheet No. 10
Alternate Twelfth Revised Sheet No. 14
Alternate Sixth Revised Sheet No. 34

Equitrans hereby submits its regularly scheduled Quarterly Purchased Gas Adjustment filing in accordance with § 154.308 and 154.304 of the Commission's regulations and section 19 of Equitrans' FERC Gas Tariff, Original Volume No. 1.

On October 11, 1989, Equitrans filed with the Commission in Docket No. RP90-10-000 a request for authority to track the recovery of firm transportation charges assessed to it by Texas Eastern Transmission Corporation ("TETCO") under Rate Schedule FT-1. Pending the outcome of the filing Equitrans hereby submits primary tariff sheets Thirteenth Revised Sheet No. 10, Twelfth Revised Sheet No. 14, Sixth Revised Sheet No. 34 to reflect these firm transportation charges in its Quarterly PGA. Equitrans is also filing alternate tariff sheets and workpapers to reflect the exclusion of firm transportation charges in the event the waiver is denied.

Equitrans states that a copy of its filing has been served upon its purchasers, interested state commissions, and upon each party on the service list of Docket No. CP86-676-000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before November 14, 1989. All such motions or protests will be considered by the Commission in determing the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-26592 Filed 11-13-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TQ90-1-25-000]

Panhandle Eastern Pipe Line Co.; Proposed Changes in FERC Gas Tariff

November 7, 1989.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on October 31, 1989, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Seventy-Fifth Revised Sheet No. 3-A
Fifty-Second Revised Sheet No. 3-B

The proposed effective date of these revised tariff sheets is December 1, 1989.

Panhandle states that these revised tariff sheets filed herewith reflect the following adjustments respecting Panhandle's D1 and D2 demand rates: (1) An increase of $1.88 for D1 and (2) a decrease of (0.24¢) for D2 pursuant to Section 18.4 of the General Terms and Conditions of Panhandle's tariff (pipeline suppliers' demand costs).

Panhandle states that the above-referenced tariff sheets are being filed in accordance with section 154.308 (quarterly PGA filing) of the Commission's Regulations and pursuant to sections 18.1 and 18.4 (Purchased Gas Demand Rate Adjustments by Pipeline Suppliers) of Panhandle's FERC Gas Tariff, Original Volume No. 1 to reflect the changes in Panhandle's jurisdictional rates effective December 1, 1989.

Panhandle states that it should be noted that by order dated June 30, 1989, issued in Docket No. RP88-185-000, the Commission accepted for filing section 25 (Seasonal Sales Program) of Panhandle's FERC Gas Tariff, Original Volume 1. Pursuant to section 25.31 thereof, sections 18.2, 18.3, 18.5, 18.6, 18.7 and 18.8 are suspended until reestablished in accordance with section 25.32. Accordingly, Panhandle is reflecting as a current adjustment only the changes in its D1 and D2 demand rates mentioned above.

Panhandle states that copies of its filing have been served on all jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP85-177-070, CP88-136-015, RP88-67-029]

Texas Eastern Transmission Corp.; Filing

November 7, 1989.

Take notice that on October 31, 1989, Texas Eastern Transmission Corporation (Texas Eastern) filed Service Agreements under Rate Schedules CD-1, CD-2, FT-1 and I between Texas Eastern, as Seller, and the customers listed in Appendix A (attached to the filing) as Buyers.

Texas Eastern states that this filing is in compliance with § 154.62 of the Commission's regulations (18 CFR 154.62 (1989)) and relates to the Joint Offer of Settlement approved by the Commission on September 29, 1988, which contemplated renomination by the Buyers of the level of firm sales and firm transportation. Texas Eastern states that on July 31, 1989, the Commission accepted Texas Eastern's tariff sheets filed on May 22, 1989, establishing new Rate Schedules CD-1 and CD-2 and revising Rate Schedule FT-1 effective August 1, 1989. Texas Eastern states that the service agreements are being filed to reflect the commencement of service under the new Rate Schedules CD-1 and CD-2 and the revised Rate Schedule FT-1, as well as to reflect renominated levels of firm sales and firm transportation service.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1989)). All such protests should be filed on or before November 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. MT88-6-002]

Texas Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

November 7, 1989.

Take notice that on October 31, 1989, Texas Gas Transmission Corporation (Texas Gas) tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume Nos. 1 and 2-A:

Original Volume No. 1

Seventh Revised Sheet No. 1
Second Revised Sheet No. 1A
First Revised Sheet No. 76A
Second Revised Sheet No. 126
First Revised Sheet No. 139A

Original Volume No. 2-A

Second Revised Sheet No. 1
Second Revised Sheet No. 60
First Revised Sheet No. 64
Second Revised Sheet No. 107
Second Revised Sheet No. 108
Original Sheet No. 109
First Revised Sheet No. 143
Original Sheet No. 144
Original Sheet No. 145
Original Sheet No. 146
Original Sheet No. 147
Original Sheet No. 148
Original Sheet No. 149
Original Sheet No. 149A
Original Sheet No. 149B
Original Sheet No. 149C
Original Sheet No. 149D
Original Sheet No. 149E
Original Sheet No. 149F
Original Sheet No. 149G
Original Sheet No. 149H
Original Sheet No. 149I
Original Sheet No. 149J
Original Sheet No. 149K

The revised tariff sheets are being filed to reflect the updating and transfer of all language relating to Order 497 appearing in Texas Gas's FERC Gas Tariff, Original Volume No. 1 to Original Volume No. 2-A, which is Texas Gas's current transportation tariff.

Additionally, Sheet No. 64 of Original Volume No. 2-A is being filed to correct a typographical error.

Copies of the revised tariff sheets are being mailed to Texas Gas's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 89-26595 Filed 11-13-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP90-25-001]

Transwestern Pipeline Co.; Correction to Filing

November 7, 1989.

Take notice that on October 31, 1989, Transwestern Pipeline Company (Transwestern) filed Substitute 3rd Revised Sheet No. 89 to its FERC Gas Tariff, Second Revised Volume No. 1.

Transwestern states that on October 30, 1989, Transwestern filed its TCR Interest Adjustment filing, Docket No. RP90-25, wherein, tariff sheets were submitted with a proposed effective date of December 1, 1989. Since the date of the aforementioned filing, Transwestern discovered a typographical error on 3rd Revised Sheet No. 89, which reflected an incorrect effective date of December 31, 1989. In the instant filing, Substitute 3rd Revised Sheet No. 89 reflects the intended effective date of December 1, 1989, which is the only change to the tariff sheet. Transwestern requests the above-referenced tariff sheet be substituted for 3rd Revised Sheet No. 89 filed on October 30, 1989.

BEST COPY AVAILABLE

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1989)). All such protests should be filed on or before November 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. CP82-457-023]

Williston Basin Interstate Pipeline Co.; Compliance Filing

November 7, 1989.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice that it issued DOE/FE Opinion and Order No. 195-B (Order 195-B) on October 31, 1989, authorizing Tennessee Gas Pipeline Company (Tennessee) to import up to 125,000 Mcf per day of Canadian natural gas for a period of two years beginning on October 31, 1990,[4] and up to 125,000 Mcf per day during the period November 1, 1990, through October 31, 2002.

II. Decision

On December 18, 1986, Tennessee filed an application in FERC Docket No. CP87-132-000, as amended on August 31, 1987, in Docket No. CP87-132-001, under section 7(c) of the Natural Gas

VOL 54 ISS 218 NOV 14 1989 UMI

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1989)). All such protests should be filed on or before November 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TQ90-1-30-000]

Trunkline Gas Co.; Proposed Changes in FERC Gas Tariff

November 7, 1989.

Take notice that Trunkline Gas Company (Trunkline) on October 31, 1989, tendered for filing the following revised tariff sheet to its FERC Gas Tariff, Original Volume No. 1:

Seventy-Third Revised Sheet No. 3-A

The proposed effective date of this revised tariff sheet is December 1, 1989.

Trunkline states that this revised tariff sheet filed herewith reflects a commodity rate decrease of (2.02 cent) per Dt in the projected purchased gas cost component.

Trunkline states that the above-referenced tariff sheet is being filed in accordance with § 154.308 (quarterly PGA filing) of the Commission's Regulations and pursuant to section 18 (Purchased Gas Adjustment Clause) of Trunkline's FERC Gas Tariff, Original Volume No. 1 to reflect the change in Trunkline's jurisdictional rates effective December 1, 1989.

Trunkline states that copies of this filing have been served on all jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. MT85-28-002]

Valero Interstate Transmission Co.; Proposed Changes in FERC Gas Tariff

November 7, 1989.

Take notice that Valero Interstate Transmission Company ("Vitco"), on October 27, 1989 tendered for filing the following tariff sheets, as required by Order No. 497, containing changes in operating personnel shared with its "affiliated marketers" and the mailing address of Vitco personnel responsible for receiving requests for transportation service:

FERC Gas Tariff, Original Volume No. 1

1st Revised Sheet No. 29.10
3rd Revised Sheet No. 51
4th Revised Sheet No. 54

Vitco states that the purpose of this filing is to update Vitco's tariff pursuant to the requirements of Order No. 497.

The proposed effective date for the above filing is December 1, 1989. Vitco requests a waiver of any Commission order or regulations which would prohibit implementation by December 1, 1989.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before November 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-487-023]

Williston Basin Interstate Pipeline Co.; Compliance Filing

November 7, 1989.

Take notice that on October 31, 1989, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, ND 58501, tendered for filing certain revised tariff sheets to First Revised Volume No. 1, Original Volume No. 1-A, Original Volume No. 1-B and Original Volume No. 2 of its FERC Gas Tariff.

Williston Basin states that revised tariff sheets were filed under protest and in compliance with the Office of Pipeline and Producer Regulations (OPPR), October 16, 1989 Letter Order directing Williston Basin to file revised tariff sheets and working papers reflecting the full storage rate base reduction of $6,860,435 for the period May 2, 1986 to the present. Williston Basin filed the instant tariff sheets under protest and states that it is appealing the instant Letter Order to the Commission.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such protests should be filed on or before November 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Persons that are already parties to this proceeding need not file a motion to intervene in this matter. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Fossil Energy

[ERA Docket No. 87-28-NG]

Tennessee Gas Pipeline Co.; Final Order Granting Authorization To Import Natural Gas and Record of Decision in Compliance With National Environmental Policy Act

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of final order granting authorization to import natural gas from Canada and record of decision.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice that it issued DOE/FE Opinion and Order No. 195-B (Order 195-B) on October 31, 1989, authorizing Tennessee Gas Pipeline Company (Tennessee) to import at Niagara Falls, New York, up to 125,000 Mcf per day of Canadian natural gas from KannGaz Producers Ltd. (KannGaz) through October 31, 2002. The gas is intended for system supply.

In conjunction with that order, FE is hereby issuing a Record of Decision (ROD) pursuant to the regulations of the Council on Environmental Quality (40 CFR part 1505) and the DOE's guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA).

A copy of Order 195-B issued in ERA Docket No. 87-28-NG,[1] is available for inspection and copying in the Natural Gas Division Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Carol Borgstrom, Director of Fuels Programs, Office of NEPA Project Assistance, U.S. Department of Energy, Forrestal Building, Room 3G-080, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-4600.

John Boyd, Office of Fuels Programs, Office of Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F-070, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-4523.

SUPPLEMENTARY INFORMATION:

I. Introduction

Pursuant to the Council on Environmental Quality regulations implementing the procedural provisions of NEPA,[2] and the DOE's guidelines [3] for compliance with NEPA, FE is issuing this Record of Decision on the Application filed by Tennessee on February 23, 1989, to remove the NEPA related conditions stated in Ordering Paragraphs B and D of DOE/ERA Opinion and Order No. 195 (Order 195) to the extent applicable to import up to 79,700 Mcf per day of natural gas during the period November 1, 1989, through October 31, 1990,[4] and up to 125,000 Mcf per day during the period November 1, 1990, through October 31, 2002.

II. Decision

On October 31, 1989, FE issued Order 195-B, under section 3 of the NGA granting Tennessee authority to import up to 79,700 Mcf per day of natural gas during the period November 1, 1989, through October 31, 1990, and up to 125,000 Mcf per day during the period November 1, 1990, through October 31, 2002.

The DOE participated as a cooperating agency during the preparation of and has adopted as DOE/EIS-0140 the Ocean State Power Project Final Environmental Impact Statement (FEIS) issued by the Federal Energy Regulatory Commission (FERC) on July 8, 1988.[5] FE used that FEIS as well as an independent review in assessing the environmental effects of granting the import.

III. Project Description

Tennessee proposes to construct and operate facilities on its Niagara Spur and on its 200 mainline in order to transport Canadian natural as to the proposed Ocean State Power (Ocean State) and Ocean State Power II (Ocean State II) electric generating plant units in Burrillville, Rhode Island and to take delivery of Canadian gas for system supply.[6]

On December 18, 1986, Tennessee filed an application in FERC Docket No. CP87-132-000, as amended on August 31, 1987, in Docket No. CP87-132-001, under section 7(c) of the Natural Gas Act (NGA), requesting authorization to provide a firm, long-term transportation service of 50,000 decatherms per day for Ocean State and to construct and operate compression and pipeline facilities in order to perform that service.

Additionally, on December 18, 1986, Tennessee filed an application in FERC Docket No. CP87-131-000, as amended on August 5, 1987, in Docket No. CP87-131-001 under section 7(c) of the NGA, requesting authorization to construct and operate compression facilities to increase the capacity of the Niagara Spur in order to take delivery of authorized Canadian imports for Tennessee's system supply. The compression would be added in two phases to accommodate the building of the volumes.

In Phase I, Tennessee proposed to operate on a permanent basis two idle compressors: The 3,500 horsepower (hp) compressor at Station 233, Livingston County, New York, along the 200 mainline and the 1,000 hp compressor at station 230-B, East Aurora, New York, at the interconnection of the Spur and the 200 mainline. Phase I was authorized by the FERC on June 30, 1987.[7]

In Phase II, which would start on November 1, 1989, Tennessee proposes to install check measurement and odorization facilities at the Niagara River; construct and operate an additional 1,200 hp compressor unit at Station 230-B; and construct and operate a 4,500 hp compressor station at Lockport, Niagara County, New York.[8]

IV. Background

On October 9, 1987, ERA issued DOE/ERA Opinion and Order 195 (Order 195) [9] authorizing Tennessee to import

---

[1] On January 6, 1989, the authority to regulate natural gas imports and exports was transferred from the Economic Regulatory Administration to the Assistant Secretary for Fossil Energy. DOE Delegation Order No. 0204-127 specifies the transferred functions (54 FR 11436, March 20, 1989).

[2] 42 U.S.C. 4321, *et seq.*

[3] 52 FR 47662, December 15, 1987.

[4] Tennessee certified that a copy of this modification request was served upon each party designated on the official service list for this docket pursuant to 19 CFR 590.107.

[5] FERC/EIS-0050.

[6] On November 19, 1986, Ocean State filed an application with the ERA, under section 3 of the NGA, for authorization to import up to 100,000 Mcf per day of Canadian natural gas over a 20-year term beginning on the date of the first delivery. The imported gas would fuel Ocean State's new power plant which it plans to build in Burrillville, Rhode Island. The plant will be comprised of two 250 megawatt combined cycle electrical generating units to be constructed sequentially.

On June 13, 1988, the ERA issued DOE/ERA Opinion and Order No. 243 (Order 243) in ERA Docket No. 86-62-NG (1 ERA Para. 70,778) conditionally authorizing Ocean State to import up to 100,000 Mcf per day of Canadian gas over a 20-year period. On September 14, 1988, after DOE's completion of its NEPA review, the ERA issued DOE/ERA Opinion and Order No. 243-A (1 ERA Para. 70,810), authorizing Ocean State to import up to 100,000 Mcf per day over a period of 20 years plus 180 days, beginning on the date of first delivery. On April 21, 1989, Ocean State and Ocean State II filed a joint application with FE to amend order 243-A. According to the joint application, at the time Order 243-A was issued, Ocean State planned to construct, own, and operate both combined units. Ocean State currently plans to develop only the first unit, Unit 1, which will utilize 50,000 Mcf of gas per day. To facilitate financing of the project, Ocean State II was formed to develop the second unit, Unit 2.

On September 22, 1989, FE issued DOE/ERA Opinion and Order No. 334 (Order 334) which amended Paragraph A of Order 243-A by authorizing Ocean State to import up to 50,000 Mcf per day of Canadian gas over a 20-year period plus 180 days beginning on the date of first delivery. Additionally, on September 22, 1989, FE issued DOE/ERA Opinion and Order 335 (Order 335) which authorized Ocean State II to import up to a total of 50,000 Mcf of Canadian gas over a 20-year period beginning on the date of first delivery.

[7] 43 FERC Para. 61,574.

[8] 45 FERC Para. 61,010.

[9] 1 ERA Para. 70,738. Order 195 was issued subsequent to publication by the ERA of a Notice of Application in the Federal Register (52 FR 23808, July 1987) and an unprotested proceeding in which 11 interventions were granted.

VOL 54 ISS 218 NO 14 1989 UMI

from Canada up to 5,000 Mcf of natural gas per day during the period November 1, 1987, through October 31, 1988. Order 195 conditionally authorized Tennessee to import up to 29,000 Mcf of Canadian gas per day during the period November 1, 1988, through October 31, 1989, up to 79,700 Mcf of Canadian gas per day during the period November 1, 1989, through October 31, 1990, up to 125,000 Mcf per day thereafter through October 31, 2002. The gas would be purchased from KannGaz Producers Ltd. (KannGaz) for Tennessee's system supply and would be delivered to Tennessee through an existing interconnection with TransCanada PipeLines Limited (TransCanada) near Niagara Falls, New York. The first year import volumes could be imported by Tennessee through existing pipeline facilities. The ERA conditioned authorization for imports above 5,000 Mcf per day on the issuance of a final ERA opinion and order after review by the DOE of FERC's environmental analysis and completion of the DOE's NEPA responsibilities in connection with the new facilities required for the transportation of the additional authorized volumes.

In DOE/ERA Opinion and Order No. 195–A issued on July 15, 1988, in ERA Docket No. 87–28–NG, the ERA authorized Tennessee to import from Canada up to 5,000 Mcf of natural gas per day during the period November 1, 1987, through October 31, 1988, and up to 29,900 Mcf per day during the period November 1, 1988, through October 31, 1989. Order 195–A reiterated Tennessee's conditional authorization to import up to 79,700 Mcf of Canadian gas per day during the period November 1, 1989, through October 31, 1990 and up to 125,000 Mcf per day thereafter through October 31, 2002.

The first and second-year import volumes could be imported by Tennessee through existing pipeline facilities. The ERA conditional authorization for imports above 29,900 Mcf per day as granted in Order 195–A, stated in ordering paragraph C that all other terms and conditions of Order 195 remained in effect, requiring the issuance of a final ERA opinion and order after review by the DOE of the FEIS being prepared by the FERC, assessing the impacts of the additional facilities proposed by Tennessee. These facilities would increase the pressure on Tennessee's Niagara Spur pipeline and northern No. 200 mainline to enable it to receive the remaining import volumes from KannGaz and move them from the Niagara Spur through the mainline. Subsequently, the review was completed, the FEIS was adopted by the DOE, and a final authorization approving the import was issued to Tennessee in Order 195–B.

V. Governmental Responsibilities

For tennessee's proposed project, the issuance of several major permits and authorizations are required. On May 22, 1987, Tennessee filed an application with the ERA in Docket No. 87–28–NG for authorization under section 3 of the NGA to import gas from Canada to be used for system supply. The FERC has the responsibility under sections 3 and 7 of the NGA, respectively, to approve the place of entry of imports whenever the import involves the construction of new domestic facilities and to certificate the pipeline facilities supplying the gas. Tennessee filed an application with the FERC on December 18, 1988, to construct and operate compression facilities to increase the capacity of the Niagara Spur pipeline to take delivery of these imports.[10]

VI. Description of Alternatives

FE has two alternative courses of action in processing Tennessee's application to import natural gas. It may grant the application (with or without conditions) or deny the application (no action). If the application is granted, Tennessee may proceed with the project as proposed, subject to any conditions imposed by FE and the FERC. If FE denied the application for importing gas to the Northeast U.S., Tennessee would need to look elsewhere for an alternative supply of gas to meet the expected future requirements of its customers in the region. Tennessee may be required to construct additional pipeline facilities in other locations to transport gas supplies from other sources. Failure to offset the projected supply deficiencies if alternative sources are not available could have an adverse impact on the economy of the Northeast, as well as diminish the quality of life.

It is significant that regardless of whether Tennessee's increased imports are approved, the facility additions proposed on the Niagara Spur in New York would still take place because they are necessary to provide previously approved Canadian gas imports to the Ocean State and Ocean State II electric generating facility units that will be built in Rhode Island. On September 14, 1988, the ERA authorized the Ocean State imports.[11] Although the Ocean State project and Tennessee's application are independent import projects, the two proposals are dependent on the expansion by Tennessee of its Niagara Spur. The FERC, on October 3, 1988, granted a certificate of public convenience and necessity authorizing Tennessee to construct and operate facilities on its Niagara Spur and on its mainline in order to transport Canadian gas to the Ocean State plant and to take delivery of gas for system supply.[12] The environmental impacts associated with Tennessee's proposed imports and Ocean State's approved imports would be no different because they are tied to the same Niagara Spur expansion.[13]

If FE granted the application, Tennessee could proceed to import the Canadian gas subject to the construction of the facilities approved by the FERC to transport said gas.

VII. Basis for Decision

The principal criteria in choosing whether to approve or disapprove a gas import is the requirement, under section 3 of the NGA, that an application to import gas must be approved unless, after opportunity for hearing, it is determined that the import is not consistent with the public interest. In addition, the environmental implications of granting or denying the import application must be considered pursuant to NEPA.

1. General Conclusions Orders 195, 195–A and 195–B

FE is guided in making its determination by the DOE's natural gas import policy guidelines.[14] Under this policy, the competitiveness of an import in the markets served is the primary consideration for meeting the public interest test. In the case of long-term arrangements such as this, need for the gas supply and security of supply are also important considerations.

FE concluded that the proposed import, which will be made under a market-responsive gas purchase contract containing a low take-or-pay obligation, price adjustment and periodic review provisions, meets the DOE guidelines concerning competitiveness, need for the supply, and security of supply, and is consistent with the public interest. In addition, it was determined that the import

[10] FERC Docket No. CP87–131–000, as amended on August 5, 1987, in Docket No. CP87–131–001 and Docket No. CP87–132–000, as amended on August 31, 1987, in Docket No. CP87–132–001.

[11] 1 ERA Para. 70,810.

[12] 45 FERC Para. 61,010, rehearing granted in part and denied in part, 45 FERC Para. 61,324, November 29, 1988.

[13] The environmental effects associated with the Niagara Spur facilities expansion were discussed in the ERA's Record of Decision for the Ocean State project (53 FR 36463, September 20, 1988).

[14] 49 FR 6684, February 22, 1984.

authorization would have limited environmental impacts and would be environmentally acceptable.

2. Environmental Determination

The FERC was the lead Federal agency in conducting an examination of the environmental effects of Tennessee's additional Niagara Spur facilities and in preparing the FEIS. Since both projects involve common facilities, the Ocean State FEIS addressed the environmental impacts of the transmission facilities proposed by Tennessee, as well as the new powerplant and ancillary facilities proposed by Ocean State. However, this Record of Decision deals solely with Tennessee's facilities. The DOE participated as a cooperating agency during the preparation of the FEIS, and utilized the FEIS (which was adopted as a DOE EIS) as well as an independent evaluation in assessing the environmental effects of granting or denying Tennessee's import authorization.

As stated in the FEIS "• • • generally, construction of pipeline loops parallel with, and adjacent to, existing pipelines is environmentally preferable. Parallel construction takes advantage of available cleared right-of-way during construction of the loop. This prevents the establishment of new pipeline corridors and minimizes the amount of required clearing. Preferable alternatives to paralleling an existing pipeline route must have significant environmental advantages over a parallel route, must be practicable to construct from an economic and engineering standpoint, and should pose no long-term operation or maintenance problems." [15]

The proposed modification to Tennessee's pipeline and its associated compressor facilities will be performed at various locations along the pipeline route. As the following discusson demonstrates, the compressor station changes proposed are the environmentally preferable construction alternative because they involve the least amount of environmental change to the affected areas.

The FEIS evaluated the following proposals by Tennessee for facilities to expand capacity on its Niagara Spur pipeline and No. 200 mainline to enable it to accommodate the scheduled buildup of contract volumes to be imported from KannGaz: (1) Expand measurement and odorization facilities at the Lewiston Meter Station at the Niagara River in Niagara County, New York; (2) convert from temporary to permanent operation the 3,500-hp gas compressor at Station 233 on Tennessee's mainline in Livingston County, New York; (3) convert from temporary to permanent operation the 1,000-hp gas compressor at Station 230B on Tennessee's mainline in East Aurora, New York, at the interconnection of the Niagara Spur and the mainline and add 1,200 hp of compression; and (4) construct a new 4,500-hp gas compressor station 230C at Lockport, in Niagara County, New York.

The impacts from modifying the Lewiston Meter Station are anticipated to be minimal. No additional buildings would be erected, and work would be confined to Tennesee's existing property. Aquatic and terrestrial ecological impacts are not anticipated, since no additional structures are proposed by Tennessee.

Compressor Station 233 would have only minimal impacts from construction and operation. No additional land is required for increasing the horsepower and there would be no effect on the cultural resources.

Compressor Station 230B is located in a rural residential area. Improvements to the station would be contained within land which is zoned industrial and is already owned by Tennesee. The station is bordered on one side by a park, but a 60-foot hill between the park and the site will shield the park from the compressor station. A trailer park also abuts the site. Access to the compressor station is along the road next to the trailer park. Traffic noise is expected to impact the park as equipment is moved in and out. There would be no effect on cultural resources.

Proposed Compressor Station 230C would be a new use for a currently cultivated parcel of land. It will be located near a residential and industrial area. Although construction traffic is expected to add to the traffic commuting to the nearby General Motors plant, the impacts are expected to be minimal.

Upgrading of existing compressor stations and construction of new compressor facilities are not expected to affect the aquatic environment since no streams are affected. None of the compressor stations would be considered a major source of air pollution and the impact on ambient air quality would not be significant.

The construction and permanent operation of the gas compression facilities would result in increases in ambient sound levels at these locations. Aside from some temporary noise due to construction, the permanent operation of the compressors may result in an annoyance to nearby residents. Tennessee has agreed to a FERC staff recommendation that its proposed compressor additions would not produce a day-night sound level (L_{dn}) of 555 decibels on the A-weighted scale (dBA) at the nearest noise-sensitive receptor, such as a residence or hospital. This can be achieved by installing mufflers, barriers, and other noise-suppression devices on the compressors.

The FEIS concluded that no significant environmental impacts would occur as a result of the proposed upgrades to Tennessee's existing gas compressor stations and construction of the new gas compressor station.

VIII. Considerations in Implementing the Decision

In the FEIS, the FERC staff specified only one mitigation measure which it considered appropriate for the construction and operation of the compressor stations. The FERC staff determined that if the compressors are designed to minimize noise levels, minimal environmental impacts would occur from the proposed compressor station additions. We note that the certificate authorizing Tennessee to construct and operate the facilities to transport gas for Ocean State and its system supply volumes was granted on the condition that Tennessee, among other things, implement the mitigation measure identified as No. 18, on page 5–32 of the Ocean State FEIS, which called for the proposed compressor station additions to be designed such that operational compressor noise shall not exceed L_{dn} of 55 dBA at any existing noise-sensitive areas nearby.[16] After construction is completed, Tennessee is required to submit to the FERC sound level surveys to verify that these performance goals have been achieved. Tennessee has agreed to the noise emission limitations.

IX. No-Action Alternative

As stated in Paragraph VI, Description of Alternatives, regardless of whether Tennessee's increased imports are approved, the facility additions proposed on the Niagara Spur in New York, would still take place because they are necessary to provide previously approved Canadian gas imports to Ocean State and Ocean State II. On September 14, 1988, the ERA authorized the Ocean State imports.

Although the Ocean State project and Tennessee's application are independent import projects, the two proposals are dependent on the expansion by Tennessee of its Niagara Spur. The FERC, on October 3, 1988, granted a certificate of public convenience and necessity authorizing Tennessee to construct and operate facilities on its Niagara Spur and on its

[15] Page 3–133, DOE/EIS–0140.

[16] *See supra* note 8.

mainline in order to transport Canadian gas to the Ocean State plant and to take delivery of gas for system supply. The environmental impacts associated with Tennessee's proposed imports and

(Tennessee) to import at Niagara Falls, New York, up to 25,000 Mcf per day of Canadian natural gas from TransCanada Pipelines Limited (TransCanada) through October 31,

per day during the period November 1, 1990, through October 31, 2002.

II. Decision

On October 31, 1989, FE issued Order

On December 16, 1988, Tennessee filed an application in FERC Docket No. CP87–132–000, as amended on August 31, 1987, in Docket No. CP87–132–001, under section 7(c) of the Natural Gas

1990, and up to 25,000 Mcf per day thereafter through October 31, 2002. The gas would be purchased from TransCanada for Tennessee's systems supply and would be delivered to

to the Northeast U.S., Tennessee would need to look elsewhere for an alternative supply of gas to meet the expected future requirements of its customers in the region. Tennessee may

VOL 54 ISS 218 NO 14 1989 UMI

mainline in order to transport Canadian gas to the Ocean State plant and to take delivery of gas for system supply. The environmental impacts associated with Tennessee's proposed imports and Ocean State's approved imports would be no different because they are tied to the same Niagara Spur expansion.

X. Conclusion

The decision whether to authorize Tennessee to import the conditioned volumes of natural gas has been evaluated against the potential environmental impacts. Implementing the specific mitigation measure identified in the FEIS would minimize the social, economic, and environmental effects and promote the positive effects of the requested import project. These additional import volumes significantly would enhance Tennessee's ability to meet the future supply requirements of its customers. The proposed facilities represent the environmentally preferable construction alternative. The FEIS identifies no significant environmental impacts resulting from the Tennessee construction proposals. Authorizing the increased volumes would have no environmental impact since the facilities would be built regardless of DOE's decision. Accordingly, FE has decided to grant Tennessee authority to import the full scheduled contract volumes of Canadian gas under its arrangement with KannGaz and determined that this decision is not inconsistent with the public interest under section 3 of the NGA.

Issued in Washington, DC, on October 31, 1989.

Constance L. Buckley,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

[ERA Docket No. 87-53-NG]

Tennessee Gas Pipeline Co.; Final Order Granting Authorization To Import Natural Gas and Record of Decision In Compliance With National Environmental Policy Act

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of final order granting authorization to import natural gas from Canada and record of decision.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice that it issued DOE/FE Opinion and Order No. 254-A (Order 254-A) on October 31, 1989, authorizing Tennessee Gas Pipeline Company (Tennessee) to import at Niagara Falls, New York, up to 25,000 Mcf per day of Canadian natural gas from TransCanada Pipelines Limited (TransCanada) through October 31, 2002. The gas is intended for system supply.

In conjunction with that order, FE is hereby issuing a Record of Decision (ROD) pursuant to the regulations of the Council on Environmental Quality (40 CFR part 1505) and the DOE's guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA).

A copy of Order 254-A issued in ERA Docket No. 87-53-NG [1] is available for inspection and copying in the Natural Gas Division Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Carol Borgstrom, Director, Office of NEPA Project Assistance, U.S. Department of Energy, Forrestal Building, Room 3G-060, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-4600

John Boyd, Office of Fuels Programs, Office of Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F-070, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-4523.

SUPPLEMENTARY INFORMATION:

I. Introduction

Pursuant to the Council on Environmental Quality regulations implementing the procedural provisions of the NEPA [2] and the DOE's guidelines [3] for compliance with NEPA, FE is issuing this Record of Decision on the Application filed by Tennessee on April 4, 1989, to remove the NEPA related conditions stated in Ordering Paragraphs B and F of DOE/ERA Opinion and Order No. 254 (Order 254) to the extent applicable to import up to 20,300 Mcf per day of natural gas during the period November 1, 1989, through October 31, 1990,[4] and up to 25,000 Mcf per day during the period November 1, 1990, through October 31, 2002.

II. Decision

On October 31, 1989, FE issued Order 254-A, under section 3 of the NGA granting Tennessee authority to import up to 20,300 Mcf per day of natural gas during the period November 1, 1989, through October 31, 1990, and up to 25,000 Mcf per day during the period November 1, 1990, through October 31, 2002.

The DOE participated as a cooperating agency during the preparation of and has adopted as DOE/EIS-0140 the Ocean State Power Project Final Environmental Impact Statement (FEIS) issued by the Federal Energy Regulatory Commission (FERC) on July 8, 1988 [5] FE used that FEIS as well as an independent review in assessing the environmental effects of granting the import.

III. Project Description

Tennessee proposes to construct and operate facilities on its Niagara Spur and on its 200 mainline in order to transport Canadian natural gas to the proposed Ocean State Power (Ocean State) and Ocean State Power II (Ocean State II) electric generating plant units in Burrillville, Rhode Island and to take delivery of Canadian gas for system supply.[6]

[1] On January 6, 1989, the authority to regulate natural gas imports and exports was transferred from the Economic Regulatory Administration to the Assistant Secretary for Fossil Energy. DOE Delegation Order No. 0204-127 specifies the transferred functions (54 FR 11436, March 20, 1989).

[2] 42 U.S.C. 4321, *et seq.*

[3] 52 FR 47662, December 15, 1987.

[4] Tennessee certified that a copy of this modification request was served upon each party designated on the official service list for this docket pursuant to 19 CFR 590.107.

[5] FERC/EIS-0060.

[6] On November 19, 1986, Ocean State filed an application with the ERA, under section 3 of the NGA, for authorization to import up to 100,000 Mcf per day of Canadian natural gas over a 20-year term beginning on the date of the first delivery. The imported gas would fuel Ocean State's new power plant which it plans to build in Burrillville, Rhode Island. The plant will be comprised of two 250 megawatt combined cycle electrical generating units to be constructed sequentially.

On June 13, 1988, the ERA issued DOE/ERA Opinion and Order No. 243 (Order 243) in ERA Docket No. 86-62-NG (1 ERA Para. 70,778) conditionally authorizing Ocean State to import up to 100,000 Mcf per day of Canadian gas over a 20-year period. On September 14, 1988, after DOE's completion of its NEPA review, the ERA issued DOE/ERA Opinion and Order No. 243-A (1 ERA Para. 70,810), authorizing Ocean State to import up to 100,000 Mcf per day over a period of 20 years, plus 180 days, beginning on the date of first delivery. On April 21, 1989, Ocean State and Ocean State II filed a joint application with FE to amend Order 243-A. According to the joint application, at the time Order 243-A was issued, Ocean State planned to construct, own, and operate both combined units. Ocean State currently plans to develop only the first unit, Unit 1, which will utilize 50,000 Mcf of gas per day. To facilitate financing of the project, Ocean State II was formed to develop the second unit, Unit 2.

On September 22, 1989, FE issued DOE/ERA Opinion and Order No. 334 (Order 334) which amended Paragraph A of Order 243-A by authorizing Ocean State to import up to 50,000 Mcf per day of Canadian gas over a 20-year period plus

Continued

On December 18, 1986, Tennessee filed an application in FERC Docket No. CP87-132-000, as amended on August 31, 1987, in Docket No. CP87-132-001, under section 7(c) of the Natural Gas Act (NGA), requesting authorization to provide a firm, long-term transportation service of 50,000 decatherms per day for Ocean State and to construct and operate compression and pipeline facilities in order to perform that service.

Additionally, on December 18, 1986, Tennessee filed an application in FERC Docket No. CP87-131-000, as amended on August 5, 1987, in Docket No. CP87-131-001 under section 7(c) of the NGA, requesting authorization to construct and operate compression facilities to increase the capacity of the Niagara Spur in order to take delivery of authorized Canadian imports for Tennessee's system supply. The compression would be added in two phases to accommodate the building of the volumes.

In Phase I, Tennessee proposed to operate on a permanent basis two idle compressors: the 3,500 horsepower (hp) compressor at Station 233, Livingston County, New York, along the 200 mainline and the 1,000 hp compressor at station 230-B, East Aurora, New York, at the interconnection of the Spur and the 200 mainline. Phase I was authorized by the FERC on June 30, 1987.[7]

In Phase II, which would start on November 1, 1989, Tennessee proposes to install check measurement and odorization facilities at the Niagara River; constuct and operate an additional 1,200 hp compressor unit at Station 230-B; and construct and operate a 4,500 hp compresor station at Lockport, Niagara County, New York. [8]

IV. Background

In DOE/ERA Opinion and Order No. 254 issued on July 15, 1988, in ERA Docket No. 87-53-NG, the (ERA) Economic Regulatory Administration (ERA) authorized Tennessee to import from Canada up to 5,000 Mcf of natural gas per day during the period November 1, 1987, through October 31, 1988, and up to 10,100 Mcf per day during the period November 1, 1988, through October 31, 1989. Order 254 conditionally authorized Tennessee to import up to 20,300 Mcf of Canadian gas per day during the period November 1, 1989, through October 31, 1990, and up to 25,000 Mcf per day thereafter through October 31, 2002. The gas would be purchased from TransCanada for Tennessee's systems supply and would be delivered to Tennessee at the international boundary near Niagara Falls, New York.

The first- and second-year import volumes could be imported by Tennessee through existing pipeline facilities. The ERA conditioned authorization for imports have 10,100 Mcf per day on the issuance of a final ERA opinion and order after review by the DOE of the FEIS being prepared by the FERC, assessing the impacts of the additional facilities proposed by Tennessee. These facilities would increase the pressure on Tennessee's Niagara Spur pipeline and northern No. 200 mainline to enable it to receive the remaining import volumes from TransCanada and move them from the Niagara Spur through the mainline. Subsequently, the review was completed, the FEIS was adopted by the DOE, and a final authorization approving the import was issued to Tennessee in Order 254-A.

V. Governmental Responsibilities

For Tennessee's proposed project, the issuance of several major permits and authorizations are required. On September 29, 1987, Tennessee filed an application with the ERA in Docket No. 87-53-NG for authorization under section 3 of the NGA to import gas from Canada to be used for system supply. The FERC has the responsibility under sections 3 and 7 of the NGA, respectively, to approve the place of entry for imports whenever the import involves the construction of new domestic facilities and to certificate the pipeline facilities supplying the gas. Tennessee filed an application with the FERC on December 18, 1986, to construct and operate compression facilities to increase the capacity of the Niagara Spur pipeline to take delivery of these imports.[9]

VI. Description of Alternatives

FE has two alternative courses of action in processing Tennessee's application to import natural gas. It may grant the application (with or without conditions) or deny the application (no action). If the application is granted, Tennessee may proceed with the project as proposed, subject to any conditions imposed by FE and the FERC. If FE denied the application for importing gas to the Northeast U.S., Tennessee would need to look elsewhere for an alternative supply of gas to meet the expected future requirements of its customers in the region. Tennessee may be required to construct additional pipeline facilities in other locations to transport gas supplies from other sources. Failure to offset the projected supply deficiencies if alternative sources are not available could have an adverse impact on the economy of the Northeast, as well as diminish the quality of life.

It is significant that regardless of whether Tennessee's increased imports are approved, the facility additions proposed on the Niagara Spur in New York would still take place because they are necessary to provide previously approved Canadian gas imports to the Ocean State and Ocean State II electric generating facility units that will be built in Rhode Island. On September 14, 1988, the ERA authorized the Ocean State imports.[10] Although the Ocean State project and Tennessee's application are independent import projects, the two proposals are dependent on the expansion by Tennessee of its Niagara Spur. The FERC, on October 3, 1988, granted a certificate of public convenience and necessity authorizing Tennessee to construct and operate facilities on its Niagara Spur and on its mainline in order to transport Canadian gas to the Ocean State plant and to take delivery of gas for system supply.[11] The environmental impacts associated with Tennessee's proposed imports and Ocean State's approved imports would be no different because they are tied to the same Niagara Spur expansion.[12]

If FE granted the application, Tennessee could proceed to import the Canadian gas subject to the construction of the facilities approved by the FERC to transport said gas.

VII. Basis for Decision

The principal criteria in choosing whether to approve or disapprove a gas import is the requirement, under section 3 of the NGA, that an application to import gas must be approved unless, after opportunity for hearing, it is determined that the import is not consistent with the public interest. In addition, the environmental implications of granting or denying the import

180 days beginning on the date of first delivery. Additionally, on September 22, 1989, FE issued DOE/ERA Opinion and Order 335 (Order 335) which authorized Ocean State II to import up to a total of 50,000 Mcf of Canadian gas over a 20-year period beginning on the date of first delivery.

procedure set forth in *Crown Central Petroleum Corp.*, 18 DOE ¶ 85,326 (1988). The total amount of refunds approved in this Decision was $31,066, representing $26,018 in principal plus $5,048 in

VOL 54 ISS 218 NO 14 1989 UMI

application must be considered pursuant to NEPA.

1. General Conclusions Orders 254 and 254–A

FE is guided in making its determination by the DOE's natural gas import policy guidelines.[13] Under this policy, the competitiveness of an import in the markets served is the primary consideration for meeting the public interest test. In the case of long-term arrangements such as this, need for the gas supply and security of supply are also important considerations.

FE concluded that the proposed import, which will be made under a market-responsive gas purchase contract containing a low take-or-pay obligation, price adjustment and periodic review provisions, meets the DOE guidelines concerning competitiveness, need for the supply, and security of supply, and is consistent with the public interest. In addition, it was determined that the import authorization would have limited environmental impacts and would be environmentally acceptable.

2. Environmental Determination

The FERC was the lead Federal agency in conducting an examination of the environmental effects of Tennessee's additional Niagara Spur facilities and in preparing the FEIS. Since both projects involve common facilities, the Ocean State FEIS addressed the environmental impacts of the transmission facilities proposed by Tennessee, as well as the new powerplant and ancillary facilities proposed by Ocean State. However, this Record of Decision deals solely with Tennessee's facilities. The DOE participated as a cooperating agency during the preparation of the FEIS, and utilized the FEIS (which was adopted as a DOE EIS) as well as an independent evaluation in assessing the environmental effects of granting or denying Tennessee's import authorization.

As stated in the FEIS "* * * generally, construction of pipeline loops parallel with, and adjacent to, existing pipelines is environmentally preferable. Parallel construction takes advantage of available cleared right-of-way during construction of the loop. This prevents the establishment of new pipeline corridors and minimizes the amount of required clearing. Preferable alternatives to paralleling an existing pipeline route must have significant environmental advantages over a parallel route, must be practicable to construct from an economic and engineering standpoint and should pose no long-term operation or maintenance problems." [14]

The proposed modifications to Tennessee's pipeline and its associated compressor facilities will be performed at various locations along the pipeline route. As the following discussion demonstrates, the compressor station changes proposed are the environmentally preferable construction alternative because they involve the least amount of environmental change to the affected areas.

The FEIS evaluated the following proposals by Tennessee for facilities to expand capacity on its Niagara Spur Pipeline and No. 200 mainline to enable it to accommodate the scheduled buildup of contract volumes to be imported from TransCanada: (1) Expand measurement and odorization facilities at the Lewiston Meter Station at the Niagara River in Niagara County, New York; (2) convert from temporary to permanent operation the 3,500-horsepower (hp) gas compressor at Station 233 on Tennessee's mainline in Livingston County, New York; (3) convert from temporary to permanent operation the 1,000-hp gas compressor at Station 230B on Tennessee's mainline in East Aurora, New York, at the interconnection of the Niagara Spur and the mainline and add 1,200 hp of compression; and (4) construct a new 4,500-hp gas compressor station 230C at Lockport, in Niagara County, New York.

The impacts from modifying the Lewiston Meter Station are anticipated to be minimal. No additional buildings would be erected, and work would be confined to Tennessee's existing property. Aquatic and terrestrial ecological impacts are not anticipated, since no additional structures are proposed by Tennessee.

Compressor Station 233 would have only minimal impacts from construction and operation. No additional land is required for increasing the horsepower and there would be no effect on the cultural resources.

Compressor Station 230B is located in a rural residential area. Improvements to the station would be contained within land which is zoned industrial and is already owned by Tennessee. The station is bordered on one side by a park, but a 60-foot hill between the park and the site will shield the park from the compressor station. A trailer park also abuts the site. Access to the compressor station is along the road next to the trailer park. Traffic noise is expected to impact the park as equipment is moved in and out. There would be no effect on cultural resources.

Proposed Compressor Station 230C would be a new use for a currently cultivated parcel of land. It will be located near a residential and industrial area. Although construction traffic is expected to add to the traffic commuting to the nearby General Motors plant, the impacts are expected to be minimal.

Upgrading of existing compressor stations and construction of new compressor facilities are not expected to affect the aquatic environment since no streams are affected. None of the compressor stations would be considered a major source of air pollution and the impact on ambient air quality would not be significant.

The construction and permanent operation of the gas compression facilities would result in increases in ambient sound levels at these locations. Aside from some temporary noise due to construction, the permanent operation of the compressors may result in an annoyance to nearby residents. Tennessee has agreed to a FERC staff recommendation that its proposed compressor additions would not produce a day-night sound level (L_{dn}) of 55 decibels on the A-weighted scale (dBA) at the nearest noise-sensitive receptor, such as a residence or hospital. This can be achieved by installing mufflers, barriers, and other noise-suppression devices on the compressors.

The FEIS concluded that no significant environmental impacts would occur as a result of the proposed upgrades to Tennessee's existing gas compressor stations and construction of the new gas compressor station.

VIII. Considerations in Implementing the Decision

In the FEIS, the FERC staff only one mitigation measure which it considered appropriate for the construction and operation of the compressor stations. The FERC staff determined that if the compressors are designed to minimize noise levels, minimal environmental impacts would occur from the proposed compressor station additions. We note that the certificate authorizing Tennessee to construct and operate the facilities to transport gas for Ocean State and its system supply volumes was granted on the condition that Tennessee, among other things, implement the mitigation measure identified as No. 18, on page 5–32 of the Ocean State FEIS, which called for the proposed compressor station additions to be designed such that operational compressor noise shall not exceed L_{dn} of 55 dBA at any existing noise-sensitive areas nearby.[15] After construction is completed, Tennessee is required to submit to the FERC sound level surveys to verify that these performance goals have been achieved. Tennessee has agreed to the noise emission limitations.

IX. No-Action Alternative

As previously noted in paragraph VI above, regardless of whether Tennessee's increased imports are approved, the facility additions proposed on the Niagara Spur in New York, would still take place because they are necessary to provide previously approved Canadian gas imports to Ocean State and Ocean State II. On September 14, 1988, the ERA authorized the Ocean State imports. Although the Ocean State project and Tennessee's application are independent import projects, the two proposals are dependent on the expansion by Tennessee of its Niagara Spur. The FERC, on October 3, 1988, granted a certificate of public convenience and necessity authorizing Tennessee to construct and operate facilities on its Niagara Spur and on its mainline in order to transport Canadian gas to the Ocean State plant and to take delivery of gas for system supply. The environmental impacts associated with Tennessee's proposed imports and Ocean State's approved imports would be no different because they are tied to the same Niagara Spur expansion.

X. Conclusion

The decision whether to authorize Tennessee to import the conditioned volumes of natural gas has been evaluated against the potential environmental impacts. Implementing the specific mitigation measure identified in the FEIS would minimize the social, economic, and environmental effects and promote the positive effects of the requested import project. These additional import volumes significantly would enhance Tennessee's ability to meet the future supply requirements of its customers. The proposed facilities represent the environmentally preferable construction alternative. The FEIS identifies no significant environmental impacts resulting from the Tennessee construction proposals. Authorizing the increased volumes would have no environmental impact since the facilities would be built regardless of DOE's action. Accordingly, FE has decided to grant Tennessee authority to import the full scheduled contract volumes of Canadian gas under its arrangement with TransCanada and determined that this decision is not inconsistent with the public interest under section 3 of the NGA.

Office of Hearings and Appeals

Issuance of Decisions and Orders, Office of Hearings and Appeals, Week of October 2 through October 6, 1989

During the week of October 2 through October 6, 1989 the decisions and orders summarized below were issued with respect to applications for refund filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

REFUND APPLICATIONS

Atlantic Richfield Company/City of Dixon Water Department, et al., 10/3/89 RF304–1584 et al.

The DOE issued a Decision and Order concerning nine Applications for Refund filed in the Atlantic Richfield Company (ARCO) special refund proceeding. Because each of the applicants was a public utility, each was presumed injured by the alleged overcharges. In addition, each of the applicants documented its volume of ARCO purchases and requested a refund of $5,000 or less. The refunds granted in this Decision totalled $3,966, including $981 in interest.

Catskill Central School District, 10/3/89 RA272–13

The DOE issued a Supplemental Order adjusting the refund amount granted to Catskill Central School District in *E.E. Guthrie, et al.*, 19 DOE ¶ , Case Nos. RF272–55012, *et al.*, (August 2, 1989). To correct our error, we granted Catskill Central School District a supplemental refund of $34.

Crown Central Petroleum Corporation/ R.L. Jordan Oil Company of SC, The Sommers Company, 10/3/89 RF313–222, RF313–282

The DOE issued a Decision and Order considering applications filed by two purchasers of Crown refined petroleum products in the Crown Central Petroleum Corporation special refund proceeding. Each applicant was found to be eligible for a refund based on the volume of products it purchased from Crown. The refund applications were granted using a presumption of injury procedure set forth in *Crown Central Petroleum Corp.*, 18 DOE ¶ 85,326 (1988). The total amount of refunds approved in this Decision was $31,086, representing $26,018 in principal plus $5,048 in accrued interst.

Delta Woodside Industries, Mount Vernon Mills, Inc., Graniteville Co., 10/5/89 RF272–9816, RD272–9816, RF272–9900, RD272–9900, RF272–11241, RD272–11241

Three manufacturers of textile products filed applications for refund as end-users of refined petroleum products in the Subpart V crude oil refund proceeding. A group of state governments filed objections to the claims, and related motions for discovery. After considering the claims and the objections, OHA determined that the states had failed to produce any convincing evidence to show that the three textile makers had been able to pass on the crude oil overcharges to their customers, and granted the refund applications. The purported economic "evidence" submitted by the states consisted of theoretical generalizations that were not linked to any aspect of the applicants' actual business operations. As in previous decisions, OHA rejected the states' contention that industry-wide data, or a record of profitable operations during the controls period, constituted sufficient evidence to rebut the presumption that end-users such as the three textile firms were injured by crude oil overcharges. The refunds approved totalled $96,619. The states' motions for discovery were denied.

Exxon Corporation/Boston Gas Company, 10/2/89 RF307–185

The DOE issued a Decision and Order concerning an Application for Refund filed by Boston Gas Company in the Exxon Corporation special refund proceeding. Boston Gas, a public utility, purchased products directly from Exxon, and was found to be eligible to receive a refund equal to its full allocable share. Boston Gas will also be required to pass through the entire refund to its customers. The sum of the refund granted in this Decision is $59,825 ($48,777 principal plus $11,048 interest).

Exxon Corporation/Cove Exxon et al., 10/3/89 RF307–1430 et al.

The DOE issued a Decision and Order concerning 45 Applications for Refund filed in the Exxon Corporation special refund proceeding. Each of the applicants was a retailer of Exxon products whose allocable share is less than $5,000. All of the applicants disagreed with the gallonage information recorded on their Exxon

VOL 54 ISS 218 NO 14 1989 UMI

volume sheets, and submitted alternative gallonage figures which they requested that the OHA accept either in lieu of or in combination with Exxon's figures. The OHA agreed to accept the applicants' figures because they were taken directly from the firm's actual Exxon invoices or monthly sales records from the consent order period. The DOE determined that each applicant was eligible to receive a refund equal to its full allocable share. The sum of the refunds granted in this Decision is $52,204 ($42,564 principal plus $9,640 interest).

Exxon Corporation/Earl Hawley Oil Co., 10-3-89 RF307-10061

The DOE issued a Supplemental Decision and Order in the Exxon Corporation special refund proceeding regarding Earl Hawley Oil Co. (Hawley). In *Exxon Corp./Jones Exxon*, Case Nos. RF307-7200 *et al.* (September 8, 1989), Hawley, Case No. RF307-7253, was granted a refund of $2,504 ($2,056 principal plus $488 interest) based on its purchases of Exxon refined petroleum products. However, the DOE determined that because the claimant in this case, Wayne Oil Co., Inc., did not purchase Hawley until after the end of the consent order period, it was not the rightful recipient of this refund. Accordingly, the refund granted to this claimant was rescinded.

Exxon Corporation/Euliss Oil Co., Inc., et al., 10/5/89 RF307-1185 et al.

The DOE issued a Decision and Order concerning 12 Applications for Refund filed in the Exxon Corporation special refund proceeding. Each of the applicants was a reseller of Exxon products whose allocable share is greater than $5,000. Instead of making an injury showing to receive its full allocable share, each applicant elected to limit its claim to $5,000 or 40 percent of its allocable share, whichever is greater. The sum of the refunds granted in this Decision is $67,112 ($54,717 principal plus $12,395 interest).

Exxon Corporation/John Anderson et al., 10/5/89 RF307-7914 et al.

The DOE issued a Decision and Order concerning 45 Applications for Refund filed in the Exxon Corporation special refund proceeding. Each of the applicants purchased directly from Exxon and was either an end-user or a reseller whose allocable share is less than $5,000. The DOE determined that each applicant was eligible to receive a refund equal to its full allocable share. The sum of the refunds granted in this Decision is $46,674 ($36,054 principal and $6,620 interest).

Exxon Corporation/Putnam Oil Co., McCleary Oil Co., 10/5/89 RF307-4351, RF307-4378

The DOE issued a Decision and Order concerning two Applications for Refund filed by Putnam Oil Co. and McCleary Oil Co. in the Exxon Corporation special refund proceeding. Each applicant's allocable share exceeded $5,000. Since neither applicant elected to make a showing of injury, each applicant was eligible to receive the larger of $5,000 or 40 percent of its allocable share up to $50,000. For Putnam 40 percent was greater, and for McCleary $5,000 was greater. The sum of the refunds granted in this Decision is $15,437, representing $12,586 in principal and $2,851 in interest.

Exxon Corporation/Ripple Oil Company, Inc., 10/6/89 RF307-10065

The DOE issued a Supplemental Decision and Order to Ripple Oil Company, Inc. in the Exxon proceeding to correct an interest calculation in an earlier decision. In the original Decision and Order, Ripple was granted a refund of $6,509 ($5,000 principal plus $1,509 interest). The DOE determined that the correct amount of the refund was $6,174 ($5,000 principal plus $1,174 interest).

Gabor Trucking, Inc., W.C. McQuaide, Inc., 10/6/89 RF272-7289, RD272-7289, RF272-7696, RD272-7696

The DOE issued a Decision and Order granting refunds from crude oil overcharge funds to two applicants based on their respective purchases of refined petroleum products during the period August 19, 1973 through January 7, 1981. A range of twenty-eight states and two territories of the United States (the States) filed identical, consolidated pleadings objecting to and commenting on the applications. The only evidence submitted by the States was several newspaper articles indicating that Interstate Commerce Commission policies permitted trucking firms to increase their rates and consequently pass on any overcharges. The DOE determined that the evidence offered by the States was insufficient to rebut the presumption of end-user injury and that the applicants should receive a refund. In addition, Motions for Discovery filed by the States were denied. The sum of the refunds granted in this Decision is $15,533.

Gulf Oil Corporation/Byrom Oil Company, Inc., 10/03/89 RF300-5324

The DOE issued a Decision and Order concerning an Application for Refund submitted in the Gulf Oil Corporation special refund proceeding. The application was approved using a presumption of injury. The total refund granted in this Decision is $6,255.

Gulf Oil Corporation/Comm & Mt. Hood Gulf, Gulf Service Center, Inc., Commonwealth Gulf, 10/2/89 RF300-8256, RF300-8257, RF300-8258

The DOE issued a Decision and Order concerning three Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Because the firms were under common ownership during the consent order period, and because their combined allocable share exceeds $5,000, it is appropriate to consolidate these Applications when applying the presumptions of injury. The total refund granted in this Decision, inclusive of interest, is $6,719.

Gulf Oil Corporation/Consolidated Edison Co. of N.Y., Inc., 10/2/89 RF300-8955

The DOE issued a Decision and Order concerning one Application for Refund submitted by the Consolidated Edison Co. of N.Y., Inc. (Con-Ed) in the Gulf Oil Corporation special refund proceeding. The application was approved using a presumption of injury. As an end user of Gulf products, Con-Ed was granted a refund based on its full allocable share. Under the procedures established in *Gulf Oil Corporation*, 16 DOE ¶ 85,381 (1987) for regulated utilities, Con-Ed also certified that it would notify the appropriate regulatory body of any refund received, and pass through any refund received to its customers. The amount of the refund granted in this Decision, including accrued interest, is $72,970.

Gulf Oil Corporation/Damascus Gulf Service Station, et al., 10/5/89 RF300 418 et al.

The DOE issued a Decision and Order concerning six Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. The applications were approved using a presumption of injury. The sum of the refunds granted is $19,974.

Gulf Oil Corporation/Don's I-10 Gulf, et al., 10/3/89 RF300-4, et al.

The DOE issued a Decision and Order concerning nine Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision, including accrued interest, is $13,231.

Gulf Oil Corporation/Felisko's Gulf Service, et al., 10/5/89 RF300-8868, et al.

The DOE issued a Decision and Order concerning 53 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision, including accrued interest, is $105,516.

Gulf Oil Corporation/Five County Farmers Association, 10/5/89 RF300-7594

The DOE issued a Decision and Order concerning an Application for Refund submitted by Five County Farmers Association in the Gulf Oil Corporation special refund proceeding. Five County was granted a refund based on its full allocable share. Under the procedures established in *Gulf Oil Corporation*, 16 DOE ¶ 85,381 (1987) for agricultural cooperatives. The refund granted in the Decision is $1,262.

Gulf Oil Corporation/Frank's Gulf, et al., 10/5/89 RF300-9112, et al.

The DOE issued a Decision and Order concerning 30 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision, including interest, is $85,612.

Gulf Oil Corporation/Hylton's Drive in Grocery, et al., 10/2/89 RF300-10049, et al.

The DOE issued a Decision and Order concerning 50 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using the small claims presumption of injury. The sum of the refunds granted in this Decision, including accrued inteerest, is $113,451.

Gulf Oil Corporation/John's Gulf, et al., 10/2/89 RF300-8800 et al.

The DOE issued a Decision and Order concerning 33 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision, including interest, is $59,144

Gulf Oil Corporation/L.P. Service Co., et al., 10/5/89 RF300-10503, et al.

The DOE issued a Decision and Order concerning five Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision, including interest, is $40,603.

Gulf Oil Corporation/Schultz Oil Company, Inc. 10/5/89 RF300-5230

The DOE issued a Decision and Order concerning an Application for Refund submitted in the Gulf Oil Corporation special refund proceeding. The application was approved using a presumption of injury. The total refund granted in this Decision is $6,719.

Gulf Oil Corporation/Steele's Riverview Gulf, et al., 10/5/89 RF300-9166, et al.

The DOE issued a Decision and Order concerning 18 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision, including interest, is $37,923.

Nabisco Brands, Inc., 10/3/89 RF272-11245, RD272-11245

Nabisco Brands, Inc., a manufacturer of retail packaged foods, filed an application for refund as an end-user of refined petroleum products in the Subpart V crude oil refund proceeding. A group of state governments filed a statement of objections to Nabisco's claim, and a related motion for discovery. After considering the claim and the objections, OHA determined that the states had failed to produce any convincing evidence to show that Nabisco had been able to pass on the crude oil overcharges to its customers, and granted the refund application. The purported economic "evidence" submitted by the states consisted of theoretical generalizations that were not linked to any aspect of the applicant's actual business operations. As in previous decisions, OHA rejected the states' contention that industry-wide data, or a record of profitable operations during the controls period, constituted sufficient evidence to rebut the presumption that end-users such as Nabisco were injured by crude oil overcharges. The refund approved was $263,122. The states' motion for discovery was denied.

OKC Corporation/Kansas, 10/3/89 RQ13-531

The DOE issued a Decision and Order granting the second-stage refund application filed by the State of Kansas in the OKC Corporation special refund proceeding. Kansas requested a total of $1,090,157 ($406,693 in principal plus $683,464 in interest) for three programs. For the first, the State wished to spend $1,080,157 to purchase 67 new vans for Kansas agencies which provide transportation for the elderly. The State also wished to spend $5,000 to train personnel providing this service and $5,000 to distribute transportation-related conservation materials to Kansas citizens. The DOE found that these programs would provide timely restitution to injured Kansas and approved the State's request.

Polo Pinto Oil and Gas/Kentucky, Standard Oil Co. (Indiana)/Kentucky, Perry Gas Processors, Inc./Kentucky, Pennzoil Co./Kentucky, National Helium Corp./Kentucky, Coline Gasoline Corp./Kentucky, Standard Oil Co. (Indiana)/Kentucky, 10/2/89 RQ5-522, RQ21-523, RQ183-524, RQ10-525, RQ3-526, RQ2-527, RQ251-528

The Office of Hearings and Appeals issued a Decision and Order approving the second-stage refund application filed by the Commonwealth of Kentucky in the Palo Pinto Oil and Gas, Standard Oil Co. (Indiana), Perry Gas Processors, Inc., Pennzoil Co., National Helium Corp. and Coline Gasoline Corp. special refund proceedings. Kentucky requested permission to deposit its $325,994 ($210,700 in principal plus $115,294 in interest) in second-stage funds into its Energy Assistance Trust Fund. The money and any interest earned on it would be used to finance Kentucky's Low Income Home Energy Assistance Program. The OHA found that, when considered as part of the Commonwealth's overall oil overcharge restitution program, Kentucky's plan is sufficiently balanced to warrant approval. While the OHA was previously concerned that the Energy Trust Fund would not provide injured consumers with timely restitution, Kentucky now plans to expend its second-stage refunds within one fiscal year after the money is received.

Puna Sugar Company, Ltd., 10/6/89 RF272-7589, RD272-7589

The DOE issued a Decision and Order granting a refund from crude oil overcharge funds to Puna Sugar Company, Ltd. (Puna) based on its purchases of refined petroleum products during the period August 19, 1973 through January 27, 1981. A group of twenty-eight States and two territories of the United States (the States) filed consolidated pleadings objecting to and commenting on the application. The only evidence submitted by the States was an affidavit by an economist stating that virtually every industry was able to pass through some costs to its customers. The DOE determined that the evidence offered by the States was insufficient to rebut the presumption of end-user injury

and that the applicant should receive a refund. In addition, a Motion for Discovery filed by the States was denied. The refund granted in this Decision is $21,467. Puna will be eligible

Shell Oil Company/Gulf States Asphalt Company, Inc., 10/5/89 RF315-2289

The DOE issued a Decision and Order granting an Application for Refund filed in the Shell Oil Company special refund forums on residential energy conservation. The new Energy Efficient Home Construction Program, with its allocation of $250,000, will inform Illinois' home builders about energy

Name	Case No.
The American Tobacco Company.	RF307-8221.
Wolfcale Oil Co.	RF315-3002.

and product chemistry and toxicity and environmental fate data submitted by pesticide product registrants to set tolerances and tolerance exemptions.

Burden Statement: The public

and that the applicant should receive a refund. In addition, a Motion for Discovery filed by the States was denied. The refund granted in this Decision is $21,467. Puna will be eligible for additional refunds as additional crude oil overcharge funds become available.

Shell Oil Company/Colony Shell Servicenter Ltd. et al., 10–5–89 RF315–1983 et al.

The DOE issued a Decision and Order granting 185 Applications for Refund filed in the Shell Oil Company special refund proceeding. Each of the Applicants purchased directly from Shell and was either a reseller whose allocable share was less than $5,000 or an end-user of Shell products. Accordingly, each applicant was granted a refund equal to its full allocable share plus a proportionate share of the interest that has accrued on the Shell escrow account. The sum of the refunds granted in the Decision was 611,035,780 gallons of refined product and the sum of the refunds granted is $164,930 ($136,098 principal plus $28,832 interest).

Shell Oil Company/Donald R. Loomis et al., 10/5/89 RF315–2014 et al.

The DOE issued a Decision and Order granting 71 Applications for Refund filed in the Shell Oil Company special refund proceeding. Each of the Applicants purchased directly from Shell and was either a reseller whose allocable share was less than $5,000 or an end-user of Shell products. Accordingly, each Applicant was granted a refund equal to its full allocable share plus a proportionate share of the interest that has accrued on the Shell escrow account. The total gallonage covered in the Decision was 290,535,398 gallons of refined product and the sum of the refunds granted was $78,417 ($65,661 principal plus $12,756 interest).

Shell Oil Company/Fraga Shell et al., 10/6/89 RF315–3006 et al.

The DOE issued a Decision and Order granting 158 Applications for Refund filed in the Shell Oil Company special refund proceeding. Each of the Applicants purchased directly from Shell and was either a reseller whose allocable share was less than $5,000 or an end-user of Shell products. Accordingly, each Applicant was granted a refund equal to its full allocable share plus a proportionate share of the interest that has accrued on the Shell escrow account. The sum of the refunds granted is $136,882 ($114,613 principal plus $22,269 interest).

Shell Oil Company/Gulf States Asphalt Company, Inc., 10/5/89 RF315–2289

The DOE issued a Decision and Order granting an Application for Refund filed in the Shell Oil Company special refund proceeding. The Applicant purchased directly from Shell and was an end-user of Shell products. The Applicant used an estimation method for total gallonage based on 1979–1980 figures. Accordingly, the Applicant was granted a refund equal to its full allocable share plus a proportionate share of the interest that has accrued on the Shell escrow account. The refund granted was $4,979 ($4,169 principal plus $810 interest).

Shell Oil Co./Safeway Shell Tire/Auto, 10/5/89 RF315–7365

The Department of Energy issued a Supplemental Order rescinding a refund of $752 that had been granted to Safeway Shell Tire/Auto in the Shell Oil Company special refund proceeding on August 24, 1989. We determined that this refund duplicated an earlier refund which had been granted to Safeway for the same gallons. We therefore directed that the refund check not be issued.

Shell Oil Company/Thums Long Beach Co., 10/5/89 RF315–2957

The DOE issued a Decision and Order granting an Application for Refund filed in the Shell Oil Company special refund proceeding. The Applicant purchased directly from Shell and was an end-user of Shell products. Although Thums was owned in part by Shell, the small size of Shell's interest in the company, and the small amount of the refund at stake, were not deemed sufficient to warrant rejecting the application. Accordingly, the Applicant was granted a refund equal to its full allocable share plus a proportionate share of the interest that has accrued on the Shell escrow account. The total gallonage covered in the Decision was 903,923 gallons of refined product and the refund was $244 ($204 principal plus $40 interest).

Standard Oil Co. (Indiana)/Illinois 10/6/89 RM251–159

In its Motion for Modification, the State of Illinois requested to use its remaining $1,420,849 in *Amoco II* principal for the enlargement of three restitutionary programs previously approved in *Standard Oil Co. (Indiana)/Illinois*, 17 DOE ¶ 85,462 (1988) and the creation of two new programs. Under this proposal, Illinois will enlarge the Low Income Energy Program by $200,000, the Rural Energy Management Program by $75,000, and the Commercial Energy Information Program by $114,000. The new Energy Information Transfer Program will be allocated $703,582, for the purpose of conducting numerous forums on residential energy conservation. The new Energy Efficient Home Construction Program, with its allocation of $250,000, will inform Illinois' home builders about energy efficient practices, which may then be implemented in the State's structures. Illinois' proposal was approved in full because it should provide restitution to the State's consumers of motor gasoline and middle distillates.

The Royal Jordanian Airline Corporation, 10/5/89 RF272–7920

The DOE issued a Decision and Order granting a refund from crude oil overcharge funds to The Royal Jordanian Airline Corporation (Royal Jordanian) based on its purchase of refined petroleum products during the period August 19, 1973 through January 27, 1981. Royal Jordanian used the products to fuel its aircraft. Its claim was determined by consulting aircraft flight consumption records and accounting records. Royal Jordanian was an end-user of the products it claimed and was therefore presumed by the DOE to have been injured. The sum of the refund granted in this Decision is $1,079. Royal Jordanian will be eligible for additional refunds as additional crude oil overcharge funds become available.

Total Petroleum, Inc./Woodland Oil Co. et al., 10/5/89 RF310–212 et al.

The DOE issued a Decision and Order concerning four Applications for Refund filed by purchasers of motor gasoline and/or No. 2 oils from Total Petroleum, Inc. The applicants sought a portion of the settlement fund obtained by the DOE through a consent order entered into with Total. Each applicant was a reseller whose allocable share exceeded $5,000, and each elected to accept 40% of its allocable share or $5,000, whichever was greater, in return for an exemption from the demonstration of injury requirement established in *Total Petroleum, Inc.*, 17 DOE ¶ 85,542 (1988). Applying the criteria established in that Decision, the DOE granted refunds in this proceeding which total $40,026 ($33,280 principal and $6,746 interest).

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATE: Comments must be submitted on or before December 14, 1989.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 382–2740.

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

Title: Tolerance Petitions (including new inert ingredients) (EPA ICR # 0597.04; OMB # 2070–0024). This ICR requests reinstatement of a previously approved collection.

Abstract: The Federal Food, Drug, and Cosmetic Act authorizes EPA to regulate the amount of pesticides that enter the diet of humans and animals by establishing tolerances (and tolerance exemptions) for pesticide residues (and new inert ingredients) found in or on raw agricultural commodities and in processed foods. EPA uses the residue and product chemistry and toxicity and environmental fate data submitted by pesticide product registrants to set tolerances and tolerance exemptions.

Burden Statement: The public reporting burden for this collection of information is estimated to average 1,523 hours per response for registrants petitioning for an active ingredient tolerance, and 763 hours per response for registrants petitioning for an inert ingredient tolerance. These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Pesticide registrants

Estimated No. of respondents: 626

Estimated total annual burden on respondents: 925,914 hours

Frequency of collection: On occasion

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to: Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM–223), 401 M Street SW., Washington, DC 20460.

Office of Water

Title: Pesticide Formulator/Packager Questionnaire (EPA ICR # 1215.01). This is a new collection.

Abstract: EPA is collecting data from Pesticide Formulator/Packagers on wastewater generation, characteristics and treatment. EPA will also collect financial and economic data. The data will be used to develop an affluent guidelines regulation.

Burden Statement: The estimated public reporting burden for this collection of information is 55 hours per respondent. This estimate includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Pesticide Formulators/Packagers

Estimated No. of Respondents: 618

Estimated Total Annual Burden on Respondents: 34,196 hours

Frequency of Collection: One time

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, to: Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM–223), 401 M Street, SW., Washington, DC 20460

and

Office of Pesticides and Toxic Substances

Title: Pesticides Environment and Applicator Certification Cooperative Agreement: Output Projections-Accomplishments (EPA ICR # 1547.01; OMB # 2030–0020). This ICR requests reinstatement for part of a previously approved collection under a new clearance number.

Abstract: Under sections 23(a) and 26(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA requires governmental entities (states, territories, and Indian tribes) to which it has delegated primary enforcement authority and with which it has cooperative agreements in place to keep records and report to the Agency periodically on their pesticide enforcement activities—including projected and completed inspections, enforcement actions, and applicator certification activities. The Agency uses this information to monitor and evaluate delegated program performance as part of its overall pesticide enforcement program and to review and set funding levels for cooperative agreements.

Burden Statement: The public reporting burden for this collection of information is estimated to average 6.3 hours per response. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: States, territories, and Indian tribes with EPA cooperative grants

Estimated No. of Respondents: 64

Estimated Total Annual Burden on Respondents: 2013 hours

Frequency of Collection: Quarterly/Semi-annually

Relative Risk Reduction Strategies Committee Environmental Risk Subcommittee Meeting

SUMMARY: Pursuant to the Federal Advisory Committee Act, Public Law 92–463, notice is hereby given of a public meeting of the Environmental Risk Subcommittee of the Relative Risk Reduction Strategies Committee (RRRSC). The Subcommittee will meet on November 30, 1989 (8:30 a.m. to 5 p.m.) and December 1, 1989 (9:30 a.m. to 1 p.m.) at the Sheraton Reston Hotel, 11810 Sunrise Valley Drive, Reston, Virginia 22091, (703) 620–9000.

PURPOSE: The purpose of this meeting is to discuss environmental and welfare-related risk reduction strategies based, in part, on an evaluation of EPA's 1987 report "Unfinished Business". For further information concerning this project, please refer to the notices contained in 54 FR 35386, August 25, 1989, and 54 Federal Register 38282, September 15, 1989.

FOR FURTHER INFORMATION: Members of the public wishing further information concerning the Subcommittee or the meeting should contact Mr. Robert Flaak, Designated Federal Official, U.S. Environmental Protection Agency (A–101F), 401 F Street SW, Washington, DC, (202) 382–2552, (FTS) 382–2552, FAX (202) 475–9693. Seating at the meeting is on a first come basis.

Dated: November 7, 1989.

Science Advisory Board Drinking Water Committee; Open Meeting

Under Public Law 92–463, notice is hereby given that a one-day meeting of the Drinking Water Committee of the Science Advisory Board will be held December 8, 1989 at Room 13 North, North Conference Center, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. The meeting will be held from 8:30 a.m. to 5 p.m. on December 8, 1989.

The purpose of this meeting is to review a draft document concerning the kinetics of decomposition of chlorine and chloramines in saliva prepared for the Office of Drinking Water as part of their development of regulations for disinfectants and disinfection by-products. The meeting will be open to the public. Any member of the public wishing to make a presentation at the meeting should forward a written statement to Dr. C. Richard Cothern, Executive Secretary, Science Advisory Board (A–101F), U.S. Environmental Protection Agency, Washington, DC 20460 or contact him on 202–382–2552 by November 27, 1989. The Science Advisory Board expects that the public statements presented at this meeting will not be repetitive of previously submitted written statements. In general, each individual or group making an oral presentation will be limited to a total time of ten minutes.

Dated: November 3, 1989.

Donald G. Barnes,

Director, Science Advisory Board.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

November 3, 1989.

The Federal Communications Commission has submitted the following information collection requirement to the Office of Management and Budget for review and clearance under the Paperwork Reduction Act, as amended (44 U.S.C. 3501–3520).

Copies of the submission may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037. Persons wishing to comment on this information collection should contact Eyvette Flynn, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–3785. Copies of these comments should also be sent to the Commission. For further information contact Jerry Cowden, Federal Communications Commission, (202) 632–7513.

OMB Number: None.

Title: Section 90.19(f)(7)—Stolen Vehicle Recovery System Requirements.

Action: New collection.

Respondents: Businesses (including small businesses).

Frequency of Response: On occasion.

Estimated Annual Burden: 40 responses; 160 hours total annual burden; 4 hours average burden per respondent.

Needs and Uses: The stolen vehicle recovery system consists of a radio-receiver-transmitter installed in a hidden location in a motor vehicle to assist in its discovery if stolen. To ensure that interference to channel 7 television is avoided, licensees will be required to submit a plan to control any interference to television.

FCC Announces Second Meeting of the ONA Joint Conference

Released: November 7, 1989.

The Federal/State Joint Conference on Open Network Architecture (ONA) will convene its second meeting at 10:30 on Tuesday, November 14, 1989, at the Boston Copley Place Marriott, 110 Huntington Avenue, Boston, Massachusetts. The meeting will be open to the public, although participation is limited to Conference members and FCC Commissioners.

The Joint Conference serves as an ongoing forum for state/federal cooperation to facilitate the development and implementation of ONA. The creation of a Joint Conference was initially announced in the Federal Communication Commission's BOC ONA Order (4 FCC Rcd 1 (1989)). Three FCC Commissioners and thirteen state commissioners serve as Conference members.

For further information contact Steven Gorosh, Policy and Program Planning Division, Common Carrier Bureau, at (202) 632–4047, or Sarah Lawrence, Office of Public Affairs, at (202) 632–5050.

Quarterly Report on the Travel Reimbursement Program

AGENCY: Federal Communications Commission.

ACTION: Publishing of Quarterly Report on Travel Reimbursement Program.

SUMMARY: In Public Law 100–504, the Congress authorized the Federal Communications Commission to accept reimbursement from non-government organizations for travel of employees of the Commission. The Federal Communications Commission must keep records of such travel by each event and prepare a report each quarter of all reimbursements allowed and provide copies of each quarterly report to the Senate Committee on Appropriations, House Committee of Appropriations, Senate Committee on Commerce, Science and Transportation, and the House Committee on Energy and Commerce. In addition the Federal Register must publish each quarterly report in the Federal Register.

DATE: This report is for the period from August 1, 1989 through September 30, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Joseph T. Hall, Office of the Managing Director, (202) 632–7194.

SUPPLEMENTARY INFORMATION: The report for the quarter ending September 30, 1989 is as follows:

BILLING CODE 6718–02–M

[FEMA–846–DR]

Kentucky; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency.
ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the Commonwealth of Kentucky (FEMA–846–DR), dated October 30, 1989, and related determinations.

DATED: October 30, 1989.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646–3614.

Notice: Notice is hereby given that, in a letter dated October 30, 1989, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*, Pub. L. 93–288, as amended by Pub. L. 100–707), as follows:

I have determined that the damage in certain areas of the Commonwealth of Kentucky, resulting from severe storms, flooding, and mudslides on October 16–18, 1989, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93–288, as amended by Public Law 100–707. I, therefore, declare that such a major disaster exists in the Commonwealth of Kentucky.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Public Assistance in the designated areas. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under PL 93–288, as amended by PL 100–707, for Public Assistance will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Robert J. Adamcik of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the Commonwealth of Kentucky to have been affected adversely by this declared major disaster:

The counties of Clay, Floyd, Jackson, Knott, Leslie, Letcher, Magoffin, Owsley, Perry, and Pike for Individual Assistance and Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Robert H. Morris,
Acting Director, Federal Emergency Management Agency.

FEDERAL RESERVE SYSTEM

The Saitama Bank, Ltd., et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 27, 1989.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *The Saitama Bank, Ltd.*, Saitama, Japan; to engage *de novo* through its subsidiary, Saitama Bank Trust Company of New York, New York, New York, in trust company functions pursuant to § 225.25(b)(3); and financial advisory activities pursuant to § 225.25(b)(4) of the Board's Regulation Y.

B. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *F.N.B. Corporation*, Hermitage, Pennsylvania; to expand the activities of its wholly-owned subsidiary, Mortgage Service Corporation, Pittsburgh, Pennsylvania, to include the origination and servicing of all types of consumer and commercial loans and to engage in providing loan marketing and advisory services pursuant to § 225.25(b)(1) of the Board's Regulation Y.

C. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *MNC Financial, Inc.*, Baltimore, Maryland; to engage *de novo* in the making of equity and debt investments in low income housing construction or rehabilitation projects designed primarily to promote community welfare pursuant to § 225.25(b)(6) of the Board's Regulation Y. These activities will be conducted in Maryland, District of Columbia, Virginia, West Virginia, Delaware, and Pennsylvania.

Board of Governors of the Federal Reserve System, November 8, 1989.
Jennifer J. Johnson,
Associate Secretary of the Board.

Centers for Disease Control

CDC Advisory Committee for Injury Prevention and Control; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control (CDC) announces the following Committee meeting:

Name: CDC Advisory Committee on Injury Prevention and Control, HHS.
Time and Date: 8:30 a.m.–5:00 p.m.—November 29, 1989, 8:30 a.m.–12:00 noon—November 30, 1989.
Place: Holiday Inn Decatur Conference Plaza, 130 Clairmont Avenue, Decatur, Georgia 30030.
Status: Open to the public, limited only by space available.
Purpose: The Committee will make recommendations on policy, strategy, objectives, and priorities including the balance and mix of intramural and extramural research; advise on the development of a national plan for injury prevention and control and the development of new technologies and their application; and review progress toward injury prevention and control.

Matters To Be Discussed: The Committee will discuss priority setting, interagency coordination, intramural and extramural programs, and map out its agenda for future meetings.

Agenda items are subject to change as priorities dicate.

Contact Person for More Information: Mark Rosenberg, M.D., Director, Division of Injury Epidemiology and Control, Center for Environmental Health and Injury Control, CDC, 1600 Clifton Road, NE, Mailstop F–36, Atlanta, Georgia 30333, telephone: FTS: 236–4690; Commercial: 404/488–4690.

Dated: November 7, 1989.

Allergan Medical Optics; Premarket Approval of Models AC–21 Non-Ultraviolet-Absorbing and AC–21B Ultraviolet-Absorbing Anterior Chamber Intraocular Lenses

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Allergan Medical Optics, Santa Ana, CA, for premarket approval, under the Medical Device Amendments of 1976 (the amendments), of the Models AC–21 Non-Ultraviolet-Absorbing and AC–21B Ultraviolet-Absorbing Anterior Chamber Intraocular Lenses. After reviewing the recommendation of the Ophthalmic Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of September 29, 1989, of the approval of the application.

DATES: Petitions for administrative review by December 14, 1989.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Nancy C. Brogdon, Center for Devices and Radiological Health (HFZ–460), Food and Drug Administration, 1390 Piccard Drive, Rockville, MD 20850, 301–427–1212.

VOL 54 ISS 218 NO 14 1989 UMI

SUPPLEMENTARY INFORMATION: On July 6, 1987, Allergan Medical Optics, Santa Ana, CA 92799–5155, submitted to CDRH an application for premarket approval of the Models AC–21 Non-Ultraviolet-Absorbing and AC–21B Ultraviolet-Absorbing Anterior Chamber Intraocular Lenses. The devices are indicated for the visual correction of aphakia in patients 60 years of age and older where a cataractous lens has been removed by primary intracapsular cataract extraction (ICCE), or primary extracapsular cataract extraction (ECCE), where there is a structural reason that the anterior chamber lens is the preferred one, or other primary ECCE provided that this be performed only after the physician has compared the published results of the anterior chamber lens with posterior chamber lenses; or in a secondary implant procedure. The devices are available in a range of powers from 4 diopters (D) through 34 D in 0.5–D increments.

On April 21, 1988, the Ophthalmic Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On September 29, 1989, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

Under the amendments, intraocular lenses are regulated as class III devices (premarket approval). A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Nancy C. Brogdon (HFZ–460), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before December 13, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: November 6, 1989.

John C. Villforth,

Director, Center for Devices and Radiological Health.

[Docket No. 89M–0362]

IOLAB® Intraocular; Premarket Approval of KRATZ™ Models 7243 and 7283, KRATZ™ Lightweight Models 8203 and 8233, KRATZ/JOHNSON Lightweight Model 8663 and Wide Loop Lightweight Model 8403 Ultraviolet-Absorbing Posterior Chamber Intraocular Lenses

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by IOLAB® Intraocular, Claremont, CA, for premarket approval, under the Medical Device Amendments of 1976, of KRATZ™ Models 7243 and 7283, KRATZ™ Lightweight Models 8203 and 8233, KRATZ/JOHNSON Lightweight Model 8663 and WIDE LOOP Lightweight Model 8403 Ultraviolet-Absorbing Posterior Chamber Intraocular Lenses. After reviewing the recommendation of the Ophthalmic Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of August 21, 1989, of the approval of the application.

DATES: Petitions for administrative review by December 14, 1989.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Nancy C. Brogdon, Center for Devices and Radiological Health (HFZ–460), Food and Drug Administration, 1390 Piccard Drive, Rockville, MD 20850, 301–427–1212.

SUPPLEMENTARY INFORMATION: On August 18, 1988, IOLAB® Intraocular, Claremont, CA 91711, submitted to CDRH an application for premarket approval of KRATZ™ Models 7243 and 7283, KRATZ™ Lightweight Models 8203 and 8233, KRATZ/JOHNSON Lightweight Model 8663 and WIDE LOOP Lightweight Model 8403 Ultraviolet-Absorbing Posterior Chamber Intraocular Lenses. The devices are intended to be used for primary implantation for the visual correction of aphakia in patients 60 years of age and older where a cataractous lens has been removed by extracapsular extraction methods. These lenses are intended to be placed in the ciliary sulcus or capsular bag. The devices are available in a range of powers from 4 diopters (D) through 34 D in 0.5 D increments.

On January 26, 1989, the Ophthalmic Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On August 21, 1989, CDRH approved the application by a letter to the applicant from the Acting Director of the Office of Device Evaluation, CDRH.

Under the amendments, intraocular lenses are regulated as class III devices (premarket approval). A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Nancy C. Brogdon (HFZ–460), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

[Docket No. 89M–0427]

Lombart Lenses Ltd.; Premarket Approval of LL–55™ (Methafilcon A) Soft Hydrophilic Contact Lenses and LL–55 Toric™ (Methafilcon A) Soft Hydrophilic Contact Lenses

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Lombart Lenses Ltd., Norfolk, VA, for premarket approval, under the Medical Device Amendments of 1976, of the spherical LL–55™ (methafilcon A) Soft Hydrophilic Contact Lenses for daily wear and extended wear and the LL–55™ TORIC™ (methafilcon A) Soft Hydrophilic Contact Lenses for daily wear. The lenses are to be manufactured under an agreement with Kontur Kontact Lens Co., Inc., Richmond, CA, which has authorized Lombart Lenses Ltd. to incorporate information contained in its approved premarket approval application and related supplement for the spherical and toric configurations of the Kontur Soft (methafilcon A) Hydrophilic Contact Lens. FDA's Center for Devices and Radiological Health (CDRH) notified the applicant by letter of September 28, 1989, of the approval of the application.

DATE: Petitions for administrative review by December 14, 1989.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: David M. Whipple, Center for Devices and Radiological Health (HFZ–460), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301–427–1060.

SUPPLEMENTARY INFORMATION: On July 19, 1989, Lombart Lenses Ltd., Norfolk, VA 23507, submitted to CDRH an application for premarket approval of the spherical LL–55™ (methafilcon A) Soft Hydrophilic Contact Lenses for daily wear and extended wear and the LL–55 TORIC™ (methafilcon A) Soft Hydrophilic Contact Lenses for daily wear. The spherical lenses are indicated for daily wear from 1 to 7 days between removals for cleaning and disinfection as recommended by the eye-care practitioner. The lenses are indicated for the correction of visual acuity in aphakic and not-aphakic patients with nondiseased eyes that are myopic or hyperopic. The lenses may be worn by persons who may exhibit astigmatism of 1.50 diopters (D) or less that does not interfere with visual acuity. The lenses are indicated in a power range of −20.00 D to +20.00 for daily wear and −20.00 D to +10.00 D for extended wear. The toric lenses are indicated for daily wear for the correction of visual acuity in not-aphakic persons with nondiseased eyes that are myopic or hyperopic and have astigmatism up to 5.00 D and can obtain satisfactory visual acuity with the lenses. These lenses range in spherical powers from −20.00 D to +12.00 D. These lenses are to be disinfected using either a chemical or hydrogen peroxide lens care system. The application includes authorization from Kontur Kontact Lenses Co., Inc., Richmond, CA 94804, to incorporate information contained in its approved premarket approval application and related supplement for the spherical and toric configurations of the Kontur Soft (methafilcon A) Hydrophilic Contact Lens.

On September 28, 1989, CDRH approved the application by letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact David M. Whipple (HFZ–460), address above. The labeling of the spherical LL–55™ (methafilcon A) Soft Hydrophilic Contact Lenses for daily wear and extended wear and the LL–55 TORIC™ (methafilcon A) Soft Hydrophilic Contact Lenses for daily wear states that the lens is to be used only with certain solutions for disinfection and other purposes. The restrictive labeling informs new users that they must avoid using certain products, such as solutions intended for use with hard contact lenses only.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request

VOL 54 ISS 218 NO 14 1989 UMI

either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register** If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before December 14, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: November 5, 1989.

John C. Villforth,

Director, Center for Devices and Radiological Health.

Ocular Technologies, Inc.; Premarket Approval of OTI-05 (Polymacon) Soft Contact Lenses and LATHE-40 (Polymacon) Soft Contact Lenses (Clear)

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Ocular Technologies, Inc., Raleigh, NC, for premarket approval, under the Medical Device Amendments of 1976, of the clear spherical OTI-05 (polymacon) Soft Contact Lenses and LATHE-40 (polymacon) Soft Contact Lenses for daily wear. The lenses are to be manufactured under an agreement with CTL, Inc., Sunnyvale, CA, which has authorized Ocular Technologies, Inc., to incorporate information contained in its approved premarket approval application and related supplements for the clear CustomEyes™-38 (polymacon) Hydrophilic Contact Lenses. FDA's Center for Devices and Radiological Health (CDRH) notified the applicant by letter of September 5, 1989, of the approval of the application.

DATES: Petitions for administrative review by December 13, 1989.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: David M. Whipple, Center for Devices and Radiological Health (HFZ-460), Food and Drug Administration, 1390 Piccard Drive, Rockville, MD 20850, 301-427-1080.

SUPPLEMENTARY INFORMATION: On May 25, 1989, Ocular Technologies, Inc., Raleigh, NC 27609, submitted to CDRH an application for premarket approval of the spherical OTI-05 (polymacon) Soft Contact Lenses and LATHE-40 (polymacon) Soft Contact Lenses. The lenses are indicated for daily wear use for the correction of visual acuity in aphakic and not-aphakic patients with nondiseased eyes that are myopic or hyperopic. The lenses may be worn by persons who may exhibit astigmatism of 1.50 diopters (D) or less that does not interfere with visual acuity. The lenses are indicated in a power range of −9.00 D to +15.00 D and are to be disinfected using either a heat or chemical disinfection system. The application includes authorization from CTL, Inc., Sunnyvale, CA 94086, to incorporate information contained in its approved premarket approval application and related supplements for the clear CustomEyes™-38 (polymacon) Hydrophilic Contact Lenses.

On September 5, 1989, CDRH approved the application by letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact David M. Whipple (HFZ-460), address above. The labeling of the clear spherical OTI-05 (polymacon) Soft Contact Lenses and LATHE-40 (polymacon) Soft Contact Lenses for daily wear states that the lens is to be used only with certain solutions for disinfection and other purposes. The restrictive labeling informs new users that they must avoid using certain products, such as solutions intended for use with hard contact lenses only.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before December 13, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the

Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: November 5, 1989.

John C. Villforth,

Director, Center for Devices and Radiological Health.

BILLING CODE 4160-01-M

National Institutes of Health

Establishment of Acquired Immunodeficiency Syndrome Program Advisory Committee

Pursuant to the Federal Advisory Committee Act of October 6, 1972. [Pub. L. 92-463, 86 Stat. 770-776] and section 222 of the Public Health Service Act, as amended [42 U.S. Code 217a), the Acting Director, National Institutes of Health, announces the reestablishment by the Secretary, Department of Health and Human Services, on October 12, 1989. of the Acquired Immunodeficiency Syndrome Program Advisory Committee.

The Acquired Immunodeficiency Syndrome Program Advisory Committee advises the Secretary, the Assistant Secretary for Health, the Director, NIH, the NIH AIDS Coordinator, and the NIH AIDS Executive Committee on long- and short-term planning to meet research needs in AIDS. Specifically, the committee shall identify opportunities to further research in AIDS; recommend areas in which research should be stimulated; and suggest conferences, workshops or other activities NIH should support to facilitate exchange of information.

Unless renewed by appropriate action prior to expiration, the Acquired Immunodeficiency Syndrome Program Advisory shall terminate two years from the reestablishment date.

Dated: November 6, 1989.

William F. Raub,

Acting Director, National Institutes of Health.

BILLING CODE 4140-01-M

Notice of Meeting of the Acquired Immunodeficiency Syndrome Program Advisory Committee

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Acquired Immunodeficiency Syndrome (AIDS) Program Advisory Committee on December 11-12, 1989, at the National Institutes of Health, Bethesda, Maryland. The meeting will take place from 9 a.m. to 4 p.m. on December 11, and from 9 a.m. to 12:30 p.m. on December 12 in Building 31, C Wing, Conference Room 10. The meeting will be open to the public. The purpose of the meeting is to discuss recent developments relating to HIV infection in clinical trials, epidemiology, and central nervous system manifestations.

Anthony S. Fauci, M.D., Associate Director for Office of AIDS Research, National Institutes of Health, Shannon Building, Room 201, Bethesda, Maryland 20892, (301) 496-0357, will furnish the meeting agenda, rosters of Committee members and consultants, and substantive program information upon request.

Dated: November 2, 1989.

BILLING CODE 4140-01-M

Public Health Service

National Center For Health Services Research and Health Care Technology Assessment; Assessment of Cardiac Rehabilitation Program Services for PTCA and Cardiac Valve Surgery Patients

The Public Health Service (PHS) through the Office of Health Technology Assessment (OHTA) announces that it is performing an assessment of the safety, clinical effectiveness, and indications for use of cardiac rehabilitation program services for Percutaneous Transluminal Coronary Angioplasty (PTCA) and cardiac valve surgery patients. A previous assessment, cardiac rehabilitation services, was published by OHTA in 1987. A notice of that assessment appeared in the August 15, 1985 **Federal Register** Vol. 50 No. 158:32911 (50 FR 32911). Cardiac rehabilitation services are intended to identify patients at increased risk for further cardiac events as well as to restore their functional status.

Specifically, we are interested in knowing whether there are significant advantages of cardiac rehabilitation program services for PTCA and cardiac valve surgery patients. If it proves to be safe and clinically effective, what are specific indications for its use and how many courses of therapy are reasonable and necessary?

The PHS assessment process consists of a synthesis of information obtained from appropriate organizations in the private sector and from PHS and other agencies in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety and clinical effectiveness of a technology. Based on this assessment, a PHS recommendation will be formulated to assist HCFA in establishing a Medicare coverage policy. The information being sought is a review

BEST COPY AVAILABLE

VOL 54 ISS 218 NOV 14 1989 UMI

and assessment of past, current, and planned research related to this technology, a bibliography of published, controlled clinical trials and other well-designed clinical studies. Information related to the characterization of the patient population most likely to benefit from it, as well as to the clinical acceptability and the effectiveness of this technology and extent of use, is also being sought. Proprietary information is not being requested. Any person or group wishing to provide OHTA with information relevant to this assessment should do so in writing no later than January 19, 1990, or within 90 days from the date of publication of this notice.

For purposes of evaluation by the interested scientific community, it is sometimes helpful to include attributions for the comments cited in OHTA assessments. In addition, information provided in response to notices such as this one are often requested by interested individuals or groups. Without a written consent to the disclosure of the source of the comments received, the identity of the source will be kept confidential, in accordance with 42 U.S.C. 306(d). Indicate whether disclosure is acceptable.

Written material should be submitted to: Diane L. Adams, M.D., M.P.H., Office of Health Technology Assessment, 5600 Fishers Lane, Room 18–40, Rockville, MD 20857 (301) 443–4990.

Dated: October 20, 1989.

Donald Goldstone,

Acting Director, Office of Health Technology Assessment, National Center for Health Services Research and Health Care Technology Assessment.

BILLING CODE 4160–17–M

National Center For Health Services Research and Health Care Technology Assessment; Assessment of Medical Technology

The Public Health Service (PHS), through the Office of Health Technology Assessment (OHTA), announces that it is coordinating an assessment of the safety and effectiveness of positron emission tomography (PET) as a diagnostic and management tool for use in patients with coronary artery disease, focal or partial epilepsy, and brain tumors.

This assessment will be concerned with the uses of PET in (a) diagnosis and evaluation of the severity of coronary artery disease, (b) assessment of myocardial viability, (c) localization of seizure focus for surgical excision, and (d) differentiation of radiation necrosis from recurrent tumor in the brain. This assessment seeks to answer the following questions: (1) Does PET provide information of value to a clinician that is not otherwise available? (2) What is the extent of any incremental benefit obtained from the use of PET when the information obtained is comparable to that available from other diagnostic modalities? (3) How does the sensitivity and specificity of PET compare with other diagnostic modalities currently in use? (4) What is the extent of interobserver and intraobserver error associated with the clinical condition being assessed? (5) Where does PET fit in the overall scheme of diagnostic testing? Should it be used in lieu of, or in additon to, other diagnostic modalities? (6) What patient selection criteria should be applied?

The PHS assessment consists of a synthesis of information obtained from appropriate organizations in the private sector and from PHS agencies and others in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety, clinical effectiveness, and appropriate uses of a technology. Based on this assessment, a PHS recommendation will be formulated to assist the Health Care Financing Administration (HCFA) in establishing Medicare coverage policy. The information being sought is a review and assessment of past, current, and planned research related to this technology, as well as a bibliography of published, controlled clinical trials and other well designed clinical studies. Information related to the characterization of the patient population most likely to benefit from it, as well as on clinical acceptability and the effectiveness of this technology and extent of use are also being sought. Any person or group wishing to provide OHTA with information relevant to this assessment should do so in writing no later than January 31, 1990 or within 90 days from the date of publication of this notice.

For purposes of evaluation by the interested scientific community, it is sometimes helpful to include attributions for the comments cited in OHTA assessments. In addition, information provided in response to notices such as this one are often requested by interested individuals or groups. Without a written consent to the disclosure of the source of the comments received, the identity of the source will be kept confidential, in accordance with 42 U.S.C. 306(d). Indicate whether disclosure is acceptable.

Written material should be submitted to: S. Steven Hotta, M.D., Ph.D., Office of Health Technology Assessment, 5600 Fishers Lane, Room 18–40, Rockville, MD 20857 (301) 443–4990.

Dated: October 20, 1989.

Donald Goldstone,

Acting Director, Office of Health Technology Assessment, National Center for Health Services Research and Health Care Technology Assessment.

BILLING CODE 4160–17–M

Assessment of Medical Technology: Regional Hyperthermia Alone and in Conjunction With Chemotherapy for the Treatment of Tumors

The Public Health Service (PHS) through the Office of Health Technology Assessment (OHTA) announces that it is performing an assessment of the safety, clinical effectiveness, and indictions for use of regional hyperthermia alone and in conjunction with chemotherapy for the treatment of tumors. A previous assessment, local hyperthermia for treatment of superficial and subcutaneous malignancies, was published by OHTA in 1984. A notice of that assessment appeared in the March 13, 1984, **Federal Register**, Vol. 49, No. 50:9476. That assessment recommended that (a) local hyperthermia should be covered under Medicare when used in conjunction with radiation therapy for the treatment of primary or metastatic cutaneous or subcutaneous superficial malignancies; (b) local hyperthermia *not* be covered under Medicare when used alone or in connection with chemotherapy. The Health Care Financing Administration (HCFA) adopted that PHS recommendation. They have now requested that OHTA evaluate the use of Regional Hyperthemia Alone and in Conjunction with Chemotherapy for the Treatment of Tumors.

Hyperthermia involves the production of local or regional heat in neoplasms without directly raising the temperature of uninvolved areas.

This assessment seeks to answer the following questions: (a) What are the beneficial effects of heat, vasodilation, enhanced pharmacologic activity, and the direct effect of heat on the tumor; (b) What complications are associated with regional hyperthermia and with chemotherapy for the treatment of tumor; (c) What evidence to date show that regional hyperthermia may have an impact upon cancer survival rates; (d) What stage of the malanoma seems to show the best improvement of survival rates following heated perfusion? (e) What other treatment is available beside amputation for diffuse melanoma involving the upper and lower extremities?

The PHS assessment process consists of a synthesis of information obtained from appropriate organizations in the private sector and from PHS and other agencies in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety and clinical effectiveness of a technology. Based on this assessment, a PHS recommendation will be formulated to assist HCFA in establishing a Medicare coverage policy. The information being sought is a review and assessment of past, current, and planned research related to this technology, a bibliography of published, controlled clinical trials and other well-designed clinical studies. Information related to the characterization of the patient population most likely to benefit from it, as well as to the clinical acceptability and the effectiveness of this technology and extent of use, is also being sought. Any person or group wishing to provide OHTA with informaton relevant to this assessment should do so in writing no later than February 19, 1990, or within 90 days from the date of publication of this notice.

For purposes of evaluation by the interested scientific community, it is sometimes helpful to include attributions for the comments cited in OHTA assessments. In addition, information provided in response to notices such as this one are often requested by interested individuals or groups. Without a written consent to the disclosure of the source of the comments received, the identity of the source will be kept confidential, in accordance with 42 U.S.C. 306(d). Indicate whether disclosure is acceptable.

Written material should be submitted to:

Diane L. Adams, M.D., M.P.H.,

Office of Health Technology Assessment, 5600 Fishers Lane, Room 18–40, Rockville, MD 20857, (301) 443–4990.

Dated: November 3, 1989.

Donald Goldstone,

Acting Director, Office of Health Technology Assessment, National Center for Health Services Research, and Health Care Technology Assessment.

DEPARTMENT OF THE INTERIOR

Oral Comments Concerning Draft Natural Resource Damage Assessment Plan and Restoration Strategy for the Exxon Valdez Tanker Accident

AGENCY: Department of the Interior.

ACTION: Draft Natural Resource Damage Assessment Plan and Restoration Strategy for the *Exxon Valdez* Oil Spill; provision for oral comments.

SUMMARY: This Notice announces the opportunity for those who have submitted written comments on the Draft Natural Resource Damage Assessment Plan and Restoration Strategy to present elaborative oral comments in the near future. The draft plan was made available to the public on August 18, 1989, by notice published in the **Federal Register** on August 15, 1989, 54 FR 33618, that required all comments to be submitted by September 30, 1989. The written comment period was later extended to October 30, 1989, 54 FR 39586, September 27, 1989.

SUPPLEMENTARY INFORMATION: The March 24, 1989, grounding of the tanker Exxon Valdez in Alaska's Prince William Sound caused the largest oil spill in U.S. history. Approximately 11 million gallons of North Slope crude moved through the southwestern portion of the Sound and along the coast of the western Gulf of Alaska, causing extensive harm to natural resources.

The draft plan described the process by which that harm will be evaluated so that compensation can be sought from those potentially responsible for the spill. The State of Alaska and three federal agencies (the Departments of Agriculture and the Interior and NOAA) are the responsible trustees to protect and assess injuries to natural resources as provided by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the Clean Water Act (CWA). The Environmental Protection Agency (EPA) is a consultant to the Trustee Council.

The Trustee Council has determined that it would be beneficial to provide the opportunity for those who provided written comments to present oral comments elaborating on their written comments. Such times and places are yet to be determined. All those who provided written comments will be sent a notice outlining the procedure for submitting a statement of oral comments. Oral comments shall be limited to elaborating upon written comments, which the party submitted on the Draft Assessment Plan. Oral comments should be technical in nature and for clarification of written comments. It is expected that the sessions will be conducted during November or early December and will take place in Alaska and Washington, DC. Parties wishing to comment need only appear at one of the meetings.

In addition, when appropriate, restoration alternatives will be made available for public comment by the Trustee Council.

David A. Watts,

Acting Associate Solictor, Conservation and Wildlife.

BILLING CODE 4310–10–M

Bureau of Land Management

Temporary Emergency Closure of the Barstow to Las Vegas Motorcycle Race Course, Barstow and Needles Resource Areas, San Bernardino County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of temporary closure on public lands in eastern San Bernardino County, California.

SUMMARY: Notice is hereby given that a temporary emergency closure of public lands on the Barstow to Las Vegas Motorcycle Race Course and the two pit areas. The course is closed to all uses except the permitted race vehicles, pit crews and authorized race officials. The closure includes, but is not limited to the following activities: driving, walking, standing, camping, spectating, protesting, and vandalism. This closure begins where the course enters public lands from Fort Irwin at the southwest corner of Section 5, Township 13 north, Range 6 east. The course travels to the northeast to the boundary of the state of Nevada in the southeast quarter of Section 7, Township 17 north, Range 15 east. The course length is approximately 100 miles. Pit 1 is located about 4 miles west of Highway 127 between the Boulder corridor and Silver Lake, covering an area of 75 feet wide by ¾ of a mile long. Pit 2 is located in Bull Spring Wash 2 miles south of Turquoise Mountain, covering an area of 75 feet by 1 mile. Pit 3 is located ½ mile south of the Boulder corridor on the California side of the Nevada boundary, covering an area about 75 feet by 1 mile.

Order: Effective November 23 through 26, 1989, the following temporary emergency closure restrictions will be in effect for the Barstow to Las Vegas Motorcycle Race Course and the three pit areas. All human activity, except

VOL 54 ISS 218 NO 14 1989 UMI

those associated with the normal operation of the permitted event will be excluded from the race course and the pit areas. Human activities include but are not limited to the following activities: driving, walking, standing, camping, spectating, protesting, and vandalism. Exceptions to the exclusions would include permitted racing, pit crews and their camps, authorized races officials conducting check point operations, rescue, assistance, security, and follow-up safety sweep of the course.

Authority for the temporary closure and interim use restrictions is contained in title 43 CFR 8364. Violation of these restrictions is punishable by a fine not to exceed $1,000 and/or 12 months in jail.

SUPPLEMENTARY INFORMATION: The purpose of the temporary closure and use restrictions is to provide protection for the desert tortoise and its habitat from unauthorized activities. The only area open to spectators is the start line, located within Fort Irwin. The remainder of the course will have restricted access. The desert tortoise has been listed on an emergency basis as an endangered species by the U.S. Fish and Wildlife Service. The race course uses existing routes of travel to cross tortoise habitat. Unauthorized activities on or adjacent to the race course and the pit areas would put the race participants and the desert tortoise at risk.

FOR FURTHER INFORMATION CONTACT: Gerald E. Hillier, District Manager, Bureau of Land Management, 1695 Spruce Street, Riverside, California 92507, (714) 351–6386, or Alden Sievers, Area Manager, Bureau of Land Management, 150 Coolwater Ln., Barstow, California 92311, (619) 256–3591.

Dated: November 7, 1989.

H.W. Riecken,

Acting District Manager.

Availability for the Molycorp Guadalupe Mountain Tailings Disposal Facility Final Environmental Impact Statement (EIS)

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management, Albuquerque District, announces the availability of the Molycorp Guadalupe Mountain Tailings Disposal Facility FEIS for public review and comment. This document analyzes whether the proposed tailings facility will result in any unnecessary or undue degradation of the public lands near Questa, New Mexico, in BLM's the Taos Resource Area.

DATE: Comments on the Final EIS can be submitted for a period of 30 days following EPA's Federal Register Notice of the EIS availability.

ADDRESS: Comments should be sent to Robert Dale, District Manager, Bureau of Land Management, Albuquerque District Office, 435 Montano NE., Albuquerque, New Mexico 87107.

FOR FURTHER INFORMATION CONTACT: Kent Hamilton, Bureau of Land Management, Albuquerque, District Office, 435 Montano NE., Albuquerque, New Mexico 87107, telephone commercial (505) 761–4546, FTS 474–4546.

SUPPLEMENTARY INFORMATION: Molycorp Inc., has applied for approval of a "Plan of Operations" for a 1,230 acre tailings disposal facility to be on millsite claims located on Guadalupe Mountain near Questa, New Mexico, pursuant to 30 U.S.C. section 42 (1976). In the case of an action authorized under the mining laws, the only required determination is whether the proposal will result in any unnecessary or undue degradation of the public lands; there is no provision for a discussion of alternatives.

The Final EIS was prepared by ENSR Consulting and Engineering a third party contractor for the Bureau of Land Management.

A copy of the Final EIS will be sent to all individuals, government agencies and groups who have expressed an interest in the project. In addition, review copies may be examined at the following locations:

Bureau of Land Management, Taos Resource Area Office, Plaza Montevideo, Cruz Alto Road, Taos, New Mexico 87571–1045.

Bureau of Land Management, New Mexico State Office, South Federal Place, Joseph M. Montoya Federal Building, Sante Fe, New Mexico 87504–1449.

Dated: November 6, 1989.

Katy J. Eaton,

Acting State Director.

BILLING CODE 4310–FB–M

[AZ–020–41–5410–ZAQH; AZA–24106]

Receipt of Conveyance of Mineral Interest Application

Notice is hereby given that pursuant to section 209 of the Act of October 21, 1976, 90 Stat. 2757, Barnabas Hugh Wasson has applied for conveyance of the mineral estate described as follows:

Gila and Salt River Meridian, Arizona

T. 10 N., R. 5 W.,

Sec. 10, NW¼, N½SW¼, SW¼SW¼.

Containing 280 acres.

The mineral interests will be conveyed in whole or in part upon favorable mineral examination.

The purpose is to allow consolidation of surface and subsurface ownership, for the lands described above, where there are no known mineral values or in those instances where the reservation of ownership of the mineral interest in the United States interferes with or precludes appropriate non-mineral development of the lands and such development would be a more beneficial use of the lands than its mineral development.

Additional information concerning this application may be obtained from the Area Manager, Lower Gila Resource Area, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Upon publication of this notice in the Federal Register, the mineral interests described above will be segregated to the extent that they will not be open to appropriation under the public land laws, including the mining laws. The segregative effect of the application shall terminate by publication of an opening order in the Federal Register specifying the date and time of opening, either upon issuance of a patent or other document of conveyance of such mineral interests, upon final rejection of the application or two years from the date of filing of the application, October 27, 1989, whichever occurs first.

Dated: October 30, 1989.

Charles Frost,

Associate District Manager.

BILLING CODE 4310–32–M

[NV–930–09–4212–11; N–25810]

Termination of Recreation and Public Purpose Classification and Order Providing for Opening of Land; Nevada

November 2, 1989.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action terminates Recreation and Public Purpose (R&PP) Classification N–25810 in its entirety. The land will be opened to the public land laws generally, including the mining and mineral leasing laws.

EFFECTIVE DATE: Termination is effective with the publication of this document. The land will be open to entry at 10 a.m. on December 14, 1989.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Nevada State Office, BLM, 850 Harvard Way, P.O. Box 12000, Reno, Nevada 89520, 702–328–6326.

SUPPLEMENTARY INFORMATION: Pursuant to section 7 of the Taylor Grazing Act (48 Stat. 1272) and the authority delegated by Appendix 1 of Bureau of Land Management Manual 1203 dated April 14, 1967, Recreation and Public Purpose Classification N–25810 is hereby terminated in its entirety:

Mount Diablo Meridian, Nevada

T. 21 S., R. 60 E., sec. 15, SW¼SW¼SW¼.

The area described contains 10 acres in Clark County.

The classification made pursuant to the Act of June 14, 1926, as amended, segregated the public land from all other forms of appropriation under the public land laws, including location under the United States mining laws and the mineral leasing laws. The land was leased to Clark County for a solid waste transfer station. The site was never developed and the lease expired November 12, 1985. There are no other applications pending. The classification is no longer considered appropriate.

At 10:00 a.m. on December 14, 1989, the land will be open to the operation of the public land laws and the mineral leasing laws, subject to valid existing rights, existing classifications and withdrawals, and requirements of applicable law. All valid applications received prior to or at 10:00 a.m. on December 14, 1989 will be considered as simultaneously filed. All other applications received will be considered in order of filing.

At 10:00 a.m. on December 14, 1989, the land will also be open to the operations of the mining laws. Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Fred Wolf,

Associate State Director, Nevada.

Office of Surface Mining Reclamation and Enforcement

Determination of Valid Existing Rights Within the Wayne National Forest

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of determination of valid existing rights within the Wayne National Forest.

SUMMARY: This notice announces the decision of the Director, Office of Surface Mining Reclamation and Enforcement (OSM), that Belville Mining Company (Belville) has not established valid existing rights (VER) for five properties in the Wayne National Forest in Ohio.

EFFECTIVE DATE: November 14, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Hagen, Director, Columbus Field Office, Office of Surface Mining Reclamation and Enforcement, 2242 South Hamilton Road, Room 202, Columbus, Ohio 43227, Telephone: (614) 866–0578.

SUPPLEMENTARY INFORMATION:

I. Background

On January 21, 1981, OSM published in the Federal Register (46 FR 5915) a notice of its decision that surface coal mining operations could not be conducted on certain lands within the Wayne National Forest unless valid existing rights could be established. The decision was based on the unsuitability criteria for mining in the Wayne National Forest, which were published on January 4, 1981 (46 FR 1420). The unsuitability criteria prohibit surface coal mining operations on lands within the boundaries of the Wayne National Forest unless valid existing rights can be established.

On August 15, 1988, Belville submitted to OSM a request for a determination of VER for five properties in the Wayne National Forest. By letter dated September 14, 1988, OSM informed Belville that it had not established VER for the five properties in question. By letter dated October 14, 1988, Belville asked OSM to reconsider its prior

BILLING CODE 4310-70-M

Office of Surface Mining Reclamation and Enforcement

Determination of Valid Existing Rights Within the Wayne National Forest

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of reopening of record and invitation for interested parties to participate.

SUMMARY: On August 30, 1989, the Office of Surface Mining Reclamation and Enforcement (OSM) issued a notice that it had decided to initiate reconsideration of its December 23, 1988, determination that Belville Mining Company (Belville) has valid existing rights (VER) to surface mine coal on five tracts within the Wayne National Forest in Ohio. The notice announced closing dates for public participation of September 14 for materials pertinent to the "McMullen tract" and September 29 for materials pertinent to all other issues. By this notice, OSM is informing interested parties that they may continue to submit relevant information and that OSM will consider all relevant information received up to the time a decision is made concerning the VER requests.

DATES: OSM will consider relevant materials submitted on the Belville matter until November 29, 1989.

ADDRESSES: Hand deliver written materials to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131L, 1100 L Street, NW., Washington, DC or mail written materials to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131L, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, DC 20240. Documents included in the administrative record are available for public review at this address.

FOR FURTHER INFORMATION CONTACT: Brent Wahlquist, Assistant Director-Program Policy, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, DC 20240; or telephone (202) 343-4264 (FTS or commercial).

SUPPLEMENTARY INFORMATION: By letter dated December 23, 1988, OSM notified Belville that, pursuant to section 522(e) of the Surface Mining Control and Reclamation Act of 1977 (the Act), Belville had VER to conduct surface mining activities on five properties involving 5,440 acres of Federal land within the Wayne National Forest in Ohio. This decision reversed a December 3, 1986, determination by OSM that Belville's earlier submissions were insufficient to establish VER for the five properties in question. By letter dated August 15, 1988, Belville had asked OSM to reconsider its prior determination.

During the course of a review of recent OSM actions concerning VER, OSM has concluded that the adminstrative record of the past Belville VER determination was inadequate to determine whether the decision was correctly made. Accordingly, in a **Federal Register** notice published on August 30, 1989, OSM reopened the matter and suspended its December 23, 1988, determination (54 FR 35945). The August 30, 1989, notice indicated that OSM would accept materials on issues related to the "McMullen tract" until September 14, 1989, and materials on all other issues until September 29, 1989.

As discussed in the August 30, 1989, notice of reopening, the effect of the decision to reopen the record is to stay the December 23, 1988, determination during the period of further consideration. Such a stay is necessary to preserve the status quo by precluding surface disturbance in the Wayne National Forest, pending full agency consideration of the VER question. By this notice, OSM is extending the period during which interested parties may submit written materials. relevant to the issues at hand until a decision is made. This action will allow development of an administrative record capable of supporting a final determination as to whether Belville has VER.

Dated: November 7, 1989.

W. Hord Tipton,

Deputy Director, Operations and Technical Services, Office of Surface Mining Reclamation and Enforcement.

BILLING CODE 4310-05-M

DEPARTMENT OF JUSTICE

Information Collections Under Review

November 7, 1989.

The Office of Management and Budget (OMB) has been sent the following proposals for the collection of information for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information: (1) The title of the form/collection; (2) the agency form number, if any, and the applicable component of the Department sponsoring the collection; (3) how often

the form must be filled out or the information is collected; (4) who will be asked or required to respond, as well as a brief abstract; (5) an estimate of the total number of respondents and the amount of time estimated for an average respondent to respond; (6) an estimate of the total public burden (in hours) associated with the collection; and, (7) an indication as to whether section 3504(h) of Public Law 96-511 applies. Comments and/or suggestions regarding the item(s) contained in this notice, especially those regarding the estimated response time, should be directed to the OMB reviewer, Mr. Edward H. Clarke, on (202) 395-7340 and to the Department of Justice's Clearance Officer, Mr. Larry E. Miesse, on (202) 633-4312. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Larry E. Miesse, DOJ Clearance Officer, SPS/JMD/5031 CAB, Department of Justice, Washington, DC 20530.

Extension of the Expiration Date of a Currently Approved Collection Without Any Change in the Substance or in the Method of Collection

(1) Application of Waiver of Grounds of Excludability.
(2) I-601. Adjudications Division (COADN), Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. The information given on this form will be used to determine an applicant's eligibility for a waiver of excludability from the United States under section 212 (g), (h), or (i) of the Immigration and Nationality Act.
(5) 3,000 respondents at .5 hours per response.
(6) 1,500 estimated annual burden hours.
(7) Not applicable under 3504(h).

(1) Application to Preserve Residence for Naturalization.
(2) I-470. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. The information will be used to determine whether an alien who intends to be absent from the United States for a period of one or more years is eligible to preserve residence for naturalization purposes.
(5) 4,000 estimated annual respondents at .25 hours per response.
(6) 1,000 estimated annual public burden hours.
(7) Not applicable under 3504(h).

(1) Waiver of Rights, Privileges, Exemptions and Immunities.
(2) I-508. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. The information is used by the Immigration and Naturalization Service to determine eligibility of an alien applicant to retain status of an alien lawfully admitted to the United States for permanent residence.
(5) 1,800 estimated annual responses at .083 hours per response.
(6) 150 estimated annual public burden hours.
(7) Not applicable under 3504(h).

(1) Application to File Declaration of Intention.
(2) I-300. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. Section 334(f) of the Immigration and Nationality Act provides for the issuance of a declaration of intention to become a citizen of the United States. The information gathered on this form will assist the INS in determining if an applicant is eligible for the issuance of such a declaration.
(5) 4,000 estimated annual responses at .5 hours per response.
(6) 2,000 estimated annual public burden hours.
(7) Not applicable under 3504(h).

(1) Affidavit of Support.
(2) I-134. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. This information will be used in determining that the applicant for benefits will not become a public charge if admitted into the United States.
(5) 44,000 estimated annual responses at .332 hours per response.
(6) 14,608 estimated annual public burden hours.
(7) Not applicable under 3504(h).

(1) Age, Sex, and Race of Persons Arrested.
(2) DO 62 (Used for persons age 18 and over), DO 62a (used for persons under age 18). Federal Bureau of Investigation.
(3) Monthly.
(4) State or local governments. Form is needed to collect information regarding the number(s) of persons arrested by law enforcement agencies throughout the United States. Summary statistics are published in a comprehensive annual and used for other law enforcement planning.
(5) 1,371 respondents, 12 responses per respondent per year totals 16,452 estimated annual responses at .5 hours per response.
(6) 8,226 estimated annual public burden hours.
(7) Not applicable under 3504(h).

Larry E. Miesse,

Department Clearance Officer, Department of Justice.

BILLING CODE 4410-10-M

Lodging of Consent Decree Pursuant of the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *United States* v. *General Switch Corporation* was lodged with the United States District Court for the Southern District of New York on November 2, 1989. The Consent Decree addresses the United States' claims against the General Switch Corporation ("General Switch") under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), 42 U.S.C. 9601, *et seq.*, regarding the abatement of a release or substantial threat of release of perchloroethylene from the General Switch facility in Middletown, New York.

The Consent Decree requires General Switch to (1) excavate and aerate three hot spots of soil contaminated with PCE located on its Middletown property, (2) pump and treat groundwater from an interceptor well until PCE levels remain stable at a concentration of less than 5 parts per billion ("ppb"), (3) connect any facilities with downgradient wells which have PCE levels of 5 ppb or above to the municipal water supply, (4) pay EPA's oversight costs for the remedial actions, and (5) pay $55,000 in settlement of past removal oversight costs.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Order. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *General Switch Corporation*, D.J. Ref. #90-11-3-221.

The proposed Consent Decree may be examined at the office of the United

VOL 54 ISS 218 NO 14 1989 UMI

States Attorney, Southern District of New York, One St. Andrew's Plaza, New York, New York 10007, and at the Office of Regional Council, United States Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10278. Copies of the Consent Decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, room 1647 (D), Ninth Street and Pennsylvania Ave., NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice. In requesting a copy, please refer to the referenced case name and D.J. Ref. number and enclose a check in the amount of $7.30 (ten cents per page reproduction cost) payable to the Treasurer of the United States.

Richard B. Stewart,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to Cercla in United States v. Deere & Co., Inc.

In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation and Liability Act, as amended, 42 U.S.C. 9622(i) ("CERCLA"), and Departmental policy at 28 CFR 50.7, notice is hereby given that on October 17, 1989, a proposed consent decree in *United States* v. *Deere & Company, Inc.*, Civil Action No. C89-1036 was lodged with the United States District Court for the Northern District of Iowa, Eastern Division.

The complaint in this enforcement action was filed on October 17, 1989, against Deere & Company, Inc. ("Deere") under sections 106 and 107 of CERCLA, 42 U.S.C. 9606 and 9607, seeking injunctive relief and reimbursement of costs incurred by the United States in responding to the release or threat of release of hazardous substances from the Site, which consists of a portion of the John Deere Dubuque Works located near Dubuque, Iowa. The proposed consent decree requires Deere to finance and perform certain remedial action, maintenance and monitoring activities at the Site.

For a period of thirty (30) days from the date of this publication, the Department of Justice will receive comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, U.S. Department of Justice, Washington, DC 20530, and should refer to *United States v. Deere & Company, Inc.*, Department of Justice #90-11-2-322.

The proposed consent decree may be examined at the office of the United States Attorney, Northern District of Iowa, Eastern Division, 425 2nd Street, SE., The Center, Suite 950, Cedar Rapids, Iowa 52401, and the United States Environmental Protection Agency, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101. Copies of the proposed consent decree may also be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Room 1748, U.S. Department of Justice, 9th and Pennsylvania Avenue, NW., Washington, DC 20530. When requesting a copy, please refer to *United States v. Deere & Company, Inc.*, DOJ #90-11-2-322, and enclose a check in the amount of $1.50 payable to the Treasurer of the United States.

Richard B. Stewart,

Assistant Attorney General, Land and Natural Resources Division.

United States District Court for the Eastern District of Pennsylvania

United States of America, Plaintiff, *v.* Pacific Dunlop Holdings Inc.; Becton, Dickinson and Company; and Edmont, Inc., Defendants.

Response of the United States to Public Comments and Motion of the United States for Entry of Final Judgment

Pursuant to section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. 16(b)-16(g) (the "APPA"), the United States hereby files its Response to Public Comments and an amended proposed Final Judgment against Pacific Dunlop Holdings Inc. ("PDH"); Becton, Dickinson and Company ("Becton, Dickinson"); and Edmont, Inc. ("Edmont"), and moves for entry of the proposed Final Judgment as amended.

I

Introduction

This action began on June 16, 1989, when the United States filed a complaint alleging that the proposed acquisition of Edmont by PDH would violate section 7 of the Clayton Act, 15 U.S.C. 18. The Complaint alleged that the effect of the acquisition would be substantially to lessen competition in the sale in the United States of dipped unsupported nitrile industrial gloves, liquid proof dipped supported latex industrial gloves, liquid proof dipped supported nitrile industrial gloves, liquid proof dipped supported neoprene industrial gloves, and liquid proof dipped supported PVC industrial gloves. Both companies sell all five of those types of industrial gloves in the United States. The Complaint seeks, among other relief, to enjoin the transaction to prevent its anticompetitive effects in the five relevant markets.

On June 16, 1989, the United States and defendants filed a Stipulation in which they consented to the entry of a proposed Final Judgment designed to eliminate the anticompetitive effects of the acquisition. In accordance with the provisions of the APPA, the United States also filed a Competitive Impact Statement explaining the basis for the Complaint and for the United States' conclusion that entry of the proposed Final Judgment would be in the public interest. As a result of public comments received by the United States, the parties have agreed to amend the proposed Final Judgment as discussed on page 17, *infra*. The proposed Final Judgment, as amended, would eliminate the anticompetitive effects alleged in the Complaint with respect to the five relevant markets by requiring PDH to sell: (1) Its subsidiary Ansell Granet Inc. ("Ansell Granet"), which manufactures liquid proof dipped supported gloves; and (2) Edmont's manufacturing facility located in Canton, Ohio ("Canton facility"), which manufactures unsupported nitrile gloves.

The United States and the defendants stipulated that the proposed Final Judgment may be entered after compliance with the APPA, unless the Government withdraws its consent. Entry of the proposed Final Judgment, as amended, would terminate this action, except that the Court would retain jurisdiction to construe, modify, and enforce the Final Judgment and to punish violations of the Judgment.

II

Compliance With the APPA

Upon publication of this Response in the **Federal Register**, the procedures required by the APPA will have been completed, and the Court may enter the proposed Final Judgment, as amended.

A. Stipulation, Proposed Final Judgment, and Competitive Impact Statement

The United States has caused the proposed Final Judgment, the Stipulation between the parties for entry of the proposed Final Judgment, and the Competitive Impact Statement, in the form prescribed by 15 U.S.C. 16(b), to be published in the **Federal Register**, 54 FR 26,854, June 26, 1989.[1] It also has furnished copies of these documents to all persons who have requested them.

B. Newspaper Notices

The United States has caused newspaper notices of the proposed Final Judgment and the Competitive Impact Statement to be published in The Washington Post and the Philadelphia Inquirer in accordance with the procedures set forth in 15 U.S.C. 16(c).[2]

C. Statements Regarding Communications

As required by 15 U.S.C. 16(g), on June 23, 1989, PDH filed with the Court a description of communications, by or on its behalf, with officers and employees of the United States concerning the proposed Final Judgment. On the same date, Edmont and Becton, Dickinson jointly filed with the Court a description of communications, by or on their behalf, with officers and employees of the United States concerning the proposed Final Judgment.

D. Waiting Period, Comments, and Publication of Comments and Response

The 60-day period provided by 15 U.S.C. 16(d) for the submission of public comments expired on August 25, 1989. The United States received comments within the waiting period from the United Rubber, Cork, Linoleum & Plastic Workers of America ("URW") on August 23, 1989; LRC-Surety Products, Inc. ("LRC") on August 24, 1989; Comasec, Inc. ("Comasec") on August 24, 1989; JOMAC Inc. ("JOMAC") on July 17, 1989; and Latex Glove Company, Inc. ("Latex Glove") on July 10, 1989.[3] The United States also received comments from Playtex Family Products Corp. ("Playtex") on September 15, 1989.[4] In accordance with the APPA, the United States has evaluated the comments, and responds to them below. As required by 15 U.S.C. 16(b), the comments are being filed with this Response, and the comments and the Response will be published in the **Federal Register**. Counsel for the United States will inform the Court when publication has occurred.

E. Standards for Review of Consent Decrees

Under the APPA, the primary responsibility for enforcing the antitrust laws and protecting the public interest in competitive markets rests with the Department of Justice. *United States* v. *Waste Management, Inc.*, 1985-2 Trade Cas. (CCH) ¶ 66,651 at page 63,045 (D.D.C. 1985). In carrying out its responsibilities, the Department has broad discretion in prosecuting alleged antitrust violations and determining appropriate relief for the settlement of cases. *United States* v. *Mid-America Dairymen, Inc.*, 1977-1 Trade Cas.

---

[1] Copies of the **Federal Register** Notices are attached to this Response as Exhibit A.

[2] Copies of the affidavits of publication are attached to this Response as Exhibit B.

[3] Copies of the comments are attached to the Response as Exhibits C through G.

[4] A copy of the Playtex comments is attached to the Response as Exhibit H. Although its comments were submitted after the expiration of the comment period, the United States will publish those comments and respond to them.

VOL 54 ISS 218 NOV 14 1989 UMI

(CCH) ¶ 61,508 at page 71,980 (W.D. Mo. 1977), citing *Sam Fox Publishing Co.* v. *United States*, 366 U.S. 683, 689 (1961) and *Swift & Co.* v. *United States*, 276 U.S. 311, 331–32 (1928). Before entering a proposed consent decree, the Court must determine that the decree is in the public interest, 15 U.S.C. 16(e),[8] but that test is limited to ensuring that the Government has met its public interest responsibilities, that is, determining that the proposed Final Judgment falls within the range of the Government's antitrust enforcement discretion. The Ninth Circuit Court of Appeals has explained these respective obligations as follows:

> The balancing of competing social and political interests affected by a proposed antitrust consent decree must be left, in the first instance, to the discretion of the Attorney General * * *. The court's role in protecting the public interest is one of insuring that the government has not breached its duty to the public in consenting to the decree. The court is required to determine not whether a particular decree is the one that will best serve society, but whether the settlement is "within the reaches of the public interest." * * * More elaborate requirements might undermine the effectiveness of antitrust enforcement by consent decree.

United States v. *Bechtel Corp.*, 648 F.2d 660, 666 (9th Cir.) (citations omitted), *cert. denied*, 454 U.S. 1083 (1981).

Indeed, the courts repeatedly have held that the purpose of their review of proposed antitrust consent decrees is not to determine whether this "is the best possible settlement that could have been obtained if, say, the Government had bargained a little harder," *United States* v. *G. Heileman Brewing Co.*, 563 F. Supp 642, 647 (D. Del. 1983), quoting *United States* v. *Gillette Co.*, 406 F. Supp. 713, 716 (D. Mass. 1975), or whether this is the remedy "the court might have imposed had the matter been litigated." *United States* v. *Alcan Aluminum Ltd.*, 605 F. Supp. 619, 622 (W.D. Ky. 1985). Rather:

> Absent a showing of corrupt failure of the government to discharge its duty, the Court, in making the public interest finding, should * * * carefully consider the explanations of the government in the competitive impact statement and its responses to comments in order to determine whether those explanations are reasonable under the circumstances. The Court must also give appropriate recognition * * * to the fact that every consent judgment normally embodies a compromise, and that the parties each give up something which they might have won had they proceeded to trial.

United States v. *Mid-America Dairymen, Inc., supra*, ¶ 61,508 at page 71,980.

In this case, the United States carefully considered the matters that are now being raised in the comments when it formulated its position with respect to this transaction, and the parties have agreed to amend the proposed Final Judgment after consideration of the comments received. We concluded, for the reasons discussed below and in the Competitive Impact Statement, that the public would be best served by the remedial action set forth in the proposed Final Judgment, as amended. If the Court finds that the United States' action represented a reasonable exercise of its antitrust enforcement responsibility and prosecutorial discretion, it may enter the proposed Final Judgment, as amended, as soon as compliance with the APPA is completed by publication of the comments and Response in the **Federal Register**.[9]

F. The Competitive Analysis of the United States

The Department believes that if the proposed Final Judgment, as amended, is entered, the transaction will no longer violate section 7 of the Clayton Act. The proposed Final Judgment, as amended, will ensure the preservation of competition in each relevant market by means of divestitures of manufacturing assets to new, or currently small, competitors in those markets. Thus, the United States concludes that entry of the proposed Final Judgment, as amended, is in the public interest.

1. The Products are Specific Types of Industrial Gloves

Industrial gloves are designed to protect hands from cuts and abrasions and environmental, chemical, and biological agents and/or to protect products from hand-borne contamination. They are manufactured using a variety of processes and materials. They may be as simple as cotton or leather gloves, or may be dipped unsupported gloves,[7] dipped supported gloves,[8] or impregnated gloves,[9] using either natural or synthetic materials. Dipped unsupported gloves are liquid proof, dipped supported gloves may or may not be liquid proof, depending on how they are made, and cotton, leather, and impregnated gloves are not liquid proof.

Industrial gloves have varying degrees of suitability for different uses depending on the manufacturing process and materials employed. Only liquid proof dipped supported and dipped unsupported gloves offer substantial protection for use with chemical agents. As between liquid proof supported and unsupported gloves dipped in the same material, the former offer superior protection from cuts and abrasions, while the latter have superior tactile and dexterity properties. Within the unsupported and liquid proof supported categories, each type of coating material offers protection against certain chemicals or other toxic or corrosive substances superior to other types. When different types of gloves are equally acceptable for a specific use, one type typically is sufficiently less costly to make its use obvious, and a small but significant and nontransitory increase in its price is not likely to cause a significant number of customers to switch to an alternative type of glove.

Consequently, at least among liquid proof supported and unsupported gloves, each type of glove constitutes a separate product market. The five product markets alleged in the Complaint are unsupported gloves dipped in nitrile and liquid proof supported gloves dipped in latex, nitrile, neoprene, or PVC.

2. The Geographic Market for Industrial Gloves is Nationwide

The geographic market for the various types of industrial gloves is the United States because firms that produce and sell those products compete with each other for sales throughout the country.

[8] This determination can be properly made on the basis of the Competitive Impact Statement, the comments and this Response. The procedures of 15 U.S.C. 16(f) are discretionary, and a court need not invoke any of them unless it believes that the comments have raised significant issues and that further proceedings would aid the Court in resolving those issues. *See* H.R. Rep. 93–1463, 93d Cong. 2d Sess. 8–9, *reprinted in* 1974 U.S. Code Cong. & Admin. News 6535, 6538.

[9] The United States respectfully requests that the Court enter the proposed Final Judgment, as amended, promptly. Congress expected federal courts to adopt "the least complicated and least time-consuming means possible" to determine if entry of a proposed final judgment would be in the public interest. *See* S. Rep. No. 93–298, 93d Cong. 1st Sess. 6 (1973), *reprinted in* 1974 U.S. Code Cong. & Admin. News. 6539; H.R. Rep. 93–1463, 93d Cong. 2d Sess. 8, *reprinted* in 1974 U.S. Code Cong. & Admin. News 6539.

[7] Dipped unsupported gloves are made by dipping a "former," a porcelain or metal form shaped like a hand, into a coating material such as latex, nitrile, or neoprene. The result is a liquid proof, chemical resistant glove made only of the coating material.

[8] Dipped supported gloves are made by cutting and sewing a lining material, typically cotton, into the shape of a hand, placing it on a former, then dipping it into a coating material such as PVC, nitrile, latex, or neoprene.

[9] Impregnated gloves are made by impregnating a fabric with PVC, nitrile, etc., then cutting and sewing the resulting material into the shape of a hand as a cotton or leather glove would be made.

3. The Effect of the Transaction

PDH and Edmont sell numerous types of industrial gloves to distributors throughout the United States. They are direct competitors in many of those product markets. In the five product markets identified in the Complaint there are few alternative sources. In all of those five markets, the HHI,[10] measured by dollar sales, exceeded 2700 before the acquisition and increased by more than 380 as a result of the acquisition. The high level of concentration in those markets, combined with the difficulty of entry into those markets, led the Department to conclude that the acquisition would eliminate significant competition in those five markets, increasing the likelihood that prices would rise in those markets.

4. The Proposed Final Judgment, As Amended

Under the terms of the proposed Final Judgment, as amended, PDH is required to divest certain assets relating to the production of industrial gloves in the five product markets in which the acquisition poses a threat to competition. PDH would be required to divest a manufacturing facility in Canton, Ohio, one of two Edmont plants used for the production of unsupported nitrile gloves, and to divest Ansell Granet, which produces all of PDH's dipped supported gloves.

PDH currently manufactures unsupported nitrile gloves at a single plant in Redditch, England, while Edmont manufactures such gloves at its Canton plant and at a plant in Juarez, Mexico. For several reasons the divestiture of the Canton plant is preferable to divestiture of the Redditch plant. Capacity to produce nitrile gloves at Canton is somewhat greater than PDH's capacity at Redditch, and although the English plant is newer, it does not appear to have any competitive advantage relative to the Canton plant in the United States. Edmont has sold in this country substantially more unsupported nitrile gloves manufactured at Canton than PDH has sold manufactured at Redditch. Moreover, the ability of PDH to compete in the United States with gloves produced in England is subject to fluctuating foreign exchange rates and greater transportation costs, problems that have affected its sales efforts, and it is likely that PDH will concentrate sales of gloves manufactured at the Redditch plant in the growing European market. Divestiture of the Canton plant to a suitable new competitor should adequately replace the competition currently provided by PDH, which currently is a small player in the market. Divestiture to a suitable existing, small manufacturer could effectively increase competition by creating an additional strong competitor in a market currently dominated by two companies.

Divestiture of Ansell Granet will effectively eliminate the anticompetitive effects of the acquisition in the various dipped supported industrial glove markets. PDH only recently entered the dipped supported glove markets in 1988, through the acquisition of the Granet Division of the WGM Safety Corp, and PDH competes in the dipped supported markets solely through this facility. Thus, divestiture of Granet to a suitable new competetitor will completely replace PDH in these markets.

G. Response to Comments

With the exception of the comments received from the URW, all of the comments received were from industrial glove manufacturers in competition with PDH and Edmont. The comments primarily fall into three categories: (1) That the proposed divestitures of the Canton Facility and Ansell Granet will not provide adequate relief for the antitrust violations charged in the Complaint; (2) that the product markets charged in the Complaint do not reflect the actual product markets, and thus understate the anticompetitive effects of the acquisition; and (3) that even if the product markets charged in the Complaint are appropriate, the acquisition will enable PDH to wield market power unreasonably in several product markets.[11] Of significance, however, is that not a single purchaser of industrial gloves, including the large, sophisticated industrial glove distributors who comprise the bulk of the customers for gloves, has expressed any concern to the Court or the Department of Justice that the proposed Final Judgment would not adequately protect its interests.

Under the circumstances, the single issue presented here is whether the proposed Final Judgment, as amended, represents a reasonable exercise of the Department of Justice's antitrust enforcement discretion. For the reasons discussed below, the United States has concluded that the proposed Final Judgment, as amended, is an appropriate resolution of this litigation, that it reflects a careful study of the market and is reasonably calculated to prevent the anticompetitive effects alleged in the Complaint, and that its entry therefore is in the public interest.

1. The Viability of the Proposed Divestitures

The Final Judgment provides that the Canton and Ansell Granet operations will be sold to a purchaser or purchasers who can operate them as "viable ongoing businesses engaged in the production of industrial gloves." The Government reserves the right to satisfy itself that the purchase or purchases are for the purpose of competing effectively in the industrial glove market and that the purchaser or purchasers have the managerial, operational, and financial capability to compete effectively in the industrial glove market in the United States. The goal of the proposed Final Judgment, as amended, is to restore the competition in the relevant markets that the acquisition eliminates. The proposed divestitures will accomplish that goal completely. Specifically, the purchaser or purchasers of these facilities will fully supplant PDH in each of these markets.

a. The Canton Facility. LRC, Comasec, and JOMAC question whether the purchaser of the Canton facility can effectively compete in the market for unsupported nitrile gloves. The divestiture of the Canton facility to a qualified purchaser will, however, restore, if not improve, the competitive situation that existed before the merger.

As noted by LRC, PDH has not been a major player in the unsupported nitrile market with its Redditch plant. The new operator of the Canton facility will be able to compete in the U.S. market at least as effectively as PDH could compete from Redditch. Production costs at the Canton facility are competitive in the U.S. market. The Canton facility has the capacity to manufacture 600,000 dozen gloves, slightly more than the Redditch plant.[12]

[10] "HHI" means the Herfindahl-Hirshman Index, a measure of market concentration calculated by squaring the market share of each firm competing in the market and then summing the resulting numbers. For example, for a market consisting of four firms with shares of 30 30, 20, and 20 percent, the HHI is 2,600 ($30^2 + 30^2 + 20^2 + 20^2 = 900 + 900 + 400 + 400 = 2,600$). The HHI takes into account the relative size and distribution of the firms in the market. It approaches zero when a market is occupied by a large number of firms of relatively equal size and reaches its maximum of 10,000 when a market is controlled by a single firm. The HHI increases both as the number of firms in the market decreases and as the disparity in size between those firms increases.

[11] Although the public comments all concern the proposed Final Judgment as originally published, they are applicable equally to the proposed Final Judgment, as amended.

[12] Canton's capacity is well over 25 percent of the estimated United States market for unsupported nitrile gloves.

Canton's 1988 U.S. sales were around $7,700,000, compared to Redditch's sales of $1,289,000. Additionally, fluctuations in currency rates can render exports to the United States from Redditch unprofitable, and growing demand in Europe makes it likely that most of the production of the Redditch facility will be directed toward the Common Market in the future.

LRC, Comasec, and JOMAC argue that the production facility at Canton is obsolete and otherwise unable to compete in the United States market. Experience refutes that concern, however. Although most of the Canton equipment is between ten and fifteen years old, it is functional, currently operating, and well maintained. Only in the past few years has Edmont produced nitrile gloves in Mexico. Prior to that time it maintained its dominant position in the market by manufacturing its gloves at Canton. Even while manufacturing gloves in Mexico, Edmont continues to manufacture substantial quantities of nitrile gloves at Canton—approximately 50 percent of the gloves it sold in the United States in 1988.[13]

Comasec states that the Canton facility has been plagued by labor problems in recent years. The Canton workforce is highly skilled and trained, however, and there is no reason to believe that it would be any less motivated to work for the new purchaser than it has been for Edmont. Although one cannot predict the future course of labor relations at Canton, the parties entered into a four-year collective bargaining agreement in July 1989. Both the new purchaser and the union are bound by the terms of the agreement. The United States is unaware of any current labor problems.

Latex Glove states a concern that the proposed Final Judgment would preclude the purchaser of Canton from manufacturing green unsupported nitrile gloves. Upon further investigation, the United States has determined that the ability to produce green gloves is vital to the ability to successfully compete for the sale of nitrile gloves. Consequently, the parties are filing an amended proposed Final Judgment which deletes from section IV.I the right of Pacific Dunlop to preclude the purchaser or purchasers from manufacturing or selling a green nitrile glove for seven years.

Comasec and JOMAC question the ability of the purchaser to compete without acquiring a distribution system. PDH and other companies in the industry have competed in the market primarily through the use of independent marketing representatives, a marketing system similarly available to the purchaser of Canton if it does not have its own distribution system. Moreover, PDH is required to provide the purchaser with the names of Edmont customers, primarily independent distributors, who purchased gloves made at Canton, and to notify those customers that they bought Canton gloves. We would expect those customers who have been satisfied with Canton gloves to be willing to continue to purchase gloves of comparable quality manufactured there.[14]

LRC correctly notes that the proposed Final Judgment requires only that the purchaser manufacture industrial gloves, not nitrile gloves, but it would make no economic sense for the purchaser not to produce nitrile gloves. The unsupported nitrile market is reportedly growing at eight percent a year, and Edmont has been utilizing about 95 percent of the capacity of the Canton plant to serve that market.[15] In any case, it would make no economic sense to convert Canton's nitrile production to latex, since nitrile gloves are more profitable, and the vast majority of latex gloves are manufactured outside the United States to take advantage of proximity to raw materials and cheaper labor.[16]

Finally, JOMAC notes that PDH may try to increase its Juarez production of nitrile gloves, thus increasing the supply of such gloves in the U.S. market. That development would not be harmful to competition, however. Indeed, it would be beneficial.

b. *Ansell Granet.* Comasec, LRC, and JOMAC also question the ability of the Purchaser of Ansell Granet to compete in the markets for dipped supported gloves. As with unsupported nitrile gloves, however, this divestiture of Ansell Granet completely removes the competitive overlap between PDH and Edmont in the affected markets. It was only through this facility that PDH competed in dipped unsupported gloves. We believe that a purchaser will be at least as competitive in those markets as PDH was prior to the acquisition.

Ansell Granet manufactures a full line of dipped supported and impregnated gloves for industry. Within this category, Ansell Granet supplies about five percent of the United States market. Products manufactured include general purpose and chemically resistant gloves. Ansell Granet has the capability of producing short runs, special colors, and other non-standard product variations. The Ansell Granet organization is vertically integrated and is capable of doing most of the steps needed for the finished product on its premises. Ansell Granet is a well-established company and should be able to continue to compete in the markets for dipped supported gloves.[17]

2. The Relevant Product Markets

LRC and Playtex comment that unsupported nitrile industrial gloves do not comprise a separate relevant product market, as set forth in the Complaint. Rather, they contend that the relevant market is comprised of all liquid proof unsupported industrial gloves, including those made of latex and neoprene. LRC claims that in such a market the merger would be unlawful, and that the proposed Final Judgment does not adequately redress such a violation.

The short answer to this contention is that consideration of markets other than those that are the subject of the Complaint is beyond the purview of these proceedings. The APPA provides, in pertinent part:

Before entering any consent judgment proposed by the United States under this section, the court shall determine that the entry of such judgment is in the public interest. For the purpose of such determination, the court may consider—

(1) The competitive impact of such judgment, including *termination of alleged violations*, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment;

(2) The impact of entry of such judgment upon the public generally and individuals alleging specific injury from the *violations set forth in the complaint* including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

(15 U.S.C. 16(e)) (emphasis added.) In *United States* v. *BNS, Inc.*, 858 F.2d 456, 462–63 (9th Cir. 1988), the court stated: "[T]he APPA does not authorize a district court to base its public interest determination on antitrust concerns in markets other than those alleged in the government's complaint." [18] *Accord, United States* v. *Waste Management, Inc.*, 1985–2 Trade Cas. (CCH) ¶ 66,651, at p. 63,045 (D.D.C. 1985). Clearly there is no basis in the Act for the court to review the decision of the Government to allege, or not to allege, antitrust violations in any given market, as LRC and Playtex would have this Court do.

But further, for the reasons outlined above at section F.1., unsupported nitrile gloves and unsupported latex gloves are clearly in separate product markets. While it is true that unsupported nitrile, latex and neoprene gloves have some overlapping uses, there is little, if any, price sensitivity in demand for the three products, and the Government's investigation has determined that a small but significant change in the relative prices of the three products would not affect consumers' choices of them.

In determining which type of glove to purchase, a consumer's initial concern is the resistant qualities that a particular glove material has to the type of chemical agent with which the consumer works; manufacturers thus include chemical resistance tables in their catalogues. For many chemicals, either latex, nitrile, or neoprene is clearly superior. Where the differences are not so clear, cost is usually the determining factor.

LRC acknowledges that nitrile is substantially more expensive than latex, but asserts that it also is twice as durable, and thus that its value to a customes is virtually identical when nitrile costs twice what latex costs. LRC's assertion that nitrile wears twice as long as latex, offsetting its greater cost, is too simplistic, however. The relative durability of those materials can vary substantially depending upon the chemical agent involved. Safety is the primary concern of users of these gloves, and the cost of gloves usually is small compared to other costs. Thus, customers purchase nitrile gloves when they are convinced those gloves are clearly superior to latex. Otherwise they purchase latex gloves, since latex is substantially cheaper.

3. Ability to Exert Market Power

LRC and Playtex assert that even assuming that separate industrial glove product markets exist, the acquisition will enable PDH to increase its market power in those individual markets. They contend that PDH will be able to force customers to purchase its full line of products to the exclusion of other glove manufacturers. More specifically, LRC claims that the acquisition will enable PDH to engage in unlawful marketing practices. Our investigation did not produce evidence that would lead to such a conclusion, but in any case, if PDH were to violate the law at some future time there are adequate means for redress of such a violation, short of prohibiting what is now a lawful merger.

PDH's acquisition of Edmont does in fact combine leading positions in two distinct markets—latex and nitrile—but that fact does not itself make the acquisition anticompetitive. There is every reason to expect that buyers will continue to purchase both types of gloves on terms that are most advantageous to them, and hence, to consumers. As noted by LRC, currently there is diversity in the buying patterns of distributors, even though Edmont has been in a position to fill most, if not all, of their needs. This condition reflects the desire of distributors to maintain relationships with multiple manufacturers, and their willingness to purchase gloves from other sources when those gloves are competitive in price and of sufficient quality.

In sum, there is no significant evidence that PDH's acquisition of Edmont will give it any greater ability to engage in predatory practices than Edmont alone possessed, if any. Most telling is the absence of complaints from buyers on this point, and further, if PDH does attempt to engage in predatory practices, appropriate relief can be sought at that time.

4. Alternative Remedies Are Not Necessary

LRC takes the view that nothing less than a permanent injunction prohibiting PDH's acquisition of Edmont would provide an adequate remedy for the violation alleged in the Complaint. In effect, it argues that *no* settlement of this litigation should be permitted. Acceptance of that argument would represent an extraordinary restriction on the prosecutorial discretion of the United States. It would require this Court and the Department of Justice to undertake the substantial costs, risks, and delays of litigating to final conclusion a case of substantial complexity, despite the Department's considered judgment that an adequate remedy can be obtained without imposing such costs on the taxpayers.

We are unaware of any instance in which a court has rejected a proposed consent decree in its entirety in the course of a public interest review. Such a conclusion should not be reached absent a compelling demonstration of the inadequacy of other forms of relief, and no such demonstration has been made here.

LRC further suggests that short of an outright injunction barring the acquisition, there are alternatives that should be included in the Final Judgment. Comasec also offers suggested modifications. Both believe PDH should not be permitted to market certain brand name products. Three of the five products identified by LRC, Ansell Conform (unsupported latex), Ansell 224 (unsupported neoprene-latex blend), and Edmont True-Touch (disposable vinyl), and both products identified by Comasec, Edmont Neotek (unsupported neoprene) and Edmont Puretek (unsupported latex), are not in product markets that are identified in the Complaint. There is no basis for requiring PDH to divest products not in product markets charged in the Complaint.

The two remaining products that LRC identifies, Edmont's Sol-vex and PDH's Challenger, are both unsupported nitrile glove products. Requiring the divestiture of one of them is not necessary to preserve competition. Most nitrile glove purchases are made by relatively large, sophisticated distributors, who are likely to be willing to purchase a new product of satisfactory quality and price. The proposed Final Judgment, as amended, will ensure that the purchaser

[13] Canton also produces unsupported latex and unsupported neoprene gloves. The purchaser of the facility will acquire the ability to produce those products as well as unsupported nitrile gloves.

[14] The URW expresses concern that PDH is not required by the proposed Final Judgment to provide to the purchaser of the Canton facility the exact nitrile formulation used by PDH at Canton. There are several provisions in the Judgment that protect the purchaser in that regard, however. Section IV H requires PDH to provide the purchaser with a nitrile formula sufficient to produce gloves of a quality, and at a level of efficiency, "substantially equivalent" to the gloves currently made at Canton. Section IV C requires PDH to provide all proprietary information necessary to manufacture nitrile gloves "to standards of quality at least equal to currently manufactured product." IV C also requires PDH to provide the purchaser with a perpetual license to use all patents currently used in the production of gloves at Canton, and to provide technical assistance to the purchaser, if requested. These provisions assure that the gloves produced at Canton will be competitive in quality with gloves produced elsewhere.

[15] Indeed, PDH requested that the proposed Final Judgment include a provision requiring the new owner of the Canton facility to enter into a contract to sell unsupported nitrile gloves to PDH for a period of time. The United States rejected that Proposal; such supply agreements are difficult to administer by means of a judicial decree, and it is vastly preferable for the new purchaser to be free to negotiate its own terms with customers.

[16] Most of the United States production of latex industrial gloves is comprised of premium latex gloves, a stagnant market.

[17] It is true, as Comasec points out, that PDH will be able to manufacture similar products in Edmont's facilities, but in that event the competitive situation will be no worse than it was when those facilities were operated by Edmont.

[18] In *BNS*, the court did state that it is appropriate to take into account in its public interest consideration the effect of the transaction in other areas of the economy, to the extent those effects resulted from the antitrust violation in the markets alleged. For example, said the court, in a case alleging a violation in a grain market the court could consider "the resulting increase in the price of bread." That analogy is not applicable here, however. Unsupported nitrile gloves are not an input for unsupported latex gloves. In this case LRC and Playtex simply urge that the Court reject the product market alleged by the Government, an issue that is not properly the subject of the public interest determination under the APPA.

VOL 54 ISS 218 NO 14 1989 UMI

of the Canton plant can produce unsupported nitrile gloves comparable in quality to Edmont, the industry leader. The purchaser will be producing gloves at a facility at which Edmont currently produces a substantial quantity of the gloves it sells. Consequently, PDH's maintenance of both the Sol-vex and Challenger brand names does not appear to give it an unfair market advantage.

LRC also suggests that Edmont's unsupported nitrile plant in Juarez, Mexico should be divested rather than the Canton facility. Such a divestiture is unnecessary to correct the competitive problem caused by the acquisition in the unsupported nitrile glove market. As noted above, the new operator of Edmont's Canton facility will occupy a position in that market at least as significant, and probably more so, as that formerly held by PDH. There is no need for it to replace Edmont as a competitor.

Comasec suggests that the proposed Final Judgment be amended to prohibit PDH from competing against the purchaser or purchasers of Ansell Granet and the Canton facility for at least two years, and to restrain it from increasing production of unsupported nitrile gloves at Edmont's Juarez plant or its own plant in Redditch. Such a non-competition requirement would be unworkable as well as undesirable. It would be impossible to prevent competition between PDH and the purchasers of the divested assets without simultaneously inhibiting PDH's ability to compete with other competitors, and such a restraint would deprive customers of the benefits of competition. Comasec's suggestion that PDH be restrained from increasing production of unsupported nitrile gloves at the Juarez and Redditch plants, would also be harmful to competition, and is not necessary to enable the purchaser of the Canton plant to establish itself in the nitrile market.[19]

5. Determinative Documents

LRC notes that the Government identified no determinative documents in the Competitive Impact Statement filed with the Court and published in the **Federal Register**. There were no documents relied upon by the United States that directly caused it to enter into the proposed Final Judgment, as amended.

III

Conclusion

For the reasons set forth in the Competitive Impact Statement and this Response, the Court should find, after publication of this Response in the **Federal Register**, that the proposed Final Judgment, as amended, represents a reasonable exercise of the Department of Justice's antitrust enforcement discretion, is in the Public interest, and should be entered.

Respectfully submitted,

Richard S. Rosenberg

Mary Ann Ryan

Chief, Middle Atlantic Office, Antitrust Division/Department of Justice, The Curtis Center, Suite 650, Seventh & Walnut Streets, Philodelphia, Pennsylvania 19106

Re: United States of America, Plaintiff v. Pacific Dunlop Holdings Inc., Becton, Dickinson and Company; and Edmont, Inc., Defendants

Final Judgment

Dear Mr. Hughes: This letter is in response to the Notice on this subject which appeared in the Federal Register/ Volume 54, No. 121/Monday, June 26, 1989.

The United Rubber, Cork, Linoleum & Plastic Workers of America (URW) is an international labor union headquartered in Akron, Ohio. The URW is affiliated with the AFL-CIO, the Canadian Labour Congress and the International Federation of Chemical, Energy and General Workers Unions. We represent approximately 120,000 workers in the United States and Canada.

URW Local Union No. 688 represents the hourly employees at Edmont's Canton, Ohio plant, one of the facilities to be divested under terms of the Final Judgment. These employees stand to be directly impacted by whatever final decision is made in this antitrust proceeding and their interests should be fully considered in the making of that decision.

Upon careful reading of the Complaint, the Final Judgment and the Competitive Impact Statement, we feel there are some issues that have not been adequately addressed. As a labor union, our primary concern is that our members have good secure jobs with decent pay and benefits. We are opposed to anything that threatens our members' livelihoods.

As you know, the Final Judgment calls for a number of safeguards in order to try to ensure that the divestiture of the Canton facility will not have an adverse impact and that the facility will be given a chance to continue as a viable operation. We appreciate the efforts of the Court and the Justice Department in that direction.

If the Canton facility should be unable to remain a viable operation and be forced to close, the result would be to decrease competition in the market—the direct opposite of the result intended and desired.

We are also concerned about what happens if sale of the Canton facility is not made within a year. The Judgment is not clear on this point.

During efforts to sell the Canton plant, the Judgment requires Pacific Dunlop to operate the plant as a going business and to use all reasonable efforts to maintain the Canton plant as a viable and active competitor. We would submit that the motivation and thus the effort referred to in the preceding sentence might very well mean different things to an owner with a future to work toward and an owner who is marking time while trying to sell the business. Future competitiveness and thus the future of the employees could easily be affected.

The Judgment also requires Pacific Dunlop to supply a purchaser of the Canton facility a nitrile formulation that will enable the production of gloves of a quality, manufacturing efficiency and yield substantially equivalent to that currently achieved at the Canton facility. It would seem to be in the interest of Pacific Dunlop to ensure that "substantially equivalent" means not quite as good as what the Canton facility currently achieves. That could be detrimental to the purchaser and the employees.

In the interest of both the well-being of the employees at the Canton facility and maintaining competition in the nitrile glove industry, we believe these questions need more thorough examination and we would urge the Antitrust Division to withdraw its consent pending a resolution to the questions we have raised in these comments.

Thank you for your thoughtful consideration.

Sincerely,

Steve Clem,
Director, Research & International Affairs.

Exhibit D

Hand Delivered

John J. Hughes,
Esquire, Chief—Middle Atlantic Office, Antitrust Division, The Curtis Center, Suite 650, 7th & Walnut Streets, Philadelphia, Pennsylvania 19106

Re: United States of America v. Pacific Dunlop Holdings, Inc., Becton Dickinson and Company, and Edmont, Inc. (E.D. Pa. Civil No. 89-4522)

Dear Mr. Hughes: We represent LRC-Surety Products, Inc., a competitor of PDH and Edmont in liquidproof unsupported industrial gloves. In response to the notice in the June 26, 1989 issued of the **Federal Register** (54 FR 26854), this letter explains our view that the proposed settlement of this case is not in the public interest because

(1) It does not provide adequate relief from the antitrust violations charged in the complaint—the proposed divestitures are unlikely to be achieved, and even if affected, they would be competitively meaningless;

(2) It ignores the market for unsupported industrial gloves as a whole, including unsupported latex gloves, which PDH will dominate if the settlement proceeds; and

(3) It permits PDH to enhance its current market power in latex and to extend it into other related markets.

The proposed acquisition will result in a substantial reduction of competition in the U.S. Superficially, such a reduction in competition in the U.S. might seem to benefit those few suppliers who are left (though it clearly disserves the consumer, as the complaint recognizes). Indeed, you may already have observed that the major distributors, who themselves have acquired competitors in recent years, welcome further concentration at the supply level. Why then should LRC-Surety complain about a concentration-increasing merger of its to largest competitors?

The answer is that LRC-Surety's business interest in this matter coincides with consumer interests. The geographic market involved here is worldwide. If the settlement is approved, the world's largest seller of unsupported latex gloves will join the world's largest seller of unsupported nitrile gloves. The acquisition will bring together the worldwide number one and number two in industrial gloves in a combination that will outstrip its next nearest competitor by nearly three-to-one in worldwide gross sales. PDH will control an agglomeration of industry-leading trademarks, state-of-the-art production facilities, technical expertise and pervasive distribution networks that will dominate industrial gloves in virtually every country where those gloves are sold.

Being among the few survivors in a global market so completely dominated by PDH is not an attractive prospect for LRC-Surety, and it thus opposes the merger as fervently as would any sophisticated, cost-conscious consumer. At all events, irrespective of our admitted business interest in the matter, I trust that our comments will be judged on their merts.

We think the proposed settlement fails the APPA's public interest test in at least three ways.

1. The "relief" proposed in the settlement will not prevent, or even reduce, the merger's illegal impact.

The complaint correctly charges that the proposed merger will eliminate actual and potential competition in U.S. markets for industrial gloves, in clear violation of Section 7. But the settlement will do nothing to cure the illegalities the complaint identifies; nor will it stem the elimination of competition in unsupported latex gloves, or in unsupported gloves as a whole, which the government has completely overlooked (*see* pp. 6-8 below). The proposed divestitures won't even touch the problem of enhanced market power that will enable PDH to raise or lower prices at will in the relevant markets without regard to competitive pressures.

A. It is no cure for the anticompetitive consequences in unsupported nitrile gloves when PDH gets to keep Edmont's state-of-the-art manufacturing plant in Juarez, Mexico, and its dominate Sol-Vex brand, and has only to divest a 60-year old, thoroughly obsolete plant in Canton, Ohio.

The settlement merely requires PDH to do something it would have done anyway. Before it transferred its main nitrile production from Ohio to Mexico, Edmont was posting a wholesale price of $10.00 per dozen for its Sol-Vex nitrile glove. Since the move the wholesale price has dropped to $8.70 per dozen. Based on its own production costs at its competing facility in Carrollton, Ohio, LRC-Surety estimates Edmont's Canton cost at close to $8.00. But we estimate Edmont's cost in Mexico at about $5.00 per dozen, which permits an $8.70 wholesale price. It defies belief that PDH would continue to operate the Canton plant after the merger, irrespective of the proposed settlement.

No one can compete out of obsolete facilities with that kind of costs disparity. No rational competitor would want the Canton facility, and no new entrant would take it even temporarily to get a "foothold," since the high barriers to entry go far beyond production economics (Compl. ¶ 18). Without an established distributor network and the trademarks excluded from the settlement, even a facility as cost-efficient as Juarez is at best of marginal value to a potential competitive entrant.

Thus, it is unrealistic to expect, as predicted in the Competitive Impact Statement, that the settlement will result in divestiture of the Canton facility or, if divested, that it will be to a purchaser who "will *compete effectively* in the United States market for *unsupported nitrile gloves*, and will supplant the loss of PDH in this market" (CIS at 8) (emphasis added). The proposed Final Judgment itself says only that the divestiture shall be to a purchaser who can operate the plant "as [a] *viable*, ongoing business engaged in the production of *industrial* gloves" (Judgment, ¶ IV, E). There is no requirement that the plant continue to produce nitrile gloves or any other kind of unsupported gloves or that the purchaser be able to compete *effectively* as to those products.

Edmont's move to Mexico further belies the government's promise to preserve effective competition. No one can "compete effectively" out of the obsolete facility in Canton, not even Edmont as shown by its move to Mexico. Nor will there be any "loss of PDH in this market" (CIS at 8). To the contrary, PDH will forcefully be in the market, with all its financial muscle, its distributor relationships, its technical and marketing infrastructure, but now joined with Edmont to build upon, facilitate and enhance the market power of both parties.

B. The divestiture of Ansell Granet does not eliminate the problems of PDH's enhanced market power and

[19] LRC further suggests that the proposed divestitures be required as a precondition to the acquisition. This cannot be done since the acquisition has already occurred. The proposed Final Judgment, as amended, requires PDH to maintain the businesses it has agreed to divest separately from its other operations, and PDH has agreed to be bound by the proposed Final Judgment, as amended, pending its entry by the Court.

acquisition of dominance in new markets.

The Granet supported glove operation, acquired by PDH in 1987, is almost as big a white elephant as Edmont's Canton facility. Granet's Latex is generally cheaper but also less durable than nitrile. At the point where the price of nitrile falls or latex rises so that the ratio is less than 2 to 1, the products are virtually interchangeable. Latex is generally cheaper but also less durable than nitrile. At the point where the price of nitrile falls or latex rises so that the ratio is less than 2 to 1, the products are virtually interchangeable. unsupported nitrile, Edmont's market share in dollars is currently 40%, PDH's 4.4%. The resulting combined HHI would be 1971, an increase of 371 points.

The APPA requires the government to consider alternatives to the proposed settlement, but there is no indication this was seriously done. Injunctive relief as called for in the complaint in the which the United States considered determinative" in coming up with its settlement proposal. Here the government has disclosed no support for the settlement. But surely defendants Holdings, Inc. as a violation of section 7 of the Clayton Act, 15 U.S.C. Paragraph 18. To eliminate the competitive threat posed by the acquisition, the

VOL 54 ISS 218 NO 14 1989 UMI

acquisition of dominance in new markets.

The Granet supported glove operation, acquired by PDH in 1987, is almost as big a white elephant as Edmont's Canton plant. Even before the PDH acquisition, Granet was a small player in supported industrial gloves, accounting at most for about 5 percent in the U.S. against Edmont's nearly 40 percent. After PDH brought Granet, the word in the industry was that Granet began to lose what market share it had. There is a real question whether PDH devoted any significant resources to Granet once the Edmont merger became a possibility. (For example, PDH apparently never acquired the building in which the Granet plant is housed, ostensibly for environmental reasons; it is still owned by Granet's prior owner, Wilson Granet Miller, Inc.).

Granet has such a small place in the industrial glove industry that it offers little incentive to anyone else to "fully replace it," despite the promise in the Competitive Impact Statement (at 9). Meanwhile, PDH's acquisition of Edmont would now make it the dominant force in supported, as well as unsupported, industrial gloves. It no longer needs Granet and, had there been no government intervention, PDH would probably have terminated its operations or folded them into Edmont.

The Granet divestiture proposal gives a cynical message to antitrust counselors—if your client wants to become the dominant market force through an acquisition, advise it to acquire a "dog" first; then have your client agree to divest the "dog" to clear the way for the really anticompetitive merger.

2. The settlement ignores unsupported latex gloves and misses altogether the merger's effect on the market for liquidproof unsupported industrial gloves.

PDH and Edmont somehow have succeeded in arguing gerrymandered markets. In unsupported gloves, the complaint charges defendants only with foreclosure of an alleged market limited to nitrile gloves. To be sure, Edmont has the dominant nitrile brands, and adding in PDH's smaller but still significant competing products, the combination is indeed illegally preemptive.

But as a matter of economic reality, the product market is broader than just unsupported nitrile. It includes gloves made from latex (natural rubber), where PDH is dominant. Latex and nitrile unsupported gloves compete directly, and can be produced on the same equipment in the same plants. There is cross-elasticity both at the production level and at the consumption level. Latex is generally cheaper but also less durable than nitrile. At the point where the price of nitrile falls or latex rises so that the ratio is less than 2 to 1, the products are virtually interchangeable.

Just ask the consumers—the food processors, electronics manufacturers, chemical producers and other businesses who buy these gloves in massive quantities. Look at Edmont's own advertising and promotion. Its explicit market strategy is to offer its industry-leading Sol-Vex nitrile gloves as a replacement for latex. And it's working. End-users have increasingly switched from latex to nitrile (or occasionally back again) for the same glove applications, based on a single calculus of product life versus comparative costs. To ignore latex in this proposed settlement is to ignore the teachings of the *Cellophane* case, the wellspring of the law of market definition.

If the settlement proceeds, the dominant latex producer, PDH, will join forces with Edmont to acquire overwhelming dominance in the U.S. market for liquidproof unsupported industrial gloves. The settlement would result in an increase in the Herfindahl-Hirschman Index by at least 900 points, to 1850. The next closest competitor, Pioneer would be at 225. (LRC-Surety, number four in the market, is at 36). The Department's Merger Guidelines should not be ignored (Guidelines, § 3.11(c) at II–135).

3. The settlement enables PDH to extend its dominance in latex gloves into related markets.

Even if unsupported latex gloves are treated as a separate market from unsupported nitrile gloves (as the government has apparently done), the settlement still furthers a disturbingly anticompetitive combination. It enables PDH, dominant in unsupported latex, to extend its power into unsupported nitrile, as well as into the four lines of supported gloves identified in the complaint. It opens the way for conduct such as "full line forcing," by which PDH can use its illegal dominance in unsupported lines to achieve similar dominance in supported lines. *See Smith-Kline v. Eli Lilly & Co.*, 575 F.2d 1056 (3d Cir.), *cert. denied*, 459 U.S. 838 (1978).

There is no doubting that such dominance will occur as to both unsupported latex and nitrile, even viewed separately. Measured in dollars, PDH's market share of unsupported latex is currently 38.4%, Edmont's 8.9%. The HHI for PDH following the proposed settlement would be 2237, an increase of over 760 points. In unsupported nitrile, Edmont's market share in dollars is currently 40%, PDH's 4.4%. The resulting combined HHI would be 1971, an increase of 371 points.

Thus, even accepting the government's approach to market definition, the increase in concentration in *both* latex and nitrile is improper under the Merger Guidelines. The increase in latex, ignored by the government, is even *worse* than in nitrile, which the government has attacked as illegal.

The proposed settlement enables PDH to extend its dominance into areas, such as unsupported nitrile where it has not previously played a major role. Distributors of liquidproof unsupported industrial gloves maintain stocks of both latex and nitrile products. As long as PDH and Edmont compete with each other, distributors and consumers benefit from competitive pricing and product choice. Suppliers such as LRC-Surety can still find a market niche with the distributors for their products.

But if PDH acquires Edmont, it can offer the leading brands in both latex and nitrile. And Edmont brings market power in supported gloves—nitrile, PVC, neoprene and latex—as stated in the complaint. PDH can then offer discounts based on tied-together product lines, the classic "if you want our best price on x, you've got to buy y and z as well" condemned in *Smith-Kline*.

The dangers of this bundling and leveraging, *i.e.* "full line forcing," are increased by the structure of the industrial glove industry. As the government has correctly observed (Complaint, ¶ 18), industrial glove producers must have substantial distributor relationships to compete effectively in the U.S. Distributors link the supplier and the consuming public. Edmont in particular has built a large, disciplined distributorship network that reaches every corner of the nation.

To date, no supplier (including PDH and Edmont) has had the ability to produce every line of industrial gloves. This has encouraged diversity in the buying patterns of distributors, even the most disciplined Edmont distributors, and enhanced competition. But now, the proposed settlement will allow PDH to add Edmont's dominance in nitrile to its own market power in latex, as well as to acquire dominance in at least four distinct markets for supported gloves. Such power enhancement has a simple description in antitrust law—monopolization and attempt to monopolize. Section 7 of the Clayton Act was enacted to prevent it.

* * * * *

The APPA requires the government to consider alternatives to the proposed settlement, but there is no indication this was seriously done. Injunctive relief as called for in the complaint is the appropriate remedy to protect the public interest. Yet even short of an outright injunction barring the acquisition, there are several alternative requirements not mentioned by the government that would have a real pro-competitive impact.

—*Divestiture of the Mexican Plant.* This underpins Edmont's supremacy in nitrile unsupported gloves. PDH is one of the few producers in the world whose current operations and whose plants in the Far East would allow it to replace the loss of the Juarez plant. Meanwhile, the Juarez plant (unlike the Canton plant) would be of real interest to existing producers currently attempting to compete in the market for liquidproof unsupported industrial gloves.

—*Divestiture of Dominant Brands.* PDH should not be permitted to retain Edmont *and* Ansell products with a high level of brand name recognition, *e.g.*, Ansell Conform unsupported latex, Ansell 224 unsupported neoprene-latex blend, and Edmont True Touch unsupported PVC. Divestiture of Edmont's Sol-Vex brand of liquidproof unsupported nitrile gloves should also be required. PDH already has the Challenger brand, an identical nitrile glove, which competes with Sol-Vex by undercelling it. Divesting the Sol-Vex brand and keeping Challenger in the market will preserve that price competition.

—*Requiring Completion of Divestitures as Precondition to Acquisition.* The proposed Canton and granet divestitures will not undo the competitive injury that will result from the acquisition, as explained above. But if the government decides to retain those divestitures as the only requirements of settlement, it should at least make sure that they actually occur. As a practical matter, it is doubtful that PDH (or a Trustee) will find a purchaser who can compete effectively in any of the relevant markets. In the past, in situations where the ability to achieve effective divestiture has been suspect, the Justice Department has required that the "fix" be effected *before* the acquisition was consummated. That approach is imperative here if the decree is to effect, at a minimum, even the negligible relief currently proposed.

* * * * *

Section 2(b) of the APPA requires the disclosure of "materials and documents which the United States considered determinative" in coming up with its settlement proposal. Here the government has disclosed no support for the settlement. But surely defendants must have provided at least some documents—such as arguments in correspondence, market share data, and the like—that persuaded the government to settle for less than what its complaint would require. The "determinative" documents requirement is to be taken seriously. *U.S. v. Central Contracting Co., Inc.*, 1982 Trade Cases (CCH) ¶ 64, 833 (E.D. Va. 1982). It appears to have been overlooked here.

* * * * *

The complaint shows that the government recognizes at least some, if not all, of the threats to competition presented by the proposed merger. But the proposed settlement fails to do what proper antitrust enforcement should do. It ignores the real economics of the industry. It prescribes economically meaningless gestures in place of enforcement. The settlement should be completely rethought and renegotiated.

We appreciate the opportunity to comment and would welcome the opportunity to provide further information about the industry and the anticompetitive implications of the proposed merger.

Respectfully yours,
Arthur H. Kahn.

Exhibit E

August 21, 1989.
John J. Hughes,
Chief, Middle Atlantic Office, Antitrust Division, Department of Justice, The Curtis Center, Suite 650, 7th & Walnut Streets, Philadelphia, PA 19106

Reference: United States of America V. Pacific Dunlop Holdings Inc.; Becton, Dickinson and Company; and Edmont, Inc. (E.D. Pa. No. 89–4522, Filed June 16, 1989)

Dear Mr. Hughes: We submit this letter pursuant to 15 U.S.C. Paragraph 16(d) as a formal written comment on the proposed consent judgment relating to the above-reference matter. Comasec, Inc. produces dipped supported gloves at its plant in Enfield, Connecticut and has considerable familiarity with the sale and manufacture of various types of industrial gloves in the United States. Comasec International, S.A., its parent company, is the second largest producer of synthetic industrial gloves in the world.

In this action, the United States government challenges the proposed acquisition of the United States assets of Edmont, Inc. by Pacific Dunlop Holdings, Inc. as a violation of section 7 of the Clayton Act, 15 U.S.C. Paragraph 18. To eliminate the competitive threat posed by the acquisition, the government proposes to require PDH to divest itself of its Ansell Granet, Inc. plant in North Carolina and of Edmont's manufacturing facility in Canton, Ohio. The competitive Impact Statement explains that an acceptable purchaser of the Ansell Granet plant will fully replace PDH as a competitor in the market for liquid dipped supported gloves and that an acceptable purchaser of the Canton facility will replace PDH as a competitor in the market for unsupported nitrile gloves.

Unfortunately, the consent judgment submitted in this matter will fail to accomplish both of the government's objectives.

PDH acquired the Granet plant in North Carolina through its subsidiary Ansell, Inc. several years ago. Utilizing the information thus obtained relating to customer identity, buying trends and prices, PDH markets Granet products through the Ansell distribution network, no longer through an independent sales force. Divestiture of this plant does not eliminate PDA after the Edmont acquisition from the liquid-proof dipped supported glove market as the government surmises, because PDH will continue selling the products formerly known as Granet to former Granet customers and compensate for any shortfall in production by increasing output at the newly acquired Edmont facilities in Ohio, North Carolina, Louisiana and Canada. This all the more so since major products in the dipped supported gloves market tend to overlap significantly across the various manufacturer ranges.

There is not so much proprietary technology or patent protection in making the products per se, as in achieving low cost position, constant high quality and market recognition of a specific item within a widely produced type.

In order to "fully replace" PDH as a competitor in this market, the prospective purchaser must be given the Ansell Granet customer lists accompanied by a non-compete agreement from PDH of at least two years in duration. Even then, the purchaser would have to reconstruct the Granet marketing network and re-establish its name recognition in order to compete effectively.

The Edmont facility in Canton, Ohio suffers similar disabilities and further has been plagued with labor problems in recent years. PDH production requirements will remain largely

unaffected by the proposed divestiture since any shortfall will be met by increased output at the Edmont plants in Juarez, Mexico and Bristol, UK K., both

short of achieving any real change in the premise that "PDH" would have substantial control of the market for unsupported nitrile gloves or for liquid

Dear Mr. Rosenberg: Thank you very much for sending me a copy of the proposed final judgment from the subject case. Our company may be

Thank you again for your consideration and assistance. We look forward to hearing from you soon.

Sincerely,

not possess. This is important because of the means of distribution used in the industrial glove market. Virtually all industrial gloves are sold by producers

Date and Time: December 7, 1989 at 2:00 p.m.

Place: Hyatt Regency Phoenix at Civic Plaza, 122 North Second Street, Phoenix,

VOL 54 ISS 218 NOV 14 1989 UMI

unaffected by the proposed divestiture since any shortfall will be met by increased output at the Edmont plants in Juarez, Mexico and Bristol, UK K., both of which are currently operating below capacity. To preserve the present level of competition in the unsupported nitrile glove market PDH must be required to enter into a non-compete agreement with the prospective purchaser coupled with a limitation on production increases at the Juarez and Bristol plants for a minimum two-year period. Additionally, PDH must refrain from marketing other gloves currently produced in Canton, including the unsupported neoprene and natural rubber gloves known respectively as Neotek and Puretek. Although these product lines comprise a relatively minor part of the unsupported industrial glove market, their unavailability from PDH/Edmont should facilitate transfer of current customers of Canton to the purchaser of the facility.

Unless modified as suggested above, the divestiture ordered by the judgment offers prospective purchasers two older production facilities with no market share, no brand name recognition, no sales organization and no established management team. Without the benefit of the intangibles required to make the operations competitive, purchasers would merely be accommodating PDH by taking unnecessary equipment off its hands. It would be cheaper and simpler to organize an independent company for entry into these segments of the industrial glove market.

We trust these comments will assist you in evaluating the future efficacy of the proposed consent judgment and the impact of its entry upon the public. Thank you for your consideration.

Very truly yours,
COMASEC, INC.
Francis T. Berend,
Its President.

Exhibit F

July 14, 1989.
Mr. John J. Hughes,
Chief, Middle Atlantic Office, Anti-trust Division, Curtis Center-Suite 650, 7th and Walnut Streets, Philadelphia, PA 19106

Dear Chief Hughes: I am writing in reference to Civil Action 89-4522, United States of America vs. Pacific Dunlop Holding, Inc.; Becton Dickinson and Company; and Edmont, Inc.

I realize that much time and effort has gone into the evaluation of the proposed transaction between Pacific Dunlop Holding and Becton, Dickinson. I believe that the proposed final judgement falls short of achieving any real change in the premise that "PDH" would have substantial control of the market for unsupported nitrile gloves or for liquid proof supported gloves.

The divestiture of Edmont's manufacturing facility in Canton, Ohio would probably result in "PDH" transferring the production to Juarez, Mexico thus providing "PDH" with an adequate supply of unsupported nitrile gloves and enable it to dominate the U.S. market and maintain an unfavorable advantage over any and all competitiors.

A potential purchaser of the Canton facility would certainly be at a disadvantage. They would be "johnny come lately" in the market and have to develop a new marketing team and compete with the giant that certainly has a running start.

I believe investigation will indicate that Edmont is already in the process of transferring much of it's production from the Canton facility to Juarez, Mexico. This would lead me to believe that the Canton facility is by it's very nature antiquated and noncompetitive.

The divestiture of Ansell Granet, Inc. would, in my opinion, result in the transfer of the production at the Snow Hill facility to other Edmont facilities in the United States, Canada, and Mexico. Ansell has through it's operation of Granet obviously obtained access to all Granet's marketing information and this is certainly the big plus when it comes to a company that has more than adequate production facilities. The divestiture of old, and possibly obsolete, facilities or equipment serves no practical purpose unless there is a procedure to prevent "DHL" from calling on or selling any of the accounts that were part of Ansell Granet's, Inc. marketing program.

I do not have access to Edmont's production information, the above comments are intended to prompt further investigation and possibly a better answer to the question at hand.

Respectfully,
W.J. Grundy,
Chairman, Jomac Products, Inc.

Exhibit G

July 5, 1989.
U.S. Department of Justice,
Antitrust Division, Middle Atlantic Office, The Curtis Center, Suite 650, Independence Square West, Philadelphia, PA 19106
Attention: Mr. Richard S. Rosenberg, Attorney
Reference: 60-2361-0001, *United States v. Pacific Dunlop*

Dear Mr. Rosenberg: Thank you very much for sending me a copy of the proposed final judgment from the subject case. Our company may be interested in acquiring the Canton facility and Ansell Granet and have expressed that interest directly to Pacific Dunlop. However, in reviewing the terms of the final judgment there are several questions which come to mind.

Under sections IV.B and IV.C, we understand that the divestiture of the Canton facility excludes nitrile formulations. However, section C states that the purchaser of the Canton facility will be provided with proprietary information to manufacture each type of industrial glove product produced at Canton since 1987. To our knowledge, this would include nitrile industrial gloves for which a nitrile formulation would be required. Please explain this apparent discrepancy.

We have taken note of Section H which provides that Pacific Dunlop will supply the purchaser with a nitrile formulation to make gloves of a quality, manufacturing efficiency, and yield substantially equivalent to those manufactured by Edmont at Canton but it is our belief that those three criteria would in fact require that the gloves be made using the nitrile formulation currently used by Edmont at the Canton facility.

Section I includes a prohibition from the manufacture or sale of a green nitrile glove for seven years following the date of divestiture. The world market for nitrile gloves has basically standardized on a green color and gloves of any other color account for a minimal percentage of both the American market and world market for nitrile gloves. All other American producers of nitrile gloves including our company use the green color. There acre, since our company has been manufacturing green nitrile gloves, we could not consider the acquisition of the Canton facility without removal of the prohibition from selling a green nitrile glove for seven years. Although we have not yet seen financial statements relating to the Edmont Canton facility or Ansell Granet, we are concerned about our ability to obtain sufficient financing to acquire these assets as well as supply sufficient working capital to maintain and expand these businesses on an ongoing basis. Therefore, with reference to section VII, we would appreciate knowing under what conditions the United States, as plaintiff, would consent to defendants financing any part of a proposed purchase.

Thank you again for your consideration and assistance. We look forward to hearing from you soon.

Sincerely,
Richard A. Rivkin,
President.

Exhibit H

Via Federal Express

James Rill,
Esq., Assistant Attorney General, Antitrust Division, Department of Justice, 10th Street & Pennsylvania Avenue, NW., Washington, D.C. 20530.

Re: *Pacific Dunlop Holdings, Inc., et al.*

Dear Mr. Rill: I am Executive Vice President of Playtex Family Products Corporation ("Playtex"), and am writing to express our concerns over the proposed acquistion of the United States assets of Edmont Inc. ("Edmont") by Pacific Dunlop Holdings Inc. We recently were informed of the proposed settlement reached by the parties to the acquisition and the Department of Justice, and we wanted to bring to your attention our views.

Playtex is a small producer of unsupported neoprene latex gloves, with 1988 sales of approximately $2.5 million. The gloves manufactured by Playtex are used interchangeably with other unsupported gloves, including unsupported nitrile gloves and unsupported latex gloves, and with some supported neoprene gloves. For example, photo processors use both unsupported neoprene latex gloves and unsupported nitrile gloves. The same is true of various electronics manufacturers, such as makers of computer micro-chips, and other manufacturers whose processes include handling acids. Manufacturers of fiber optic cable, who use neoprene latex gloves, could also use other gloves which are cut resistant, such as nitrile gloves in response to a price difference among various types of cut resistant gloves. We believe Edmont is the dominant producer in the U.S. market for unsupported gloves while Pacific Dunlop's subsidiary, Ansell Granet, is the third largest producer. The proposed combination, even allowing for the divestitures proposed by the settlement agreement, will be the dominant firm in the manufacture and sale of unsupported gloves.

The proposed combination will also result in a dominant producer of industrial gloves, which includes both supported and unsupported gloves. Ansell will possess a full line of industrial gloves, which it currently does not possess. This is important because of the means of distribution used in the industrial glove market. Virtually all industrial gloves are sold by producers to distributors, who make the actual sales to end users. We believe that approximately 85% of industrial gloves are sold through such distributors. One hundred percent of Playtex's industrial glove production is sold through distributors. Such distributors are interested in carrying a full line of industrial gloves, and the proposed combination of Edmont and Pacific Dunlop will allow Edmont and Pacific Dunlop to offer a full line of products to such distributors. This could easily result in small producers with limited product lines, such as Playtex, being squeezed out of the only access to the market.

The pricing plan already adopted by Edmont suggests that such foreclosure is a distinct possibility. Edmont offers discounts for larger orders. For example, under its "Alpha" pricing plan, distributors are rewarded with larger discounts for the purchase of $40,000 of a combination of industrial gloves and rain suits. By offering discounts for large orders covering all types of industrial gloves, Edmont will be able to use its market power to prevent producers with limited lines and limited sales of industrial gloves, such as Playtex, from sales to distributors, effectively foreclosing such producers from reaching the consumers of industrial gloves.

In sum, we believe that further investigation is required before the proposed settlement is approved. We believe that your Department should investigate further the implications of Ansell possessing a full line of products in light of the only existing means of distribution in this industry.

Very truly yours,
Ronald B. Gordon.

Immigration and Naturalization Service

[INS No. 1345-89]

Immigration and Naturalization Service User Fee Advisory Committee; Meeting

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Notice of meeting.

Committee Holding Meeting: Immigration and Naturalization Service User Fee Advisory Committee.

Date and Time: December 7, 1989 at 2:00 p.m.

Place: Hyatt Regency Phoenix at Civic Plaza, 122 North Second Street, Phoenix, Arizona 85004.

Status: Open. Fourth meeting of this Advisory Committee.

Purpose: Performance of advisory responsibilities to the Commissioner of the Immigration and Naturalization Service pursuant to section 286(k) of the Immigration and Nationality Act of 1952, as amended. [8 U.S.C. 1356(k)] and the Federal Advisory Committee Act [5 U.S.C. App. 2].

Agenda:

1. Introduction of the Committee members.
2. Discussion of administrative issues.
3. Discussion of activities since last meeting.
4. Discussion of specific concerns and questions of Committee members.
5. Discussion of relevant written statements submitted in advance by members of the public.
6. Scheduling of next meeting.

Public Participation: The meeting is open to the public, but advance notice of attendance is requested to assure adequate seating. Persons planning to attend should notify the Contact Person at least two (2) days prior to the meeting. Members of the public may submit written statements at any time before or after the meeting to the Contact Person for consideration by this Advisory Committee. Only written statements received at least five (5) days prior to the meeting by the Contact Person will be considered for discussion at the meeting.

Contact Person: Sharon L. Isenberg, Program Analyst, Office of the Assistant Commissioner, Inspections, Immigration and Naturalization Service, Room 7123, Chester Arthur Bldg., 425 I Street NW., Washington, DC 20536, Telephone (202) 633-2685.

Dated: October 26, 1989.
Richard E. Norton,
Associate Commissioner, Examinations, Immigration and Naturalization Service.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 89-78]

NASA Advisory Council (NAC), History Advisory Committee (HAC); Meeting

AGENCY: National Aeronautics and Space Administration.

VOL 54 ISS 218 NO 14 1989 UMI

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, History Advisory Committee.

DATES: November 20, 1989, 9:00 a.m. to 4 p.m.

ADDRESSES: National Aeronautics and Space Administration, Room 7002, Federal Building 6, 400 Maryland Avenue SW., Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Dr. Sylvia D. Fries, Code XH, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-8300).

SUPPLEMENTARY INFORMATION: The History Advisory Committee was established to provide advice and guidance to the NASA history program, which maintains a non-record historical reference file and publishes works in the history of aeronautics and space science and technology. The Committee, chaired by Dr. Arthur Norberg, consists of 8 members. The meeting will be open to the public up to the seating capacity of the room, which is approximately 20 persons, including Committee members and other participants. It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the participants.

Type of Meeting: Open.

Agenda:

November 20, 1989

9 a.m.—Introductory Remarks.
9:15 a.m.—Program Review.
10 a.m.—Update on Five Year Plan.
1:00 p.m.—Program Planning.
4:00 p.m.—Adjourn.

Dated: November 7, 1989.

John W. Gaff,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-445]

Texas Utilities Electric Co., et al.[1]; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an exemption from a portion of the requirements of Appendix J of 10 CFR part 50 to the Texas Utilities Electric Company, et al. (the applicant). The exemption would apply to the facility operating license for the Comanche Peak Steam Electric Station, Unit 1, located on the applicant's site in Somervell County, Texas.

[1] The current owners of the Comanche Peak Steam Electric Station are: Texas Utilities Electric Company (TU Electric), Tex-La Electric Cooperative of Texas, Inc. (Tex-La), and Texas Municipal Power Agency (TMPA). Transfer of ownership from TMPA to TU Electric was previously authorized by Amendment No. 9 to Construction Permit CPPR-126 for Comanche Peak, Unit 1 on August 25, 1988 to take place in 10 installments as set forth in the agreement attached to the application for amendment dated March 4, 1988. At the completion thereof, TMPA will no longer retain any ownership interest in Comanche Peak, Unit 1. Transfer of ownership from Tex-La to TU Electric was previously authorized by Amendment No. 11 to Construction Permit CPPR-126 for Comanche Peak, Unit 1 on August 29, 1989 as set forth in the agreement attached to the application for Amendment dated May 4, 1988. At the completion thereof, Tex-La will no longer retain any ownership interest in Comanche Peak, Unit 1.

Environmental Assessment

Identification of the proposed action: The proposed action would allow an exemption from the requirements of 10 CFR part 50, Appendix J, section III.D.2(b)(ii) for the operation of Comanche Peak, Unit 1 in response to the applicant's request dated January 20, 1988.

The need for the proposed action: Section III.D.2(b)(ii) of appendix J states that "Air locks open during periods when containment integrity is not required by the plant's Technical Specifications shall be tested at the end of such periods at not less than P_a." In its request, the applicant requested that the Comanche Peak Unit 1 Technical Specifications be written to instead require an overall air lock leakage test at P_a to be performed only upon completion of maintenance which has been performed on the air lock that could affect the air lock sealing capability. Otherwise, if an air lock is opened during periods when containment integrity is not required and no such maintenance has been performed, a door seal leak rate test (a less time-consuming test) must be performed. This requested exemption is consistent with the staff's position on the acceptable testing frequency necessary to demonstrate air lock sealing capability intended in appendix J. The staff's current position is shown in the Standard Technical Specifications for Westinghouse Pressurized Water Reactors (NUREG-0452, Revision 4). Until Commission rulemaking changes the current requirement in appendix J, an exemption to the present regulation must be granted before the applicant can adopt the requested Technical Specification. The proposed exemption is needed because, based on experience at various plants, the staff found that literal compliance with section III.D.2(b)(ii) of Appendix J is not necessary to assure containment leaktightness. The requested exemption is consistent with the staff's technical position and has been granted to many plants. Literal compliance with the regulation would lead to increased costs and occupational exposure.

Environmental impacts of the proposed action: The proposed exemption to 10 CFR part 50, Appendix J, section III.D.2(b)(ii) will assure air lock sealing capability and containment integrity; therefore, this exemption will not increase the probability of accidents and post-accident radiological releases, nor otherwise affect radiological plant effluents. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with this proposed exemption.

With regard to potential non-radiological impacts, the proposed exemption involves systems located entirely within the restricted area as defined in 10 CFR part 20. The proposed exemption does not affect non-radiological plant effluents and has no other environmental impact. The Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed exemption.

Alternative to the proposed action: The principal alternative would be for the Commission to deny the requested exemption. This would result in increased costs and occupational exposure and would not reduce the environmental impacts of plant operation.

Alternative use of resources: This action does not involve the use of resources not previously considered in the Final Environmental Statement related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (NUREG-0775), dated September 1981.

Agencies and persons consulted: The NRC staff reviewed the applicant's request and applicable documents referenced therein that support this exemption for Comanche Peak, Unit 1. The NRC did not consult other agencies or persons in preparing this assessment.

Finding of No Significant Impact

The Commission has determined that preparation of an environmental impact statement for this proposed action is not necessary. Based on the foregoing environmental assessment, the Commission concludes that this action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the applicant's request for exemption dated January 20, 1988. This document is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room at the Somervell County Public Library on the Square, P.O. Box 1417, Glen Rose, Texas 76043. The staff's evaluation of the request will be published in the Safety Evaluation Report related to the operation of the Comanche Peak Steam Electric Station, Units 1 and 2 (NUREG-0797), Supplement No. 22, and will be available for inspection at the locations listed above.

Dated at Rockville, Maryland, this 9th day of November, 1989.

BILLING CODE 7590-01-M

[Docket No. 50-445]

Texas Utilities Electric Co., et al.[1]; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an exemption from the requirements of 10 CFR 50.33(k) and 10 CFR 50.75 to Texas Utilities Electric Company, et al. (the applicant). The exemption would apply to the facility operating license for the Comanche Peak Steam Electric Station, Unit 1 (the facility) located on the applicant's site in Somervell County, Texas.

Environmental Assessment

Identification of proposed action: The proposed action would allow a temporary exemption from the requirements of 10 CFR 50.33(k)(1) and 10 CFR 50.75 for the operation of Comanche Peak, Unit 1, in response to the applicant's request dated July 28, 1989. The applicant has requested that it be allowed to file its decommissioning funding report within the same time frame as is specified in 10 CFR 50.33(k)(2), that is, on or before July 26, 1990.

Need for proposed action: 10 CFR 50.33(k)(1) requires that each application for an operating license for a production or utilization facility include information in the form of a report, as described in 10 CFR 50.75, indicating how reasonable assurance will be provided that funds will be available to decommission the facility. 10 CFR 50.75 establishes requirements for indicating how reasonable assurance will be provided that funds will be available for decommissioning. 10 CFR 50.33(k)(2) specifies that each holder of an operating license is required to submit information in the form of a report indicating how reasonable assurance will be provided that funds will be available to decommission the facility on or before July 26, 1990. By letter dated July 28, 1989, the applicant requested a temporary exemption from the requirements of 10 CFR 50.33(k)(1) and 10 CFR 50.75 for Comanche Peak, Unit 1 and proposed to delay submittal of its decommissioning funding report until July 26, 1990. The proposed exemption is needed because there has been insufficient time for the applicant to complete all of the actions necessary to submit its decommissioning funding report as an operating license application document. The funding report and required certification are complex and require careful and deliberate financial planning. The applicant is evaluating the funding options to determine which is more appropriate. Once this decision is made, the applicant must effectuate its decision by financial instrument. If the applicant chooses to use an external sinking fund, it will need to execute one or more trust agreements. Exactly how the trust and external sinking fund would be structured would in turn depend on Internal Revenue Service and Texas Public Utility Commission requirements. The exemption is being sought to provide the time the applicant believes is necessary to perform proper planning and provide the Commission with an accurate and informed report.

Environmental impacts of the proposed action: There are no environmental impacts associated with the proposed action. The proposed exemption from 10 CFR 50.33(k)(1) and 10 CFR 50.75 will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant cumulative radiation exposure. Accordingly, the Commission concludes that the proposed exemption would result in no significant radiological environmental impact. Additionally, it does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant environmental impacts associated with the exemption.

Alternative to the proposed action: The Commission has concluded that there are no measurable environmental impacts associated with the proposed

[1] The current owners of the Comanche Peak Steam Electric Station are: Texas Utilities Electric Company (TU Electric), Tex-La Electric Cooperative of Texas, Inc. (Tex-La), and Texas Municipal Power Agency (TMPA). Transfer of ownership from TMPA to TU Electric was previously authorized by Amendment No. 9 to Construction Permit CPPR-126 for Comanche Peak, Unit 1 on August 25, 1988 to take place in 10 installments as set forth in the agreement attached to the application for amendment dated March 4, 1988. At the completion thereof, TMPA will no longer retain any ownership interest in Comanche Peak, Unit 1. Transfer of ownership from Tex-La to TU Electric was previously authorized by Amendment No. 11 to Construction Permit CPPR-126 for Comanche Peak, Unit 1 on August 29, 1989 as set forth in the agreement attached to the application for Amendment dated May 4, 1988. At the completion thereof, Tex-La will no longer retain any ownership interest in Comanche Peak, Unit 1.

VOL 54 ISS 218 NO 14 1989 UMI

action. The principal alternative would be for the Commission to deny the requested exemption. This would not reduce the environmental impacts of plant operation.

Alternative use of resources: This action does not involve the use of resources not previously considered in the Final Environmental Statement related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (NUREG–0775), dated September 1981.

Agencies and persons consulted: The NRC staff reviewed the applicant's request and applicable documents referenced therein that support this exemption for Comanche Peak, Unit 1. The NRC did not consult other agencies or persons in preparing this assessment.

Finding of No Significant Impact

The Commission has determined that preparation of an environmental impact statement for the proposed exemption is not necessary. Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the applicant's request for exemption dated July 28, 1989. This document is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room at the Somervell County Public Library on the Square, P.O. Box 1417, Glen Rose, Texas 76043. The staff's evaluation of the request will be published in the Safety Evaluation Report related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (NUREG–0797), Supplement No. 22, and will be available for inspection to the locations listed above.

Dated at Rockville, Maryland, this 6th day of November, 1989.

BILLING CODE 7590–01–M

[Docket No. 50–445]

Texas Utilities Electric Co., et al.[1]; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of an exemption from the requirements of 10 CFR 70.24 to Texas Utilities Electric Company, et al. (the applicant). The exemption would apply to the facility operating license for the Comanche Peak Steam Electric Station, Unit 1 (the facility) located on the applicant's site in Somervell County, Texas.

Environmental Assessment

Identification of proposed action: The proposed action would allow an exemption from the requirements of 10 CFR 70.24 for the operation of Comanche Peak, Unit 1 in response to the applicant's request dated June 30, 1989.

The need for the proposed action: The exemption from 10 CFR 70.24 would allow irradiated or unirradiated fuel assemblies to be handled and stored in the Comanche Peak fuel handling building without having a monitoring system which will energize clearly audible alarms if accidental criticality occurs. This exemption will be deemed acceptable provided that no more than two fuel assemblies are outside an approved shipping container, storage rack, or fuel transfer tube at any time and a minimum 12-inch, edge-to-edge distance is maintained between such assemblies. The proposed exemption is needed to permit fueling and refueling operations at Comanche Peak without the criticality monitoring systems specified by 10 CFR 70.24(a).

Environmental impacts of the proposed action: There are no environmental impacts of the proposed action. Criticality will be precluded by the restriction that no more than two fuel assemblies shall be authorized to be outside of an approved shipping container, storage rack, or the fuel transfer tube at any time and a minimum 12-inch, edge-to-edge distance is maintained between such assemblies. Because these measures provide assurance that criticality will not occur during receipt, inspection, or storage of fuel, this is an acceptable alternative to a monitoring system. Since the proposed exemption does not otherwise affect radiological plant effluents nor cause any significant occupational exposures, the Commission concludes that there are no radiological environmental impacts associated with this proposed exemption.

With regard to potential non-radiological impacts, the proposed exemption involves systems located entirely within the restricted area as defined in 10 CFR part 20. The proposed exemption does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed exemption.

Alternative to the proposed action: The Commission has concluded that there are no measurable environmental impacts associated with the proposed exemption. The principal alternative would be for the Commission to deny the requested exemption. This would not reduce the environmental impacts of the plant operation.

Alternative use of resources: This action does not involve the use of resources not previously considered in the Final Environmental Statement related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (NUREG–0775), dated September 1981.

Agencies and persons consulted: The NRC staff reviewed the applicant's request and applicable documents referenced therein that support this exemption for Comanche Peak, Unit 1. The NRC did not consult other agencies or persons in preparing this assessment.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption. Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have significant effect on the quality of the human environment.

For further details with respect to this action, see the applicant's request for exemption dated June 30, 1989. This document is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room at the Somervell County Public Library on the Square, P.O. Box 1417, Glen Rose, Texas 76043. The Commission's evaluation of the request will be published in the Safety Evaluation Report related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (NUREG–0797), Supplement No. 22, and will be available for inspection at the locations listed above.

Dated at Rockville, Maryland, this 6th day of November, 1989.

BILLING CODE 7590–01–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee; Generalized System of Preferences (GSP)

At the direction of the President, the GSP Subcommittee of the Trade Policy Staff Committee (TPSC) is initiating a special review to consider requests from the Governments of Bolivia, Colombia, Ecuador and Peru to Add Products to the List of Articles Eligible for Duty-Free Treatment Under the GSP. Notice is hereby given that, in order to be considered in the special review, all petitions requesting the additions to the list of articles eligible for duty-free treatment under the Generalized System of Preferences (GSP) must be received at the Office of the U.S. Trade Representative no later than 5 p.m. on Monday, January 15, 1990. The GSP provides the duty-free importation of qualifying articles when imported from designated beneficiary developing countries. The GSP is authorized by Title V of the Trade Act of 1974, as amended, and has been implemented by Executive Order 11888 of November 24, 1975, and modified by subsequent Executive Orders and Presidential Proclamations.

Special GSP Review for Countries in the Andean Region

The governments of Bolivia, Colombia, Ecuador and Peru may submit petitions requesting the President (1) to designate additional articles as eligible for GSP; (2) to waive the competitive need limits with respect to specific GSP eligible articles; and (3) to otherwise expand GSP coverage. Requests to expand GSP product coverage from parties other than the governments noted above, and requests for other modifications of the GSP program will not be accepted at this time. Such requests can be submitted in the 1990 GSP annual review, with a tentative submission deadline of June 1, 1990.

Submission of Petitions and Requests

Petitions and requests to expand GSP treatment should be addressed to: GSP Subcommittee, Office of the U.S. Trade Representative, 600 17th Street, NW., room 517, Washington, DC 20506. Petitions which are hand-carried should be delivered to room 517. All such submissions must conform with regulations codified in 15 CFR part 2007. In addition to these requirements, the petition should identify the product of interest in the Harmonized Tariff System (HTS) nomenclature. The petition should also identify the former TSUS headings for the products of interest and provide the petition history for those TSUS tariff headings. Trade data for the last three years should be provided in the HTS category. Where the conversion to the new nomenclature makes this difficult, HTS estimates can be provided, along with the relevant TSUS data. The methods used to arrive at HTS estimates should also be described.

Information submitted will be subject to public inspection by appointment only with the staff of the USTR Reading room, except for information granted "business confidential" status pursuant to 15 CFR 2003.6 and 15 CFR 2006.10. The telephone number for the USTR Reading room is (202) 395–6186. Petitions and requests must be submitted in twenty copies in English. If the petition or request contains business confidential information, twenty copies of a nonconfidential version of the submission along with twelve copies of the confidential version must be submitted. In addition, the submission containing confidential information should be clearly marked "confidential" at the top and bottom of each and every page of the submission. The version that does not contain business confidential information (the public version) should also be clearly marked at the top and bottom of each page (either "public version" or "nonconfidential").

Prospective petitioners and requestors are strongly advised to review the GSP regulations published in the **Federal Register** on Tuesday, February 11, 1986 (51 FR 5035). Prospective petitioners and requestors are reminded that submissions which do not provide all information required by § 2007.1 will not be accepted for review except upon a detailed showing in the submission that the petitioner or requestor made a good faith effort to obtain the information required. This requirement will be strictly enforced. Petitions with respect to competitive need waivers must meet the informational requirements for product addition requests in § 2007.1(c). A model petition format is available from the GSP Information Center [(202) 395–6971] and USTR Reading room in the publication *A Guide to the U.S. Generalized System of Preferences.* Prospective petitioners are requested to use this model petition format so as to ensure that all informational requirements are met. Furthermore, interested parties submitting petitions that request modifications with respect to specific articles should list on the first page of the petition the following information: (1) the requested action; (2) the classification of the article(s) of interest in HTS nomenclature; and (3), if applicable, the beneficiary country(s) of interest. Questions about the preparation of petitions and requests should be directed to the staff of the GSP Information Center.

Notice of petitions and requests accepted for review will be published in the **Federal Register** on or about Thursday, March 1, 1990. The notice will also provide updated information concerning the opportunity for interested parties to comment on requests accepted for review through public hearings and written submissions. The tentative schedule for public hearing and comment is as follows:

Deadline for Bolivia, Colombia, Ecuador and Peru to submit petitions: January 15, 1990

Deadline for submitting pre-hearing briefs: April 12, 1990

Public Hearings: April 26, 1990

Deadline for submitting post hearing briefs: May 10, 1990

Deadline for submitting rebuttal briefs: May 31, 1990

Deadline for public comment on ITC advice: June 21, 1990

Any modifications to the GSP resulting from the GSP special review will be announced on or about July 13, 1990 and will take effect on or about August 1, 1990.

David A. Weiss,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3190–01–M

PRESIDENTIAL COMMISSION ON CATASTROPHIC NUCLEAR ACCIDENTS

Meeting

The Presidential Commission on Catastrophic Nuclear Accidents, pursuant to its authority under subsection 170(l), of Public Law 100–408, the Price-Anderson Amendments Act of 1988, will hold a meeting on November

---

[1] The current owners of the Comanche Peak Steam Electric Station are: Texas Utilities Electric Company (TU Electric), Tex-La Electric Cooperative of Texas, Inc. (Tex-La), and Texas Municipal Power Agency (TMPA). Transfer of ownership from TMPA to TU Electric was previously authorized by Amendment No. 9 to Construction Permit CPPR–126 for Comanche Peak, Unit 1 on August 25, 1988 to take place in 10 installments as set forth in the agreement attached to the application for amendment dated March 4, 1988. At the completion thereof, TMPA will no longer retain any ownership interest in Comanche Peak, Unit 1. Transfer of ownership from Tex-La to TU Electric was previously authorized by Amendment No. 11 to Contruction Permit CPPR–126 for Comanche Peak, Unit 1 on August 25, 1989 as set forth in the agreement attached to the application for Amendment dated May 4, 1988. At the completion thereof, Tex-La will no longer retain any ownership interest in Comanche Peak, Unit 1.

VOL 54 ISS 218 NO 14 1989 UMI

30, 1989, from 10 a.m.–5 p.m. and on December 1, 1989, from 8:30 a.m.–11 a.m., at the Quality Hotel Capitol Hill, 415 New Jersey Ave., NW., Washington, DC 20001. The Commission was created to conduct a comprehensive study of appropriate means of fully compensating victims of a catastrophic nuclear accident and to submit a final report to Congress no later than August 20, 1990.

At this meeting, representatives of the insurance industry will discuss the industry response to Hurricane Hugo and the San Francisco earthquake, and Dennis Kwiatkowski, Assistant Associate Director of the Office of Natural and Technological Hazards from the Federal Management Agency, will speak on the various funds and methods of responding to natural and man-made disasters as well as FEMA's response to the recent disasters. (Mr. Kwiatkowski was scheduled to speak at the last meeting, but had to postpone because of schedule conflicts). In addition, Jack B. Weinstein, Judge of the U.S. District Court of the Eastern District of New York, will discuss the Agent Orange litigation. There may be additional speakers.

The Commission will also conduct working sessions to begin work on its report to Congress.

At its last meeting, the Commission set dates for meetings in 1989 and 1990. These dates include December 21, January 11–12, February 7–8, March 15–16, April 19–20, May 10–11, and June 4. Agendas and detailed information about these meetings will be available through the Commission office.

The public is permitted to attend all of these meetings, and there will be time during each meeting for brief statements. Transcripts or minutes of these meetings will be available at the Commission office, 600 E St., NW., room 660.

For further information, contact Jerome Saltzman at 600 E St., NW., room 660, Washington, DC 20004, (202) 272–5695. Members of the public planning to attend the Commission meeting should contact Mr. Saltzman at (202) 272–5695 at least two days before the meeting date.

Dated: November 8, 1989.

Jerome Saltzman,

Executive Director, Presidential Commission on Catastrophic Nuclear Accidents.

[FR Doc. 89–26701 Filed 11–13–89; 8:45 am]

BILLING CODE 6820–DF–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 34-27423; File No. SR-PSE-89-25]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Pacific Stock Exchange, Inc.; Relating to the Conducting of a Pilot Program of the Pacific Options Exchange Trading System ("POETS")

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 6, 1989, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange intends to conduct a pilot program of its Pacific Options Exchange Trading System ("POETS"). The system is comprised of an options order routing system ("ORS"), an automatic and semi-automatic execution system ("Auto-Ex"), an on-line book system ("Auto-Book"), and an automatic market quote update system ("Auto-Quote"). The pilot is scheduled to begin in December 1989, and continue for six months. POETS will be implemented in one equity options class in December and will be expanded to all equity options classes at two trading posts by January 22, 1990. POETS is expected to be floorwide by the end of the pilot program. This statement of the terms of substance of the proposed rule change will describe the operation of the various components of the POETS System.

Order Routing System

The options order routing system ("ORS") will be available to all members of the Exchange. ORS will provide the Exchange with a means of accepting, editing and routing orders that are submitted electronically for execution at market prices or placement in the Public Limit Order Book, as well as cancellation of orders previously submitted. Member firm access to ORS will be controlled through the process of connecting member firms to the system by communication links. Eligible orders will be submitted through ORS from member firm offices. Exchange floor brokers will have access to ORS, as will Exchange staff. Member firms, floor brokers, and Exchange staff will receive on-line reports of order execution and cancellation confirmations through ORS.

Orders entered through ORS may be sent to one of three destinations: automatic execution system ("Auto-Ex"), on-line book ("Auto-Book"), or a member firm's default destination. All market orders and executable limit orders that are received by ORS will be directed to Auto-Ex. All non-executable limit orders will be directed to Auto-Book. The default destination is a firm specified point to which orders that are unable to be routed to Auto-book or Auto-Ex are sent. In connection with Auto-Ex, orders can be re-routed from full Auto-Ex to semi-Auto-Ex if the options class eligibility criteria have been changed.

Automatic Execution Description

Firms placed on ORS will automatically be on Auto-Ex for purposes of routing small public customer market and marketable orders for automatic execution. Firms on ORS have the ability to go on and off ORS at will. Firms not on ORS that wish to participate in the pilot will be given access to Auto-Ex from terminals at their booths on the floor. Auto-Ex will be piloted in classes of options on individual equity issues as determined by the Options Floor Trading Committee ("OFTC"). The Auto-Ex function will operate in two modes, full Auto-Ex and semi-Auto-Ex. The semi-Auto-Ex function provides for Order Book staff and crowd intervention.

Full Auto-Ex

When full Auto-Ex receives an order, the system automatically will attach to the order its execution price, determined by the prevailing market quote at the time of the order's entry to the system. A buy order will pay the offer; a sell order will sell the bid. A participating market maker will be designated as contra-broker on the trade.

Auto-Ex will preserve limit order book priority in all options. Orders will be executed against the book when the prevailing market bid or offer is equal to the best bid or offer on the Exchange's book.

Participating market makers will be assigned by Auto-Ex on a rotating basis, with the first market maker selected at random from the list of signed on market makers. Participating market makers are obligated to trade at the displayed market quote at the time an order enters the system for Auto-Ex.

Except for the provisions of Exchange Rule VI, sections 5 and 6, applicable to

position and exercise limits, Exchange rules shall not apply to the extent that they are inconsistent with the terms of the pilot, including but not limited to Rule VI, section 49 (Priority of Bids and Offers), Rule VI, section 47 (Manner of Bidding and Offering), and Rule VI, section 73 (Market Maker Defined). Position and exercise limits will remain in effect for Auto-Ex transactions, pursuant to Rule VI, sections 5 and 6. Transactions executed through Auto-Ex will count towards a market makers fulfillment of the in person requirement of Rule VI, section 5.

Once a trade is executed, all participants are immediately informed of the execution. A fill report is generated to the firm at the firm's point of entry into the system (i.e., either its branch office or floor booth). A market maker is informed of the trade through a scrolling screen above the trading crowd. This display includes the time of execution, executed price, and other trade confirmation information. A market maker will also have access to trade information through the on-line system. Each market maker and member firm may only view their own Auto-Ex trades. Trade reports will be distributed to firms and market makers the following business day, summarizing trade information for the previous day.

Eligible Auto-Ex orders must be market or marketable limit orders for the number of contracts approved by the OFTC. The Exchange, at the OFTC's discretion, may determine to restrict eligible orders, including but not limited to, limiting orders to market order and to lowering or increasing contract limits. The Exchange will have discretion to place on the system such series in the eligible classes of options as the OFTC determines are appropriate. Information concerning eligible series will be made available by the Exchange on a daily basis.

Each day the system is available, Exchange supervisory personnel will start the system after quotes in the eligible series have been updated following opening rotation. If market maker participation is insufficient, the system will not be started. The determination of sufficient participation will be by the OFTC. If the system is or becomes unavailable for any reason, eligible orders will be handled manually.

Eligibility criteria for participation as a contra-broker to Auto-Ex trades during the pilot program will be limited to individual market makers and joint accounts. Market makers must be in the trading crowd when signed onto the system. A market maker must be logged off the system when leaving the trading crowd, except if it is for a short time. Any market maker logging onto the system during an expiration month must log onto the system in that options class whenever he is in the trading crowd until the next expiration. Moreover, if any time there is inadequate participation in a particular options class, the OFTC may require market makers who are members of the trading crowd, as defined in Exchange Options Floor Procedure Advice B–13, Commentary .01, to log onto the Auto-Ex absent reasonable justification for non-participation. Should a member not meet its obligations pursuant to eligibility requirements, disciplinary action may be taken pursuant to Exchange Rule VI, section 30 and Exchange Rule XX.

The Exchange may suspend book participation in Auto-Ex for an option class upon a declaration of unusual market conditions. Such a declaration may be made in an options class whenever the Exchange's Chairman (or his respective nominees) concur in determining that the conditions in that options class are such that it is no longer possible for Exchange operations personnel to conduct normal trading operations and to handle the manual integration of booked and Auto-Ex orders. Such concurrence is also required to restore book participation in Auto-Ex.

Semi-Auto-Ex

The same issue eligibility requirements for full Auto-Ex will be applicable for semi-Auto-Ex. When the semi-Auto-Ex function is used, an order entered by ORS will be sent to Book staff. Upon receipt, Book staff will call for a market in the particular options class and series. If a market maker betters the market, the Book staff can execute the trade with the market maker or allocate the trade among market makers. If no one in the crowd updates the displayed market quote, Book staff can execute the trade against the screen market using the rotation list. Semi-Auto-Ex will then operate in the same manner as full Auto-Ex. If the crowd updates the market and the correct best Book quote is at or better than the market, Book staff can trade the Auto-Ex order and the booked order that makes up the best quote against each other. All orders in the semi-Auto-Ex files can be cancelled in the same manner as in full Auto-Ex.

Pursuant to Article VI, section 6 of the PSE Constitution, the Exchange shall not be liable for any damages sustained by a member or member firm resulting from the use of the Auto-Ex system in the conduct of their business.

Automatic Market Quote Update

Auto-Quote allows market quotes to be generated systematically, using programmed theoretical models and variable criteria which are entered through the Auto-Quote function by Book staff. Market quotes are entered into the trading system, and are used to update the disseminated market screens. Market quote updates also generate records that are sent to OPRA for dissemination to the public.

Auto-Quote will be used by Book staff at the direction of members in the trading crowd. Auto-Quote generation will be initiated at the issue level, per option type, and quotes will be generated and updated at the series level.

The initial implementation of Auto-Quote will include only one variation of the Cox/Ross/Rubinstein model to be used for puts, and the Black-Scholes models for calls. As the pilot progresses, other models, and additional variations on each model, will be reviewed.

On-Line Book System

The new system will eliminate the use of the physical file of orders. Processing of Book orders is currently performed using a physical inventory of orders and a manual tracking system. Auto-Book will provide an on-line Book function that provides Book staff with the ability to enter, update, inquire, delete, cancel and execute Book orders, as well as providing member firms the ability to enter, cancel, update and inquire against their own Book orders.

Book staff will access Auto-Book for a specific series. Open buy orders are displayed first, followed by open sell orders. Auto-Book will also automatically display the total number of contracts per limit price for open Book orders in a specific option series.

The eligibility requirements will remain the same whereby only customer limit orders and cabinet orders may be submitted to the Book.

A member firm may enter its orders to the Book through ORS, Book staff, or the Member Book function. The Member Book function allows a member firm to enter an order from its booth as the order is received.

Auto-Book also allows members to inquire against their own book activity/transactions using the Member Book function. In addition, this Member Book function may also be utilized to cancel orders through the on-line system and confirm outstanding good until cancelled ("GTC") orders.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

and provisions of the Securities Exchange Act of 1934, and in particular section 6(b)(5) thereof, in that the proposed rule change offers the potential for improving the accuracy,

number in the caption above and should be submitted by December 5, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated

Maritime Administration

Change of Name of Approved Trustee

8½% Treasury Bonds of 2019

VOL 54 ISS 218 NO 14 1989 UMI

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Exchange proposes to conduct a pilot program to test its Pacific Options Exchange Trading System ("POETS"). The Exchange will review POETS to determine the system's effects and capabilities, as well as the benefits to public customers, market makers, floor brokers and member firms. The Exchange expects that the implementation of the options order routing system ("ORS"), the automatic and semi-automatic execution system "(Auto-Ex") the on-line book system ("Auto-Book") and the automatic market quote update system ("Auto-Quote") will have a profound effect on the trading of listed options on the Exchange and will provide substantial benefits to the investing public.

In connection with the Auto-Ex system, the Exchange intends to allow for the automatic execution of small customer market and marketable limit orders in classes of options on individual equity securities. The Options Floor Trading Committee ("OFTC") will be responsible for reviewing the pilot to determine order and market maker eligibility as well as the pilot program effectiveness. The Auto-Ex pilot will commence with providing execution for small customer orders of five contracts just-out-of the money, just-in-the-money and at-the-money option series. Book priority will be in effect at all times. Auto-Ex will also be open only to individual market makers. Groups will not be allowed to participate. However, a market maker may have Auto-Ex trades clear into his joint account. Auto-Ex, along with Auto-Book, is expected to reduce the amount of paper that trading crowds and Exchange order books have to deal with.

The Exchange believes that the rule change is consistent with the purposes and provisions of the Securities Exchange Act of 1934, and in particular section 6(b)(5) thereof, in that the proposed rule change offers the potential for improving the accuracy, reporting and handling of small public customer orders, booked orders and market quotes.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change imposes a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by December 5, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[1]

Dated: November 6, 1989.

Jonathan G. Katz,

Secretary.

BILLING CODE 4810-25-M

Office of the Secretary

[Dept. Cir.—Public Debt Series—No. 32-89]

8½% Treasury Bonds of 2019

Washington, November 2, 1989.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of chapter 31 of title 31, United States Code, invites tenders for approximately $10,000,000,000 of United States securities, designated 8½% Treasury Bonds of 2019 (CUSIP No. 912810 ED 6), hereafter referred to as Bonds. The Bonds will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. Additional amounts of the Bonds may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities.

2. Description of Securities

2.1. The Bonds will be issued November 15, 1989, and are offered as an additional amount of 8½% Treasury Bonds of 2019 (CUSIP No. 912810 ED 6) dated August 15, 1989. Payment for the Bonds will be based on the price equivalent to the bid yield determined in accordance with this circular, plus accrued interest from August 15, 1989, to November 15, 1989. Interest on the Bonds offered as an additional issue is payable on a semiannual basis on February 15, 1990, and each subsequent 6 months on August 15 and February 15 through the date that the principal becomes payable. They will mature August 15, 2019, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Bonds are subject to all taxes imposed under the Internal Revenue Code of 1954. The Bonds are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Bonds will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Bonds will be issued only in book-entry form, and in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. A Bond may be held in its fully constituted form or it may be divided into its separate Principal and Interest Components and maintained as such on the book-entry records of the Federal

prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting

7.4. Attachment A is incorporated as part of this offering circular.

Gerald Murphy,

Fiscal Assistant Secretary.

VOL 54 ISS 218 NO 14 1989 UMI

2.5. A Bond may be held in its fully constituted form or it may be divided into its separate Principal and Interest Components and maintained as such on the book-entry records of the Federal Reserve Banks, acting as fiscal agents of the United States. The provisions specifically applicable to the separation, maintenance, transfer, and reconstitution of Principal and Interest Components are set forth in Section 6 of this circular. Subsections 2.1. through 2.4. of this section are descriptive of Bonds in their fully constituted form; the description of the separate Principal and Interest Components is set forth in Section 6 of this circular.

2.6. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2–86 (31 CFR part 357), apply to the Bonds offered in this circular.

3. Sale Procedure

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239–1500, prior to 1 p.m., Eastern Standard time, Thursday, November 9, 1989. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Wednesday, November 8, 1989, and received no later than Wednesday, November 15, 1989.

3.2. The par amount of Bonds bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan association; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organization in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks. Tenders from all others must be accompanied by full payment for the amount of Bonds applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Competitive tenders at yields higher than 8.81% will not be accepted, because the equivalent prices would fall below the original issue discount limit of 92.750. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Bonds specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the bonds allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted, and must include accrued interest from August 15, 1989, to November 15, 1989, in the amount of $20,31250 per $1,000 of Bonds allotted. Settlement on Bonds allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5. must be made or completed on or before Wednesday, November 15, 1989. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, November 13, 1989. When payment has been submitted with the tender and the purchase price of the Bonds allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Bonds allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Bonds allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the Bond being purchased. In any such case, the tender form is used to place the Bonds allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. Separability of Principal and Interest

6.1. Under the Secretary's STRIPS Program (Separate Trading of Registered Interest and Principal of Securities), a Bond may be divided into its separate components and maintained as such on the book-entry records of the Federal Reserve Banks, acting as Fiscal Agents of the United States. The separate STRIPS components are: Each future semiannual interest payment (referred to as an Interest Component) and the principal payment (referred to as the Principal Component). Each Interest Component and the Principal Component shall have an identifying designation and CUSIP number, which are set forth in attachment A to this circular.

6.2. Attachment A also provides the payable dates for the separate components. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

6.3. For a bond to be separated into the components described in section 6.1., the par amount of the Bond must be in an amount which, based on the stated interest rate of the Bond, will produce a semiannual interest payment of $1,000 or a multiple of $1,000. The minimum par amount required to obtain the separate components for this offering is $320,000. Par amounts than the minimum amount must be in multiples of that amount.

6.4. A Bond may be separated into its components at any time from the issue date until maturity. A request for separation must be made to the Federal Reserve Bank maintaining the account for the Bonds. Once a bond has been separated into its components, the components may be maintained and transferred in multiples of $1,000.

6.5. Interest Components and Principal Components in multiples of $1,000 will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

6.6. Interest and Principal Components of separated securities may be reconstituted, i.e., restored to their fully constituted form, on the book-entry records of the Federal Reserve Banks. A Principal Component and all related unmatured Interest Components, in the appropriate minimum or multiple amounts previously announced, must be submitted together for reconstitution.

6.7. Detached physical interest coupons, coupons held under the CUBES Program, or cash payments may not be substituted for missing Interest or Principal Components. Any reconstitution request which does not comprise all of the necessary STRIPS components in the appropriate amounts will not be accepted.

6.8. The book-entry transfer of each Interest Component and Principal Component included in a reconstitution transaction will be subject to the fee schedule generally applicable to transfers of book-entry Treasury securities.

6.9. Unless otherwise provided in this offering circular, the Department of the Treasury's general regulations governing United States securities apply to the Bonds separated into their components.

7. General Provisions

7.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Bonds.

7.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Bonds. Public announcement of such changes will be promptly provided.

7.3. The Bonds issued under this circular shall be obligations of the United States, whether held in the fully constituted form or as separate Interest and Principal Components, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Bonds.

7.4. Attachment A is incorporated as part of this offering circular.

Gerald Murphy,

Fiscal Assistant Secretary.

CUSIP Nunbers and Designations for the Principal Component and Interest Components of 8⅛% Treasury Bonds of August 15, 2019, CUSIP No. 912810 ED 6

The Principal Component is designated 8⅛% Treasury Principal (TPRN) 2019 due August 15, 2019, CUSIP No. 912803 AR 4.

BILLING CODE 4810–40–M

[Dept. Cir.—Public Debt Series—No. 31–89]

Treasury Notes of November 15, 1999, Series D–1999

Washington, November 2, 1989.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of chapter 31 of title 31, United States Code, invites tenders for approximately $10,000,000,000 of United States securities, designated Treasury Notes of November 15, 1999, Series D–1999 (CUSIP No. 912827 YE 6), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be

determined in the manner described below. Additional amounts of the Notes may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may be issued at the average price to Government accounts and to Federal Reserve Banks as agents for foreign and international monetary authorities.

1.2. The Notes will be issued in bearer form only, and interest will be payable only by mail upon presentation of interest coupons. The Notes will not be issued in registered form. The Notes will not be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes. The Notes will be subject to estate taxes. The Notes will be issued without the privilege of exchange for registered Notes. The Notes will be issued without the privilege of conversion to registered Notes. The Notes will be issued without the privilege of reconversion into the same kind of Notes previously converted from registered Notes. The Notes will be issued without the privilege of exchange for Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2–86 (31 CFR part 357), apply to the Notes offered in this circular.

2. Description of Notes

2.1. The Notes will be dated November 15, 1989, and will bear interest from that date, payable on May 15, 1990, and semiannually thereafter on November 15 and May 15 each year until the principal becomes payable. They will mature November 15, 1999, and will not be subject to call for redemption prior to maturity.

2.2. The Notes will be issued in denominations of $1,000, $5,000, $10,000, $100,000, $1,000,000, and $5,000,000. Book-entry Notes will be available to depository institutions holding Treasury Department book-entry accounts and to others as described in Treasury Department Circular, Public Debt Series, No. 2–86 (31 CFR part 357). Definitive Notes will be available to others.

2.3. The Notes will be subject to the general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2–86 (31 CFR part 357), apply to the Notes offered in this circular.

3. Sale Procedure

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239–1500, prior to 1 p.m., Eastern Standard time, Tuesday, November 14, 1989. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, November 13, 1989, and received no later than Wednesday, November 15, 1989.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan association; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organization in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Competitive tenders at yields higher than 8.81% will not be accepted, because the equivalent prices would fall below the original issue discount limit of 92.750. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made or completed at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted, on or before Wednesday, November 15, 1989. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, November 13, 1989. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the Note being purchased. In any such case, the tender form is used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. Separability of Principal and Interest

6.1. Under the Secretary's STRIPS Programs (Separate Trading of Registered Interest and Principal of Securities), a Note may be divided into its separate components and maintained as such on the book-entry records of the Federal Reserve Banks, acting as Fiscal Agents of the United States. The separate STRIPS components are: Each future semiannual interest payment (referred to as an Interest Component) and the principal payment (referred to as the Principal Component). Each Interest Component and the Principal Component shall have an identifying designation and CUSIP number, which are set forth in attachment A to this circular.

6.2. Attachment A also provides the payable dates for the separate components. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

6.3. For a note to be separated into the components described in section 6.1., the par amount of the Note must be in an amount which, based on the stated interest rate of the Note, will produce a semiannual interest payment of $1,000 or a multiple of $1,000. The minimum par amount required to obtain the separate components for this offering is $320,000. Par amounts than the minimum amount must be in multiples of that amount.

6.4. A Note may be separated into its components at any time from the issue date until maturity. A request for separation must be made to the Federal Reserve Bank maintaining the account for the Notes. Once a note has been separated into its components, the components may be maintained and transferred in multiples of $1,000.

6.5. Interest Components and Principal Components in multiples of $1,000 will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

6.6. Interest and Principal Components of separated securities may be reconstituted, i.e., restored to their fully constituted form, on the book-entry records of the Federal Reserve Banks. A Principal Component and all related unmatured Interest Components, in the appropriate minimum or multiple amounts previously announced, must be submitted together for reconstitution.

6.7. Detached physical interest coupons, coupons held under the CUBES Program, or cash payments may not be substituted for missing Interest or Principal Components. Any reconstitution request which does not comprise all of the necessary STRIPS components in the appropriate amounts will not be accepted.

6.8. The book-entry transfer of each Interest Component and Principal Component included in a reconstitution transaction will be subject to the fee schedule generally applicable to transfers of book-entry Treasury securities.

6.9. Unless otherwise provided in this offering circular, the Department of the Treasury's general regulations governing United States securities apply to the Notes separated into their components.

7. General Provisions

7.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

7.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

7.3. The Notes issued under this circular shall be obligations of the United States, whether held in the fully constituted form or as separate Interest and Principal Components, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

7.4. Attachment A is incorporated as part of this offering circular.

Gerald Murphy,

Fiscal Assistant Secretary.

CUSIP Numbers and Designations for the Principal Component and Interest Components of 8¼% Treasury Notes of November 15, 1999, CUSIP No. 912827 YE 6

The Principal Component is designated 8¼% Treasury Principal (TPRN) 1999 due November 15, 1999, CUSIP No. 912803 AS 2.

BILLING CODE 4810–40–M

VOL 54 ISS 218 NOV 14 1989 UMI

determined in the manner described below. Additional amounts of the Notes may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated November 15, 1989, and will accrue interest from that date, payable on a semiannual basis on May 15, 1990, and each subsequent 6 months on November 15, and May 15 through the date that the principal becomes payable. They will mature November 15, 1989, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. A Note may be held in its fully constituted form or it may be divided into its separate Principal and Interest Components and maintained as such on the book-entry records of the Federal Reserve Banks, acting as fiscal agents of the United States. The provisions specifically applicable to the separation, maintenance, transfer, and reconstitution of Principal and Interest Components are set forth in section 6 of this circular. Subsections 2.1. through 2.4. of this section are descriptive of Notes in their fully constituted form; the description of the separate Principal and Interest components is set forth in section 6 of this circular.

2.6. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2-86 (31 CFR part 357), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239 1500, prior to 1 p.m., Eastern Standard time, Wednesday, November 8, 1989. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, November 7, 1989, and received no later than Wednesday, November 15, 1989.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 97.500. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determination of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes alloted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5. must be made or completed on or before Wednesday, November 15, 1989. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, November 13, 1989. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder."

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the Note being purchased. In any such case, the tender form used to place the Notes alloted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. Separability of Principal and Interest

6.1. Under the Treasury's STRIPS Programs (Separate Trading of Registered Interest and Principal of Securities), a Note may be divided into its separate components and maintained as such on the book-entry records of the Federal Reserve Banks, acting as Fiscal Agents of the United States. The separate STRIPS components are: each future semiannual interest payment (referred to as an Interest Component) and the principal payment (referred to as the Principal Component). Each Interest Component and the Principal Component shall have an identifying designation and CUSIP number, which are set forth in attachment A to this circular.

6.2. Attachment A also provides the payable dates for the separate components. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

6.3. For a Note to be separated into the components described in section 6.1., the par amount of the Note must be in an amount which, based on the stated interest rate of the Note, will produce a semiannual interest payment of $1,000 or a multiple of $1,000. Attachment B to this circular provides the minimum par amounts required to separate a security at various interest rates, as well as the interest payments corresponding to those minimum par amounts. Par amounts greater than the minimum amount must be in multiples of that amount. The minimum par amount for this offering will be provided in the public announcement of the amount and yield range of accepted bids.

6.4. A Note may be separated into its components at any time from the issue date until maturity. A request for separation must be made to the Federal Reserve Bank maintaining the account for the Notes: Once a Note has been separated into its components, the components may be maintained and transferred in multiples of $1,000.

6.5. Interest Components and Principal Components in multiples of $1,000 will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

6.6. Interest and Principal Components of separated securities may be reconstituted, i.e., restored to their fully constituted form, on the book-entry records of the Federal Reserve Banks. A Principal Component and all related unmatured Interest Components, in the appropriate minimum or multiple amounts previously announced, must be submitted together for reconstitution.

6.7. Detached physical interest coupons, coupons held under the CUBES Program, or cash payments may not be substituted for missing Interest or Principal Components. Any reconstitution request which does not comprise all of the necessary STRIPS components in the appropriate amounts will not be accepted.

6.8. The book-entry transfer of each Interest Component and Principal Component included in a reconstruction transaction will be subject to the fee schedule generally applicable to transfers of book-entry Treasury securities.

6.9. Unless otherwise provided in this offering circular, the Department of the Treasury's general regulations governing United States securities apply to the Notes separated into their components.

7. General Provisions

7.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

7.2. The Secretary of the Treasury may, at any time, supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

7.3. The Notes issued under this circular shall be obligations of the United States, whether held in the fully constituted form or as separate Interest and Principal Components, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

7.4. Attachments A and B are incorporated as part of this circular.

Gerald Murphy,

Fiscal Assistant Secretary.

BILLING CODE 4810-40-C

VOL 54 ISS 218 NO 14 1989 UMI

[Dept. Circ.—Public Debt Series—No. 30-89]

Treasury Notes of November 15, 1992, Series U-1992

Washington, November 2, 1989.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $10,000,000,000 of United States securities, designated Treasury Notes of November 15, 1992, Series U-1992 (CUSIP No. 912827 YD 8), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate of the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated November 15, 1989, and will accrue interest from that date, payable on a semiannual basis on May 15, 1990, and each subsequent 6 months on November 15 and May 15 through the date that the principal becomes payable. They will mature November 15, 1992, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2 The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $5,000, $10,000, $100,000, and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5 The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2-86 (31 CFR part 357), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239-1500, prior to 1 p.m., Eastern Standard time, Tuesday, November 7, 1989. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, November 6, 1989, and received no later than Wednesday, November 15, 1989.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3 A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.250. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5. must be made or completed on or before Wednesday, November 15, 1989. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, November 13, 1989. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forefeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration or the note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may, at any time, supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

VOL 54 ISS 218 NO 14 1989 UMI

Sunshine Act Meetings

Federal Register
Vol. 54, No. 218
Tuesday, November 14, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 3:28 p.m. on Tuesday, November 7, 1989, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following:

Request of Putnam Fiduciary Trust Company (formerly Marsh & McLennan Trust Company), Boston, Massachusetts, for rescission of certain conditions imposed in granting Federal deposit insurance and trust powers.

Recommendations regarding the liquidation of a depository institution's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. FL-89-0016
American Diversified Savings Bank, Costa Mesa, California
Case No. FL-89-0021
American Diversified Savings Bank, Costa Mesa, California
Case No. FL-89-0024
Southwest Savings and Loan, Abilene, Texas
Matters relating to the possible closing of certain insured banks.
Matters relating to the Corporation's corporate activities.
Administrative enforcement proceedings.

In calling the meeting, the Board determined, on motion of Director Robert L. Clarke (Comptroller of the Currency), seconded by Director M. Danny Wall (Director of the Office of Thrift Supervision), concurred in by Chairman L. William Seidman, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Dated: November 8, 1989.
Federal Deposit Insurance Corporation.
Robert E. Feldman,
Deputy Executive Secretary.

BILLING CODE 7590-01-M

POSTAL SERVICE BOARD OF GOVERNORS

Notice of Vote To Close Meeting

At its meeting on November 6, 1989, the Board of Governors of the United States Postal Service voted unanimously to close to public observation its meeting scheduled for December 4, 1989, in Phoenix, Arizona. The members will discuss preparations for the rate case filing.

The meeting is expected to be attended by the following persons: Governors Alvarado, del Junco, Griesemer, Hall, Mackie, Nevin, Pace, Ryan, and Setrakian; Postmaster General Frank, Deputy Postmaster General Coughlin, Secretary to the Board Harris, and General Counsel Cox.

The Board determined that pursuant to section 552b(c)(3) of title 5, United States Code, and section 7.3(c) of title 39, Code of Federal Regulations, discussion of this matter is exempt from the open meeting requirement of the Government in the Sunshine Act, [5 U.S.C. 552b(b)], because it is likely to disclose information in connection with proceedings under chapter 36 of title 39 (having to do with postal ratemaking, mail classification and changes in postal services), which is specifically exempted from disclosure by section 410(c)(4) of title 39, United States Code.

The Board has determined further that pursuant to section 552b(c)(10) of title 5, United States Code, and section 7.3(j) of title 39, Code of Federal Regulations, the discussion is exempt because it is likely to specifically concern the participation of the Postal Service in a civil action or proceeding or the litigation of a particular case involving a determination on the record after opportunity for a hearing. The Board further determined that the public interest does not require that the Board's discussion of this matter be open to the public.

In accordance with section 552b(f)(1) of title 5, United States Code, and section 7.6(a) of title 39, Code of Federal Regulations, the General Counsel of the

VOL 54 ISS 218 NOV 14 1989 UMI

United States Postal Service has certified that in his opinion the meeting may properly be closed to public observation pursuant to section 552b(c)(3) and (10) of title 5, United States Code; section 410(c)(4) of title 39, United States Code; and section 7.3(c) and (j) of title 39, Code of Federal Regulations.

Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 268-4800.

David F. Harris,

Secretary.

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 171, 172, 173, 174, 175, 176, 177, and 178

[Docket No. HM-169A; Notice No. 89-8]

RIN 2137-AB50

Transportation Regulations; Compatibility With Regulations of the International Atomic Energy Agency

AGENCY: Research and Special Programs Administration (RSPA), Department of Transportation (DOT).

ACTION: Notice of proposed rule (NPRM).

SUMMARY: This notice proposes to amend the Hazardous Materials Regulations (HMR) concerning radioactive material to make them compatible with those of the International Atomic Energy Agency (IAEA) and thus with those of most major nuclear nations of the world. Although several substantive changes are proposed to provide a more uniform degree of safety for various types of shipments, the basic standards for packaging radioactive material remain unchanged. The intended effect of this rulemaking is to increase the level of safety and facilitate international commerce as it relates to the transportation of radioactive materials. On June 8, 1988, the U.S. Nuclear Regulatory Commission (USNRC) published a corresponding proposed rule change (53 FR 21550) to its transportation regulations found in 10 CFR part 71.

DATES: Comments must be received on or before February 9, 1990.

ADDRESSES: Address comments to Dockets Unit, Office of Hazardous Materials Transportation, (DHM-30), U.S. Department of Transportation, Washington, DC 20590. Comments should be submitted, when possible, in five copies and should identify the docket. Persons wishing to receive confirmation of receipt of their comments should include a self-addressed stamped postcard. The Docket Unit is located in Room 8421 of the Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Office hours are 8:30 a.m. to 5:00 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Michael E. Wangler, Chief, Radioactive Materials Branch, Technical Division, Office of Hazardous Materials Transportation, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-4545.

SUPPLEMENTARY INFORMATION:

I. Background

In 1958, at the request of the Economic and Social Council of the United Nations, the IAEA undertook the development of international regulations for the safe transportation of radioactive materials. The initial regulations published by the IAEA in 1961 were recommended to member states as the basis for national regulations and for application to international transportation. As a result of extensive revision in 1963 and 1964, and further effort in 1966, a version of the IAEA "Regulations for Safe Transport of Radioactive Materials, Safety Series No. 6" was published in 1967. The IAEA regulations have since been adopted generally by most nations of the world as a basis for their own national regulations governing the transportation of radioactive materials.

Since 1966, the U.S. Nuclear Regulatory Commission (USNRC) (formerly the Atomic Energy Commission (AEC)) has issued regulations which are substantially in conformance with IAEA standards for fissile radioactive materials and large quantities of radioactive materials. In October 1968 the Hazardous Materials Regulation Board of DOT published amendments which were also in substantial conformance with the 1967 IAEA standards (Docket HM-2, 33 FR 14918).

In February 1969, recognizing that the international standards should be revised from time to time on the basis of scientific and technical advances, as well as accumulated experience in their application, the IAEA invited its member states to submit comments and suggested changes to the regulations. Other goals of this IAEA procedure were to remove any ambiguities and to simplify the presentation of the text of the regulations.

Within the U.S., comments and suggested revisions to the IAEA regulations were collected by DOT from the AEC, the American National Standards Institute (ANSI), the Atomic Industrial Forum and others. As a result of that effort, a compilation of approximately 40 comments was forwarded by DOT to the IAEA in July 1969. Some of those suggested changes were intended to more closely align U.S. regulations with the IAEA regulations.

In 1970 the IAEA convened a panel of experts to review the regulations and consider the comments which had been submitted by member states. As a result of this review panel's efforts and additional revisions, the Director General of the IAEA (Director General) transmitted a third revision draft to all IAEA member states and to interested international organizations.

In January 1971, the Office of Hazardous Materials of the DOT published a public notice (36 FR 1280) in the form of a "Request for Public Advice on Revisions of International Regulations." Interested persons thereby were informed of the issuance and availability of this third revised draft, identified as IAEA Document No. PL-383, entitled "Regulations for the Safe Transport of Radioactive Materials, Third Revised Draft, November 1970".

In cooperation with the AEC, the DOT solicited comments on this third draft. Copies were distributed to all AEC operating contractors, as well as the Atomic Industrial Forum and ANSI Subcommittee N14 (Transportation of Fissile and Radioactive Materials) for redistribution to their members and other interested persons. Formal U.S. comments on the third draft were forwarded by DOT to the IAEA through the Department of State.

A final Review Panel of experts was convened by the IAEA in October 1971, to finalize the revisions. As a result of that Panel, the IAEA subsequently issued its "Safety Series No. 6, Regulations for the Safe Transport of Radioactive Materials 1973 Revised Edition," in late 1973. Subsequent to the issuance of the 1973 Edition of IAEA Safety Series No. 6, the IAEA convened another Review Panel in December 1974. The purpose of this Panel was to consider any minor inconsistencies, omissions or errors that were revealed in the course of national and international applications to the IAEA's 1973 Revised Standards, and to recommend, among other things, any changes in details that should be made in the regulations under the established procedures of the IAEA Board of Governors.

As a result of the 1974 Review Panel work, the IAEA developed a list of minor drafting changes to the 1973 Revised Edition of Safety Series No. 6, which became effective in May 1975, as well as a list of substantive proposed changes under the "90-day" amendment procedure. These latter changes were adopted in 1977 by the IAEA.

At its first meeting in October 1978, IAEA's Standing Advisory Group for the Safe Transport of Radioactive Materials (SAGSTRAM), established by the Director General in October 1977, reviewed and recommended a small number of additional amendments, some

of which slightly modified the changes issued by the IAEA in 1977. The recommendations of SAGSTRAM were subsequently published by the Director General as the "1973 Revised Edition, As Amended."

On March 10, 1983, RSPA published Docket HM-169 (48 FR 10218), which revised the HMR relating to the transportation of radioactive materials. That revision, in combination with a parallel revision of 10 CFR part 71 administered by the USNRC, brought United States domestic transport safety regulations at the Federal level in accord with relevant portions of the IAEA design and performance requirements to the extent considered feasible. This action made U.S. regulations compatible with the domestic regulations of most of the international community.

At the time of the 1971 Review Panel, a decision was made that periodic review of Safety Series No. 6 should be carried out at intervals of about 10 years to assure that the requirements were kept current. As a result, a review was initiated in 1979 to fulfill this commitment for periodic evaluation.

As in the past, the IAEA solicited comments and proposals for changes from member states and international organizations. Based on more than 200 pages of comments, the IAEA convened a Review Panel for the comprehensive review of Safety Series No. 6 considering changes in transport conditions and methods used for shipping radioactive materials. The Review Panel was again composed of the major countries involved in radioactive material transportation. The Review Panel was asked to strike a balance between keeping the regulations reasonably the same for continuity and ease of application and making necessary changes as a result of experience gained in their application. Two additional panel meetings produced a draft document that was issued in 1985 by the IAEA as the "1985 Edition" of Safety Series No. 6. Minor changes to the 1985 edition were made in 1986. Docket HM-169 was written to incorporate, to the extent possible, some of the changes anticipated in the 1985 version of Safety Series No. 6.

At its Fifth Meeting in 1986 SAGSTRAM recommended that Safety Series No. 6 undergo revision every ten years for major changes, and that minor changes and changes of detail be made at two-year intervals to ensure that it remains current with technology and needs. Minor changes are promulgated by the Director General without specific member state acceptance; changes of detail are subject to the "90 day" rule in which members states are given the opportunity to submit their acceptance or rejection of individual changes of detail. These recommendations were accepted by the Director General.

To initiate the revision process, the IAEA in 1986 again solicited comments and proposals for changes to the regulations and to its supporting documents. A Technical Committee was convened in 1987 to review the member state submittals, to determine which submittals warranted consideration and to assign each submittal to the appropriate category of change. Given the recommendations of this Technical Committee, the Director General promulgated the minor changes and submitted the changes of detail under the "90 day" rule. The changes were accepted by the member states and were published as "Supplement 1988" to the 1985 edition of Safety Series No. 6.

This notice proposes to revise the HMR, as it relates to the transportation of radioactive materials, so that it is in essential conformance with the 1985 edition of Safety Series No. 6 and the Supplement 1988. These revisions to the HMR are necessary to allow for the international transportation of radioactive materials to and from the United States.

II. Discussion of Changes

While this notice proposes an extensive revision of that portion of the regulations dealing with the transportation of radioactive materials, the majority of the changes are not substantive in nature. Many changes involve revision of section and paragraph numbers and their references and the use of the International System of Units (SI units) for radiological measurements where appropriate. In addition, a few sections are proposed to be rewritten to provide clarity without changing their subject matter. Although not all of subpart I of part 173 of 49 CFR, entitled "Radioactive Materials", has been proposed to be changed, it has been reprinted in its entirety for ease of understanding. Substantive changes are discussed in the following paragraphs.

Radiation Protection

On January 27, 1987, the Environmental Protection Agency (EPA) published a document titled, "Radiation Protection Guidance to Federal Agencies for Occupational Exposure: Recommendations Approved by the President." This document updated radiation guidance to Federal agencies. The recommendations are provided to Federal agencies to enable them to revise or develop detailed standards and regulations in those areas for which they have regulatory or administrative jurisdiction. As the lead Federal agency in this area, the EPA will monitor Federal agency compliance with the recommendations, will provide clarification and interpretation, as appropriate, to reflect new information, and will promote the necessary coordination to achieve an effective Federal program of worker protection.

Among its recommendations, the EPA specifies that no exposure should occur unless an overall benefit will be derived from the activity causing the exposure; that radiation dose should be maintained as low as it is reasonably achievable (ALARA); that the annual effective dose equivalent be limited to 50 milliSieverts (5 rems) to the whole body, 150 milliSieverts (15 rems) to lens of the eye, and 500 milliSieverts (50 rems) to any other organ, tissue or extremity of the body; that occupation exposure for individuals under the age of 18 not exceed 1/10 of values recommended for radiation workers; and that the dose equivalent to an unborn child as a result of the occupational exposure of a woman who has declared herself to be pregnant should not exceed 5 milliSieverts (500 millirems) during the entire gestation period. Since this proposal only summarizes EPA's recommendations, the full text should be obtained from EPA for study.

RSPA proposes to incorporate the EPA recommendations into the HMR. The HMR would incorporate the EPA document by reference, would require that an ALARA program be established, and would limit radiation exposures to those specified in the EPA recommendations. The HMR would also provide for a three-tier approach for developing a radiation protection program to monitor the dose to any worker exposed to radiation for meeting the recommendations of the EPA guidance. For annual effective dose equivalents not exceeding 5 milliSieverts (500 millirems), a shipper or carrier would not be required to provide any detailed monitoring program for the workers. However, the shipper or carrier would be responsible for periodically evaluating operations to ensure that no activity would cause an annual dose to exceed 5 milliSieverts (500 millirems). For operations which will cause an annual dose of between 5 milliSieverts (500 millirems) and 15 milliSieverts (1.5 rems), the shipper or carrier would be required to perform periodic assessments of radiation exposure levels for each worker in this range to determine if controls to limit exposure should be implemented or if

constant personnel exposure monitoring is required. For operations which will cause an annual dose of between 15 milliSieverts (1.5 rems) and 50

inherently radioactive but is superficially contaminated. Not every conceivable type of radioactive material that is removed from a facility during

A new type of package, called the "industrial package", is being proposed for the handling of low specific activity material (LSA) and surface

type needed to transport radioactive materials. The A_1 and A_2 values are the maximum quantities of a particular radionuclide permitted in Type A

Classification of Fissile Material

constant personnel exposure monitoring is required. For operations which will cause an annual dose of between 15 milliSieverts (1.5 rems) and 50 milliSieverts (5 rems), a radiation exposure monitoring program for each individual would be implemented. Programs would be able to satisfy this latter requirement through the issuance and monitoring of individual personnel exposure devices on a monthly or quarterly basis.

The promulgation of a radiation protection program will bring the HMR in line with other Federal agencies which control the radiation exposure of occupationally exposed individuals. For example, under the Atomic Energy Act of 1954, as amended, the USNRC limits the radiation exposure of individuals who are employed by its licensees. Similarly, the Department of Energy under this same Act conducts a radiation protection program for its employees meeting the requirements of the Federal guidance.

General Design Requirements for All Packages

As proposed, certain packagings used for the transportation of radioactive materials would be required to have greater integrity. Excepted packages are currently required to meet the requirements only for a strong, tight package. Under the proposal, all packages of radioactive materials, including excepted packages, would be required to meet general design requirements prescribed in § 173.410. These packages would be required to be designed for ease of handling and proper restraint during shipment. They would be required to be free of protuberances and easily decontaminated. They would be required to be capable of withstanding the effects of vibration during transport. They also would be required to meet reduced pressure and temperature requirements. Minimum design requirements for excepted packages will increase the overall integrity of the packages.

Low Specific Activity Material and Surface Contaminated Objects

The IAEA has been working to update its requirements for shipment of low specific activity material (LSA) to provide for the transportation of irradiated and contaminated parts and equipment from decommissioned nuclear plants. The IAEA adopted a new designation for radioactive material called surface contaminated object (SCO). Unlike LSA, which requires a uniform distribution of radioactive material within the material, SCO is not inherently radioactive but is superficially contaminated. Not every conceivable type of radioactive material that is removed from a facility during the decommissioning process will be covered by this proposal. New materials can be added to the SCO definition as needed. RSPA and USNRC concur with the IAEA in recognizing the need to issue regulations for the transportation of this specific type of material.

New LSA and SCO regulations consist of the following:

1. An expansion of the LSA definition to include new types of material;
2. A new definition of "surface contaminated object" (SCO) which is treated in a manner similar to LSA material; and
3. An increase of specific activity limits for nondispersible, nonrespirable forms of LSA material while at the same time limiting the quantity of LSA material which can be shipped in other than a Type B package. The package quantity limit is intended to limit external radiation levels produced as a result of shielding loss in a transportation accident.
